My best judgment is that the Senator from Oregon did the housing industry and the private industry a disservice by his remarks. I think those who sent him telegrams would agree that the philosophy he expounded—namely, to have the Federal Government finance the houses at par—and other remarks he made constituted a disservice to the private industry of America. So far, the building industry has been handled by private industry and private enterprise. My best judgment is that the last thing in the world the home builders of America want and the last thing in the world the sawmills of Oregon and the businessmen of Oregon want is to have the Federal Government take over all financing and the handling of all the home building in America.

Mr. HUMPHREY. Mr. President, it is my intention to make some remarks tomorrow concerning the housing bill. I hope my good friends, the Senator from Oregon and the Senator from Indiana, will be here at that time.

FORESTRY RESEARCH FUNDS

Mr. MORSE. Mr. President, I have received a telegram from W. F. McCullough, of the School of Forestry, Oregon State College, which reads:

Urge restoration House cuts agricultural research budget. Oregon needs research.

I wish to say to Mr. McCullough, through the RECORD today, that I am calling his telegram and the problem it involves to the attention of the appropriate subcommittee of the Committee on Appropriations with a very strong recommendation that the cut be restored by the Senate. I completely agree with this great forester of Oregon that it would be false economy to seek to economize at the expense of forestry research, because sound forestry research, as I have pointed out many times in the past in speeches on the floor of the Senate, has returned to the Treasury of the United States hundreds and thousands of times the cost of the research through the great savings which have been made as a result of the research in Federal forests.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting a nomination was communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The PRESIDING OFFICER (Mr. CLARK in the chair) laid before the Senate a message from the President of the United States submitting the nomination of Andrew Downey Orrick, of California, to be a member of the Securities and Exchange Commission for the term expiring June 5, 1962, which was referred to the Committee on Banking and Currency.

EXCESSIVE FEDERAL CONSTRUCTION COST IN OREGON

Mr. MORSE. Mr. President, I wish to read into the RECORD a part of the latest Market Letter, dated May 23, 1957, published by a great leader in the lumber industry in my State—Herbert J. Cox, of Eugene, Oreg. Mr. Cox is the editor of this market letter for the lumber industry. He calls attention to a very interesting and specific instance of a failure, it seems to me, on the part of governmental agencies to realize that Eugene, Oreg., at the present time is probably the lumber capital of the Nation. Mr. Cox has this interesting note in his Market Letter of May 23, 1957:

A local contractor is the low bidder at $246,000, basic-plus additives, for construction of a United States Army Reserve Training Building at Eugene, according to the Army Corps of Engineers, Seattle district. This work involves construction of an 11,500 square feet, 1-story building with concrete slab on grade, concrete walls with brick facing, open-web steel roof joists, metal roof decking, insulation, and built-up roofing. Not one piece of lumber to be used for a one-story building in the center of the forest products industry.

I'm not a contractor, but according to reliable builders, $246,000 for 11,500 square feet ($21.35 per square foot) is a wanton waste of taxpayers' money. Undoubtedly, this is an example of what President Eisenhower's budget contains and indicates he does not know what he is talking about in claiming his budget cannot be cut.

While conceding that taxes cannot be reduced now, nevertheless, there is no reason why Government spending cannot be curtailed and value received for each dollar spent. Probably Government spendthrifts, rather than "tight money" are responsible for loss of public confidence and the national slowdown in business and industry.

DOMINIC PAUL STEINHAUSER (HIROSHI TSURUDA)

Mr. HUMPHREY. Mr. President, I ask that the Chair lay before the Senate the amendment of the House of Representatives to the bill (S. 93).

The PRESIDING OFFICER (Mr. SPARKMAN in the chair) laid before the Senate the amendment of the House of Representatives to the bill (S. 93) for the relief of Dominic Paul Steinhauser (Hiroshi Tsuruda), which was, on page 2, line 8, after "That" insert ", unless the beneficiary is entitled to medical care under the Dependents' Medical Care Act (70 Stat. 250)."

Mr. HUMPHREY. Mr. President, on March 25, 1957, the Senate passed S. 93, to grant to the minor adopted child of citizens of the United States the status of a nonquota immigrant, and to waive the excluding provision of existing law relating to those afflicted with tuberculosis in behalf of the child. The bill provided for the posting of a bond as a guaranty that the beneficiary will not become a public charge.

On April 17, 1957, the House of Representatives passed S. 93 with an amendment which would provide that a bond be posted only if the beneficiary is not eligible for medical care under the Dependents' Medical Care Act of the 84th Congress.

The amendment is in accordance with a recently adopted policy concerning cases of this kind.

I move that the Senate concur in the House amendment to S. 93.

The motion was agreed to.

STYLIANOS LECOMPLES

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 687) for the relief of Stylianos Lecomples, which was, to strike out all after the enacting clause and insert:

That, notwithstanding the provision of section 212 (a) (9) of the Immigration and Nationality Act, Stylianos Lecomples may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this act.

Mr. HUMPHREY. Mr. President, on March 8, 1957, the Senate passed S. 687, to grant the status of permanent residence in the United States to the beneficiary. On April 17, 1957, the House of Representatives passed S. 687, with an amendment to grant a waiver of the grounds of inadmissibility in behalf of the beneficiary. By departing from the United States, the beneficiary will be able to qualify for a nonquota visa to reenter the United States for permanent residence, as the spouse of a United States citizen.

The amendment is acceptable, and is in accordance with the recent policy in connection with cases of this kind. I move that the Senate concur in the House amendment to S. 687.

The motion was agreed to.

ALECOS MARKOS KARAVASILIS AND HIS WIFE STELIANI KARAVASILIS

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 696) for the relief of Alecos Markos Karavasilis and his wife, Steliani Karavasilis, which was, to strike out all after the enacting clause and insert:

That the Attorney General is authorized and directed to cancel any outstanding orders and warrants of deportation, warrants of arrest, and bonds, which may have issued in the cases of Alecos Markos Karavasilis and Steliani Karavasilis. From and after the date of the enactment of this act, the said Alecos Marcos Karavasilis and Steliani Karavasilis shall not again be subject to deportation by reason of the same facts upon which such deportation proceedings were commenced or any such warrants and orders have issued.

Mr. HUMPHREY. Mr. President, on March 25, 1957, the Senate passed S. 696, to grant the status of permanent residence in the United States to the beneficiaries. On April 17, 1957, the House of Representatives passed S. 696, with an

amendment to provide only for cancellation of outstanding deportation proceedings, which will accomplish the desired effect in providing relief from deportation.

The amendment is acceptable, as I understand. I move that the Senate concur in the House amendment to S. 696.

The motion was agreed to.

JOHN LEARY

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 797) for the relief of John Leary, which was, to strike out all after the enacting clause and insert:

That the Attorney General is authorized and directed to cancel any outstanding order and warrant of deportation, warrant of arrest, and bonds, which may have issued in the case of John Leary. From and after the date of the enactment of this act, the said John Leary shall not again be subject to deportation by reason of the same facts upon which such deportation proceedings were commenced or any such warrants and orders have issued: *Provided*, That nothing in this act shall be construed to waive the provisions of section 315 of the Immigration and Nationality Act.

Mr. HUMPHREY. Mr. President, on March 8, 1957, the Senate passed S. 797, to grant the status of permanent residence in the United States to the beneficiary. On April 17, 1957, the House of Representatives passed S. 797, with an amendment to provide for cancellation of outstanding deportation proceedings, and to provide specifically that the beneficiary will be unable to qualify for United States citizenship for the reason that he filed an application for relief from training and service in the Armed Forces.

The language of the Senate bill accomplished the same effect of merely permitting the beneficiary to remain in the United States to provide for his United States citizen wife and children. However, in consultation with committee members, the language of the amendment has been found to be acceptable. I move that the Senate concur in the House amendment to S. 797.

The motion was agreed to.

NEWSLETTERS ON SENATOR HUMPHREY'S TRIP TO THE MIDDLE EAST

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a number of newsletters I prepared during my recent trip into the Middle East. The letters discuss the purpose and objective of the journey, and include observations—made en route—relating to our foreign policy, particularly our food policy.

There being no objection, the newsletters were ordered to be printed in the RECORD, as follows:

NEWSLETTER OF SENATOR HUBERT H. HUMPHREY, WEEK ENDING APRIL 26, 1957

MIDDLE EAST TRIP

As chairman of the Senate's Subcommittee on the Near East, we are making a quick trip through troubled areas of the Middle East on behalf of the Senate Foreign Relations Committee. It will provide an opportunity to confer personally with heads of state or foreign policy officials in Egypt, Israel, Lebanon, and other areas, as well as with our Ambassadors and military officials in the Mediterranean. Such discussions will be extremely helpful in considering the foreign aid program coming before the Senate on my return. My itinerary will include Italy, Egypt, Lebanon, Israel, Greece, and Spain.

FARM EXPORTS

In addition to looking into our international relations generally, I am doubling up on assignments by using the trip for a study of opportunities for additional exports of farm commodities, particularly under the Public Law 480 program of sale for foreign currencies and barter. Detailed hearings on administration of this program will be held under my chairmanship upon my return. Spain offers an example where American food products were used to finance construction of all our military installations. I want to see if more of this can not be done in other areas of the Middle East.

FOOD RESERVES

While in Rome I will be conferring with officials of the U. N.'s Food and Agricultural Organization regarding implementation of the proposal I made earlier this year in the General Assembly of the United Nations, for international cooperation toward establishing National Food Reserves in food-deficit or famine areas. The U. N. went on record approving the idea and referred it to FAO for further action. If properly persued, it offers another opportunity for making wiser use of our country's food abundance. During the trip I also intend to look into opportunities for using foreign currencies obtained from sale of farm products for expanding our student exchange programs, giving more American youths an opportunity for visits abroad and bringing more young people from other countries into the United States to learn more about our way of life.

DEFENSE PROBLEM

Another mission of the trip to the Mediterranean will be to discuss with our military representatives in the area their problems of backing up our extensive commitments in the Near East and southern Europe. The recent announcement of the British cutbacks in conventional armed forces, for example, poses serious questions for our own forces. They will have increased responsibility now for backing up the Eisenhower Doctrine, and other commitments which we have made to the Baghdad Pact nations along the southern perimeter of the Soviet Union.

NEWSLETTER OF SENATOR HUBERT H. HUMPHREY, WEEK ENDING MAY 3, 1957

DATELINE ROME

It is a strange and wonderful experience to fly in a little over 10 hours from the banks of the Potomac in Washington—the center of power in the world today—to the banks of the Tiber where Rome 20 centuries ago was the power of the ancient Mediterranean world. Here in Rome and Naples today are the NATO commanders with the heavy responsibilities of defending the free world in Southern Europe and the Middle East. This weekend, before flying on into the center of dissention and confusion which is the Middle East, I hope to find the answers to many technical questions involving the security of this vital area.

COMMITMENTS AND CAPABILITIES

We have commitments to friendly nations around the world—treaties and agreements and pacts which have put us on record to come to their defense in the event of Soviet aggression. In the Mediterranean area, not only have we firm commitments to our NATO allies in southern Europe—to Italy, Greece, and Turkey, but we also have a new commitment to the nations of the so-called Baghdad pact—Iran, Iraq, Pakistan, and Turkey. Turkey is also covered by our NATO commitment and Pakistan by SEATO. In addition, under the vague and uncertain program known as the Eisenhower doctrine, we are apparently in the process of making new commitments to Arab nations not covered by previous formal agreements. Complicating this already complicated picture is the startling news of Britain's new look in defense spending, involving a severe cutback in her conventional armed services and increasing reliance on nuclear weapons and missiles. For over a generation, British ships and British infantry have been present in the Middle East to back up the extensive British commitments which we have now so largely taken over. A very large question indeed is whether the United States has the present military capabilities in the Mediterranean area to back up our commitments. That is why my first stop on this information-gathering swing through the Mediterranean area is at the Rome and Naples headquarters to discuss with the NATO commander for Southern Europe, and with the commander of the Navy's 6th Fleet of ships and Marines, the question of whether we have enough men and hardware to back up our foreign policy in this area.

SOME POINTED QUESTIONS

There are many vital questions involved within the broader question of whether we are physically prepared to back up our friends in the Mediterranean area. For example, how much can we rely on the U. N. emergency force? How much actual help could we get from the British and the French forces in the area? What effect does Egyptian control of the Suez Canal have upon our defense plans in the Middle East? These and many more questions demand realistic answers, if we are to develop a sound and workable policy in the Middle East.

MILITARY FORCES AREN'T EVERYTHING

Following my conferences with the military commanders this weekend, I shall be on my way to the Middle East itself to talk with leaders of both Arabs and Israelis, and to explore with these leaders ideas for positive American assistance to remove the danger of new Arab-Israeli warfare. Economic and social considerations in the long run will be decisive in the Middle East. Our military forces and those of our allies are only the shield which can permit us to go to work in a constructive way to help build a stable and durable relationship among the peoples of this tense and critical area. I am particularly interested in exploring next week the proposal I made last year at the United Nations for a Middle East Development Authority—a regional approach to the severe economic problems of the area which would join Mideastern ideas and resources with Western assistance.

NEWSLETTER OF SENATOR HUBERT H. HUMPHREY, WEEK ENDING MAY 10, 1957

ENROUTE TO CAIRO

As this is written, we are enroute to Cairo, where I shall visit with Egyptian Premier Gamal Nasser, beginning at 2-week series of discussions with Near Eastern leaders. Based on my first round of discussions in Italy, the upcoming meetings will be of material assistance to me as chairman of the Senate's Subcommittee on the Near East, as the Senate focusses its attention late this month on this very critical area.

OUR ITALIAN ALLY

I was agreeably impressed during my 3 days in Italy, by the rising standard of living, by the Italian Government's genuine efforts at land reclamation, irrigation and land reform in southern Italy, and by the extent of Italy's growing contribution to NATO

strength in southern Europe. The top Italian officials with whom I talked were deeply conscious of their nation's responsibilities as a partner in NATO, and reflected pride in their nation's efforts to put itself back on its feet. I saw a great deal of new construction and evidence of efficient and well-planned government in both Rome and Naples. Our Ambassador to Italy, James D. Zellerbach and his staff of dedicated career Foreign Service officers, I want to report, are doing a good job, as is the United States Information Service headquarters in Rome.

HIGH DRAMA

Not 24 hours after our arrival in Rome, the United States Sixth Fleet suddenly weighed anchor from its ports in Italy and southern France and swept down the coast of Italy toward the eastern Mediterranean hotspot. Our plans to go aboard the giant carrier *Forrestal* to visit with the Sixth Fleet Commander had to be postponed until later, for the Fleet was on its way too fast and too far. The effectiveness of this Fleet movement at the height of the Jordanian crisis was a dramatic demonstration of the fact that our Nation, with its many and varying foreign policy commitments, must continue to maintain a defense structure in which flexible "conventional forces" are available. Meeting at Naples, we had a valuable and detailed discussion with the capable Commander in Chief of Allied Forces, Southern Europe, American Adm. Robert Briscoe, about some of the key problems involving the defense against Soviet aggression in the Mediterranean area.

FOOD

While in Italy we also met with Food and Agriculture Organization officials and with Italian government officials to discuss the workings of Public Law 480, the program to dispose of American agricultural commodities abroad in constructive ways. Over and over again, I heard that the work of the churches and voluntary agencies in making American foodstuffs available in Italy has done more to combat communism in Italy than any other single factor. I also learned that the Italians are very anxious that a pound of shortening and a pound of oils should be included in the relief packages. I intend to follow this up with the Agriculture Department in Washington later this month.

MEETING AT THE VATICAN

Just before leaving Italy I had the inspiring experience of meeting personally with his Holiness, Pope Pius XII, in the center of the magnificent basilica of St. Peter's. Surrounded by literally thousands of people jamming the cathedral, the Pontiff displayed that characteristic dignity and spiritual grace which the world has come to recognize in this great spiritual leader. Surely there will be no single experience on this journey with quite the moving effect of this brief meeting.

NEWSLETTER OF SENATOR HUBERT H. HUMPHREY, WEEK ENDING MAY 17, 1957

THE ARAB WORLD

Enroute to Beirut, Lebanon, after 4 days in Cairo, Egypt, I have an opportunity to reflect upon my visit to this center of the Arab world. After talking with President Nasser and members of his cabinet, to American diplomats, businessmen, professors, students, and newspapermen of our own and other countries of the free world, my deepest impression is that we need a great deal more patience and humility to replace the peevishness and arrogance which have too often characterized our dealings in the Middle East, and particularly in Egypt.

HOW TO PROCEED

There are no quick and easy solutions here. Furthermore, I think that we should not move unilaterally, by ourselves, in the Middle East any more than we have to. In many cases our national objectives can best be accomplished through the United Nations, or in joint efforts with European states such as Italy or West Germany, or with some of the states in the Middle East itself. There is much to be done—a tremendous need for economic development. Here are 22 million people concentrated in an area no larger than that of Massachusetts and Connecticut. I have seen the Cairo slums; it is a shocking, frightening experience to see such poverty. The pressure of population in Egypt is intense and growing, with no more than one-third of an acre of cultivated land available for each Egyptian. Seeing these conditions, it is easier to understand the sharp disappointment of Egyptians over the withdrawal of our offer of assistance in financing the great irrigation project known as the Aswan Dam.

FOOD AND NATIONAL POLICY

Our relations with Egypt were also severely hurt by our refusal to sell wheat and other food supplies from American agricultural surpluses in November of last year. Furthermore, the 2-year-old successful CARE program in Egypt was largely brought to a standstill in September of 1956 when our Department of Agriculture began to sit on the request for renewal of the authorization. Up until September, almost 3 million persons per day were being fed under CARE. Now the hot school lunch program is dead, and only about 100,000 people are receiving privately-donated food under the CARE program. Russians, by providing wheat for these people, have been able to make great inroads. Soviet medical supplies and kerosene were gratefully received when we failed to make available these supplies after the invasion of the Suez area last fall.

ENCOURAGING SIGNS

There are encouraging signs that Egypt's leadership would prefer to devote its energies and resources to building roads, schools, hospitals, and homes rather than to military adventures and international political intrigues. Certainly, the challenge of economic development would focus the energies of the Egyptian people on constructive undertakings. Egyptian economic development would also be in the self-interest of the United States—offering an enormous potential market for American products. However, there are serious differences of opinion between our two governments, and it is going to take a long time to work out solutions. Many problems probably are just going to have to be allowed to work out themselves. Furthermore, this is a changing area, in which the alternatives are often unclear, and our dealings in the area must be characterized by great patience and wisdom and sometimes the willingness to choose between more or less undesirable courses of action. It is a great challenge—not only to our diplomats in the area and to the Department of State—but also to the American people, without whose support the best efforts of our diplomats will surely fail.

NEWSLETTER OF SENATOR HUBERT H. HUMPHREY, WEEK ENDING MAY 24, 1957

BACK TO ROME

Just 2 weeks ago I left Rome bound for Cairo, on my factfinding trip through the Middle East. It has been a whirlwind tour, crowded with discussions and observations. Before I leave for Spain and Washington, here are just some of the highlights of the past 2 weeks.

WATER

One has only to fly over the delta of the Nile in Egypt to realize the overriding importance of water in the Mid-East. There is a shocking contrast between irrigated land and unirrigated. When one sees the desolate Negev, the great southern desert of Israel, and learns that Israel expects 100,000 immigrants this year, he better understands too why the Israelis are so insistent on irrigation of the Negev. The fact is that water is at least as important as oil in the Middle East, if not more so. The Nile, Jordan, and the Tigris-Euphrates are all international rivers, and if maximum use is to be made of their waters it must be done under some kind of international arrangement. A new approach is needed—perhaps in the form of a regional development agency under the United Nations, but operating independently through a representative board of directors.

ARAB REFUGEES

Through such economic development projects, the terrible problem of the Arab refugees may be settled—clearly one of the essentials of a lasting Mid-East peace. I visited two of the refugee camps while I was in Lebanon. The best was bad and the worst was incredible. The poverty is simply appalling. Half of the nearly 1 million refugees are under 15 years old. Hundreds of thousands are nearing maturity knowing only the life of the refugee camps. It is a readymade situation for Communist propaganda and agitation, and the Communists are taking advantage of it. There is no easy solution to this bitter problem, but it seems that the right of repatriation should be established as should the right of compensation. Once this is done, it should then become possible to begin some major public works projects to make possible the resettlement of refugees in some of the Arab States surrounding Israel. The Arab States have a responsibility to cooperate in this program. Their refusal to act thus far has been most unfortunate and unwise.

THE VITALITY OF ISRAEL

The new Israeli state is a striking contrast to the ruin of older civilizations one sees on every side. It is a young, vigorous nation—strongly and confidently led by men and women of the caliber of David Ben-Gurion and Mrs. Golda Meier. It is a working democracy, with active political participation. Although small, it is extremely well-organized and so capable of effective military action in any direction that one understands why some Arab leaders express fears of Israeli expansion. Israel is a good friend of the United States; she has used to the utmost advantage every bit of economic aid we have given her. She is a showcase of what can be done in this dry, poverty-stricken area of the world when there is a will, when there is good organization, and when there is an adequate supply of funds of public works and industrial expansion.

LEBANON

One of Israel's neighbors is tiny Lebanon, with whose President Chamoun and my friend, Lebanon's Foreign Minister Malik, I had the pleasure of a long discussion. Lebanon is a sophisticated, metropolitan community, very friendly to the United States. While in the capital, Beirut, I had the opportunity to meet with many of our sailors and marines (some of them Minnesotans) from the Sixth Fleet who were paying a visit to Beirut.

NEWSLETTER OF SENATOR HUBERT H. HUMPHREY, WEEK ENDING MAY 31, 1957

GOOD TO BE BACK

It is good to be back in the United States from my Middle East tour, a most enlightening and productive trip. Already we are at work on the new mutual security-foreign aid bill. It has been reassuring to have the President accept many of the recommendations from our Senate committee's foreign-aid study, including a long-overdue shift to repayable loans instead of just

grants. I have been pleased by the President's presentation this year, and shall support his overall objectives. Since my last report from overseas, I have visited in both Greece and Spain to wind up my trip. In both countries, food—American food—is urgently needed, and one of the most useful forms of economic assistance we can provide. In both countries I made personal observation tours of food-distribution programs carried on by American voluntary agencies, such as CARE, the National Catholic Welfare Conference, and other church groups. I saw with my own eyes what these programs mean to youngsters and adults alike, and how grateful they are for the generosity of American people.

ORPHANS IN GREECE

I wish many of you could have been with me as I visited an orphanage in Greece where eager youngsters are being given vocational education to prepare them to be self-supporting. One-third of Greece's children have lost either one or both of their parents in Greece's struggle, first, against totalitarianism of Mussolini and Hitler and, next, against communism. It was indeed a thrill to find the labels of Minnesota dairies on barrels of dry milk powder that is helping to keep these children alive and healthy. Greece needs more food, both for the CARE program, and for purchase with Greek money under our Public Law 480. It has asked us for more food, and is still awaiting an answer. We depend upon Greece as a vital military ally under our NATO alliance against communism. Greece is our friend, proven over and over. Yet Greece must have food for its friendly government to survive. How can we ignore its appeal? How can we go on telling farmers not to produce, when our friends are in need of such production overseas?

SAME IN SPAIN

The same story was repeated in Spain. Whether we like the Spanish Government or not, the Spanish people are human beings. Our hope for the future is to have those people understand America and Americans, to know the real spirit of humanitarianism which exists among us. We are pouring millions into Spain building airbases upon which we are staking much of our defense hopes if worse comes to worse, and world war III ever occurs. Yet those bases are useless to us unless we can maintain political and economic stability in Spain, and make sure Spain welcomes American troops. Spain has had severe weather setbacks destroying its own crops; it is in serious financial difficulty. It wants to buy American food—wheat and soybean oil—with Spanish money. Congress has authorized such sales under Public Law 480. We have good uses for the Spanish money we obtain, in paying for our military construction projects. Unless we use Spanish money gained from food sales, we have to use American dollars. Yet for more than 3 months Spain has been trying in vain to get our Government to sell it 500,000 tons of wheat and 30,000 tons of soybean oil. The situation is now serious. Unless Spain gets 500,000 tons of wheat before June 30, it faces bread rationing. I have called this emergency situation to Secretary Benson's attention on my return in the hope of stimulating some action.

DISARMAMENT

Progress in disarmament negotiations at the London conference resulted in Secretary Dulles asking me to call my Senate Disarmament Subcommittee into a special executive session last week, in which the leadership of both parties in the Senate participated. Both Dulles and Harold Stassen were witnesses. The Senate may be asked to send representatives to aid in the negotiations which are now under way.

USE OF FARM SURPLUS TO HELP FINANCE UNITED STATES BUSINESS ABROAD URGED BY HUMPHREY, MAY 27, 1957

America's much-maligned farm abundance can be the means of financing greater private investment abroad by United States free enterprise, Senator HUBERT H. HUMPHREY declared last night.

Senator HUMPHREY revealed he would seek whatever changes in legislation may be necessary to provide for such a program, as one of the conclusions reached after a 4-week tour of the Middle East and Mediterranean area "where they need and want the farm products we complain so much about."

"I am convinced that our Public Law 480, under which surplus farm products can be sold for foreign currencies, can become the framework of a sound foreign economic policy by using some of the foreign currencies to loan to American business enterprises in other lands as well as for economic development loans to the countries buying our food," Senator HUMPHREY said.

"As part of our foreign policy, the Government has been urging American businessmen to invest in friendly countries. However, one of the deterrents to such investments is the inability of branches, subsidiaries, or affiliates of American companies to borrow local currencies in the respective countries for their normal operational needs. Loans are either not available or the interest rates are prohibitive.

"However, there is an ample source of available funds in many foreign countries originating from the sale by our Government of agricultural surpluses under Public Law 480. There is need for more such sales. In addition to using the local currencies obtained for paying United States obligations abroad and providing long-term, interest-bearing loans for economic development by the participating countries, it would be good business to set aside at least a part of such funds for loans to American industrial and business enterprises abroad through the Export-Import Bank."

Senator HUMPHREY said he had discussed the proposal with American businessmen abroad during his trip, and found widespread agreement that such a policy would simultaneously help American farmers, help American business, help America's foreign policy, and help friendly countries bolster their economy.

"Everybody would gain, and a way would be provided for stimulating international trade and commerce which would eventually lessen the need for heavy foreign-aid expenditures," Senator HUMPHREY said.

"Instead of spending millions trying to get the farmers to quit producing, we would all be better off to use our potential production constructively as a means of financing our foreign policy objectives in both public and private enterprise channels.

"Everywhere I went, I found the American business community making a valuable contribution to understanding and good will toward our country. The more we can encourage American business abroad, the solider we can unite the Free World.

"We are going to have to compete with the Soviet on the trade and economic front as well as military fronts, and the sooner we recognize it and move ahead more aggressively on a constructive international economic policy the better off we will be," Senator HUMPHREY said.

EIGHTY-SIXTH BIRTHDAY ANNIVERSARY OF FORMER SENATOR JOHN G. TOWNSEND, JR., OF DELAWARE

Mr. WILLIAMS. Mr. President, on Friday, May 31, 1957, the Selbyville Rotary Club, of Selbyville, Del., is planning a special program honoring former Senator John G. Townsend, Jr., of Delaware, on his 86th birthday.

Senator Townsend, also a former Governor of our State, is known both in the State of Delaware and nationally for his outstanding public service.

The Vice President has accepted an invitation to participate in this program, and I have been asked by the Selbyville Rotary Club to extend an open invitation to Senator Townsend's many other friends in the Nation's Capital to join them in paying respects to him on this occasion.

This program is being held in his home town of Selbyville, Del. Complete details of the program and the route may be obtained by contacting my office.

RECESS

Mr. HUMPHREY. Mr. President, I move that the Senate stand in recess until tomorrow, at 12 o'clock noon.

The motion was agreed to; and (at 7 o'clock and 6 minutes p. m.) the Senate took a recess until tomorrow, Tuesday, May 28, 1957, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate May 27, 1957:

DIPLOMATIC AND FOREIGN SERVICE

James M. Langley, of New Hampshire, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Pakistan.

SECURITIES AND EXCHANGE COMMISSION

Andrew Downey Orrick, of California, to be a member of the Securities and Exchange Commission for the term expiring June 5, 1962. (Reappointment.)

UNITED STATES ATTORNEY

Wendell A. Miles, of Michigan, to be United States attorney for the western district of Michigan for a term of 4 years. He is now serving in this office under an appointment which expires June 9, 1957.

Clinton G. Richards, of South Dakota, to be United States attorney for the district of South Dakota for a term of 4 years. He is now serving in this office under an appointment which expires June 9, 1957.

UNITED STATES MARSHAL

James L. May, of Alabama, to be United States marshal for the southern district of Alabama for a term of 4 years. He is now serving in this office under an appointment which expires July 17, 1957.

HOUSE OF REPRESENTATIVES

MONDAY, MAY 27, 1957

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Almighty God, as we continue to go forth into the hours of this new day, with its various duties and responsibilities, may our souls be jubilant with praise for the assurance of Thy goodness and loving kindness.

We humbly confess that our minds and hearts are frequently bewildered by the mysteries of life and we seem to be wandering in a valley of deep shadows.

Help us to believe and feel that Thou art always willing to walk with us, a companion to dispel our loneliness and a counselor to guide us in the homeward way.

Grant that amid all the changes and seeming contradictions, which we encounter, we may turn unto Thee and find that peace which the world can neither give nor take away.

Hear us in the name of Him who loves us and gave Himself for us. Amen.

The Journal of the proceedings of Friday, May 24, 1957, was read and approved.

THE LATE HONORABLE LUTHER PATRICK

The SPEAKER. The Chair recognizes the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Speaker, last night, May 26, 1957, former Representative Luther Patrick passed away in Birmingham, Ala., at the age of 63. Mr. Patrick served in the United States House of Representatives from January 3, 1937, to January 3, 1943, and again from January 3, 1945, to January 3, 1947, representing the Ninth Alabama District, the district which I am privileged to serve at this time. His untimely passing will be received by those who were associated with him here in the House and who numbered themselves among his many friends with a deep sense of sorrow.

Mr. Patrick was born near Decatur, Morgan County, Ala., on January 23, 1894. He attended the public schools of Alabama, Louisiana State University at Baton Rouge and Purdue University, Lafayette, Ind. He was graduated in 1918 from the law school of the University of Alabama at Tuscaloosa. During the First World War he served as a private and was assigned to the Army training detachment and to the central officers' training school from June 14, 1918, to December 4, 1918.

Mr. Patrick was admitted to the Alabama bar in 1919 and commenced the practice of law in Fairfield, Jefferson County, Ala. He was city attorney for Fairfield from 1920 to 1922, assistant attorney general of Alabama, 1927–29, assistant United States district attorney for the northern district of Alabama in 1933 and 1934. He was an author of humorous prose and verse and was well known throughout the country as a radio commentator and a homespun philosopher.

Following his retirement from Congress in 1947, Mr. Patrick did not lose his interest in politics and the practical operation of the American form of government. He had great faith in representative government and he always played an active part in its preservation and its betterment. In his last years Mr. Patrick suffered from a severe case of arthritis and many other illnesses, disabilities which would have destroyed the will and zest of other men. However, disabled though he was, he maintained the sense of humor and love of life for which he was so famous. He sought election last spring as a delegate to the Democratic National Convention and was elected. He attended the convention in Chicago in a wheelchair, and was active through all of the deliberations.

It was my privilege and good fortune to be closely associated with and to know Mr. Patrick intimately. He was truly a Christian gentleman in all that the term implies. He was a man highly respected for his fine qualities and his courageous adherence to convictions. He was a good father and husband and wonderful friend.

My earnest sympathies are extended to Mrs. Patrick and the members of the family. Their loss is great indeed and we pray that God will comfort and strengthen them in this period of sorrow. Alabama has lost an outstanding son and the country one of its best citizens.

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks in the RECORD on the death of Mr. Patrick.

The SPEAKER. Is there objection?

There was no objection.

Mr. JONES of Alabama. Mr. Speaker, I was greatly saddened this morning to receive the report that Hon. Luther Patrick, of Alabama, a former Member of this House, died yesterday. For many years, I have known this splendid gentleman, and on this occasion, I join with my colleagues in paying tribute to him for his many fine accomplishments and good deeds.

Even though during recent years he was confined to a wheelchair, Luther Patrick never lost his cheerfulness, optimism, and zest for living. He certainly set a fine example for the rest of us to be of good courage always and to move forward with conviction.

Luther Patrick was a man of many and varied talents. He was a renowned lawyer, a successful writer and radio commentator, and an effective legislator, both on the State and Federal levels.

Luther Patrick was a loyal Democrat, thoroughly devoted to his country and

State. He worked long and hard in the interests of the masses and was a champion of the common man.

Alabama and the Nation have lost a great citizen and public leader in the death of Luther Patrick. He was truly a great American.

Mr. ELLIOTT. Mr. Speaker, I am deeply saddened to learn of the death of my long-time friend, Luther Patrick.

I have been privileged to know Luther Patrick and many of the members of his family. He was raised in Cullman County, Ala., in the district I have the honor to represent. His brother, G. T. Patrick, is superintendent of city schools of my hometown of Jasper, Ala.

Luther Patrick had a long and interesting political career. He served as city attorney of Fairfield, Ala., 1920–22. He was an assistant attorney general of Alabama, 1927–1929. He was an Assistant United States District Attorney of the Northern District of Alabama in 1933 and 1934.

He served in this body as a Member of Congress from the Ninth Congressional District of Alabama in the 75th, 76th, 77th, and 79th Congresses.

I was privileged to have a deep tie of personal friendship with Luther Patrick. He encouraged my own political career, and throughout was most kind and sympathetic.

Luther Patrick was a great Democrat. He was loyal, and dependable, and progressive in party matters. His interest in his party continued to the time of his death. Though crippled with a terrible arthritis that immobilized his body, his mind and heart continued steadfast. Though confined to a wheelchair, he wrote and spoke, with vibrant voice, for his party.

Luther Patrick loved the common people. He spoke their language. His spirit was in tune with theirs. They loved him and he loved them. His writings were closely tied to the lives and experiences of ordinary people. His humor was hearty, but never hurtful. Hundreds of Alabama audiences were privileged to laugh and enjoy his recitation of his most famous poem entitled "Sleeping at the Foot of the Bed."

As remarkable as all these things were about Luther Patrick, his greatest quality was the equanimity with which he faced defeat—his courage in adversity.

I never knew a man who faced up to the buffets of life's storms with greater spirit. He did not ask quarter of life because of his physical infirmities. He could truly say:

> In the fell clutch of circumstance
> I have not winced nor cried aloud,
> Under the bludgeonings of chance
> My head is bloody but unbowed.
> —*Henley.*

Alabama has lost a great citizen. The people have lost a friend.

It seems to me that Charles C. McWhorter's poem describes the philosophy that motivated Luther Patrick's being:

> And I am repaid and my soul is serene,
> If I put you one flower you might not have seen,
> My mission accomplished in deed and in word;
> If you hear one sweet note that you might not have heard.

Mr. ROBERTS. Mr. Speaker, the Nation and the State of Alabama lost one of its most distinguished citizens Sunday night when the Honorable Luther Patrick, former ninth district Alabama Congressman, died in Birmingham following a long illness.

Luther Patrick served four terms in this House, 1937–43 and 1945–47. He was a stanch Democrat and a devoted statesman, beloved by his fellow Members and all who knew him.

Luther Patrick's motto was "Bear ye one another's burdens—never mind about your own." These were not idle words with Mr. Patrick; they were his creed by which he lived day by day.

He helped to lift others' burdens by a remarkable sense of humor, a keen wit, and a clearly wielded pen. He wrote three books and was working on another on folklore when he passed away. He loved to write poetry, and the people of Alabama loved to read what he wrote.

Even during the latter part of his life when he was confined to a wheelchair with crippling arthritis, Luther Patrick did not turn aside from his motto. He lifted others' burdens, never minding his own, with his writings and his Will Rogers type of humor.

I am sure that I speak for the Members and others who knew him when I say that we grieve the passing of Luther Patrick. His life carried out with faithfulness the words of Saint Paul, from which Luther Patrick's credo of life was taken: "Bear ye one another's burdens, and so fulfill the law of Christ."

Mr. HUDDLESTON. Mr. Speaker, the Members of the House have been previously advised that former Representative Luther Patrick, of Alabama's Ninth Congressional District, passed away during the night of Sunday, May 26, 1957. He was beloved by all who knew him, and his close friends numbered in the thousands. With the death of Mr. Patrick, Alabama has lost a great son and the Nation a fine citizen.

Under leave to extend my remarks heretofore granted, I insert in the CONGRESSIONAL RECORD a newspaper account of Mr. Patrick's death, which appeared in the Monday, May 27, issue of the Birmingham (Ala.) News:

LUTHER PATRICK, FORMER CONGRESSMAN, DIES AT 66

Former Congressman Luther Patrick—beloved poet, wit, writer, lawyer and radio entertainer—died last night at West End Baptist Hospital at the age of 66.

Death came after a long illness to the public figure who had been confined to a wheelchair in the closing years of his life. Although suffering with crippling arthritis, his courage never waned and he maintained a lively interest in Birmingham's civic affairs.

His frequent letters to newspaper editors made himself heard where his voice couldn't reach.

Funeral services will be held at 2 p. m. Tuesday at Johns-Ridout's Chapel, with the Reverend Paul Clem and the Reverend Frank Ledford officiating. Burial will be in Elmwood Cemetery.

Patrick's life was the familiar American success story—from farm to fame, though his fame was limited largely to his own State and particularly to Birmingham, his adopted home.

He was a "Will Rogers type" radio entertainer and his folksy, down-to-earth comments and humor endeared him to thousands of listeners.

One of his many poems, "Sleepin' at the Foot of the Bed," was widely circulated and has been read or recited several times on national radio network shows.

He wrote three books: Hope Ye're Livin and Doin' Well, Friends, Neighbors, and Kinfolks, and Goosepocket. At the time of his death he was writing a book on folklore.

A veteran of four terms in Congress, he once said membership in the Democrat Party was a "southern requirement."

During his last term as Representative, he said he supported "education, industry, progress, good will, health, fair dealing, thrift, peace, knowledge, truth and virtue in general."

After his congressional service, he returned to Birmingham to live at 921 7th Street West.

Last year, he was a delegate to the National Democratic Convention.

Born on a farm in Morgan County, he first attended Gum Pond School and his teacher was Miss Effie Livingston. This also was the first school and the first teacher of Senator JOHN SPARKMAN.

Patrick worked his way through college. He first studied electrical engineering and then law at the University of Alabama, Louisiana State, and Purdue University.

He used his knowledge of engineering effectively as a member of the House Interstate and Foreign Commerce Committee.

World War I interrupted his legal career. When he returned from service, he worked in a steel mill before beginning full time practice of law.

In 1919, he opened his law office in Fairfield, moving to Birmingham in 1922.

Patrick was an assistant Alabama attorney general during the Graves administration, and also served as an assistant United States attorney for the northern district of Alabama.

At one time he served as consultant on the war production board. In 1949 he was an unsuccessful candidate for the post of associate city commissioner.

A pioneer radio commentator, he started in this work in 1925 with stations WAPI and WBRC.

He was a member of McCoy Methodist Church and often served as substitute Sunday school teacher. He also was a member of Alpha Masonic Lodge, Shriners, Knights of Pythias, Eagles, Elks, High Twelve Club, Men of Prayer Club, and The Club.

Surviving are his wife, Mrs. Pearl McPherson Patrick; a daughter, Mrs. W. James Brasher, Birmingham; five brothers, Irving and Ivan Patrick, Birmingham; Gilbert Patrick, Jasper, and Ferris and E. L. Patrick, Cullman.

FORMOSA

Mr. DORN of South Carolina. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN of South Carolina. Mr. Speaker, the riots on Formosa, disrespect for the American flag, destruction of American property and injury of American nationals is shocking. It is obvious that this lawless demonstration was instigated by a few well-placed individuals who are enemies of the United States and are enemies of freedom. I believe these riots were Communist inspired and were aimed at the Free World's defense line in the Pacific.

The Japanese used Formosa as a base to conquer the Philippines and all of southeast Asia. Formosa in Communist hands today would threaten the independence of the Philippines, Australia, Indonesia, Malaya, all of southeast Asia, Japan and the United States itself.

I am glad that in the crisis the Free World had a courageous leader, Generalissimo Chiang Kai-shek. Chiang acted with alacrity and decision. He did not equivocate, he did not hesitate. He declared marshal law, rushed three divisions into the capital, T'ai-pei, and soon had the situation well in hand. I am glad that Formosa, the key of freedom's defense in the Pacific, is governed by such a fearless leader upon whom we can depend. Chiang acted in the tradition of Douglas MacArthur, Syngman Rhee, and the late immortal Magsaysay.

The Government of Formosa, under Chiang Kai-shek, will bring out the facts and we will soon know that the Communists and their allies are trying to destroy south Pacific solidarity and our friendship for that area.

POWER TO DECLARE RECESS TOMORROW

Mr. McCORMACK. Mr. Speaker, Chancellor Konrad Adenauer, of Germany, now on an official visit to our country, is one of the great leaders of this important and trying period of the world's history.

Chancellor Adenauer is not only a practical and courageous leader but, in my opinion, he is the No. 1 idealist in the world of today, and we need leadership on the level of idealism to meet the challenge that confronts us.

There is no man in the world today who better understands the Communist mind and intent than Chancellor Adenauer. He is an affirmative minded leader, not only to the people of Germany, but to all the peoples of the non-Communist world and to the countless of millions behind the Iron Curtain who seek liberty and who are praying and hoping for the day of their early deliverance from Communist oppression.

The people of Germany are justified in feeling proud of him.

The House of Representatives will receive this fine gentleman and great leader tomorrow as its guest. He will address the Members of the House of Representatives tomorrow, Tuesday, May 28, at 12:30 noon.

The House of Representatives has had many great men as its guest, but none greater and none who symbolizes more the spirit of liberty than Chancellor Adenauer.

I know the Members are looking forward to his visit to the House tomorrow.

Mr. Speaker, I ask unanimous consent that it may be in order at any time on tomorrow, May 28, 1957, for the Speaker to declare a recess for the purpose of receiving His Excellency Konrad Adenauer, Chancellor of the Federal Republic of Germany.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CALL OF THE HOUSE

Mr. WIGGLESWORTH. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 87]

Andresen, August H.	Garmatz	Mailliard
Barrett	Granahan	Miller, Md.
Baumhart	Grant	Moore
Beamer	Green, Oreg.	Morgan
Belcher	Green, Pa.	Murray
Blatnik	Griffin	Patterson
Blitch	Gubser	Pfost
Bolton	Hardy	Pillion
Bowler	Healey	Polk
Boyle	Hemphill	Powell
Buckley	Hoeven	Prouty
Byrd	Holtzman	Rains
Byrne, Pa.	James	Reece, Tenn.
Carnahan	Jenkins	Robsion, Ky.
Celler	Jonas	Santangelo
Chelf	Kearney	Shelley
Chudoff	Kee	Siler
Cooley	Kelley, Pa.	Spence
Dawson, Ill.	Kilburn	Taylor
Delray	Kitchin	Teller
Digga	Kluczynski	Van Pelt
Fino	Lipscomb	Watts
Fogarty	McCarthy	Wolverton
	McConnell	Zelenko

The SPEAKER. On this rollcall 361 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1958

Mr. MAHON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 7665) making appropriations for the Department of Defense for the fiscal year ending June 30, 1958, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 7665, with Mr. KEOGH in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Under the unanimous-consent agreement of Friday, May 24, general debate will continue for not to exceed 4 hours, the time to be equally divided and controlled by the gentleman from Texas [Mr. MAHON] and the gentleman from Massachusetts [Mr. WIGGLESWORTH].

The Chair recognizes the gentleman from Texas [Mr. MAHON].

Mr. MAHON. Mr. Chairman, I yield 30 minutes to the gentleman from Florida [Mr. SIKES], chairman of the Army panel.

Mr. SIKES. Mr. Chairman, this is a new day of new weapons—weapons with a capacity for destruction that is beyond the comprehension of man. Every city is now within range of planes which can deliver these weapons. In a few years planes will not be needed to deliver them. They will cross oceans and swoop down upon targets in a matter of minutes. Defense against that ultimate weapon is still largely a hope and a prayer.

There are those who believe with sincerity that there is no place for the Army in today's warfare; that the day of land fighting is over; that the Army's principal mission henceforth is not as a fighting force, but as an occupying or police force. If that is so, we are wasting a lot of money in this bill. But, there is another side to the story.

World War II seems a long time ago, but there still are lessons to be learned from it and those weapons used were very effective for the times. Air power gutted Germany—literally destroying it—but the German's didn't stop fighting until their territory was overrun by the allied armies. A lot of destruction and a lot of deaths, allied and enemy, would have been unnecessary if Patton and Bradley had been given gasoline and supplies in 1944.

Korea is a more recent experience—one whose outcome we cannot point to with pride because of the limitations put on America's fighting forces through our timid allies. In Korea we had unquestioned air and naval superiority. Within territorial limits we bombed at will. What happened? We got kicked all over the lot until we had enough troops and weapons on the ground to stop the enemy.

Please remember joint American forces readied for the defense of Taipan undoubtedly staved off a Red-Chinese invasion. But the collapse of allied efforts in Indochina permitted the partition of that unhappy area.

The valiant patriots in Hungary were crushed and now are held captive by the armed might of the Russian Army. No help can reach them while this is true. The overwhelming air and naval power of Britain and France did not frighten Nasser into submission and they allowed themselves to be talked out of a successful land, air, and water campaign by another timid ally; this time the United States. The Israeli kicked the living daylights out of the Egyptians on the ground with troops and armor. Jordan would not be an independent nation today if the Sixth Fleet and its Marines had not made its dramatic and forceful appearance in the Mediterranean.

I have brought you to very recent days and to the type of operation which is becoming more and more clearly the pattern of Soviet troublemaking.

I know full well of the hurried preparations for thermonuclear war on both sides of the Atlantic. Yet, I do not think we will ever see a thermonuclear war. I cannot imagine anyone being so mentally depraved or so completely a fool that he would pull the trigger on what almost certainly would be mutual mass destruction and the end of civilization. Thermonuclear war is indescribable and unthinkable. The capability we must possess, otherwise there would be no security in the world we now know. But, I think and I pray to God that we will never have to use that capability.

Tactical atomic weapons are an entirely different consideration. They are

devised for military targets—not for mass destruction. They are a part of a modern army's equipment. When we say that the next war will involve the use of atomic weapons, we do not necessarily mean thermonuclear weapons. It is entirely conceivable that the only atomic weapons used will be tactical weapons designed for combat purposes. Every service is important. Every service is essential. No one service is self-sufficient. If limited wars are to be the pattern or if Russia suddenly moves to occupy all of Europe, we must have trained and equipped troops on the ground and ready.

Now, let me point to the fact that we have troops all over the world. We have commitments or treaty obligations to defend 42 nations. I want to be sure that American fighting forces have a chance to defend themselves if trouble comes. I don't want our forces to be sitting ducks whose weakness invites aggression. Now, theoretically, we have considered ourselves in the main the supplier of weapons and our allies the supplier of troops. That is not entirely true. Despite the promises and the treaty commitments of our allies, their forces are much smaller today than we had anticipated or planned for. Britain is sharply retrenching, cutting her forces back 34,500 men, seriously weakening her commitments for the defense of Europe. France mired in North Africa is keeping only skeleton divisions in Europe. West Germany, more than 2 years behind schedule, is just beginning a serious defense program with fewer than 100,000 men under arms. Japan does virtually nothing toward the defense of the Far East. Today the United States is putting more men and money into the defense of Europe than is any European nation.

The fighting machines of Russia and Red China are huge steamrollers, well organized and newly reequipped. They have every weapon that we do and more of most. The Soviet claims of reductions in troops strength are paper reductions not borne out by demobilization if our intelligence is not deceived. They have launching sites behind the Iron Curtain from which guided missiles can reach all of Europe if our intelligence is not deceived. Soviet military strength always has depended upon mass steamroller tactics by which they seek to overrun enemy positions regardless of cost in manpower.

Diplomatically, their strategy is to pinch off territory whenever and wherever they can by whatever means they can. That is the kind of threat American forces live under in all parts of the world. I want them to have the ability to fight back and live.

Again, let us think back to Korea. There American forces without adequate training and with World War II equipment were thrown into the gap to try to stop hordes of disciplined enemy troops in the most brutal and savage fighting experienced by American troops in many a decade. I would not want that to happen again. But, this budget makes no provision for modern equipment for American or Korean forces now in Korea. American forces and Korean forces are equipped with weapons of the type that they had when the fighting stopped. They are equipped with the planes they had when fighting stopped. There were no atomic tactical weapons in use in the field when the fighting stopped in Korea so our forces have none today. On the other side of the defense line, Chinese and Red Korean forces have been augmented and completely equipped with new weapons. They have atomic weapons. They have hundreds of newly developed airfields with the latest planes. The last token forces of our allies other than the Koreans are pulling out. The fact that this budget makes no provision for the improvement of that picture is not an Army decision. The Army grimly contemplates its responsibility in Korea and knows that the cards are stacked against us. Policy considerations directed by the State Department and the administration require that we observe armistice terms which forbid modernizing our forces. The Communists made the same agreement, but they are not similarly inhibited by moral or treaty obligations. They have broken the contract. Therefore, I say it is no longer binding on us, and that American and Korean forces there should have every type of modern equipment our arsenal possesses.

What about the Army budget for fiscal 1958?

Mr. CANFIELD. Mr. Speaker, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from New Jersey.

Mr. CANFIELD. I am glad to hear the very able gentleman from Florida make that statement about our military situation in Korea, because I am very much concerned about it.

A dispatch from Korea in the Associated Press today makes this statement, that if the North Korean forces and the Red Chinese move against our forces and the Southern Korean forces today those forces would have little hope.

Mr. SIKES. I am afraid that is true.

Mr. MORANO. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from Connecticut.

Mr. MORANO. Does the gentleman have any information as to whether or not we have the kind of equipment that you think is needed in Korea in nearby Okinawa, Japan, or the Philippines that it would be able to get into Korea in an emergency?

Mr. SIKES. Of course, there is limited equipment that is available within the same geographical area but not in the amounts we would need; and this budget does not provide it. I think I can explain that to the gentleman's entire satisfaction later. There is simply not enough money in the budget to do the job.

Mr. MORANO. What about atomic tactical weapons in that area? Are they in that area? Arey they in that area where they can be used in case of emergency, or can they be gotten into Korea?

Mr. SIKES. The atomic tactical weapons and their crews have been directed almost wholly to assisting our allies in Europe.

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from Texas.

Mr. MAHON. This question of the American military position in Korea is a question that is presently being considered on a very high level. It is a question of treaty obligations; various countries are involved. I have discussed this matter within the last 3 days with appropriate officials of the Government. I am assured that plans are being made to work this problem out to the best interests of the United States.

It is not a matter of shortage of weapons in being, so I am told by the Pentagon, but a decision as to what we should do toward strengthening our position in Korea. But this is a matter of negotiation between governments, as I understand, and I think it would be a mistake to discuss this matter at length on the floor at this time. Later when top level decisions are made we can discuss the problem more freely.

Mr. SIKES. That is correct. In the meantime our defenses in Korea deteriorate each day in comparison with the defenses of the enemy.

Now, what of the Army budget for fiscal 1958. Generally, I support it. I am not an enthusiastic supporter in that there are areas where the cuts go very deep. I will discuss them later. Not all of this is chargeable to the committee. The Department of Defense and the Bureau of the Budget held the Army to a low figure in nearly every category. In addition, Mr. Eisenhower pinpointed and thereby insured one cut that I consider too deep for sound management and planning.

Nevertheless, the Army possesses and will improve its position generally in its ability to wage both conventional and atomic warfare. It will be a powerful force to reckon with and it is becoming increasingly mobile and air transportable. The committee does not recommend, nor do we see a necessity for any cuts in uniformed personnel.

The Army has had to develop a new concept for training, supply, and maneuver. This is the atomic capability concept. Now smaller divisions must operate with greatly modernized equipment, spread over a much larger area. It must strike in many directions at once, seek out and destroy enemy concentrations and targets. The Army must have a capability for sustaining operations even though ports may be rendered unusable, water transportation more difficult, and production facilities destroyed by atomic attack. The Army must still be prepared to deny friendly territory to the enemy, to take and hold enemy territory. Only then can we be sure the enemy resistance has ended. All of this does not make an easy task nor a cheap one.

Costs are going right out of the top of the tent. Each soldier is costing us $7,000 a year and Congress authorized every item of expenditure including all the comforts and conveniences and security we like to provide as a part of modern soldiering. Despite the enormity of this budget, our mobilization reserves

are low. We will not have enough weapons or supplies to keep going long. We have tried to strike a balance with reality, drawing on the world knowledge of the administration and the battle experience of the Pentagon. Then, because the Nation has said it wanted cuts, we have doubly studied each item and reassessed each item for its necessity and importance. The cuts are in this bill. You now are the judges of our wisdom or lack of it.

The services say they are hurt badly by the reductions. In some instances I think they are. In other instances I do not agree. I do think this is the tightest military budget in years. The services have on the whole been doing a progressively better job in avoiding or eliminating unnecessary expenditures. I believe the Army in particular has done a good job in trying to eliminate waste. The Army's presentation to this committee was outstanding, clear, and factual.

Mr. VINSON. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from Georgia.

Mr. VINSON. The gentleman stated that the Army felt in certain instances it was hurt by the reduction and that thought was concurred in by the gentleman from Florida. Particularly am I concerned about military personnel. I understood the gentleman to say that there was no intention to cut the ground forces but I have been advised by the Department that the way the figures turn out there will be a forced reduction and I particularly invite the committee's attention to a reduction of 15,000 men or one division out of money that is being made available for military personnel. Am I correct?

Mr. SIKES. I expect to touch on that in detail in a few minutes. I believe I can show the gentleman without question that there is not any necessity for cuts in personnel. I would deplore any substantial reduction. I do not feel that it is necessary. I will explain in just a few minutes why I do not consider it necessary.

Mr. BROOKS of Louisiana. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from Louisiana.

Mr. BROOKS of Louisiana. I think the gentleman is making a most impressive statement here, and I have listened to it with a great deal of attention. In addition to what my able chairman the gentleman from Georgia [Mr. VINSON] has referred to, I am disturbed in reference to this cut of $10 million in the Army Reserve program. We have been making a fight through the years to build up the Reserve program. We have brought it now into a shape where it looks like a real active Reserve program. I am told that this cut will destroy the 6-month training program for the Army Reserves, and I would like to get the gentleman's idea in that respect.

Mr. SIKES. Well, I am disturbed about it, too, and I must point out to my good friend, who has been very zealous in his own efforts in behalf of the Reserve, that information given to the committee at the time the hearings were held does not coincide with information which has subsequently been given to the committee. The new information is the result of the effects of the very rapid augmentation of the 6-month training program. I think very likely we will need to put back the money that was eliminated. I am going to discuss that in detail in just a few minutes. If my friend will bear with me, I will get to that, also.

Mr. BROOKS of Louisiana. I certainly appreciate the consideration of that particular item.

Mr. SIKES. I thank the gentleman.

Before I get into the actual details of the budget, I want to comment for a little bit about waste, because there always is talk about waste. And, I have to admit that a certain amount of waste appears to be built into any organization as big as the military services. A certain amount, I presume, is inherent anywhere in Government. It is part of the system. There are little bits of waste everywhere in Government, and some of it is going on and will continue to go on regardless of what you and I do about it. We try to force elimination of waste. We try to make it impossible by the nature of the cuts we inflict, but the real challenge for the elimination of waste must lie within the departments, whether that be Defense or any other. If a general wants to fly in his personal plane to Rio de Janiero for lunch or a golf game, there is nothing that Congress can do about it, because it goes down in the record as a training trip. But, in our indignation about this, let us remember that we in the Congress are not above waste, also. An official in Government recently told me that he arranged 15 trips abroad for 1 Congressman in 6 years. I find it awfully hard to believe that all of those trips were necessary.

Now, we do a lot of things for the services that cost a lot of money. These are the things that Congress has authorized: They include transportation overseas for the families of the soldiers, rental, canteens, medical, educational, and retirement privileges. We are educating 48,000 Army children abroad, 91,000 children of all the services. Two hundred and thirty-four thousand Army dependents are abroad, five hundred and twenty-four thousand dependents of all the services. It costs $37 million a year to send out 2 checks a month to all of the people who draw pay from the United States Government rather than to send them 1 check a month. There are so many places where a lot of money is spent doing the things that we think make the services more attractive and make Government service more attractive, and in none of this do I speak in the same connotation as I spoke about waste a little earlier.

I am disturbed about the cost of the CIA. We spend hundreds of million of dollars a year on this organization. It has almost no screening or control from the Congress. That in itself is an invitation to excessive spending and to empire building. I seriously question that it is earning its keep. These are but a very few examples:

Now, if I can, I want to talk briefly about the actual budget estimates and appropriations for the Army. The 1957 appropriation was $7,752,000,000. The 1958 budget request was $8,465,000,000. We recommended in this bill $7,239,000,000. That is $332 million less than the 1957 appropriation, $1,226,000,000 less than the 1958 appropriation request.

However, $400 million of this is to be derived by transfer. We have directed that $350 million be derived from the Army stock fund and used to pay salaries and expenses, and $50 million be transferred from the Army industrial fund.

Where does the Army's stock fund money come from? During the Korean war we built up a great backlog of supplies. In subsequent years the Army has been using those supplies but the Army's mobilization reserves have been dropping. As a result money accumulates in the stock fund and by the same token in the industrial funds. Instead of leaving that money for subsequent use when needed, we are requiring that it be used within the Army structure for current needs, thereby cutting back on the amount of new money that we must appropriate.

The reduction in the bill also contemplates that the Federal Government of Germany will supply approximately $105 million, which is the amount they supplied to help bear the cost of American forces in Germany during the past year. They are becoming more and more reluctant to share in those costs. If the State Department is unable to work out an agreement with the German Republic for the continuation of the deutschemark support, then we will have to put back a proportionate part of the $105 million we have eliminated.

The gentleman from Georgia [Mr. VINSON] just a moment ago asked about Army strength figures under this budget. It is contemplated that we will begin the fiscal year 1957 with 1 million men and that we will end it with 1 million men. The average strength will run from 997,000 to 999,000. The money for military pay and related purposes for the year is calculated at $3,113,000,000 plus the transfers that I mentioned a little while ago. That is the money that goes for pay, food, clothing, and travel. These are necessary items, housekeeping items, things we obviously cannot eliminate. From the requested $3,549,000,000 program the committee recommended a cut of $36 million, as an actual cut; that is all, $36 million. That is 1 percent.

Mr. VINSON. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from Georgia.

Mr. VINSON. As a matter of fact, the request for the next fiscal year was $49 million below what it was for fiscal 1957. So if you add the $36 million and the $49 million, you get $84 million, which represents a budget cut below the current year. Then if you add to that the $28 million on account of the increased cost of subsistence, railroad rates, and so forth, you get a total reduction of $113 million below the current year; is that right?

Mr. SIKES. $113 million less than the comparable figure would have been for 1957.

Mr. VINSON. That is right, to take care of the same number of troops, 997,000 or 1 million.

Mr. SIKES. But let me say to the gentleman from Georgia that it is only $36 million less than the Army requested for fiscal 1958. It is not 113 million less than the army stated would be needed. Economies and adjustments within the Department eliminated the requirement for the additional items which the gentlemen has enumerated.

Mr. VINSON. That is right.

Mr. SIKES. Now let me go just a little further and see where that $36 million reduction is to come from. Remember this is $36 million less than the Army actually requested for a million men for fiscal 1958. We propose that those reductions be taken in certain ways, and we specify that we do not want them to come through reduction of uniformed personnel.

We believe that the decline in reenlistments is going to mean that the Army has asked for more reenlistment allowance money than is needed. We deducted $6,500,000 from that item.

The 1957 aircraft procurement program was subjected to a slowdown. We feel that the buildup in aircraft inventory in fiscal 1958 is not going to be sufficient for Army to use all of the flying pay requested for 1958 and, therefore, we deducted $1,500,000 from that item.

The enlisted dependents are entitled to allowances under the law. However, if the enlistment rate does not increase, the replacements which must be obtained through the draft will have fewer dependents. We deducted another $5,100,000 from that item.

Now, here is the big cut, in travel. The service requested $229,900,000 for travel. We believe there still is much more travel within the services than there is justification for, much more than there can possibly be a necessity for, and we took a 10-percent slash out of that item and reduced the amount available by $22,900,000.

Nearly 23 million of the 36 million reduction is in travel. You cannot tell me that if we cut travel $22,900,000 it is going to mean we have to discharge 15,000 uniformed personnel. It simply will not hold water. Now I know this: I know that travel costs more because of increases in rates. The Interstate Commerce Commission gives the common carriers a rate increase about once a month, it seems to me, and those increases come out of this budget. The Government pays a very big part of the increase its own agencies granted to the carriers. I claim that the $22,900,000 decrease in travel is a very big cut. I think the Army should have to try to live within the money appropriated. I think travel in all the services is excessive, and I insist that it must be curtailed.

Mr. VINSON. I want to clear this matter up because I think the committee is entitled to it. The way my mind runs, I think this is the most serious cut, probably, in this whole bill. If the gentleman will bear with me just one second, I should like to give the figures so the committee can understand them.

Your report shows that the Army requested $3,549,000,000 for fiscal 1958 to support approximately 1 million military personnel of the Army. The Army admitted that it had $49 million more than this amount in 1957 to support approximately the same number of troops. The committee cut this request for fiscal 1958 funds by an additional $36 million. This means that the Army will have $84 million less to maintain approximately the same military strength in fiscal 1958 than it had in fiscal 1957.

Mr. SIKES. That is overlooking the fact that the Army did not ask for that $49 million.

Mr. VINSON. That is true.

Mr. SIKES. They said they could live without it.

Mr. VINSON. But they did ask for the $36 million.

Mr. SIKES. That is right. I have just told the gentleman where we made the cut of $36 million, $23 million of that $36 million is travel. When you require a reduction in travel, it cannot possibly follow that you have to discharge troops.

Mr. VINSON. Let us sum up the two things. The Army comes in and asks $49 million less. Then you cut it $36 million. That is the result of it. Now see if this is correct. I further understand that the Army will be required to absorb an additional sum of $28 million due to an increase in freight rates and sea transportation.

Mr. SIKES. The Army knew it had to absorb those costs when it made its request for NPA funds.

Mr. VINSON. That is right.

Mr. SIKES. The Army cannot in my opinion have a sound justification for its statement that it will be necessary to discharge 15,000 men as a result of a $36 million cut in this item, the major part of which is for travel.

Mr. VINSON. Here is the question: As a result of these cuts, the Army states it will be necessary to reduce its strength, which would average 997,000 in fiscal 1958, by approximately 15,000 men—equivalent to 1 division. The question I have is, Is this cut going to bring about a reduction of one Army division?

Mr. SIKES. If I were convinced there would be a necessity for a substantial reduction, I personally would offer the amendments to put back the money, but I am not convinced by any information which has been made available to me. I will be very glad indeed to learn any facts that can be helpful to me in this particular matter.

Mr. VINSON. May I say this. I want to state to the committee that I was advised by the proper officials last Friday that as a result of this reduction they would be forced to reduce military personnel by 15,000 and that that many men would have to be discharged.

Mr. SIKES. I say to my good friend, we have 4 hours of debate here today and probably considerable more under the 5-minute rule on tomorrow before we get through but if the Department of Defense has any figures which will show that 15,000 men must be discharged as the result of the committee action, I want to see them also.—I am just as concerned as my distinguished friend on this point. But the Department of the Army has made no information availiable to me thus far which changes my position.

Mr. SMITH of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield.

Mr. SMITH of Mississippi. I commend the committee for the effort that has been made to achieve greater economy in travel within the military services. On that point, in regard to the Army's travel allowances that have been made and the reduction which the gentleman has just been discussing, it is my understanding that the Army figures the cost of an individual soldier averages about $19 a day. With regard to these overall costs and all of the Army expenditures in travel time, has the committee taken into consideration the value of a man's time in travel? I would like to ask the gentleman if he agrees that we should make it known to the military that we expect the value of a man's time to be taken into consideration in selecting the mode of transportation to be used for movements of military personnel.

Mr. SIKES. The committee has so indicated in its discussions with the Department of Defense. The committee does feel that there are times when air travel could be used to good advantage at savings to the Government and it is not being used to the extent that it could be. I hope we have made this completely clear in our discussions with the Department of Defense.

Mr. SMITH of Mississippi. I thank the gentleman.

Mr. DEVEREUX. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield.

Mr. DEVEREUX. I would like to ask the gentleman this question with reference to the reenlistment rate. My recollection is that the report to the Committee on Armed Services was to the effect that the reenlistment rates have been increasing and that the picture looks much better now, and that is primarily because we have provided for reenlistment bonuses. As I understand the gentleman from Florida, you have reduced those funds because, according to your information, the reenlistment rates have fallen off.

Mr. SIKES. Unfortunately it is true that reenlistment rates are dropping. The figures are shown very clearly in the hearings.

We are very concerned about the fact that reenlistment rates have been dropping during recent months. That is the factor we used in making this reduction. Last year, the reenlistment figures went up very nicely and we thought we were over that hump. Now the reenlistment rate has dropped and it is difficult to assign definite reasons, although probably it is because there are many civilian jobs available at higher pay.

Mr. DEVEREUX. Does the gentleman believe that by reducing these funds, with reference to the reenlistment bonus that we may curtail some of the reenlistments?

Mr. SIKES. I do not think so. We reduced the money by the amount which

we thought would not be used. Certainly, it is not our intention to discourage reenlistments. We want reenlistments wherever it is possible to get them. The men who reenlist are those who have training. The greatest economy comes through keeping trained men in the service. The reenlistment rates are down; consequently, we believe the Army has asked for more money than it can use in this particular field if that is true. There is no point in appropriating money which will not be used.

Mr. DEVEREUX. Would there be a possibility, for instance, if we believe that there will be a need for additional money to encourage reenlistments that we can transfer any funds from the training funds—which is the crux of the whole thing—to the reenlistment fund?

Mr. SIKES. I would have no objection whatever to making any transfers within reason that will be helpful in increasing reenlistments.

Mr. DEVEREUX. I thank the gentleman.

Mr. SIKES. Now if I may proceed. I have used up much time but I do want to talk about operation and maintenance. The 1957 appropriation was $3,055,000,000. The 1958 budget estimate was $3,400,000,000. We made an actual cut of $150 million. This, I think, is where we made the deepest cut and where we may have done damage. Operation and maintenance includes all the training of soldiers, training in atomic concepts, training with modern weapons, all maintenance of facilities, weapons, buildings, everything the Army owns. Operation and maintenance money, is actually the life blood of the services. When you cripple that, you cripple the Army. The men cannot be trained if the facilities cannot be properly maintained and you soon cease to have an effective fighting force.

Let me mention at this point the matter of deferred maintenance. The service establishment, including all its posts and stations, is getting bigger all the time. The costs of repair and upkeep and maintenance are getting bigger all the time. Unfortunately, the Army has to defer some of the needed maintenance each year and the amount has now climbed to $100 million. It is like saying if your house needs to have the roof repaired this year, you are going to postpone it until next year when you hope you will have more money. By next year the leaky roof has caused a rotting of lumber within the house and the job has grown considerably bigger. There is nothing in this budget for deferred maintenance.

As this bill is written, in addition to this decrease of $150 million in operation and maintenance, there are many factors where additional costs are required for O. and M. I list some of them:

Survivor benefit, $48 million; civil service retirement fund, $85 million; transfer of aircraft depot maintenance and Army pilot training from the Air Force, $49 million; increase in classified activities, for Department of Defense, $25 million; freight rate increases, Military Transport Service, $24 million; dependent medical care program, $19 million, 6 months' training for trainees at a cost of $85 million, more than in the comparable period in the last budget year.

In other words, the cost of operation and maintenance has gone up tremendously, yet we cut it $150 million. That is a serious cut. The Army is going to be very hard pressed to live within it.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

Mr. MAHON. Mr. Chairman, I yield the gentleman 4 additional minutes.

Mr. SIKES. I promised to discuss the Reserve and National Guard. For Reserve personnel we have allowed $197 million. The Army requested $207 million. We based that cut on the fact that each year we have given to the Army more money for its Reserve program than they have been able to use, yet each year we cut the Army below the amount they estimated they could use. We gave them less than they wanted, and they spent less than we gave them. With that experience factor we felt there was no justification for appropriating all of the $207 million the Army requested.

There are now in training 255,000 men in the Reserve program. The Army wants to increase that number to 297,000 during the next fiscal year. If they are able to do that, they will need every bit of the money that was requested in this budget, and they could need even more. The Army is not going to spend all the money we gave them for the Reserves in fiscal 1957, but if we hold them to the committee figure, there is a distinct possibility that this will mean the end of the 6 months' program about September for the fiscal year. The reason is that the Army has placed so much emphasis on the 6 months' training program that it has reached strength figures much greater than those considered possible.

The completion of the training of the men now in the 6 months' training program will eat up a considerable part of the money originally planned for use during all of fiscal year 1958. I think the Army has overemphasized the 6 months' program at the expense of other programs. I do not agree with the Army's policy in taking in for 6 months' training those men who are 18½ to 26 and I do not agree with their policy of cutting back on the reserve obligations. Some of the information I am giving you now was not available to us at the time we heard the budget presentation.

Now let me say just a word or two about the Army National Guard: The 1957 appropriation was $320,162,000. The 1958 budget estimate was $320,000,000, and we allowed the full $320,000,000. We felt from the information given us at the time of the hearing on the budget that amount would be sufficient to permit the Army National Guard to maintain a strength figure of 400,000 throughout fiscal 1958. However, we have found, as a result of recent information, that the guard is in a very difficult position. Because of that we have written language into the report inviting the Army, if they run into trouble maintaining the National Guard strength at 400,000, to come back and discuss it with us in January, when we can give consideration to providing more money if it is needed.

Their problem is simply this: They have built enlistments to about 437,000 in the National Guard. However, the National Guard strength figure carried in the budget is 400,000 men for the entire year beginning July 1. Obviously, if they forcibly reduce the National Guard to a figure of 400,000 by the first of July, many men are going to have to be discharged, and the National Guard will not be able to enlist any new men after August for the entire fiscal year.

That sort of thing is ruinous to the morale of any organization and would be very destructive to the National Guard. It is the feeling of this committee that the required attrition should be brought about gradually, and that it should not be forced attrition that the drop in strength predicated upon a strength of 400,000 should be accomplished over a period of several months, and that there would be modified recruiting to permit replacement of those who drop out after the guard reaches the 400,000 level; that under no circumstance should the level of the National Guard drop below 400,000. We invite further information from the guard if additional action by the Congress is required.

Now a very brief word about research and development. The Army R. and D. program is apparently enjoying one of its highest levels of performance. It has a splendid staff headed by Lt. Gen. James Gavin. It has enisted the services of many outstanding scientists in the guided missile and other important modern fields. It is unfortunate in my opinion that the Army does not have money in this budget to continue its valuable work on the intermediate range ballistic missile Jupiter. We do have the assurance of the Department of Defense that money will be made available by the Secretary from funds at his disposal to carry on the work as long as there is justification. There will undoubtedly be question about the wisdom of a 2-percent cut of $8 million in this item. Actually, it is part of a servicewide cut intended to cause each of the services to tighten up on its R. and D. program to eliminate deadwood and unnecessary projects. There is no question but the research and development must be carried on at a level in keeping with the requirement of the times.

My last comments will be directed at procurement and production. For a number of years, as a matter of fact since the Korean war, we have utilized funds appropriated in the final stages of that war and not spent for new weapons by the Army. This year the Army estimated a requirement for $583 million in new money. However, there are available to the Department of the Army $516 million additional which the Army had planned to use in fiscal 1959. The President suggested that this money be used in fiscal 1958 although he pointed out it would be done at the expense of sound programing. Actually, to require the use of all of the $516 million will create considerable difficulty for the Army. A substantial portion of this money must come from MAP reimbursements which

will not be available until late in the fiscal year. There is a possibility that a part of it will not be available at all. Nevertheless, the committee accedes to the recommendation. For modern day procurement and production the Army needs to spend about $2 billion yearly on new weapons. This budget provides only about $1⅓ billion. Approximately one-half will go for guided missiles. They are very costly and the number to be procured is low in comparison with the possible requirement.

It would be a wonderful thing if we could safely ignore national defense. We find ourselves building great plants at Government expense, utilizing the Nation's best brains, expending literally billions of dollars each year on preparations to kill people. It is a tragic commentary on the times that 2000 years after Christ lived on earth that the world's major emphasis is still on destruction. Yet, what is the choice? Russia has every weapon that we have today. They have concentrated on some. We have concentrated on others. They have more of most weapons than we. Significantly all of Europe is now under the threat of Russia's guided missiles that are in being and in place. By the same token, all of Russia is under the threat of weapons which we can order into action instantaneously. In a strong defense lies the only sure and certain guaranty of safety from this mass destruction that man is capable of inflicting. Russia knows that the attempt to bring destruction upon the Free World will also produce destruction for communism.. By spending these great amounts for security, we hold Russia in check and give the diplomats a chance to find a way.

Let me thank most sincerely and commend most highly my colleagues and the clerk of the Army panel for their outstanding work on this bill.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 45 minutes to the gentleman from Michigan [Mr. FORD].

Mr. FORD. Mr. Chairman, on Friday you heard intelligent, competent, persuasive and eloquent remarks by my colleagues on the Subcommittee on National Defense of the Committee on Appropriations. Rather than talk to you about the overall, as some of them did, I would like to confine my remarks today to specifics in reference to the Army.

I speak as a member of the Army panel, 1 of 3 panels of the subcommittee dealing with military appropriations.

It would be unforgivable if I did not compliment each and every one of my colleagues whether I agreed with them or not. I think they are conscientious and intelligent. In my judgment, the staff members of this subcommittee have done the most able job in the preparation of this committee report that I have seen in the 5 years of my membership on this subcommittee.

I can also say that the presentation by the Army to the Army panel was excellent. It was most helpful to the Army panel.

We hear, or we used to hear, from time to time severe criticism—perhaps some of it is justifiable—about the way we run our Armed Forces. I think it is wise, however, for those who have the opportunity to see the facts to recognize the good things that have been done and to show to our colleagues the progress that has been made. I would like to talk first about the personnel situation, both military and civilian, for the Department of the Army.

At the end of the fiscal year 1953, the Army had on active duty 1,534,000 men.

On June 30, 1956, the Army had on active duty 1,024,000.

On June 30 of this year the Army will have approximately 1 million; and at the end of the fiscal year 1958, if this budget is recommended by this subcommittee as approved, the Army can and should have 1 million men on active duty. In other words, over a period of 4 or 5 years the size of the Army has been reduced one-third.

Let us talk about the civilians who are employed by the Army. On June 30, 1953, the Army employed, worldwide, that is civil service, foreign nationals, and so forth, 883,000.

On June 30, 1956, the Army employed 592,000.

On June 30, 1957, it is anticipated the Army will employ 589,000.

On June 30, 1958, it is anticipated the Army will employ 586,000.

So we can see over a span of approximately 4 to 5 years the Army has gone down about one-third in uniformed personnel and about 30 to 40 percent in civilian employees.

Let us turn now to the fiscal picture.

In 1953—that is, the fiscal year—the Army expended $16,300,000,000 plus 600 million in what we call deutschemark support. May I explain what we mean by deutschemark support. Since the termination of World War II we have had in West Germany a sizable armed force. The Germans over this period of time have reimbursed us for these forces by contributing what they call deutschemark support. They could not pay us in dollars but they could provide us with services and with supplies. As a consequence, in fiscal 1953 the Army received in lieu of dollars about 600 million deutschemarks.

In the fiscal year 1956 the Army expended $9.5 billion, plus $268 million in deutschemark support. In the fiscal year 1957 the Army expended $8.6 billion, plus about $120 million in deutschemark support. It is expected, if this budget is approved, that the Army will expend in the fiscal year 1958 $9.2 billion plus $104 million in deutschemark support.

The point I want to make, and I intend to reemphasize it during the afternoon, is that the Army has constantly improved its fiscal policies and has done a remarkably good job in tightening its belt.

Now, Mr. Chairman, let us turn to the question of unexpended balances. We hear from time to time a good deal of criticism—some of it might be justified—that many of our agencies, particularly the military, have too much stashed away some place which the Congress has lost control of and which is uneconomical and wasteful. The Army, in my opinion, has done a very competent job in the reduction of its unexpended balances. At the end of the fiscal year 1955 the Army had in unexpended balances $11.3 billion. It is anticipated, if this budget is approved, that the Army at the end of fiscal year 1958 will have reduced that unexpended balance to approximately $5,300,000,000. In other words, they have reduced their unexpended balances in a 5-year period by 50 percent.

Let us turn now to the unobligated balances picture. Again there has been criticism, perhaps justified, that the services have had too much in unobligated balances available. At the end of fiscal 1955 the Army had in unobligated balances slightly over $6 billion. At the end of fiscal 1958, if this budget is approved, the Army will have left less than $500 million in unobligated balances. And I suspect that it will be closer to $300 million in unobligated balances.

I think these remarkable improvements in the fiscal picture in the Army can be attributed to two factors: First, that Congress has been more alert to the need for closer scrutiny; at the same time, the officials in the Department of Defense, both civilian and military, have done a better job. The net result is that this Congress today has greater control over the dollars and the policies of the miltary than we have had at any time in my service in this body. My chairman on the Army panel has done an excellent job, in my opinion, in presenting the picture as far as the Army is concerned.

I would now like to express several personal views about the recommendations you have before you as they affect the Army. In the first place, we cut $36 million out of the military pay account. That is 1 percent of that account. The Army requested almost $3.6 billion. The reduction, as the gentleman from Florida [Mr. SIKES] pointed out, is 1 percent. And we did not apply the meat ax. We, I think, intelligently and constructively pointed out where those reductions of 1 percent can be made.

Now we turn to the second biggest item reduction in the bill as far as the Army is concerned, that is the account of what we call operations and maintenance.

Mr. SIKES. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Florida.

Mr. SIKES. Mr. Chairman, I wish to propound a question to my distinguished colleague from Michigan. Let me preface it by saying that his service has been outstanding on this committee, and it is typical of the very fine work he does in all of his work in the Congress. Is the gentleman of the opinion, as I am, that the cut of $36 million will not require or will not justify the loss of any uniformed personnel?

Mr. FORD. It is my opinion and most sincere view that this reduction of $36 million will not, under any circumstances, require the reduction of 15,000 in uniformed personnel for the Army. I think that the people who are saying that in the Pentagon are being a little unfair with the committee, because they know as well as we do that you cannot translate dollars of reductions in this

account precisely into personnel or the loss of personnel. And, I personally resent their attitude in trying to sell the restoration of that amount on that basis.

Mr. SIKES. And does my distinguished colleague join me in the statement that it is not the intention of this committee that any uniformed personnel be discharged as the result of this cut?

Mr. FORD. Our subcommittee specifically pointed out that we wanted no reduction in uniformed personnel, and it is our considered opinion, among the 5 of us on the Army panel, that the $36 million cut, 1 percent, does not require such a reduction.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Massachusetts.

Mr. NICHOLSON. Why do we need 1,000 generals, while we are on this subject of doing away with uniformed personnel? Was the question of the enormous amount of generals that we have taken up in the committee?

Mr. FORD. I would say to the gentleman from Massachusetts that our subcommittee does not dictate policy as to the arrangement of rank and rate within the military. That is done by the committee chairmanned by the very able gentleman from Georgia. They determine the rate or rank structure within the Army. All we do is appropriate the money for the payment of the personnel involved. We do not have the right, even if we wanted to, to legislate on an appropriation bill. The minute we try to do it, certain people rise up in righteous wrath; so we stay clear of any such action. That is the responsibility of the legislative committee.

Mr. GAVIN. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield.

Mr. GAVIN. With reference to this cut of $36 million, the Army asked $49 million less this year than last year; is that right?

Mr. FORD. That is right.

Mr. GAVIN. On top of their voluntary cutback of $49 million, the committee cut them back an additional $36 million; is that correct?

Mr. FORD. That is correct.

Mr. GAVIN. Does not the gentleman from Michigan believe that with the many responsibilities they have, with the rise in cost of clothing and subsistence, railroad freight and passenger rates, and with a full year's contribution to the social security and retirement system that that is too much of a cut? The gentleman a moment ago complimented the Department of the Army very highly. He said they had not used all of the appropriations that had been granted them, and that they attempted to present to the committee to the best of their ability a statement of what they actually will need for the coming year.

Mr. FORD. In the first place may I say this: The Army on its own, without any urging from the committee, reduced the uniformed personnel of the Army about 2,500. That brings up a rather interesting point. When the Army reduces personnel voluntarily they do not arbitrarily assign so much money per man. And yet they are condemning us by saying that if we cut $36 million, that means we are going to cut out 15,000 members of the uniformed services. The two just do not follow necessarily.

Mr. GAVIN. That may be.

Mr. FORD. So the Army actually in fiscal 1958 asked about 2,500 less than in fiscal 1957. That accounts for part of the reduction to which the gentleman refers.

Mr. GAVIN. But the gentleman who has the floor did not bring to the attention of the Committee that the Army voluntarily cut back $49 million from what they had last year. The gentleman says they are conscientiously trying to do a good job. The gentleman admits that they are doing a pretty fair job, but the Army may disagree with the gentleman on the basis of the actual strength necessary. But they did call to your attention some of the items that have increased in cost; railroad freight and passenger rates, clothing and subsistence and there is a full year's contribution to the social security and retirement system. Therefore I think that the Department of the Army has submitted a budget which they think they can get along with and if we cut them back further, after they have made a voluntary reduction of $49 million, there is a question in my mind whether they are going to be able to operate as efficiently as they should under the circumstances.

Mr. FORD. Let me answer the gentleman. This year the Army asked for $222 million for travel of military personnel. We cut them back to the level of the fiscal year 1957.

Let me give you an example of the kind of unnecessary travel we think the Army has participated in. I do not like to mention names, but let us be frank about it. For a period of 18 months the Superintendent of the Military Academy at West Point was General Bryan. He is a very competent and highly respected soldier. He was transferred from there, after being there 18 months, out to the South Pacific and given a very responsible position. He was there less than a year. Do you know where they sent him? Right back to New York City. In other words, he moved himself and his family from West Point, New York, out to the South Pacific and back again in less than a year. That is the kind of unnecessary travel about which this subcommittee says, "You stop." And we mean it. We do not condone it and we will not permit it. We will reduce the funds further if this is the kind of travel we are going to have face us every year.

Mr. SPRINGER. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Illinois.

Mr. SPRINGER. I notice that the appropriations for 1957 were $7,500,000,000. The budget request of the Army, as I understand it, was $1 billion more than that for 1958. My question is, What justification did the Army give to this committee for requesting roughly 13 percent more in the budget estimate of 1958 than was granted in the appropriation for 1957?

Mr. FORD. The answer generally falls in the area of what we call the production and procurement account; that is where the heavy procurement of guns, tanks, ammunition, missiles, and so forth occurs. At the time of the Korean war, and properly so, the Army was given substantial amounts of funds or obligational authority to handle the procurement of the necessary weapons of war. When the Korean war ended in July of 1953, they had a huge availability. Gradually over the years we have either rescinded at their initiative or at ours substantial sums. In addition, they have lived off of or used that availability. We have gradually worked it down. This was the first year since the fiscal year 1953 that the Army made any request for obligational authority for the procurement and production account.

Mr. SPRINGER. By reducing their request by $1,225,000,000 what are you cutting out? I am talking about the major items that they requested.

Mr. FORD. As I say, there is $36 million in the account that the gentleman from Pennsylvania refers to. The next one is the one I want to talk about mostly, if I may, because I do not happen to agree with what the subcommittee did. If the gentleman will let me discuss the operations and maintenance account, I will explain, I hope, where most of the money was reduced and why I do not happen to agree.

Mr. SPRINGER. The gentleman is talking about the major portion of the $1,200,000,000?

Mr. FORD. May I correct the gentleman. He is talking about the Army, Navy, and Air Force. I am speaking only of the Army.

Mr. SPRINGER. I am using the Army figures as shown on page 2 of the committee report, referring to title III, Department of the Army; $1,225,000,000.

Mr. FORD. Here is the answer to that. I am sorry. I apologize. What we have done to the extent of $400 million as far as the Army was concerned was to take unused obligational authority which was in the stock fund, $350 million in the stock fund and $50 million in the industrial fund, and transfer that to the military pay account.

Mr. SPRINGER. That is $400 million?

Mr. FORD. That is correct. The stock fund was set up 4 or 5 years ago. They capitalized all of their equipment, the supplies they had on hand. Then from that point what we did was to appropriate in this bill sufficient obligational authority for them to buy from the stock fund whatever they had to use. We put the Army on a consumer basis. The Army, because it had built up stocks during the Korean war, did not have to go out and buy new supplies. When certain elements in the Army bought from the stock funds, they simply drew their supplies from the stock fund.

Mr. SPRINGER. I believe the gentleman is looking at page 113. But is this the answer—that you took $400 million from transfer, $350 million from the Army stock funds and $50 million from the Army industrial fund; and that

accounts for $800 million of this $1,200,000,000 which is referred to on page 2?

Mr. FORD. Let me put it my way. We took $400 million by the substitution of stock-fund obligational authority. We took $104 million by the utilization of deutschemarks. We took $516 million on the recommendation of the President on the P. and P. account. We took $36 million out of the military pay account strictly on its merits. We took $10 million out of the reserve program. We took $8 million out of the R. and D. program. We took $75,000 out of the rifle-practice program and $700,000 out of the Alaska communications program. Those are the entire cuts across the board.

Mr. SPRINGER. I thank the gentleman.

Mr. WIGGLESWORTH. Is it not fair to say that the real cut, when you take into consideration the figures which the gentleman has just referred to, that the real cut as far as the Army is concerned is roughly $200 million?

Mr. FORD. That is apparently correct. If I might, I would like to talk about the O. and M. account because to me this is the most harmful reduction made in the Army.

Mr. GAVIN. Mr. Chairman, will the gentleman yield?

Mr. FORD. I will yield to the gentleman for a question.

Mr. GAVIN. Does the gentleman have many instances such as the one he referred to where there has been a transfer to certain items or are there any similar instances or is this one which the gentleman pinpointed?

Mr. FORD. That is one that I know about. I can supply for the record several others, but that is the grossest example that I am familiar with. I am sorry I must decline to yield further to the gentleman.

I want to talk about a very serious matter, I think, as far as the Army is concerned. The operations and maintenance account is, in my judgment, the real area where the Army operates. The Army requested for the fiscal year, 1958, $3,678,000,000. The Department of Defense reduced that to $3,400,000,000. In the fiscal year 1957, the Army had the authority to obligate $3,139,000,000. It would appear in fiscal 1958, the Army is going to have about $260 million more than they had in the fiscal year 1957. When you carefully examine the facts, you find that that is not accurate. In reality, the Congress primarily, but the Department of Defense to some extent, have imposed on the Army additional financial burdens which total in this account alone about $330 million. So the net result is in reality for its day-to-day operations, the Army will have on the budget submitted less money than it had in fiscal year 1957.

May I pinpoint for your information some of the congressionally imposed additional burdens in this account, burdens that the Army has to finance because we told them to. For example, civil service retirement. In this account alone, the Army will be required to contribute $72 million. Dependent medical care, additional requirement in this account alone $19 million. MSTS and railroad freight rate increases $12 million. Now that is not an imposition by the Congress, but it is something over which the Army has absolutely no control whatsoever. As I indicated before, these additional financial burdens imposed either by the Congress or the Department of Defense or the railroads or others total over $300 million.

So, in the O. and M. account, the Army in reality, on the budget submitted, would have less money in fiscal year 1958 than they had in fiscal year 1957.

I might add there is about $61 million in the O. and M. account which is an additional burden, simply because of the 6 months' trainee program. If you want the Reserve program with the 6 months' training, you have to finance it. Sixty-one million dollars of this account falls in that category.

Now what did the subcommittee do? The Army panel was unanimous that not more than $70 million should be reduced in the O. and M. account, out of the $3,400,000,000. The full subcommittee, after a fair hearing, overrode the decision of the Army panel and reduced it by $150 million. In my judgment, that was a very serious mistake, and I made reservation at the time the matter was decided in the subcommittee. Consequently, it is my intention when we read the bill to offer an amendment to restore $80 million out of the $150 million, so that we can have the operation and maintenance part of the Army where I think it should be at the minimum.

Mr. BALDWIN. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield.

Mr. BALDWIN. There was an article in the Washington Post recently stating there would be a reduction of about 50,000 civilian employees by the reduction in this bill, a part of which would be caused by the reduction in this particular account you mentioned. Would the gentleman care to comment about the accuracy of that prediction?

Mr. FORD. As I recall the statement and the comments of the Secretary of the Army, he said in this area it would require a reduction of about 20,000 civilians by the Army. I cannot pinpoint whether it will cause a reduction of 20,000 or not, but I think one of the reasons our Army panel was willing to reduce it $70 million was because we felt that the Army could reduce, legitimately, some civilians. I do not see a halo around any certain number of people who work for the Army. I think that the Army can reduce some civilians, and the $70 million we cut from the O. and M. account probably would result in a reduction of a few thousand. I have grave doubt that it would be 20,000.

Mr. MAHON. The total number of civilian employees in the Army is in excess of 500,000, I believe.

Mr. FORD. Actually over 500,000.

Mr. MAHON. So, to cut out 3,000 might well be wholesome. It would probably be more wholesome to cut 10,000 in order to get more efficiency and more for the taxpayer's dollar.

Mr. FORD. As I say, there is nothing sacrosanct about 20,000 additional employees from the Department of the Army. If they can do a better job with 10,000 less, that is fine with me. I think our Army panel has some feeling that they ought to make some reduction.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield.

Mr. CURTIS of Missouri. It is this area that those who are interested in getting the military out of business might consider, because, as I understand it, it is in the operation and maintenance account that the military have gotten the funds in order to go into these civilian activities. Am I not correct?

Mr. FORD. That is right. That is where most of the operations of a civilian nature are handled, and any reduction would be an incentive to get the Army to curtail some of the things they are doing.

I must say, however, that they have made substantial progress in the reduction of the number of bakeries, in the number of laundries, and in a number of miscellaneous activities of that nature.

Mr. CURTIS of Missouri. I agree with the gentleman. I think there is still a long way to go, but I did want to pinpoint this area.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Iowa.

Mr. GROSS. The particular subject of personnel and reduction in civilian personnel has been mentioned by the gentleman. I want to commend the committee for the attention it gave in its report to the widespread use of consultants of all kinds, particularly personnel-management consultants.

Referring to page 23 of the report, I commend the committee for bringing that to the attention of the Members, and I certainly hope they will continue to direct attention to expenditures for this purpose which in my opinion are getting out of hand.

Now I should like to ask the gentleman this: Page 21 of the report speaks of car rentals. Total vehicles proposed for 1958 with an average projected military strength of 2,800,000 is approximately 45,000 with the cost of rentals stated at $6,600,000.

May I ask the gentleman why this extensive rental of motor vehicles in the Military Establishment?

Mr. FORD. It is not in the military as such, I may say to the gentleman from Iowa, this is for the Defense Department. Our committee was concerned about it.

The Secretary of Defense was asked to submit a statement. I believe it is in the record. I cannot give you precisely the page, but there is an explanation of their part in that regard.

Mr. GROSS. In the hearings?

Mr. FORD. In the hearings some place. I think it is in the defense portion of the hearings.

Mr. SIKES. If the gentleman will yield, the Army part I think is at page 1400 of the Army hearings. We will locate the others as rapidly as we can.

Mr. FORD. I thank the gentleman. Now, if I may, I would like to proceed and mention another part of the bill

where I feel very seriously we have made a mistake.

Mr. GAVIN. Mr. Chairman, will the gentleman yield?

Mr. FORD. Let me finish my point first.

Mr. GAVIN. On that particular subject of this $150 million.

Mr. FORD. I yield for a question.

Mr. GAVIN. The gentleman stated he intended to offer an amendment to restore $87 million.

Mr. FORD. Eighty million dollars.

Mr. GAVIN. Eighty million dollars. I wondered what the differential was between the $150 million and the $80 million that warranted the committee in feeling it should restore $80 million of the cut.

Mr. FORD. I am predicating my decision on the recommendation of the Army panel. Prior to the markup of the bill the chairman of the Army panel had a meeting at which he had a number of responsible people in the Army sit down with us and discuss where we felt and they felt some bona fide reductions could be made. We went over it, and over it, and over it; and in the O. & M. area it was the consensus that if they maintained their present plant and facilities intact, including all that they closed up, laid away, and so forth, they could not afford any reduction.

But then under interrogation by the chairman and questioning by others it was brought out that if they put the screws on and disposed of some of these plants and facilities, posts, plants, and stations which are closed up, they would not have the same financial burden in fiscal 1958 as they had contemplated.

It was further brought out that the military has a tendency once they get something, a plant, a post, a camp, a station, or whatever it may be, they just feel they cannot give it up even though it is not being currently used.

It was the considered opinion of a high-ranking, responsible official in the Department of the Army that a cut of this nature might be the one thing that would force the Army to get rid of some of those plants which they really think they ought to dispose of. On that basis our subcommittee recommended a reduction of $70 million. I think it is a bona fide, legitimate cut.

Now, to tell you where I think we made a mistake, I refer to the research and development program for the Army. Here is the picture: During fiscal 1957 the Army will have for obligation and will obligate $418 million for research and development.

In fiscal 1958 the Army wanted $590 million. In the fiscal year 1957 they are going to obligate $418 million. The Secretary of the Department of Defense authorized $400 million. Our subcommittee, despite the adverse recommendation of the Army panel, reduced this $400 million by $8 million.

Here is the situation: This year they are going to obligate $418 million. The committee recommends a reduction of $8 million below the $400 million. So there is 18, plus 8, which is $26 million and, in addition to that, for the first time in the fiscal year 1958 the Army Research and Development program will have to absorb the civil-service retirement which in this instance for some 13,000 employees will total $9 million. So in effect for research and development in fiscal 1958, if this reduction stands, you will have $35 million less next year for the Army to spend than they have this year.

Let me point out a fact which I think is disturbing. For the last 4 or 5 years this country, and rightly so, has been really pushing the development of our ICBM and our IRBM. We spent millions of dollars. About 2 years ago we first started to hear about the development of the antimissile missile, which is the missile that is going to pick up, seek out, and destroy the ICBM and the IRBM. That is quite a job. The ICBM travels 15,000 miles per hour, and it will go 5,500 miles, it will go to a height of some 300 miles. It can carry an atomic or nonatomic warhead.

About 2 years ago the Army decided something ought to be done to lick the problem. They started some research and development on it. They have spent altogether, I would say, about $20 million so far. The Army in fiscal 1958 in R. and D. wanted to spend slightly more than $20 million for the antimissile missile program. So when they had the reduction from $590 million down to $400 million they had to cut that antimissile missile program from slightly over $20 million down to $12 million. If you impose an additional reduction, it is logical to assume we are going to have a further reduction in this program. I think it is very serious. Right now the antimissile missile program is not current, so to speak, with the ICBM and the IRBM program. What I think we ought to do is to expedite the antimissile missile program. Let us get caught up so we do not have this hiatus of a few years where you are literally unprotected from the ICBM and the IRBM. It is my honest opinion that this reduction of $8 million will have some impact on that program.

Mr. ANDERSON of Montana. Will the gentleman yield?

Mr. FORD. I yield to the gentleman from Montana.

Mr. ANDERSON of Montana. Can the gentleman tell me where in the appropriation of money for the Army they have the Jupiter missile?

Mr. FORD. There is no money in fiscal 1958 in the Army R. & D. for the Jupiter. As the gentleman undoubtedly knows, the Army is only funding in fiscal 1957 for the Jupiter program. In the testimony it has been brought out by a number of members of the subcommittee that any funds for the Jupiter program in fiscal 1958 will come out of either the emergency fund that the Secretary of Defense has or will come out of the transfer authority which the Secretary also has under his control. So that the Jupiter program, if we can rely on the people in the Department of Defense, and I am certain we can, will not be hurt in fiscal 1958. Of course, I assume the gentleman knows it has been decided that sometime early in fiscal 1958 there will be this great decision whether we are going to proceed with Jupiter or with Thor. Thor is the Air Force IRBM program.

Mr. ANDERSON of Montana. In your judgment, since the Army is going to continue the development of Jupiter and since we know this is going to take another $25 million, might it not be a good idea if this Congress put into this appropriation bill the $25 million so that we would know that Jupiter would be properly developed by the people who are now working on it?

Mr. FORD. No. I cannot agree with the gentleman, because under the bill the Secretary of Defense, and rightly so, has $135 million in either emergency funds or transfer authority for anyone of the three services, so if one of the services needs additional funds for something, where there is a breakthrough, they can go to the Secretary of Defense and get whatever is necessary out of that $135 million.

Mr. ANDERSON of Montana. I thank the gentleman.

Mr. FORD. As I have indicated, the Secretary of Defense or his assistants have promised the committee that the Jupiter money for fiscal 1958, which I think totals about $35 million, will be available out of that emergency fund.

Mr. SCOTT of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Pennsylvania.

Mr. SCOTT of Pennsylvania. Am I correct in understanding that the only antimissile missile program is the one which the Army is engaged in and that neither of the other services has anything to do with it, and therefore if this program is too seriously contracted, we simply fall back in our schedule with the entire Army forces antimissile missile program?

Mr. FORD. It is not fair to say that the Army is doing the whole job in the antimissile missile field, but I think it is reliable to say that the Army is doing 90 percent of it.

Now, if I might take a few minutes to discuss the problem on which I wrote minority views in the subcommittee report. If you will turn to pages 108, 109, and 110 of the subcommittee report, I would like to discuss with you, if I may, the minority views that I have expressed concerning the language in the bill. In the bill on page 8, lines 2 through 6, there is language which I think is detrimental to the Army program expense in dollars, and inefficient in the utilization of personnel. That language in the bill, and it exists in law today, forces the Army to keep two hospitals open, one in Waltham, Mass., called Murphy Army Hospital, and another called Army and Navy Hospital at Hot Springs, Ark. In my judgment, that language should be stricken from the bill. I intend to offer such an amendment, and if the language is stricken from the bill and the hospitals are closed, the first year's savings to the taxpayers will be $746,000 and the annual savings each year thereafter will be $1,043,000 plus the fact that you will get more economical, efficient utilization of not only your civilian personnel but also your military medical personnel.

Mr. DONOHUE. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Massachusetts.

Mr. DONOHUE. I am wondering if any evidence was submitted to the committee that would indicate how this saving could be accomplished and still take care of the dependents of the many, many thousands of men from New England who are in the services.

Mr. FORD. There was ample evidence submitted in the hearings, I would say, and in my minority statement I refer to the various pages. In the Army hearings it is on page 884 and related pages, and in the Department of Defense hearings it is on page 479 and pages the follow. But, if the gentleman will let me proceed with my comments, I will be glad to answer any questions after I have finished, because I think it is a story that ought to be related in sequence. What are the facts? You have a hospital in Waltham, Mass., which was built in 1943 and 1944 called Murphy Army Hospital. It has a normal bed capacity of 450 and is expandable to a bed capacity of 525. It is of the emergency or cantonment type construction. The hospital in March of 1957 had 91 beds used out of 450. The fiscal year average of bed occupancy was no more than 95 out of a normal capacity of 450 and an expandable capacity of 525.

Let us see how many personnel were employed to take care of the 91 people who were in beds in March of 1957. They employed 183 civilians and they had 213 military personnel for a total of 396 military and civilian personnel taking care of patients who occupied 91 beds.

Let us look at another aspect of this problem. The Army has wanted to close this hospital since the fall of 1953. In the appropriation bill for the fiscal year 1954 our subcommittee took the money out. On the floor of the House, my good friend from Massachusetts, Mr. DONOHUE, offered an amendment to put the money back and to keep the hospital operating. We were swamped by those who said that we had to keep the hospital open. The amendment was approved, the money went back in, and ever since the hospital has been operating.

The Army has consistently felt that it ought to close this hospital and a year ago the Army said, "What we want to do now is to move the New England Division of the Corps of Engineers out of Boston to this hospital after we have closed the hospital up for patients."

In other words, they would not abandon the structure, they would simply substitute the Corps of Engineers personnel for the patients. It is interesting to note that today the Corps of Engineers is paying in the Boston area $193,000 a year for rent. And we have a hospital operating at Waltham, Mass., with 91 patients and 396 people to take care of them. What the Army wants to do is to close the hospital and move the Corps of Engineers up there. They say it will save over $500,000 a year after the process is completed.

I know some people are going to say that if we close this hospital all the soldiers, the other military personnel and their dependents in the Waltham area will not have any place to get medical care. Let us look at the facts. Within a radius of 15 miles there are 2 military hospitals, one at Chelsea, Mass., run by the Navy; it has a normal capacity of 887 and an expandable capacity of 1,271. In April of 1957 they had 538 beds used. So the hospital is using only five-hundred-some beds out of 887.

Let us turn to the other hospital, within 15 miles of this one, the one at Fort Devens, a pretty sizable Army installation. I remind you that this is another hospital within a few miles of this Murphy Army Hospital.

Mr. PHILBIN. If the gentleman will yield, I would like to correct the gentleman about the mileage. Fort Devens is more than 15 miles away from Murphy. I know the gentleman wants to be fair. They are 40 or 45 miles away from the Boston area. That happens to be in my district, and I know what I am speaking about.

Mr. FORD. If the gentleman tells me that is right, I agree with him, but according to the information the Army gave me it is within 15 miles.

Mr. PHILBIN. It is 40 or 45 miles away.

Mr. FORD. Anyway, Fort Devens Hospital is a maximum of 40 miles away.

Mr. PHILBIN. Further, Murphy General Hospital is the only hospital that is serving military personnel and their dependents in that area. If military personnel and their dependents were to require medical service in a general hospital, they would otherwise have to go all the way down to the Valley Forge Hospital in Pennsylvania.

Mr. FORD. Let me just clarify the situation. Here is an Army hospital at Fort Devens. It has a normal capacity of 929 and an expanded capacity of 1218. Do you know how many they had in the hospital in April of 1957? They occupied 118 beds, one-tenth of the capacity. In other words, you have two military hospitals that are not being used to capacity within a limited distance of Murphy Army Hospital. If this hospital were closed down it would save the taxpayers five-hundred-odd-thousand dollars per annum.

In addition, in 1956 the Congress, and rightly so, passed the dependents medical care bill, so that any soldier, any wife of a soldier, or any children of a soldier can go to their own civilian doctor and to their own civilian hospital. So if this Army hospital were closed in Waltham, Mass., if they did not want to drive to the Chelsea Hospital, where only about three-fifths of the beds are occupied, or they did not want to go Fort Devens, where only 1 in 10 is occupied, they could go to their own hospital in Waltham or their own doctor in Waltham.

The net result is this: We are being asked in this Congress to keep a hospital open that was of an emergency type construction at an additional extra cost to the taxpayers of $500,000 a year. It is the grossest case of extravagance and inefficiency I have ever run into in my period of service in this Congress.

If you want to agree with the President, if you want to agree with the Secretary of the Army, if you want to agree with the Surgeon General of the Army, if you want to agree with the Hoover Commission all you have to do is vote to strike out this language. Believe me, if you want to have the sympathy of the taxpayer, if you want to do away with the grossest extravagence I have ever run into, the most willful misuse of Federal funds, I urge you with all the conviction I have to vote to strike this language from the bill.

Mr. DONOHUE. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. DONOHUE. Mr. Chairman, the most immediate answer to the minority report filed with the appropriation bill regarding the closing of Murphy General Hospital at Waltham, Mass., is to remind ourselves that the Appropriations Committee, who have repeatedly, over these past 4 years, listened to all the evidence and thoroughly studied the background and history, are again recommending approval of the comparatively small amount involved. Let me also remind you that on two occasions the committee apparently found it necessary to rebuke the military officials rather sternly and strongly criticized them for not making a wholehearted effort to operate the hospital in a proper manner and in accord with the expressed intent of the committee and the Congress. This unfortunate attitude was reflected upon the enlisted personnel and dependents and the officials have been accused of unduly restricting and discouraging treatment at the facility.

From January 1, 1953, through April of 1954, the record shows 5,313 patients admitted; the average daily patient census was 437; average number of beds occupied 320; laboratory-service procedures performed, 143,908; 14,442 X-ray services were administered, and 59,705 outpatient visits were made; these are but a few of the fundamental figures demonstrating the vital need of the area for at least restricted hospital service and treatment.

These are some of the basic facts which inspired the committee to make their conscientious judgment. I think there are few, if any, who do not feel that the members of this Appropriations Committee, after burdensome hours of hearings and diligent study of evidence, have set a historical precedent in patriotic protection of the financial interests of our taxpayers. I know you join me in congratulating them for their unparalleled accomplishments.

With respect for truth and with regard for your obligation, I want to emphasize that this is no attempt, on my part or on the part of any other Member here, to continue a district activity for any practical selfish reason. As a matter of fact, and so far as the area economy might be affected, it would seem more beneficial locally to accept the military recommendation instead of the committees' because of the greater number of personnel the military say they plan to use in the facility. However, in my humble opinion, there are much deeper and more serious questions of national preparedness and moral principle involved.

One of those urgent questions is whether or not, in the event of war, this hospital unit is a vital part of the military-hospital network needed to adequately fulfill the military obligation. The answer to that question appears simple and obvious. The record shows that in the war year of 1942 the military themselves requested and recommended the erection and use of this permanent modern type installation where it now strategically stands. This hospital is the only general hospital within the New England region and has been serving the population of that whole area; the next such hospital is at Valley Forge, Pa. This plant is admittedly ideally accessible by train, plane, and automobile. It is advantageously located next to one of the greatest and most renowned medical centers of the world. The New England area is among the very highest, if not the highest, potential military recruitment sections of the country in time of peace and in time of war. The expansion of military bases at Limestone, Maine, and at Otis and Bedford Air Fields in Massachusetts, with accompanying military-housing construction, is constantly bringing an ever-increasing military population to our area, thus projecting an ever-higher potential of military medical requirements for service people and dependents; these are undoubtedly reasons, and they still exist, why the military officials originally recommended the hospital. In this striking respect, the present officials have never pretended that it was a mistake to build it in the first place or flatly stated that it would not be of essential need in case of emergency. If and when they forthrightly would do so I would be personally inclined to accept their sincerity but I do not think they will ever dare. They would like us to forget, but the committee did not forget, their unhappy and unfortunate planning that resulted in the economic fiasco of closing the hospital just 2 months prior to the outbreak of the Korean war. Needless to relate they were forced to reopen it at tremendous and unnecessary cost to the American taxpayer. In view of the tense atmospheres existing in the world today, I think it is quite reasonable to question, and the committee did question, whether their judgment can be any better now than it was when they made that mistake.

The military people tell us that they can use and vitally need the hospital space for transfer of units of the Army Engineer Corps and Air Force. On the other hand, and in contradiction thereto, authoritative advice furnished me from sources associated with the Boston Army Base indicates there are over 400,000 square feet that could be used by these units at a cost of approximately 35 cents per square foot for maintenance whereas the comparative cost at the hospital would approximate and could well exceed as much as $1 per square foot. The military have never replied to questions about the Army base space nor revealed their plans for use of the space. It seems obvious to me, and I personally would certainly have welcomed it, that they should have made full and complete disclosure of this matter if their motives were clear.

Let me remind you the President himself has expressed his concern over the vital necessity of improving military career incentives to prevent the large military turnover involving staggering training costs for repeated short service enlistments. The Secretary of Defense also expressed himself in this matter and I quote as follows: "Medical care for dependents is one of the strongest inducements for servicemen to continue in a military career. Yet, today approximately 40 percent of our military dependents cannot be given medical care through service facilities. This is one of the major obstacles in our efforts to enhance the attractiveness of military service because it affects the wives and children of servicemen directly." That is his statement.

Mr. Chairman, I certainly do not have to emphasize here that despite possession of the most advanced weapons, the only true measure of the fighting efficiency of any military unit is the height of their morale. In my judgment, the duty of the Congress is to exercise every effort to insure the maintenance of the highest possible morale among our military personnel. It is impossible for me, then, to understand how we can meet that duty if we cooperate in a military gamble involving adequate military medical treatment to members of the Armed Forces and dependents within a large area of the country and to which they are morally and legally entitled. Especially is it difficult for me to understand, when this gamble was proved wrong on the one occasion that it was tried.

I would rather recommend and implore the officials of our armed services to patriotically and dutifully concentrate their efforts upon the elimination of the frightening and staggering waste and extravagance as repeatedly revealed by subcommittees of this committee and the Armed Services Committee. The only gamble involved in that wholesome objective would be a substantial profit and saving to the burdened taxpayer. It appears from the facts of this sorry and unhappy record that some military officials are unwittingly overlooking the certain savings to the taxpayers by scrupulous correction of admittedly existing extravagant and wasteful methods of procurement and inventory and are more intent upon gambling with military morale and military career incentives for the sake of a very dubious and comparatively small reduction in our medical program.

The only attempted answer of the military to these grave and serious considerations is the unproved and untried contention that the Military Dependents Assistance Act provisions authorizing private medical treatment for dependents will take care of the situation with an accompanying financial savings. Now these people know, but they would like to have it overlooked, and I know that their own testimony before the Appropriations Committee discloses they themselves have requested funds to take care of expected private medical treatment based on the conservative cost of $50 per day to the Government whereas an extravagant cost of military medical treatment is based on a range of $20 to $26 per day—Navy appropriations, page 888. Now do those authoritative figures sound to you like anything that has even the vaguest promise, not counting the cost of the redtape, of a potential savings to the taxpayer; I rather think not.

The record shows that Murphy General Hospital was originally and wisely recommended by the military as a vital war unit and it proved it's worth. It was closed once and that proved to be a serious mistake. It is located outside the main target area of military installations in the Boston vicinity and it's type of construction affords maximum protection against bombing attacks. Chelsea Hospital, suggested as an alternative, is 120 years old and located in the midst of a heavy industrial section. Murphy was built in 1944, comprises more than 90 acres and has plently of room for expansion. To replace it today would cost about $20 million. I, and many others, have earnestly suggested that this location and space be fully utilized by building expansion which could then provide an ideally situated combined service hospital which could adequately take care of the military medical needs of the whole of the New England area under the best possible conditions. Regretfully it seems no official comment or exploration of this sound practical economic suggestion has been made.

It appears that these current military officials would rather take a reckless gamble with military morale which they cannot justify on the record, cannot demonstrate to be economically wise, which once proved a sorry error and the alternatives to which they cannot adequately answer.

In my most earnest judgment, the question of the wisdom of the moral, patriotic and economic gamble is the fundamental issue involved here and on that question I ask only the individual conscientious action of the Members of this House.

Mr. MAHON. Mr. Chairman, I yield 30 minutes to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Chairman, as most of you know, I serve on the Army panel of this subcommittee. You have heard me in these debates on these appropriation bills for a number of years, and you know that under no circumstances if I thought there was even going to be remote damage to the Department of Defense or to the Army or to any of the other branches of the service, would I be in favor of this bill. Since I have been on this committee since 1944, for 10 years, I have been a big Army, a big Navy and a big Air Force man, and under no circumstances would I let you put a glove, if I could stop it, upon the Marine Corps, and you know why. That being the case, let me direct your attention to the members of this subcommittee for defense. These men have been on this subcommittee for from 10 to 25 years. Just look at their names:

Mr. WIGGLESWORTH from Massachusetts.

Mr. SCRIVNER—POP SCRIVNER from Kansas who is proud of the fact that at one time he was an old National Guard

Infantry captain—that is 100 years ago, about.

Mr. FORD from Michigan.

Mr. MILLER from Maryland, a colonel in the Reserve in two wars.

Mr. OSTERTAG from New York who has been with us for many years on this committee.

Mr. MAHON, from Texas, the chairman and ranking member of the full committee and chairman of the Air panel.

Mr. SIKES, from Florida, who came to us from the Armed Services Committee where he served for years and who is now Army chairman of our committee.

Mr. NORRELL, from Arkansas, one of the ranking Members of the House of Representatives.

Mr. WHITTEN, from Mississippi, who served on this committee during the war.

Mr. SHEPPARD—the Admiral—from California, who came to this committee from the old Navy committee before unification.

Mr. ANDREWS, from Alabama, who served for 10 or 12 years on the Navy panel.

Mr. RILEY, from South Carolina—a legitimate South Carolina colonel.

Mr. Chairman, there is nobody in this country from the White House down, who is more concerned and more experienced—with deeper feeling and understanding of this defense bill than these men. They do not say their work is sacred; that there is not an element of give and take here—there always is. This is no more sacred and certainly this bill is not any more sacred than the budget itself. Let me remind you, Mr. Chairman, there is no budget for any department or any bureau in this Government for the last 150 years regardless of what administration was in power, no matter who the President is, that this Congress cannot cut and has not cut including the Department of Defense. We were not all in complete agreement, but for the purpose of bringing the bill to the floor we were. I will speak for a few minutes on the Army bill only.

I agree with much of what my friend the gentleman from Michigan [Mr. FORD] has said. I am especially concerned with the cut in the Army bill for research and development. That is what you will hear referred to as R. & D. In my judgment, one of the greatest soldiers, one of the greatest generals who ever served in the uniform of this country, Lt. Gen. Jumping Jim Gavin—and of course he comes from Pennsylvania—is Chief of the Research and Development. I am no long-haired scientist. But, by the way, neither are you. I believe this cut will not destroy the Army; it will not put research and development of the General Staff out of business; blood will not be dropped because of this $8 million cut; but balancing all of the equities we, who feel closest to the problem are convinced, and we offer you our sincerity and our belief, that that cut should be restored.

Mr. Chairman, at the proper time I shall make an effort by amendment to restore that cut, and the gentleman from Michigan [Mr. FORD] and some of my colleagues are in agreement with my attempt.

You heard one of the most eloquent—and eloquence can be predicated upon its mere simplicity and strength—you heard one of the most eloquent addresses that I ever heard made by the gentleman from Texas [Mr. MAHON]. I was impressed. I am sure you are in the same position. I know that you were impressed. The main argument for the reason for the cuts, and the value of them, he made, and I shall not attempt to gild the lily.

Let me tell you this, that yesterday I had occasion to go to my home State and to make a memorial address at the dedication of a Grant memorial to our guard division, the famous Bloody Bucket of the 28th Division of Pennsylvania. We have battle stars and battle pinions on our standards, and casualty lists from every war and every battle all over the world since the beginning of this Nation from the Revolution to the last one. We feel we have a right to speak. There a ceremony, born from the War Between the States, but now a memorial not just for Yankees, but to all dead of all our wars, and when the division band began to play very softly the old World War I song, "My Buddy," and before these rows of crosses, behind which stood a young girl with a wreath to place as the unit numbers were called, you saw in the best American tradition the belief in this Nation of a strong and inviolate Department of Defense. You must look forward with belief to a plateau of perhaps 10 years when your defense budget will not vary a half billion dollars one way or the other from the one you will pass on Wednesday. If you look forward to the continuance of gigantic cuts of a dozen billion dollars in the Defense Department for the next 10 years, forget about it; it is not going to happen.

And if you look for reduction in taxes hopefully predicated upon that expectancy, abandon it, it will not happen. Knowing the facts, there is nobody in this country who wants it to happen—knowing the facts. Those who do simply do not have the facts.

Let me point out to you that there is nothing even though you have as the motto of your country "In God We Trust"—there is nothing unless you have a private pipeline to the omnipotence which is going to guarantee this civilization and this Nation perpetuity any more than it was guaranteed to Greece, or Rome, Turkey, or other empires of medieval times.

A great historian once said that as a nation approaches its middle age it must remember its early years and be as strong and as brave; and this Nation in our history is approaching that time.

I would like to make one comment at this time outside the Army, a comment on the Air Force. Many of you know that from the beginning of these hearings this year and for the past 2 years I have been making the statement in behalf of the Army that there does not exist and there has not existed for the past 2 years, and I charge it does not exist today, an adequate airlift to transport Army atomic and air divisions to theaters of operation throughout the world. Against that broad indictment that I make you have to the contrary every member of the Joint Chiefs of Staff, including, believe it or not, the Army. If you are concerned, you politicians, with getting unanimity of action, I refer you to the Joint Chiefs of Staff. There is a classic example of unanimity of action on anything: You scratch my back and I will scratch yours. "Give me atomic carriers," says the Navy, "and you can have your B–52's in the Air Force." I do not know why General Taylor is going along, because I have never been able to find anything that the Army is getting out of the deal.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from Oklahoma, of course.

Mr. EDMONDSON. I wanted to state to the gentleman that I share with him completely and wholeheartedly the apprehension he expresses about the absence of facilities to transport large numbers of men through the air in our present defense picture; and the pitiful thing about it is that the public very recently was subjected to a large dose of propaganda to the effect that we were going to build this C–132 and provide this capacity. Then within a matter of days after the public had been deluged with all that publicity it was announced in a very quiet way that they were abandoning this program on the C–132's.

Mr. FLOOD. The gentleman is quite right about the $150 million mistake by the Air Force. With money running out of their ears, that to them was a mere bagatelle, only $150 million, to them only a mere parenthesis.

But on this question of the Air Force we had every member of the Joint Chiefs and the top civilians, from Wilson down, at the Pentagon. Now, I want you to know what they said. We have it. I am a lawyer. I am no 4-star general, I am not the Secretary of Defense, but I have been around here a long time. I have talked to people in the Army and the Air Force who do not dare stick their necks out. I would not dream this up. This is no dream. I have been at this thing for years and I have reasonable cause to say what I will say. I say to you, Mr. Chairman, that the reason we could only take 3,000 men into Sicily in our first air junket was because we did not have the aircraft to take any more men of the 82d Division into Sicily. We could only jump with 3,000. The only reason we could not take any more men when we jumped into Salerno was because we did not have aircraft to jump more. The only reason we did not take a greater number was because we did not have sufficient aircraft.

I say to you, it is my considered judgment for what little it is worth that if the necessity arose tomorrow to take one Army division to the Far East and tomorrow afternoon one Army division to the Suez or that area—and do not forget the necessity will rise in two theaters at once, for if the enemy hits he is going to hit in the East and he is going to hit in the West on the same day—there does not exist not alone enough aircraft, transport craft, to take one division to the East and one division to the West, but, Mr. Chairman, it is my considered judgment there does not exist sufficient aircraft to take one Army division to one

theater of operation inside of 30 days and maintain it and keep it there in a supposedly modern air war.

Mr. SCRIVNER. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. To the gentleman from Kansas, who knows more about it than I do, I yield.

Mr. SCRIVNER. I do not know that I know more about it but I would point out one statement that can be found starting on page 27, part I of the hearings which shows to my satisfaction that the airlift today is 10 times what it was in World War II and it is adequate for the present military war plan.

Mr. FLOOD. That it is 10 times greater than it was in World War II there is no question. It is probably 100 times greater than it was in the War of 1812. That has nothing to do with the case tra la. I am talking about tomorrow afternoon. We do not have the aircraft. You are going to call upon certain civilian components, you are going to call on the commercial airlines to give you their aircraft, you are going to take these plushed up modern jet jobs, but you cannot take any more than an advance echelon with the hardware they carry on their shoulders. You will put them down in a desert with rifles, some antitank weapons and food enough for 5 days. Then I have the word of Admiral Radford, Chairman of the Joint Chiefs of Staff, that he is going to supply these Army divisions only, all over the world for the next 30 days, by sea lift. The Admiral did not say what war. Why, you know the fiasco at Suez when the British and French struck there. They laid an egg because they did not have what was necessary. They did not have the aircraft and their success at Suez was not the result of diplomacy or failure, it was a lousy job. That is what the trouble was.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. It seems to me ABC economics, if we did have an airlift, or the capacity in the air to transport these troops to danger points at very short notice and within a very short period of time, it would be possible to effect these cuts in the personnel of our services which a lot of people would like to see and still preserve the effectiveness of our striking power at a much more reasonable cost than today.

Mr. FLOOD. Now, this is the first time since we have been together in the House that I have disagreed with the distinguished gentleman from Oklahoma. I want to point out to you that it is the current opinion in the latest scientific periodicals that so-called pushbutton missile warfare is not going to reduce the number of uniformed bodies in the armed services. On the contrary, you will have to have more of them.

Now, let me add this. Do not forget the human element, the man. There is no scientist in the world today who has been able to make a man, and you cannot substitute with bombers and guided missiles manpower. You cannot take the place of a man, with his heart and his soul and his intelligence and his judgment. Do not forget that.

You talk about what is the lead time on bombers. Three years. What is the lead time on IRBM and ICBM or SRM? Three years, 5 years. Let me point out to you, Mr. Chairman, that the lead time on a fighting soldier is 18 to 20 years. That is the lead time it takes to make a man for the infantry or the Air Force. Do not worry about the lead time for making missiles. You have a more important element and a more important problem for which no scientist can make a substitute. This next war, God forbid, is not going to be a pushbutton war where robots are going to take the place of men. No. Always, as I say, you are going to have an Army regardless of bombers or missiles. You must have an Army to go in there and fight and hold, and in any war in the past or any war in the future, the Army is the queen, and they will fight.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from West Virginia.

Mr. BAILEY. Does the gentleman not think that we should give some attention at the present time to the proper training of the men who are going to operate these machines?

Mr. FLOOD. I think you have in the Army of the United States today and the Air Force and the Navy the best-trained and best-uniformed and best-paid and best-fighting men that you have or ever will have in any country. I cannot agree with the gentleman about the training.

Mr. BAILEY. The gentleman does not think it is necessary to train these uniformed personnel adequately to operate these powerful engines of destruction?

Mr. FLOOD. Of course, they must have training, and they will get more. I am not concerned about training. If I was, I would be the first to speak, and you know that. No. Do not worry about that. Whether we can keep them or not after we train them I do not know.

Mr. BAILEY. The answer probably is to build more school buildings.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. I want to correct an impression the gentleman apparently received that I was supporting drastic cuts in personnel of our Army, Navy, Air Force, and Marines. I am in agreement with the gentleman that we must sustain those forces and maintain them at a high level. What I was trying to make clear was that the effectiveness of the man in uniform would be multiplied several times if we had the Air Force to transport them to various places where needed.

Mr. FLOOD. The gentleman has been reading my speeches. I agree with you.

Now, I would like to direct my remarks to one phase of the Air Force bill, although it comes under the general heading of defense as well. One of the most controversial phases of our entire Defense Department is the Military Air Transport Service known affectionately as MATS. Now, Secretary Wilson and the other civilian Secretaries came to us in the last 2 or 3 years and they have been sending us vast lists of where they are putting the Government out of competition with private business. Now, everybody on the appropriations subcommittee for defense is in favor of that. We have eliminated popcorn machines and shoeshining machines; we have eliminated beauty parlors; we have eliminated all kinds of paint and other factories. So we are consistent with the best wishes of a businessman's administration for whom our heart bleeds in putting the Government out of competition with business. I am for that. Everybody is for that. And we did it. And yet here, in this Military Air Transport Service—and it is not chickenfeed—you have the United States Government in competition with commercial airlines by at least $500 million a year.

The commercial airlines are no great friends of mine; because, when I served on the Appropriations Subcommittee for the Department of Commerce, with the gentleman from New York [Mr. ROONEY] we went to bat to cut out their subsidies. So I am not a very popular fellow with them, either. And we succeeded in doing it. They can use their own money. This House did it.

But if you want to take the Government out of competition with business, and you mean it, here is where you can do it, providing, in the course of it, you do not even indirectly endanger the national security or the national defense by interfering with the operations of the Air Force. If you do that, then I am against it. But my information is that you do not, if you exercise merely the rule of reason; that the Air Force should control their aircraft and have as much of it as they need, where they need it, and when they need it. I am for that. But you can have a reasonable difference of opinion as to what constitutes how much and when and where.

We believe that in the best interests of national defense, a greater amount of military traffic, cargo and people, should be contracted for by the Department of Defense with commercial air carriers. Why not? If they cannot carry them, then do not give it to them. If they cannot buy their aircraft and maintain them properly, then do not bother about it. But if they can, if they will buy their own aircraft and maintain them and fly them safely and more cheaply—and for the purpose of emphasis I repeat "more cheaply," much more cheaply than the Air Force—then if those facts are correct, it is difficult for me to understand why these commercial airlines, businessmen in a business administration, great contributors, should not have a reasonable opportunity to engage in that transportation.

Last year this subcommittee, after an exhaustive examination, and again this year with a special investigation and long hearings, 610 pages of hearings on this question, had this to say. And I would like to have the chairman reaffirm the language which was the gist of a 2- or 3-page statement we made last year, because I do not want the Air Force on July 1, if this language is not in the report or in this RECORD, to pretend that

we forgot about it. This is the language from the Hoover Commission report and it is the language from the committee's and Senate report of last year. I shall read it and I hope that the gentleman from Texas [Mr. MAHON] will agree that again, for the purpose of emphasis if for no other reason, and to protect our flanks, the language be reaffirmed. This is the language:

> The Government should to the greatest extent practicable adjust its use of air transportation so as to use existing unutilized capacity of United States air carriers (H. Rept. 2104, 84th Cong., 2d sess., p. 46).

What in the world is the matter with that, and who possibly could object to it? For that reason, because of his sound judgment, I am sure the gentleman from Texas would concur.

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from Texas.

Mr. MAHON. As I understand it, the gentleman from Pennsylvania is suggesting that we agree that our view and our statement in the report of last year for the current fiscal year for the defense budget with references to MATS is still the view and opinion of the committee. I believe the view and opinion of the committee is still as we expressed it in the language we used in the report last year. I wish to assert very strongly that it is my own view that we should favor civilian aircraft as long as we can do so without jeopardizing the necessary military air transportation. I strongly support and reaffirm the language in the report last year in regard to MATS and I have so notified Air Force officials.

Mr. FLOOD. The highest form of compliment I could pay to the gentleman from Texas is to say I could not have said that better myself.

The very distinguished gentleman from Texas [Mr. MAHON], who is the chairman of the Defense Appropriations Subcommittee and floor manager of this bill, has clearly expressed the sense of our committee and I know that we all expect the Defense Department to reduce its expenditures on MATS and other Government-owned air transport activities and devote these funds to making far greater use of United States air carriers.

More extensive use by the military of United States air carriers, as is being directed by our committee, will result in considerable net savings to the American taxpayers, as well as a reduction of Government competition with private taxpaying business.

Mr. MAHON. Mr. Chairman, I yield such time as he may desire to the gentleman from Georgia [Mr. VINSON], chairman of the Committee on Armed Services.

Mr. VINSON. Mr. Chairman, we have before the House today a bill authorizing the appropriation of some $33,541,225,000. According to the report of the Appropriations Committee the budget estimate has been reduced by $2,586,775,000, and the recommended appropriation of $33,541,225,000 is $1,157,298,000 below the amount approved for fiscal 1957. Of the $2,586,775,000 reduction, the report states that the amount of $1,996,775,000 represents a direct reduction in the defense budget, and $590 million is a reduction in funds appropriated in prior years, but currently available to the Department for obligation and expenditure under stock and industrial fund operations.

Mr. Chairman, no Member of Congress, no member of the Joint Chiefs of Staff, no President or former President, in fact no living person can state with certainty that this bill contains a sufficient amount of money to assure our national survival—nor can anyone state with certainty that it endangers our security.

But I, for one, refuse to allow our national security requirements to be determined by a dollar sign. Our way of life, our standard of living, our freedom, all that we own, all that we hold dear, depends upon our ability to withstand the onslaughts of those who would deprive us of these benefits.

If I thought that our survival depended upon a much greater annual defense expenditure, I would not hesitate to vote that amount of money because I will not allow the dollars to blind me to the inestimable value of freedom.

But, Mr. Chairman, unfortunately there is not one of us in this Congress, or out, who can state with certainty that we are acting wisely or foolishly in our attempt to determine the necessary appropriations for our national defense for the next fiscal year.

Thus, we must depend upon the combined views of many people—the President of the United States, members of the Joint Chiefs of Staff, the Secretary of Defense, the Director of the Budget, the members of the Appropriations Committee, and finally, but most important of all, the decision of the Members of Congress. Only the years that lie ahead can answer the question as to whether or not this budget is adequate.

The report from the Appropriations Committee emphasizes the fact that the Soviet Union is closing the gap between the United States and Soviet military strength.

According to the report from the Appropriations Committee:

> The Russian Army is 3 times the size of our own; the Soviet Navy reportedly has 1,650 active ships as contrasted with 983 in our Navy; the Soviet Union has more than 450 submarines as contrasted with 53 in the German Navy when World War II began; the Soviet Union jet fighter aircraft inventory, is probably greater than our own and the rate of production of fighter aircraft in Russia is greater than our own.

In the field of missiles, according to the Appropriations Committee—

> We are in a nip and tuck race with Russia; we are probably behind the Soviet Union in progress made in the perfection of the intermediate range ballistic missile.

And finally, the Appropriations Committee says:

> All available information makes it clear that there is no room for complacency among our people in the consideration of our defense program.

Last year the distinguished gentleman from Texas [Mr. MAHON] stated before the House in connection with the Defense Appropriation Act of 1957:

> After all the heavy taxes we have borne and all the money we have spent on defense in recent years it must come as a bitter fact to the American people that our military supremacy is being challenged. We have talked, and rightly so, about our military might being a deterrent to war. We have said that we must get stronger and stronger in order to negotiate at the conference table from a position of strength. That has been one of our major premises. If we do not choose our course very carefully we are going to negotiate at the conference table from a position of relatively less strength and the Soviets are going to sit at the conference table and deal from a position of greater and greater strength.

The distinguished gentleman from Texas made many other wise observations during the debate last year. He stated, for example:

> We have several choices. We have got to more than match the Soviet Union to keep ahead; or we have got to reconcile ourselves to be on a military parity with the U. S. S. R. or we must allow ourselves to fall behind in military strength.

After reciting the facts in connection with the period of atomic plenty, the distinguished gentlemen from Texas said what is in all of our minds:

> It is hard to know what to do in the situation in which we find ourselves. I do not have the answers.

And again, the distinguished gentleman from Texas last year stated:

> Indications are that we must continue the high rate of military spending; not only continue it, but perhaps raise it a bit from year to year, as recommended for next year by Secretary of Defense Wilson.

But this year, the gentleman from Texas has taken the position that since we are in a long-range defense program we ought to "fix a figure for defense spending which is within the bounds of reason and stay with it in a general way pending a decisive change in world conditions." And then the gentleman from Texas stated that we ought to set a target of "say $35 billion per year" and further he says:

> Do not tell me that we could not have a reasonable and adequate defense program for approximately $35 billion a year rather than $38 billion a year, as presently budgeted.

But the distinguished gentleman from Texas also stated the other day:

> We cannot afford to embark upon a course of gradual whittling away of our defense program. We cannot start a trend toward a position of military weakness which would inevitably lead toward a national policy of appeasment, which we know is the road to war. * * * We must become adjusted to an indefinite period of high level defense costs without costly peaks and valleys.

Mr. Chairman, I have the greatest admiration and respect for the distinguished gentleman from Texas [Mr. MAHON], but I cannot reconcile his previous statements, or his statements contained in the debate last Friday, with a price tag national defense program geared to a fixed dollar figure. I do not subscribe to the theory that we can buy for $35 billion as much as we can get for $38 billion. I do not subscribe to the theory that we buy as much for less money—not in an era of rising costs due to increased technical complexities, a higher demand for increased skills, and an ever-upward spiraling increase in the cost of living.

The report from the Committee on Appropriations shows that the Army, for example, requested $3,549,000,000 for fiscal 1958 to support approximately 1 million personnel. I am advised by the Army that it had $49 million more than this amount in fiscal 1957 to support approximately the same number of troops. However, the Committee on Appropriations has cut this request for fiscal 1958 funds by an additional $36 million. This means that the Army will have $84 million less to maintain approximately the same military strength in fiscal 1958 than they had in fiscal 1957.

I further understand that in addition to the foregoing cuts, the Army will be required to absorb additional sums of approximately $28 million due to the increase in rates for railroad and sea transportation, as well as increases in the costs of subsistence and clothing. On the basis of these figures, which I am advised are correct figures, the Army will have $113 million less in fiscal 1958 than it had in fiscal 1957 to maintain its military strength. As a result of these cuts, I am further advised that it will be necessary for the Army to reduce its strength, which would average 997,000 men in fiscal 1958, by approximately 15,000 persons, the equivalent of 1 division.

I then raise the serious question as to whether or not this Congress is justified in the present state of world conditions to reduce the Army by one division?

Mr. Chairman, in the face of information which was available to the Committee on Appropriations; in the face of statements which were made last year and again this year in the face of the forecasts that the appropriations for our defense this year would exceed those that were appropriated last year, I, for one, must at least raise the question as to whether these cuts are justified; and I for one will not support one additional penny reduction in the bill now before this House.

Let none of us be lulled into the complacency the Appropriations Committee warned about. I am confident in my own mind that the reductions that are contained in this bill may have to be made up by supplemental appropriations in the months ahead.

I would be remiss in my duties as a Member of this House if I did not caution the House that in my opinion this is a rockbottom bill as it now stands and it cannot be further reduced without jeopardizing our national security.

Any further reductions will have to be felt in reduced procurement, extended lead time, and reduced research. We can talk until we are blue in the face about duplication, but bear in mind that we have all the same objective in mind—the defense of the Nation. And I, for one, will not subscribe to the theory that interservice rivalry is jeopardizing our national security. Each service is seeking to perfect the weapons necessary to accomplish its assigned mission. So long as those missions remain unchanged, it is not only incumbent upon, but absolutely essential, that each service perfect the weapons that will permit them to gain the weapons supremacy necessary in their field of endeavor.

Many questions have been raised by Members of Congress and others as to why it is necessary for us to maintain a stable force of approximately 2,800,000 men in our Armed Forces for the years ahead, particularly when we are approaching an era of guided missiles and so-called pushbutton warfare.

Mr. Chairman, this Nation, whether we like it or not, must be prepared to fight not only an atomic war with all of its horrors, but also a conventional war that likewise is horrible to contemplate, but at least does not threaten world extinction.

Not only must we be ready to fight two types of war, but we must be ready to fight on the land, on the sea, under the sea, in the air, and in the stratosphere. Our main line of resistance does not begin at the end of the 12-mile limit; our main line of resistance is to be found in Germany, Italy, Turkey, Greece, Korea, Formosa, Indochina, the Philippines, and every place in the world where free governments exist.

Our international commitments require manpower. These commitments are not based upon pure altruism—they are based upon the necessary strategy which will assure our victory if another world war should occur—be it atomic or nonatomic in nature.

The price of freedom is high, but the cost of defeat is beyond description.

Mr. Chairman, I have tremendous respect for the gentleman from Texas [Mr. MAHON], and I realize how difficult and complicated a defense appropriation bill must necessarily be. And while I might differ with the gentleman from Texas in some of his conclusions, nevertheless I would like to take this opportunity to congratulate him upon his masterful presentation of this defense budget. But there is one statement which the gentleman from Texas made that cannot go unchallenged and I refer to that part of his statement of last Friday when he said:

> A part of the answer is a greater degree of unification instead of tension and disunity, something approaching a merger.

This statement concerns me greatly.

There is no Member of this Congress more interested in economy than I. All of us would like to see Government expenditures and the national debt reduced, and taxes decreased.

But I sincerely trust that the vast majority of this House will resist all efforts to bring about specious savings through the merger of our armed services, under one chief of staff, all wearing one uniform.

There seems to be a tendency on the part of some to adopt the wishful theory that more centralization of power brings about savings. Nothing could be further from the truth.

In 1947 the Congress approved the National Security Act which created the Office of the Secretary of Defense and the Department of Defense, but at the same time created a separate Air Force. I thought then, and I continue to think that that decision was a wise one.

We created a board of directors when we created the Office of the Secretary of Defense, but we also wisely acknowledged the permanent establishment of a separate military organization known as the Air Force because its roles and missions had attained a position in our defense structure which not only required but demanded its separate administration.

Today we have three separate military departments, separately administered, but under the direction, authority, and control of the Secretary of Defense. But the same law that grants this authority specifically states that our military departments shall not be merged.

We will hear for years to come many well-meaning persons strongly advance the argument that billions in potential savings can be effected through a complete merger of our armed services.

Should we ever be so foolish as to succumb to this illusion we will have jeopardized the security of this Nation to such an extent that our continuation as a free Nation would be extremely doubtful.

We have made great strides in unification as evidenced by the single service procurement system, the recent adoption of the single manager system, and the identification phase of the Federal catalog program. According to a recent report of the Secretary of Defense, a total of 2,750,000 items have been identified, or approximately 90 percent of the more than 3 million separate items estimated to be in the military supply system as of June 30, 1956. Further progress has been made in the identification program based upon the work already accomplished in the catalog program.

According to the report of the Secretary of Defense, since the beginning of the identification program, more than 437,000 items have been eliminated.

In evaluating recent criticism of the Defense Department with respect to the fiscal year 1958 budget and the necessarily large outlays of funds for procurement, critics would have us believe there is extensive duplication of buying by the military services. Here are a few facts which clearly demonstrate the notable extent of unification of the armed services in the procurement and supply fields.

There are two principal management systems used to implement centralized procurement within the Department of Defense—the single-manager program and the single-procurement assignment program.

In the single-manager program the Secretary of one military department is responsible for all Department of Defense supply management functions for a designated class of commodities, or services, from research and development through procurement, stock control, financial management, distribution, issue, and disposal. This system establishes a single wholesale stock of the commodities for all military uses, centrally controlled by the single manager. It eliminates duplicate pipelines and storage, minimizes cross-handling, and promotes effective utilization of stocks, services, and facilities.

Defense procurement for materiel and supplies is currently running at the rate of about $15 billion annually. Of this amount, approximately $2.5 billion or

17 percent represents the portion procured under the single managers. These commodities include petroleum products, subsistence, clothing and textiles and medical material. There is no duplication here.

In the single procurement assignment program one of the military departments, through its normal procurement system, purchases all of a given class of commodities for itself and the other services in accordance with their requirements. This program covers about one-half of all Department of Defense purchases of materiel and supplies. Exceptions are made for local procurement and certain equipment of special design.

Included in the single procurement assignment program is the plant cognizance program. Under this program each aircraft, engine, and propeller plant is under the cognizance of a single service. The cognizant service alone maintains a contract administration staff at the facility and processes orders to the plant for all of the services. Steps are now being taken to place missile plants under the plant cognizance system. Even where plant cognizance has not been assigned to a single service, one service normally performs the inspection and local contract administration functions for all the services buying from the plant.

Still another significant refutation of charges of duplication is found in the Defense Interservice Supply Support Program—a relatively new but vitally important phase of military supply management which assures the interdepartmental utilization of overall Defense supply assets before new procurement is undertaken, and which prevents the disposal of items for which any requirement exists.

At present there are 18 commodity groups wherein this method of utilization is being effected—covering about half of the total items in the Defense supply system. Plans are being made for the inclusion of another 13 commodity groups which will cover practically all of the balance of the common supply items. This program alone assures that new procurement will be held to a mimimum, where materials are already available, and that the greatest possible utilization of the supply stocks held by all the services will be made on an integrated basis to prevent duplication of buying.

Most of the remaining procurement funds not covered by the foregoing coordinated programs are for items peculiar to the individual service, such as naval combatant vessels.

In this connection, it should not be assumed that complete centralization of procurement and storage is the best and only solution in every situation. The problem of centralization versus decentralization of procurement activities is not unique to the Defense Department. It is also quite common in private industry. In a recent article in Business Record, published by the National Industrial Conference Board, an organization devoted to business affairs, the point is made that there has been a gradual drift toward decentralized purchasing in private industry. One conclusion of this article is that—

> The purchasing function should be guided by what offers the most effective results, whether it be centralized, decentralized, or a combination of both.

Secretary of Defense Wilson's remarks at his press conference of May 16, 1957, are singularly appropriate in this context:

> My former experience, about every 3 years someone would raise the question wouldn't we save money in General Motors if we centralized the thing and did all the buying in one big place, pointing out that the Buick company paid a few cents more a thousand for some nuts or bolts or screws or something, all the common items, and we would look it over again and decide no, that it wasn't the right way to do it, and it was much more efficient and effective, and our big problem was to decentralize the thing and clarify the policy.

Mr. Chairman, there is a basic difference between the unification of our armed services as contemplated by the National Security Act and merger as recommended by those who believe that the savings of dollars possible in merger are far more important than the functions of the separate services.

Mr. Chairman, I do not believe for one moment that the merger of our armed services would save the taxpayers one thin dime. If anything, I am sure that merger might well bring about added costs.

I am convinced, and very thoroughly convinced, that were we to merge our 4 services under 1 head; were we to have 1 single staff system; were we to adopt 1 uniform—we would be creating a military monstrosity that would be an open invitation to disaster.

We hear much about duplication of efforts—I do not question for a moment that there is duplication of effort—but it is a competitive type of duplication that assures this Nation military supremacy in the quality of its weapons.

There has been altogether too much misguided criticism of so-called competition between the Armed Forces, particularly with respect to missile development.

Mr. Chairman, I have followed this missile development matter most closely and I am certain in my own mind that controlled competition, instead of being wasteful, is vitally necessary. We must approach any specific major problem of missile development with boldness and objectivity. We are dealing with a vast realm of unknown factors. We are truly exploring the unknown. I know of no surer way to jeopardize our Nation than to insist that only one line of missile development be followed.

I readily grant that it would be possible, although fatally injurious, to eliminate missile competition between the services. But while we have the power to eliminate interservice competition in the development of missiles, we would not have the power to eliminate Russian competition for missile superiority.

Therefore our Armed Forces must not be restricted to one arbitrary line of missile development. If we do not have competition—separate but different approaches toward the solution of the missile problems—we will never know if there really was a better line of development in our quest for missile superiority. We would not know if it were possible to develop better missiles until war came and the Russians then might show us that our chosen method was perhaps not the best one.

We must not eliminate wholesome and constructive competition in the Armed Forces. It is the stimulus for great achievement. It is the only reasonable assurance of superiority in this vastly complicated technological world in which we live. Eliminate competition, establish a system that provides for only one line of development in armaments, and you have a oneway ticket to defeat.

Competition is the heart and soul of American industry, and the American people. Why should it be different in the armed services? What is wrong with esprit de corps? What is wrong with a man's having pride in his own unit, or his own branch of the service?

Those who advocate merger do so in the face of history which has proved that a single staff system cannot possibly function under a total war concept, or even a limited war concept, so long as the military movements involve land, sea, and air.

The Prussian single staff system failed Germany twice in this century. Are we to take the lessons of history, stare them straight in the face, and then completely ignore them? Even our industrial giants, such as General Motors and others, have learned that decentralization not only is profitable, but essential to successful operation.

I know of no individual now alive capable of directing all four of the services, either from a staff level or an operational level.

I know of no individual now alive who could completely divorce his own service background to the point where he could view all four services on a purely objective basis.

But beyond that is the fact that our four services exist for the simple reason that there are four separate and distinct missions which are assigned to them. The four services do not exist for the sake of tradition, nor do they exist for the sake of providing billets for generals and admirals. They exist, in my opinion, because of the urgent necessity for maintaining a balanced force, which proved its mettle in World War II, again in Korea, and may well prove its wisdom in the event of another conflict.

Under our present system we do have competition—competition which is healthy and which produces the finest weapons obtainable.

We had the same situation prior to World War II, when the Navy was developing air-cooled aircraft engines and the Army was developing liquid-cooled aircraft engines. Each thought the other was wrong, but as it turned out there was a need for both in different phases of World War II. However, had we had a single service concept in effect at that time, we might well have ended up with just a liquid-cooled engine and our efforts in the Pacific theater might have

become a world tragedy, since liquid-cooled engines could not attain the altitudes necessary to combat the Japanese Zero.

I use this merely as an illustration of the difference between competition and duplication.

The same situation may well be true in the field of guided missiles. Certainly, guided missiles are expensive, but I do not believe anyone can sincerely question the fact that guided missiles and our superiority in this field may well prove to be the one factor which will prevent another war in the years ahead. But even in this field, it is clear to me that there is adequate room for the development of 3 separate systems—1 for the Army, 1 for the Navy, and the other for the Air Force.

What might appear to some to be duplication, in my opinion, actually amounts to competition. But that competition, even in similar missiles, does not necessarily involve a waste of funds, for certainly the nation that has in its possession the most up-to-date and most improved guided missiles will control the destiny of the world.

That there is a certain amount of conflict between the Army and the Air Force with regard to the control of missiles cannot be denied. That there is a certain amount of conflict between the expenditure of funds for aircraft carriers and other types of weapons cannot be denied.

But to me it is not improper for a service to advocate its own weapons system. In fact, it is essential in order that the Congress may choose wisely in appropriating the necessary funds for future developments.

But the very thing suggested, merger, would eliminate entirely this type of advocacy, and would put the average Member in the position of having only one choice—that of believing the testimony of the single service staff, or not believing that testimony.

Should we ever adopt a single service concept in this Nation on the theory that it will save money, not only will we be endangering our own national security but we will certainly be deluding ourselves with respect to savings.

I am firmly of the opinion that no military command system has ever been devised that is equivalent to our present Joint Chiefs of Staff system. Through this system we receive the benefit of the combined views of four persons, each an expert in his own particular field. But in other areas of the world, we operate joint commands and do so very successfully. Thus, the decisions which are arrived at through a combination of sound minds, arriving at sound conclusions, make it possible for joint commands in other theaters of operation to function well.

But when the day arrives that we have a super staff, or a single staff, or a single uniform, or a merger of the 4 services, we will have destroyed not only the morale of the armed services, not only the wisdom of the joint staff made up of representatives from all 4 services, but we will also be placing our dependence upon an assumption that 4 separate missions, involving the technicalities, the complexities, and the skills of these 4 services, can be merged into 1 at a time when it is even difficult for each of the separate services to maintain the skills necessary in their particular fields.

I trust that our Nation will never make the fatal error of merging our Armed Forces, or of even adopting something approaching merger.

Mr. MAHON. Mr. Chairman, I yield 30 minutes to the gentleman from Missouri [Mr. CANNON], chairman of the Committee on Appropriations and ex officio a member of all the subcommittees.

Mr. CANNON. Mr. Chairman, when we look back through the years, events stand out in sharper perspective and clearer light than at the time. But all the attrition of the years cannot change the basic facts.

With the possible exception of Waterloo, no battle has been more carefully reviewed and analyzed than Gettysburg. It is a part of the formal course of study at every national military academy in the world, the topography, the terrain, the personnel, the strategy, and the effect.

When you consider the strategy of the two commanders the conclusion is inescapable that there could not possibly have been any preliminary plans of battle, there could not have been any preconceived strategy. Neither commander had expected to fight at Gettysburg. Lee assumed he had the State of Pennsylvania largely to himself and had ample time in which to concentrate his forces for a selected field. Mead, with his troops strung out along miles of difficult road, had not expected to intercept Lee here. His first hastily occupied line of defense proved untenable and in the first day's fighting he was driven back to what proved to be a better position.

Lee, wholly unfamiliar with the territory, saw only the skyline. He sent Stuart's cavalry, the eyes of the army, forward to reconnoiter but taken unaware Stuart was outgeneraled and isolated and could not get a courier back. Lee had no knowledge of the number or composition of the troops in front of him or what lay behind.

But he did know the temper of his own men. He had tested them on every battlefield of the war. He knew that in the third of the war, outnumbered and outequipped he had defeated every army the North could send against him. He did not know that in the remaining years of the war his campaigns in defense of Richmond were to be acclaimed by the most eminent military authorities as unsurpassed in the annals of warfare.

If he could break the line he could destroy the enemy piecemeal as he had destroyed them so many times before, and the way was open to Baltimore and Washington and to recognition of the Confederacy by European nations—and final victory.

Mr. YOUNGER. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN (after counting). Sixty Members are present; not a quorum.

The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 88]

Albert	Garmatz	Miller, Md.
Andresen, August H.	Granahan	Miller, Nebr.
Barden	Grant	Moore
Barrett	Green, Oreg.	Morgan
Baumhart	Green, Pa.	Murray
Beamer	Griffin	Osmers
Blatnik	Gubser	Patterson
Blitch	Hardy	Perkins
Bowler	Healey	Pillion
Breeding	Hemphill	Powell
Buckley	Hoeven	Prouty
Burdick	Holtzman	Rabaut
Byrd	James	Rains
Byrne, Pa.	Jenkins	Reece, Tenn.
Chelf	Jennings	Santangelo
Chudoff	Jonas	Shelley
Cooley	Kearney	Siler
Dawson, Ill.	Kee	Spence
Delray	Kelley, Pa.	Taylor
Diggs	Kilburn	Teller
Dollinger	Kitchin	Thornberry
Dorn, S. C.	Kluczynski	Van Pelt
Eberharter	McConnell	Watts
Fallon	McGregor	Wilson, Ind.
Fino	McMillan	Wolverton
Flood	Machrowicz	Zelenko
Fogarty	Mailliard	
	Mason	

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. KEOGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill H. R. 7665, and finding itself without a quorum, he had directed the roll to be called, when 348 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The Chair recognizes the gentleman from Missouri [Mr. CANNON].

Mr. CANNON. Oh, Mr. Chairman, at this late date, 90 years afterward, with the battlefield spread out before you, it is easy to criticize but we are inclined to wonder if under similar circumstances the commanders of today would not have reached the same decision.

I am convinced—with perhaps a much biased point of view, of course, that if Lee had known what we know today he would have been invincible. He could not have lost. Perhaps a divine providence obscured the light. "The race is not always to the swift nor the battle to the strong but time and chance happeneth to us all."

I had an uncle at Gettysburg. He was a graduate of the University of Virginia and served 4 years under Lee. His widow, my aunt, lived to be a hundred years old. As a boy I heard her tell over and over again the tragic story of Gettysburg. When I came to Washington she came to visit me. I took her to Gettysburg, and from the crest of Cemetery Ridge with this venerable and beloved lady looked down the long slope across which Lee launched the last lightning charge of the Confederacy.

Standing there beside the High Tide Monument, where fell the gallant Captain Armistead, of North Carolina, as leading his men with his cap on the point of his sword, he came across the stone wall to die there with the shattered remnants of the brigade that followed him, I said to her, gently, "I am a southerner, and had I lived in those stirring times and had my way, I would have

marched with Lee, and had it been possible I would have come across that field with Pickett." Then, with my arm around her, I drew her closely to me, "But today I thank Almighty God that Pickett failed and the mighty Government of the United States still lives to bless mankind." I am afraid she never fully forgave me.

But times change and the minds of men react to changing issues and circumstances. In many Congresses following the war, and notably in the 53d Congress, which convened in this hall in 1893, there was not a single Member who had not served in either the Union Army or the Confederate Army. Had this question been considered then it would have occasioned some controversy. They are gone. The issues which stirred them are gone. And mercifully we let the dead past bury its dead.

But we have here today in the bill before us the same problems in another form. Perhaps it is even more serious in its possibilities because defeat in the war for which we are preparing in this bill means not merely the loss of a war, but extermination, the extinction of our people, our form of government, our civilization, and our way of life, without a trace and forever.

And yet I noted in the debate last week and today everyone has spoken of defense as if it involved only military defense. My friends, it involves vastly more than that. Wars are won not only with arms and military munitions but with money. And the United States Treasury is as important a part of national defense as the armed services.

We should write this bill with that in view. Russia has boasted since the last war that they would prod us into bankruptcy and take us without firing a shot—as they took most of their satellites. There is too much money in this bill. And some of it is for the wrong purposes. We can be defeated economically as decisively as we can be defeated militarily.

Let us look at it from a sensible light and from a practical point of view. You do not have to be a graduate of West Point or Annapolis to see it at a glance. It is so plain that he who runs may read.

The one thing that stands out like Mars at perihelion—like the headlight on a locomotive on a moonless midnight—is that if there is a war there will be no time for the Army and Navy to nibble around the edges.

The imminence of war is receding. There is less and less likelihood of a world war. We do not want a war and we will not start one. Russia does not want a war and Russia will not start one. So we can discount by a large percent any chance of our having to use the war material we are providing in this bill. But we cannot take a chance. We must be prepared. So we are passing this bill.

If war should come, time would be of the essence. It would be necessary—immediately—to strike at the heart of Russia—at the spider in the center of the web. We would have to destroy Moscow and the Kremlin and the centers of production in Siberia and wherever they happen to be. It would be a race whether we would destroy Moscow first or whether they would bomb Washington and Detroit and Pittsburgh first.

When our radar stations reported Russian bombers on the way where would we turn for protection?

Could the Army protect us? Could the Army defend Washington and Cleveland and San Francisco? Of course not. The Army is no longer of any use in time of war except in occupying territory taken from the air and in enforcing martial law. We will never again send an expeditionary force to Europe, until after the Air Force has cleared the way. We could not possibly land an army in any European port. The Russian Army can sweep to the channel as fast as its soldiers can march. Our only army problem in event of war would be how to get our token forces out of Europe and even that would be doubtful. We ought to cut at least one Army division out of this bill—if not more. We have no use for them. Send the men home to engage in productive employment.

If war should come could the Navy protect us? Ridiculous. Enemy bombers would fly right over them. With the exception of our submarines the Navy would cease to exist in a matter of hours. And yet this bill carries $314 million for a carrier. A carrier is the most expensive machine the world ever saw. It consumes more skilled labor, more strategic material, more money than any human contrivance the sun ever shown upon. And yet in war it would be worse than useless. It will require a flotilla of auxiliaries, tenders, destroyers, tankers and other shipping covering the sea over an area as large as Delaware and Rhode Island combined. But a single bomb—dropped from a plane flying too high and too fast to be seen or heard will cover hundreds of square miles with destruction. Or a single submarine remaining under, if need be, half way around the globe can wipe out all this vast armament and the millions of dollars it cost in the twinkling of an eye.

Listen. They propose to power this carrier with atomic energy. As the chairman told you they have not a very definite idea of just how it will be done—but they will not wait for that. They will spend the money now. And when completed, however successful, it will have a speed of 40 miles per hour. Think of it. Forty miles per hour in this age of supersonic speeds. The commander of the Air Force tells us he can sink it in 2 hours or less. And you know Russia could sink it any hour of the day or night. They talk about a mobile base and eluding the enemy. Any one knows that the Russians would know where that carrier was from the day it was launched. Attempts to hide a target of that size would be absurd. But it is in this bill at $314 million and with its armament and complement and protecting convoy it would run up above a billion dollars by the time it was in commission. Let us exercise just a modicum of commonsense.

The next world war will be decided in a matter of hours. There will be a period of mopping up and taking over but the war will be decisively fought in one afternoon or less. That was conclusively demonstrated in the "brush" operation last year, when over half a dozen Southern States with forces evenly divided and an impartial referee, the war was over in 40 minutes and the United States, the defenders, lost. There is no particular reason why Russia would not duplicate the performance in actual warfare unless we have an air force to stop her. Certainly neither the Army nor the Navy could stop them if the Air Force failed.

A recent United States intelligence report estimates that 88 percent of Russia's long-range bombers are based above the Arctic Circle. Only 12 percent are down in the European area. What does that mean?

When they come over the pole what can the Army do? What can the Navy do? How can we save our cities and the 92 million of our people it is estimated they would kill in one afternoon. Just how far will this bill protect us.

Mr. Chairman, we hold hearings covering weeks and months. And still fail to adduce all the facts. Added to that is the tendency to minimize pertinent facts. Here is an example. Here is one of the many weekly information letters published in Washington. Most of you subscribe to them and are familiar with them. They tell you what has happened—what is happening—and what will happen. And sometimes they are surprisingly accurate. This one happens to be one of the Kiplinger letters. It came in with this morning's mail under date of May 25, 1957. I will read the postscript:

> Our letters are read in many military posts in the United States and abroad.
>
> Recently we carried a number of reports on waste in the military service which led to the barring of the letters from the officers mess at a naval base.
>
> It illustrates a military attitude that young officers should not be told of the waste and extravagance of higher ups.
>
> As if they did not already know.
>
> Also that their personal reading matter ought to be censored for them.

Mr. Chairman, some may be misled. But in writing this bill, let us not be misled. There are millions in this bill that ought to be applied to the public debt, or to tax reduction—or to real defense that will protect us when, with uplifted hands, we are "calling for the mountains to fall upon us."

Mr. MAHON. Mr. Chairman, I yield 25 minutes to the gentleman from South Carolina [Mr. RILEY].

Mr. RILEY. Mr. Chairman, I like to agree with my distinguished chairman, one of the most valuable Members in this House and one of its ablest men, my good friend, the gentleman from Missouri [Mr. CANNON], but I must in some respects take issue with him in regard to this great defense team, which we need to protect this country until such time as men's minds and men's hearts are reconciled to the abolishment of war.

I like to think of our Armed Forces as a unit. I know, as you do, that we lack the full realization of that objective. However, I am firmly and sincerely convinced that there is a definite mission for each of the armed services now in being and any disparagement and depreciation of any one of these services not only tends to weaken the service attacked, but weakens the entire defense

team. I believe that it is absolutely necessary to have strong Army, Navy, and Air Force units of one coordinated defense team. Because of my assignment on the Army subcommittee I would like to refresh your minds on certain features of one of these units of our defense.

I hope that what I have to say will not in any way be construed as reflecting on either of the other teams in this defense unit. Certainly I believe that each has a necessary and vital mission.

Each year under the influence of the huge military budget we are tempted to hope and to look for some easy and inexpensive out—for some short cut to military power. There is always talk about some new weapon or some push-button innovation which renders unnecessary all of the traditional paraphernalia of war which we have supported for many years. This hope has always proved to be more or less of a mirage, but a hope which harbors grave danger, in my opinion, to our security. There is no easy or safe way to fight a war and, in my opinion, there never will be. War will always be destructive, filled with sweat and tears, blood and tragedy. New and modern weapons serve our soldiers, our airmen, and our sailors, but do not replace them. In fact weapons, no matter how efficient or how marvelous, are absolutely worthless without men to handle them. The ultimate weapon in war, then, as in all other human endeavors and activities, is man.

We must evaluate our defense establishment against the background of actual existing conditions. Both the United States and the Soviet Union will soon have, if they do not now have, the ability to devastate each other's home land with thermonuclear weapons. As the full import of this fact registers throughout the world, and the strategists of both East and West ponder over its implications, it seems to me that a great general thermonuclear war becomes less and less likely as a deliberate act. Certainly, we must maintain, always, our ability to strike back, instantly and massively, with long-range bombers, and in the not too distant future with long-range missiles, so that any possessor of thermonuclear megaton destructive capability will hesitate to use that capability except as a retaliatory measure. Therefore, it seems to me that these weapons of massive retaliation will be effective only so long as they are not used. Important as they are, such weapons are essentially weapons of hopelessness to be used as a last resort and as a final act of desperation when all other measures have failed. Do not misunderstand me—I reiterate, we must have these weapons, but we must recognize, also, that they are essentially negative in character. I, for one, would like to see more attention paid to weapons that can be used under all conditions, whether in a small engagement, or in a larger conflict.

Notwithstanding the fact that the Communist powers will, I believe, hesitate to use their nuclear potential, I do not believe that they have given up their aggressive, and possessive designs. I fully expect that the Soviet Union, and its satellites, will continue to look for soft spots around the edges of the Free World; any weakness that they find will be swiftly and cleverly explored.

Thus, if we develop only weapons of megaton impact, the use of which we will not initiate, we will find ourselves faced, in each succeeding crisis, with the horrible choice of inviting thermonuclear disaster or being forced into disgraceful appeasement. Unless we maintain strong, strategically mobile Army Forces we will not be able, in my opinion, to successfully aid our Allies of the Free World, or to adequately defend ourselves.

In the issue of Life magazine of May 6 this year, Mr. Thomas E. Murray, an able and successful engineer, and one of the five members of the Atomic Energy Commission, strongly advocates the use of smaller nuclear weapons. Only the Army and the Marines are organized to use such tactical weapons. Only the Army and the Marines offer protection in limited land engagements.

How can this Nation hope to exert its influence in the world at large unless it has Army forces that can respond, if necessary, to a Korea or to an Indochina or to a Suez? How except with Army strength can we help our friends and Allies without destroying them in the process, should they be invaded? History teaches us that wars are fought for the ultimate purpose of controlling land areas and the people who inhabit those lands. Only the Army and the Marines can occupy and hold land areas.

The Army we have is performing that role now. Army forces in Europe and Asia are a visible and constant reminder to the Communists that aggression will be resisted by the armed might of the United States and its associates. Let us not overlook the fact that since World War II there have been 14 acts of aggression but not one of these has been launched within the range of United States Army guns.

In Europe the United States Seventh Army, with its atomic punch, is the keystone of NATO defenses. The atomic capability of this Army is of a tactical nature and its weapons are designed for maximum results against an enemy army without utterly and finally destroying everything in a vast area. This army also has conventional weapons. The influence of this Seventh Army may be fully appreciated only by considering, for a moment, what would be the situation in Europe if they were withdrawn. This same test may be applied to the value of the United States Army Corps deployed south of the demilitarized zone in Korea. In addition to these two armies we have forces in 7 other foreign countries—making 9 in all.

Furthermore the United States Army military assistance advisory groups are located in 35 other nations making a total of 44 foreign countries in which our military missions and advisory groups are assisting the free countries in deterring aggression and promoting peace. One of the most satisfying Army missions has been the result of the Army's work in Vietnam. This valiant country, whose leaders spoke to us a few days ago in this hall, has achieved internal stability and respected strength in a very few years by its determination and resourcefulness, assisted and encouraged by the United States Army mission in Saigon.

The question may well be asked whether the Army can survive in an era of atomic weapons and missiles. I am convinced that it can. To meet such a contingency the Army is already in the process of reorganization. The combat elements of the Army—the infantry, airborne, and armored divisions—are being streamlined and reoriented toward the requirements of the atomic battlefield. The new so-called pentomic divisions are smaller, more mobile, and possess more firepower than their predecessors.

The equipment of the new airborne divisions has been either lightened or eliminated so that it too can be carried by air. The battle groups of the new infantry divisions are all completely air transportable and, like the airborne divisions, they can be moved quickly anywhere in the world. These new divisions with less total manpower than before have more fighting men and less men supporting them than their older counterparts. The new divisions have been given their own atomic punch and these atomic weapons together with the improvement of conventional weapons give our Army units their greatest firepower in history.

The new organizations depend on larger numbers of Army aircraft to give them an edge in mobility over any forces that they might some day oppose. Consequently the Army is developing an air arm of small fixed-wing aircraft and helicopters, such as can be used in either a short takeoff or a vertical takeoff. This so-called air arm of the Army in no way conflicts with the Air Force.

The increasing complexities of weapons in our defense forces demands that no talent go to waste and the Army is keenly aware of this. I am satisfied that the Army now is making excellent use of the talents and abilities of the young men and women who enter its service. American parents may rest assured that their sons and daughters upon entering the service are carefully evaluated and assigned to those jobs for which they are best fitted. Especially is this so in utilizing those with scientific and professional experience. The Army is not soft, and neither is it perfect, but it has vastly improved its assignments and its training in the past few years.

Army leadership in ballistic missile development has been recognized for some time. Dr. Von Braun and his colleagues of the Army Ballistics Missile Agency at Red Stone Arsenal in Alabama are recognized as the foremost missile development team in the United States. These scientists have been working for the Army since 1947 when at the end of World War II we had the foresight to bring them into this country and reserve their talents for the benefit of this Nation. The arsenal of Army missiles which has grown out of this effort is impressive. The Honest John and the Corporal are already in the hands of our troops overseas. Others to follow in quick succession are Little John, La-Crosse and Red Stone. I am convinced that the Army Jupiter, the intermediate

range ballistic missile, is the most successful development thus far of this type.

Of the many contributions of the United States Army, the most obvious, and the one closest home, is the defense of the cities and industries of our Nation against air attack by the use of Army surface-to-air Nike missiles. All the arguments about antiaircraft missiles are overshadowed by the fact that the Nike is the only fully developed land-based surface-to-air missile in business today. Nike installations are in place now in many localities including the area around Washington.

In time improved versions of these missiles will replace the fighter intercepter for the close-in defense of our vital areas. In the very near future the Army will bring the Nike Hercules in the Army Air Defense Command and it will ultimately replace tht present Nike-Ajax. The Nike Hercules has a greater range and more destructive power than the Ajax, so it will afford an efficient defense against the more modern planes. The Army Air Defense Command is a strong deterrent to any would be aggressor.

The Army, like the other Services, has its problems with rising costs. The new and complicated modern equipment is very expensive. For example the cost of equipping a Nike Battalion is 2½ times as much as that of a 90 mm gun battalion which it replaces. Also the record shows that materiel costs are up some 7 percent above fiscal 1956 costs. It takes careful planning and management to keep the operational and procurement costs at realistic figures. The Army has improved its management remarkably during the past several years.

There has been considerable criticism of waste in the Armed Services over a period of years, but I submit that we should give commendation to the Army for the effort it is making to put its house in order, and give the American public an adequate defense machine at the lowest possible cost. Schools have been established to train officers in the most efficient management and to develop the most practicable and highly efficient procurement practices. Even procedures for making small purchases, which compose the largest part of the procurement effort, now closely parallel in efficiency the practices used in business and industry.

Management in the defense forces cannot, in my opinion, be developed to the efficiency obtained in private industry, because industries are able to retain its efficient executives and workers while the officers and men of the Army are undergoing constant transfer and reassignment in order that they may have the broadest possible experience in all phases of military activity. I do believe, however, that waste in the Army is being minimized and duplication is being eliminated.

Because of its experience and organization the Army, under the single management system initiated last year, has been designated manager for subsistence, clothing and textiles, and traffic management within the United States for all defense forces. In other words, the initial procurement of food and clothing, and the transportation of goods and men in the Zone of the Interior is an Army responsibility.

I return now to my original premise that this country, in order to be properly protected, must have a balanced team of defense forces. One of the abilities that made America great has been that ability to reconcile differences, and to cooperate with each other for the best interests of all concerned. I believe that this must be our objective as regards the several elements of our Armed Forces. In his novel the Three Musketeers, Dumas has his 3 heroes pledging each other "all for one and one for all."

I believe this would be a fitting motto for our airmen, our soldiers, our sailors and our marines.

Mr. Chairman, I yield back the balance of my time.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. OSTERTAG].

Mr. OSTERTAG. Mr. Chairman, before commenting on the bill which is before us, I wish to pay tribute to the chairman of our subcommittee, the Honorable GEORGE H. MAHON, of Texas. There are few civilians in our country who have as profound knowledge of our defense program as Congressman MAHON. His searching, diligent study, and analysis of the budget now before us, represents years of acquaintance with defense problems, plus a broad and balanced view of their relations to our security and economy. It has been a pleasure and an honor to work with him and under his leadership.

Now, I should also like to pay tribute to the ranking minority member of the committee, the gentleman from Massachusetts [Mr. WIGGLESWORTH]. It has been my pleasure to work with him not only on the full Subcommittee on Appropriations for Defense, but also on the Navy panel. The members of this subcommittee, 13 in all, are devoted men and unusually equipped to deal with this tremendous task of considering some $30 or more billions each year. It has been quite an experience to be associated with him in this task.

I should like also to pay tribute to the chairman of the Navy panel, the gentleman from California [Mr. SHEPPARD]. He has presided over the Navy subcommittee panel discussions and deliberations and he has always been fair, conscientious, and diligent in his undertaking.

During the past 4 months, the Subcommittee on Defense of the Appropriations Committee, has spent hundreds of hours and has taken thousands of pages of testimony on the defense budget. A military establishment—any military establishment—is a giant, with an insatiable appetite. No military establishment in history ever got all it wanted, or all it thought was necessary to fulfill its missions. Ours is no different. Our Defense officials are to be commended for it. If they were willing to think in terms of half-measures, they would have no business being in the Defense Department and our armed services. On the other hand, it is our responsibility to weigh their requests within the broad framework of our national welfare. The reason our Constitution provides for civilian control over the military is to insure that the military shall be subject to checks and balances like the rest of our Government.

The President has wisely noted, that our freedom depends, in equal measure, on spiritual, economic, and military strength, and the impairment of any one of them can be fatal to the whole. There is no one on earth who can say to you with certainty that X billions of dollars will secure the safety of our country while Y billions will imperil it.

In the consideration of this budget we must give thought to inflation, which is steadily eroding the buying power of our dollar. For a time, a few years ago, the deadly virus of inflation was checked, and the dollar remained virtually stable. Then our national budget began to rise again, and inflation resumed its devastating march across our land. Defense spending is the biggest item in our national budget. Just last week we have had two solemn warnings from two joint Congressional committees that Federal spending is going to outrun the original estimates, that inflation is the chief villain of the piece, and that hope of tax relief must be abandoned. This is sobering news to the American people, who are carrying the heaviest tax load in the world and the heaviest tax load in history.

We need to remind ourselves that the only way to curb inflation is through restraint and discipline. Trying to outspend it is like trying to put out a fire with gasoline. It is a sure road to disaster.

On the other hand, we must not let down our guard and we must not take second place to any power on earth. It would seem reasonable and wise to hold costs down, particularly expenditures which will in no way reduce our total military strength and national security.

Now, if I may just take a moment to review some of the general figures with regard to this bill, calling your attention once again, as has been mentioned before, the total budget request before us as presented by the administration, amounted to $36,128,000,000.

This bill amounts to $33,541,255,000, a reduction of $2,586,775,000.

There is an unexpended carryover of $32,803,000,000. After this bill has been passed and the money is appropriated there will be available for expenditure some $66.3 billion.

I might call your attention to the fact that estimates for spending during this next fiscal year are not the amount of money that is in this bill, but estimated for expenditure is the total sum of $35,704,000,000.

I think, too, it is important to note, and very little has been said about it, the increased cost to our Military Establishment resulting from economic factors as a result of developments that have taken place over the years: For example, a number of years ago a conventional submarine cost about $4,700,000; today a nuclear-powered submarine costs in the neighborhood of $60 million.

Back in the World War II years a B–29 bomber cost $600,000. Moving along to Korean times a B–36 cost $4 million;

and today our B–52 bombers cost $8,500,000 each.

I might also call your attention to the fact that this bill includes within it over $300 million to provide the funds necessary to meet the retirement contribution on the part of the Government. It also includes increased pay and allowances which were provided for by law by the Congress of the United States. It also calls for increased provisions for the so-called dependents medical care which was made law about a year ago and which we provided allowances or benefits for dependents as well as our military people in the matter of medical care. All of these services and all of these costs have added to the total overall costs necessary to meet our responsibilities in this atomic age.

Now, I think you ought to know, too, that $190 million of this reduction is based on the transfer of excessive funds in the Navy and Marine Corps stock funds and in the naval industrial fund to the appropriation for military personnel, Navy. That is part of the changes or the items referred to heretofore as bookkeeping transactions.

The funds recommended by the committee will provide an average year's strength of 675,000 military personnel in the Navy. Others on the committee, the gentleman from Kansas [Mr. SCRIVNER] and the gentleman from Texas [Mr. MAHON], and other Members, have made reference to the fact that this bill does in no wise reduce or change our military personnel as such.

The shipbuilding program is the heart and soul of the Navy. Funds in the bill will provide for the construction of the first nuclear-propelled attack aircraft carrier. Five guided missile destroyers are included. Heavier and harder hitting than these destroyers are the guided missile frigates, of which there are 8 in this program. In these ships the full main battery is the guided missiles. Like the guided missile destroyers they will have the latest in the antisubmarine warfare weapons system. I think it might be well for me to call your attention, if it has not already been said, to the fact it is common knowledge that the Soviet Union has had a tremendous buildup of submarines. I believe the number ranges over the 400 mark.

We are continuing to put powerful emphasis on submarines. There are three nuclear-propelled guided missile submarines in this program. These submarines have the tremendous advantage of high sustained submerged speed, great maneuverability and endurance, limited only by the staying power of those who man them. They will make a major contribution to the underseas warfare capabilities of our Navy.

It has been mentioned that the fourth nuclear-propelled submarine is contained in this year's shipbuilding program.

Included in the conversion program are three guided-missile cruisers, an attack aircraft carrier, and four ocean-radar picket ships.

The heart of the striking power of the Navy continues to be the attack carrier. May I state, too, that the Chief of Naval Operations and the Secretary of the Navy, and others, have reminded us constantly that the role and mission of the Navy is control of the seas. When you stop to realize the developments and changes that have taken place, you will find with the Navy, despite the fact its mission is the control of the seas, its principal operation is airpower.

This bill will provide for the procurement of approximately 1,220 aircraft which, when coupled with prior procurement, will provide for approximately 2,100 new aircraft deliveries to the Navy and Marine Corps during this next fiscal year. I believe the record shows that the Navy's inventory today is somewhere in the neighborhood of 17,000 aircraft. The percentage of modernity and combat potential of the Navy air arm will increase during the fiscal year 1958, with the receipt of more modern aircraft. Additional Navy and Marine air squadrons will have more guided-missile capabilities. In other words, this already powerful, strong arm of the Navy will be greatly reinforced by the program contained in this bill.

The Marine Corps has developed its new vertical assault technique. The amphibious assault ship funded in the fiscal year 1958 program is the heart of this future amphibious operation. The Marine Corps will continue to be maintained at the level of 3 combat divisions and 3 Marine air wings with the necessary supporting troops. The strength of the Marine Corps will be maintained at the level of 200,000 personnel.

It has been my personal privilege to serve as a member of the Board of Visitors of the Naval Academy where one of the major problems has been the lack of maintenance to their official plant. This bill makes provision for increased maintenance support at the Academy to assure that it continues to fulfill its vital purpose.

In the field of procurement of ordnance and ammunition the committee has recommended a total of $176 million, a reduction of $80 million in the budget estimate. According to the data presented to the committee in the detailed hearings unobligated balances will be available in this account considerably in excess of the amount shown in the budget estimates. As a matter of fact, $81 million of the funds appropriated for this item in fiscal year 1957 have not even been apportioned to the Department of the Navy. These balances represent to a large degree the basis for the committee reduction. The program approved by the committee in this field for fiscal year 1958 will provide for major steps forward in equipping the fleet with modern weapons, including guided missiles and weapons systems especially designed for antisubmarine warfare.

The matter of aviation spare parts and the aviation supply system has been of particular interest to me. The spare parts problem as it relates to aircraft procurement is a complex one. Modern aircraft, with their many and varied components, make the accurate prediction of the requirements for spare parts most difficult.

This subject has been discussed by other members of the committee, particularly with reference to the Air Force, but it is still a problem in the services generally. Frequently, in the provisioning of new planes, there is little or no usage data upon which to base the spare parts requirements. In recent years, the Navy has taken firm steps to solve this problem. I believe, however, that much more remains to be done, and that continued careful and diligent analysis of this problem will result in considerable savings to the Government in the future as well as in increased operational effectiveness and efficiency in the Navy. The committee report has aptly stated:

> It will be expected that the present method used on initial provisioning and in subsequent replenishment will be thoroughly reviewed and procurement (of spares and spare parts) held to the minimum consistent with the operational needs of the Navy.

An almost equally difficult problem is the matter of the aviation supply system. The complexities which plague the provisioning of spare parts are accentuated in the difficulties in operation of the aviation supply system. The aircraft in the fleet and the effectiveness of the naval air arm are responsive in a large degree to the effectiveness of the aviation supply system. Unless these planes can be supplied in the proper manner, the fleet will automatically be denied their operational capabilities. The presentation of this problem to the committee showed that progress is being made in improving thc effectiveness of this supply program.

Mr. Chairman, in short, the recommended funds for the Navy, as for the other services, will, in my judgment, add great new strength to our already powerful Defense Establishment.

I have reservation on certain cuts which have been recommended, and that is in connection with the reduction of funds for all-weather fighter planes, missiles, and spare parts for aircraft. In connection with the overall missile development, there are, in fact, 26 different kinds of missiles now being developed by the 3 services, 9 of which are currently operational. Concurrent efforts in this field were originally encouraged in the Defense Department as a means of achieving operational weapons in this field at the earliest possible moment. Yet I am not entirely satisfied that the shift in objectives justified a reduction in this particular budget item and seriously question our action in that regard.

Despite the general acceptance that the threat of war has lessened, we must not in any way let down our guard. Our committee has, in a sense, presented a budget to you which carries with it a statement or a declaration that we have in no way reduced our missile program or prevented the production or procurement of missiles and of important bombers or other airplanes and aircraft.

I hope that we can fulfill that pledge and that promise, because we must continue to maintain a strong, modern Military Establishment. Costs will continue to rise because of these new developments in the missile field and the atomic carriers and superjets. They all mean more and more dollars.

As Admiral Radford said to our committee, as shown at page 4 of our report:

I feel that we have a Military Establishment today which is responsive to almost any situation that can be foreseen, and within a reasonable period of time we can take care of anything. And we are respected. Our power is respected.

Secretary Wilson said:

With the situation the world is in today, * * * another world war would inevitably be an atomic war, and that the big thing is to avoid any such catastrophe.

I feel, Mr. Chairman, that our best insurance of preventing an atomic war is to meet our responsibility of the best possible national security through modern development in this atomic age.

Mr. MAHON. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. KILDAY].

Mr. KILDAY. Mr. Chairman, I know of nothing in the present world situation which would justify any reduction in our National Defense Establishment. On the other hand, I know of nothing that would cause me to believe that our present National Defense Establishment is operated with 100 percent efficiency and economy. I feel that we can with complete safety to our country maintain our present defense forces and do so under the amount of money that has been recommended by the Committee on Appropriations. It is, therefore, my purpose when we come to reading the bill to vote to sustain the action of the Committee on Appropriations in reporting this bill to us.

I feel that the budget of the Department of Defense is the same as any other budget except that it is larger. I think it is even the same as a family budget and that like any other budget it can find ways and means of taking care of sudden emergencies or effecting some economies. I think the family man who is making perhaps $600 a month who finds himself suddenly confronted by a doctor's or dentist's bill of $42, which would be 7 percent of his income, just as this Congress' cut is 7 percent, will find ways and means of paying that $42 by cutting down on some of the luxuries he had anticipated. I think every one of us on the floor, every Member of this House, had had many, many occasions of doing the same thing, and I think our military forces can do that also.

I feel that there does exist some luxury, some activities that can be lessened and this amount of money saved. I have stated that I shall support the committee's action in applying these cuts. The committee has studied the budget of the Defense Department and has decided that in the areas it has applied the cuts it can be done with safety, and I shall support that action.

If it had been my decision and if I had the right to say the manner in which it would have been done, I would not have done it exactly as the committee has done. I feel that all that needs to be taken out of the request of the Department is an amount of savings. I do not know where those savings ought to be made specifically. I know many areas in which I know savings can be effected, but the departments should know or they can find out where those savings could be made.

I would have provided in the bill after appropriating the amount of money requested that the Secretary of each military department was required to effect savings to a stated amount within his own department, and in that manner we would have been able to save in the lowest priority of military necessity. Each department knows which item of expenditure is absolutely essential and of the highest priority. By following that system they would have been in a position to eliminate those things which they needed the least or those things which they could have postponed. I have no doubt that the departments when you ask them how they would apply a cut that might affect personnel would come up with a statement of 15,000 men, and that constitutes a division. On the other hand, I am not positive by a great deal that there are not 15,000 men in the Army who are not assigned to divisions. I know that there are military police assigned to patrolling practically ever city and community in which a miltlary establishment is located, that the civilian police are already patrolling that city, and that that duplication is not necessary. I know the same to be true with the Air Force. I know that somewhere in the lines of communications around depots and whatnot those men could be found.

So should it be that the other body should see fit to adopt a system under which the amount requested in the budget by each military department is appropriated, and that then a stated amount equivalent to reductions made by this committee is imposed upon the Secretary of a military department as the amount that he shall reduce the funds appropriated to him, it will represent the saving that this committee has asked for, and it will not be subject to any criticism that we are cutting necessary or essential items. This is not a new departure. This has been done by this House before. In the year when we had one appropriation bill for all departments, I believe it was either 1949 or 1950, after these funds had been appropriated there was an amendment which required the departments to reduce, I think it was by $550 million, the amount that had been appropriated. That was done and it was found to be administratively feasible. So, I say I support the committee in their view of effecting these savings and the manner in which they have done so. Should the other body see fit to adopt the other system, I would support that.

Mr. Chairman, I yield back to the remainder of my time.

The Clerk read as follows:

TITLE II

Interservice activities

Claims

For payment of claims by the Office of the Secretary of Defense, the Army (except as provided in appropriation for civil functions administered by the Department of the Army), Navy, Marine Corps, and Air Force, as authorized by law; claims (not to exceed $1,000 in any one case) for damages to or loss of private property incident to the operation of Army and Air National Guard camps of instruction, either during the stay of units of said organizations at such camps or while en route thereto or therefrom; claims for damages arising under training contracts with carriers; and repayment of amounts determined by the Secretary of the Army, the Secretary of the Navy, or the Secretary of the Air Force, or officers designated by them, to have been erroneously collected from military and civilian personnel of the Departments of the Army, Navy, and Air Force or from States, Territories, or the District of Columbia, or members of National Guard units thereof; $12,000,000.

Mr. MAHON. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose, and the Speaker having resumed the chair, Mr. KEOGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 7665) making appropriations for the Department of Defense for the fiscal year ending June 30, 1958, and for other purposes, had come to no resolution thereon.

GENERAL LEAVE TO EXTEND

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members who spoke on the defense appropriation bill today may have permission to revise and extend their remarks and include appropriate extraneous matter.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McBride, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 179. Concurrent resolution authorizing the printing of additional copies of the report to accompany H. R. 7125, a bill to make technical changes in the Federal excise-tax laws.

The message also announced that the Senate recedes from its amendments Nos. 5 and 8 to the bill (H. R. 5788) entitled "An act making appropriations for the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes."

The message also announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 33. Concurrent resolution requesting the President to return the enrolled bill S. 1463 to the Senate.

ADDRESS BY HON. SHERMAN ADAMS, ASSISTANT TO THE PRESIDENT, DELIVERED AT TRENTON, N. J., MAY 24, 1957, BEFORE THE SIXTH REGIONAL CONFERENCE SPONSORED BY THE REPUBLICAN NATIONAL COMMITTEE

Mr. WIGGLESWORTH. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. SCOTT] may extend his remarks at this point, and to include an address.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. SCOTT of Pennsylvania. Mr. Speaker, the Honorable Sherman Adams, assistant to the President, delivered a very informative address at Trenton, N. J., on last Friday before the regional conference sponsored by the Republican National Committee, as follows:

Tonight I feel as Abe Lincoln evidently did on one occasion in 1860.

You will recall that after his nomination he stayed in Springfield until the election. There he interviewed an endless procession of job hunters and their friends. This frustrating job he patiently handled with that amazing humanism, tact and insight that distinguished him from ordinary men. Then one day he contracted a mild case of smallpox. When he discovered what his ailment was, he said to his secretary, "Tell all the officeseekers to come at once, for now I have something I can give all of them."

Tonight I also have the urge to give something to everybody. I hope, however, I shall have something less uncomfortable than he had to give. I earnestly hope, too, it will prove to be of greater value to all of you.

This gathering is the sixth in a nationwide series of such meetings. To me it is best characterized as a soul searching—a coming together to evaluate how far we have progressed these past 4 years—to measure where we now are—to appraise where we, as Americans and as Republicans, must strive to go between now and 1958 and 1960.

As it is written in the Holy Book, "To every thing there is a season, and a time to every purpose under the heaven." This is our season—this is our time—to set about our common purpose in the face of the obstacles we know are ahead.

I am not used to mincing words. Nor am I accustomed, as the saying goes, to shovel smoke. It is written that there is "a time to keep silence, and a time to speak." Tonight I am here to speak.

For I am certain of this: We are at the time, and we are in the season, when straight talking is indispensable to Republican purpose and progress. In no other way can we chart for ourselves the right course. It is to do exactly this that we are gathered here.

Our self-appraisal will not be helped by turning our eyes from some of the things that have been perplexing our party. An example is our peculiar obsession right now with epithetical Republicanism.

In earlier political history Americans have known the Barnburners, the Know Nothings, the Free Soilers, the Mugwumps, the Abolitionists, and the Locofocos. Today how freely we Republicans bandy about colorful terms.

The Democrat opposition, as all of us know, suffers from a chronic and incurable political schizophrenia. Schizophrenia, you remember, is split personality. Indeed, their party is irreparably split—and down its very middle, both geographically and philosophically—and the split is so deep that the party simply cannot put itself together again. In that party, as the North proposes, the South disposes, and never the twain shall meet.

Unfortunately, we Republicans are doing a little splitting ourselves. While this may be fun, it is a pastime we can ill afford.

Today, we have the stalwarts, the irreconciled, and the irreconcilables. We have the liberals, the liberal-conservatives, the plain and simple conservatives, and the reactionaries. We have the moderns and the un- or anti-moderns, the old-fashioned and the traditionalists, each resoundingly the oracle of the true meaning of Republicanism. By itself that should give us concern enough.

But another concern is the 1958 Federal budget, its size and composition, what it means to us.

Another is our defense and mutual security programs and their cost and meaning to our country and our party.

Here's yet another, social progress, its scope and direction, and what difference it makes to us as a people and as a party.

Another is our party's official posture before the American people, proclaimed proudly, before all America in our party's platform adopted a short 9 months ago in San Francisco. We are concerned as well with the import of these solemn pledges to our President and to all of us who consider ourselves loyal, dependable workers in the Republican cause.

Two other concerns come to mind. One is the year 1958, as critical a year as our party has faced in its 100 years. The other is 1960, the importance of which I hardly need emphasize here.

So we need to look again to the bricks and mortar of our party structure. The outlines of this great edifice we can see easily enough. But we must test the materials that compose its foundations and walls, lest intentionally or otherwise, by our own huffing and puffing, we blow our own house down.

Now, our party is no nicely-trimmed organization including only those who think and speak precisely alike. It enforces conformity upon no one. Our party is big enough in spirit and purpose to include every single citizen who believes in its basic principles.

Every Republican is entitled to interpret for himself the nature of our commitments and objectives. Even so, if our party means anything at all, it means that every loyal member of this Republican party is committed to certain common goals and shares certain basic views.

The hyphenation of Republicanism that I mentioned earlier is a case in point. We must stop claiming allegiance to a fraction of a faction. Suppose we be just this—loyal Republicans—the kind of Republicans who are willing to join with other Republicans to get our Congress back in 1958 and keep the Presidency in 1960.

As his first term came toward a close, three considerations weighed heavily in the President's mind as he considered the possibility of another term:

1. That the foreign policies he had pursued had kept our country at peace in this dangerous world.

2. That his domestic policies had brought prosperity to our people.

3. That he felt he had the physical energy to go through four more gruelling years of the Presidency.

As for the last, time and the fates will prove, but this I can report to you: The President is in great shape, and unless I miss my guess, both time and fate are on his side.

As for the second—his domestic policies—may I give you the opinion of one of the opposition leadership. During last month's recess of the Congress he told me this: "My people are happy and prosperous," he said. "They have relatively few complaints. They look ahead with confidence. Just keep that President of yours in good health for us."

As for the first—his foreign policies—we have an absence of fighting. To be sure, an uneasy peace. But we have stopped the loss of frontiers of the Free World. The Communist destroyers of freedom are understanding more clearly where we stand. Ours has been a cleaner and plainer policy. Our relentless waging of peace is turning the tide. The neutrals and the soft populations are edging our way. Our mutual security programs, our "Atoms for Peace" program, our disarmament efforts, our information services, our every diplomatic move, all are showing results in an easing of tensions and a recoiling from war. True, keeping the peace is expensive.

And let that introduce some observations about the spending of money.

First, let's remind ourselves of certain precepts that we Republicans hold in common—economical and efficient government, for instance—a government that taxes no more than imperatively necessary to maintain essential functions—that spends no more than the minimum needed for such services—that considers the public debt not praiseworthy proof of our national wealth but an obligation to be paid off. We demand government that respects and is determined to protect the integrity of the citizen's dollar, that recognizes the indispensability of private initiative to our way of life, that believes in the rewarding of ability and hard work—a government devoted to equality of freedom but that rejects paternalism, regimentation, and the penalizing of success.

To me these are traditional Republican principles. They are as sound and strong today as ever. They are more than enough to make trivial our superficial differences which merely prove the continuing vigor of this Grand Old Party—a party as lustily determined today as at its birth a century ago to meet responsibly the Nation's needs.

It's time we looked hard at our growing propensity to find motes in our colleagues' eyes, to harp about our primly adjusted party halos, to pass judgments, and to bandy about epithets, as though we ourselves were our own worst enemies—political or otherwise. It is time that we, as a party, mind an old adage, "What Peter says about Paul tells more about Peter than it tells about Paul."

To prove my point, let's take our Republican precept: good government is economical government. That, I am sure, has no opponent here. Now let's apply it.

What does economy in government mean to you, to your neighbor, to our party throughout the Nation? Does it mean endangering our country's safety to save dollars, regardless of Communist missiles and aircraft and submarines and atomic bombs? Surely, it must not. Yet we do want economy, and we want our taxes cut. So we ask ourselves, can we cut the Federal budget for defense, where 2 out of 3 of our tax dollars go?

On this there has been much difference of opinion. Mainly it is inspired by our political opposition, which a year ago was charging all over America alleging that our defenses, along with all other Federal programs, had too little, not too much, money. That fact is an interesting commentary on how much they meant what they said last year, and how much they mean the exact opposite that they say now. You remember the jet airplane that flew into its own bullets last year. If we'll just be patient, the opposition will show us exactly how that's done in politics.

But here's the point: is the defense budget now recommended by the President too big, as the opposition says now—too little, as the opposition said last year—or about the right amount as our President says?

Should we, for example, buy fewer jet bombers at $8 million each because they cost two and a half times more than they did, and fewer aircraft carriers because they cost three times as much? Should we have fewer submarines and tanks because their cost has doubled—fewer missiles and rockets and atomic bombs because they take billions we could otherwise use for tax cuts?

The answers are obvious. Not one of us would whittle our Army, Navy, Air Force and Marines below safe levels simply to save money.

That raises these key questions: Committed as we are to economy, do you believe that it is either economy or commonsense to cut defense spending below the point of national safety? Would you support unsafe reductions to make possible tax cuts, budget balancing, debt reduction, if thereby

the security of your home and country and world peace were endangered? Of course you would not. Then, what should we do about this major part of this whole budget question?

As for my own viewpoint, I'll say simply this:

I know not who your confidential defense expert is. Maybe he is a Member of Congress or a news reporter—maybe yourself, or, even, your Federal tax return. But certainly I have mine.

He is the best our Nation has ever had in the highest office in the land.

Confidently, gladly, I put my trust for our defense in Dwight D. Eisenhower.

And of this I am deeply convinced: for our Republican Party—for every American—the only sound course is to give our loyal backing to our great soldier-President on what he deems essential to keep the world at peace and to protect our country.

If that be our proper course in defense, then our search for economy must lead us elsewhere.

Now take the figure 41. That, in billions, is defense cost. Add the figure 17. That, in billions, is for interest payments on the huge national debt we inherited from our Johnny-come-lately economy-minded opponents. That $17 billion also pays expenses which the Government under law has no option but to pay. To cut here is unlawful. So we have the figure 58—41 for defense, 17 for bills we have to pay. Now there is another figure—13. In billions, that's what is left in the budget. In part of this area economy seekers can publicly display their zeal by cutting what they voted for last year and by closing up some of the programs that they so eagerly commenced. Judging from some talk I've heard lately, this $13 billion area ought to be our party's happy hunting ground.

Now, let's look at what is in this figure 13.

Aside from defense and expenses fixed by law, the figure 9 pays for every service and program which your Government carries on. What are they? Let me give you just a few examples: flood control, disaster relief, river, shore and harbor improvements, upkeep of our merchant fleet, assistance in cleaning up slums, most of our farm programs, carrying the mails, construction of post offices and public buildings, maintaining national parks for your recreation, health services for our people, the school lunch program, and so on. Spending for these programs can be stopped if you want them and other such programs stopped, but crippling them will build a poor platform to elect a Congress and a Republican President. It is on such questions that some of us in the Republican Party disagree. The test of this budget cutting must be right here, for certainly we agree that our defense must remain strong and that the legal obligations of our Government must be paid.

What is the ingredient in these programs that generates so much argument? Two words define it: social progress.

Here I want to give you some quotations to help put us on the course again.

The first one is this:

"The legitimate object of Government is to do for a community of people whatever they need to have done but cannot do at all, or cannot do so well, for themselves in their separate and individual capacities. But in all that people can individually do as well for themselves, the Government ought not to interfere."

That wise counsel comes to us from our first Republican President, Abraham Lincoln.

The second quotation is this:

"Our religious faiths have taught us our obligation to those who fall behind in the race for a decent living * * * I believe that the Federal Government should aid education in those States below the average national income, should aid States to give free medical care to all those unable to pay for it, should assist local governments in eliminating slums and providing minimum decent housing, and should, in a crisis, undertake to assist States to provide food."

That statement is bequeathed to us by a statesman who became one of our President's closest, most respected friends—Senator Robert A. Taft.

And third, from the President himself, this quotation:

"In all those things that deal with people, be liberal, be human. In all those things which deal with people's money, or their form of government, be conservative."

And fourth, from our Republican platform adopted less than a year ago, these quotations:

Promise No. 1 in our Republican platform:

"We shall continue our far-reaching and sound advances in matters of basic human needs—expansion of social security—broadened coverage in unemployment insurance—improved housing—and better health protection for all our people."

Promise No. 2 in our Republican platform:

"(We) will continue to fight for dynamic and progressive programs which * * * will stimulate improved job safety for our workers * * * (assist) millions of workers with special employment problems, such as older workers, handicapped workers, members of minority groups, and migratory workers; strengthen * * * the Federal-State Employment Service and improve the effectiveness of the unemployment insurance system; protect * * * the assets of employee welfare and benefit plans * * *; assure equal pay for equal work regardless of sex * * * strengthen the 8-hour laws for the benefit of workers who are subject to Federal wage standards * * * extend the protection of the Federal minimum-wage laws to as many more workers as is possible and practicable * * * fight for the elimination of discrimination in employment because of race, creed, color, national origin, ancestry or sex * * * improve the economic conditions of areas faced with persistent and substantial unemployment * * * revise and improve the Taft-Hartley Act * * * (protect) the right of workers to organize into unions and to bargain collectively.

Promise No. 3 in our Republican platform (relating to aid for school construction):

"The Republican Party will renew its efforts to enact a program of Federal assistance in building based on sound principles of need and designed to encourage increased State and local efforts to build more classrooms."

These statements—from Republican leaders, from our present Republic Platform adopted only 9 months ago—I cite with this 1 purpose in view:

Simply this: to clear our minds of any lingering doubts that any of us have that this Party of ours is a novice in the field of social progress, and that our Party today is no less committed to sound social progress than it was when it was born 100 years ago.

The fact is, today we Republicans are committed before all America, and properly so:

First, to work to achieve equality before the law, regardless of race, creed, or color.

Second, to make sure that our Government remains warmly responsive to the urgent social and economic problems of the American people.

To these ends, we are committed by our Republican platform. To these ends, the campaign in 1956 committed us. To these same ends, the President stands personally pledged, and he has explicitly stated that he, for one, does not take pledges and promises lightly.

I am convinced that the great majority of the people of our party are as resolutely determined to work for all other promises to which our party stands committed as they are determined to work for a smaller budget and the protection of the citizen's dollar.

But this economy business is playing some strange tricks. We see some among us, cheered on by the political opposition, attempting to cripple or to strike out forever some of these programs that we—all of us—pledged to the American people a few months ago.

I say simply this: The pledges we have made cannot be ignored, cannot be weakened, cannot be violated without permanent injury to our entire party. Hypocrisy, personal or political, is not part of the Republican character.

Here, let me make one point absolutely clear.

I am proud—and I believe every Republican in America should be—that our President is determined to carry into full effect every platform commitment of our party, and every campaign commitment he made last fall.

Our job, in my opinion, is to give this dedicated President of ours every possible help in carrying those promises into effect. Can there be better politics for the Republican Party? Repudiation of our party promises and programs will end in nothing but political suicide.

Now, a word on one more concern I mentioned—mutual security it is rightly called; foreign aid or giveaway, as some call it.

No purpose can be served by elaborating on this program on the heels of the President's message to Congress and his personal message to the Nation.

Once again, if we will but refer to our party's pledge to the American people, we will see what we must do or rightly forfeit public confidence and support.

Our platform pledge doesn't beat around the bush.

"We shall continue," it says, "to support the collective-security system begun in 1947 and steadily developed on a bipartisan basis."

Our platform goes on to say this: "Technical and economic assistance programs are effective countermeasures to Soviet economic offensives and propaganda. They provide the best way to create the political and social stability essential to lasting peace."

Even in the absence of these pledges, mutual-security programs demand support for the reasons set forth by the President. But with these pledges, if Republicanism now should turn its back on mutual-security programs, it will be not only at the expense of our Nation's security, but also at the expense of running out on the party's word.

That brings me to mention 1958 and 1960.

This much is clear: No less than a unified and all-out effort can hope to bring victory to the Republican Party in either of these years. Our political opposition is already hard at work, both by commission and by omission. Its omission is inaction—for example, in the field of civil rights, immigration, school legislation, all key elements in our legislative program. Their party is in a real dilemma. If they pass civil rights, they're ruined down South. If they don't, they're ruined up North. The same on schools. The same on immigration. To quote a popular Tennessean, their split personality has them "all shook up." Are we going to let that Jekyll and Hyde combination get away with it? I say "No."

Weapons for victory we Republicans have, in great abundance—a great President; a program of national urgency and demonstrated merit; a nation prosperous and at peace; a defense and a program to wage peace that every Republican can proudly support.

Peace we have gained in contrast to 4 years ago; balanced budgets we have restored; tax cuts we have had, the largest in all history; Government payrolls we have cut; social advances we have forged all across the domestic scene. America today is stronger, happier, better prepared economically and militarily, sounder philosophically

and politically, than in many years. In such a climate, on the very heels of such accomplishment, political success is certain if we will just not rest our oars.

If all this were not enough, we have a political opposition in a constant state of self-contradiction, shook up on issues it can never itself resolve.

Here, then, is the really great lesson from this meeting—to return to our homes and places of business reconsecrated to work wholeheartedly together to win back control of Congress in 1958 and to hold the Presidency for Republicanism in 1960.

And second, I feel impelled to leave this thought with you:

To me it is inconceivable that loyal Republicanism can be twisted to mean persistent and carping opposition to our party's leader and our party platform. If that should be our course—inconceivable though it is—then, earnestly I say this to you: Our party will be foredoomed at the polls.

Therefore, let each of us give personal attention to the official pledges of this party of ours. Let us review the pledges of our President last fall. Then let us redouble our efforts and join with him and our party leadership to ensure that this Republican Party of ours stands honestly, clearly, proudly, before America as one that keeps its word.

Let our party work in unity, as it has promised, incessantly for peace, for sustained progress along paths already laid, for the betterment of every citizen, regardless of station, race, color, or creed.

SMALL BUSINESS AND DEFENSE PROCUREMENT

Mr. PHILBIN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PHILBIN. Mr. Speaker, relative to my interest in stepping up the share of small business in Government procurement and defense procurement, I have again been informed by the Department of Defense that it is the definite policy of the Department that a fair proportion of the total purchases and conracts for supplies and services of the Department be placed with small business concerns whether as prime contractors, subcontractors, or suppliers.

I have learned with much satisfaction that in order to insure that small business is given this fair proportion, a small business adviser has been appointed to the Office of Assistant Secretary of Defense (Supply and Logistics) who is responsible among other things, for representing the Assistant Secretary of Defense in the execution within the Department of Defense of an appropriate small business program.

Similarly, I am informed that each military department has established an Office of Small Business, and small business specialists have been appointed in each principal procurement office of the military departments. To this end, the military departments have been directed to include in their regulations and instructions specific provisions for carrying out the Department of Defense policy.

It is also the general policy of the Department of Defense to consult and cooperate with the Small Business Administration in actively assisting small business concerns to participate in defense procurement. To carry out this policy, I am informed that representatives of the Small Business Administration are afforded an opportunity to review proposed procurements of $10,000 and over and to make recommendations concerning them, including proposals that they be exclusively or partially set aside for small business concerns. When it is determined by such representatives and the contracting procurement agency, the entire amount of the procurement may be set aside for the exclusive participation by small business concerns. Furthermore, in the Department of Defense subcontracting program, prime contractors with prime contracts in excess of $1 million are urged to establish small-business programs similar to that of the Department of Defense.

It is interesting to note that in the 18-month period July 1, 1955, to December 31, 1956, the net value of military prime contracts with business firms in the United States total approximately $27.6 billion. During the same period the small business potential amounted to $8.3 billion or about 30 percent of the total procurement.

Although this factual information seems to indicate that the Defense Department is acting under the Small Business Act of 1953 and motivated by the same consideration that prompted my own bill, H. R. 871, for setting aside a specific portion of the total defense program for small business, I think it will be of great importance that the Department continues its efforts to channel a larger portion of its total procurement to small business. The facts show that small business employs more than 50 percent of the total labor force actively engaged in industry and business, and I think that most of us recognize that small business as such is the very keystone of the vaunted, incomparable American free enterprise system.

Let me make it clear that those of us interested in the problems of small business, seeking to protect and strengthen the position of small business in the economy are not hostile to big business. We believe that big business, like small business, definitely has its place in our economy. Some of us have been concerned, however, about certain aspects of the marked recent growth and steadily increasing and broadening influence of huge business aggregations which we conceive may be posing for the Nation serious problems arising from monopolistic organization acquiring such vast economic power as to, in course of time, stifle, harm, and dangerously check the opportunities of small business as well as lessen competition and work dangerous social results to the people.

It is my confirmed view that there is room for every kind of enterprise, large and small, in this great Nation and in our economy. The important thing is to maintain the kind of climate that will protect and consequently spread over the entire field those incentives and opportunities for expression and fulfillment of initiative that are necessary to promote the health, vigor, and dynamic character of our business and economic institutions.

It is for these reasons that I regard the implementation by the Defense Department of the Small Business Act of 1953 to be so fortuitous, timely, and encouraging. I hope efforts along this line will continue, not only in the Defense Department, but in every other department of Government, in order to insure for small business a real opportunity to enjoy the fruits of Government procurement and Government contracts, which at this time in our economic history are so important to business, and consequently to millions of workers, technicians, experts, and managers who are dependent upon continued prosperity for livelihood for themselves and their families.

Many are concerned and alarmed about the impact and effects, industrially, economically and socially, that would follow the termination of huge annual expenditures by the Government for defense and related purposes. For several years now, the Federal Government has been spending billions upon billions of dollars for defense, most of which is channeled into the national economy. Obviously, the sudden cessation of this voluminous flow of dollars would have serious repercussions, yet I am of the opinion that these untoward effects would not long be continued. In the short run, the Government would certainly have to implement in other fields makeshift substitutes for these huge expenditures. But in the long run, there are such vital forces of growth and development at work in the Nation driving us forward to increasing economic and social levels that our economy would be bound to make favorable adjustments.

The rapid increase in population well beyond any of our expectations, the advent of surprising, miraculous new inventions, the expansion of scientific and industrial techniques, the emergence of a multitude of new needs and new demands of the economy and of the people from a solid basis for future expansion and future economic well-being and prosperity.

The real problem of the Congress is to maintain its acute awareness of deep-rooted changes and advances in our total organic structure and try to anticipate the time of necessary readjustments due to the improvement of conditions in the world, and the elimination, or at least the amelioration, of those alarming forces tending in the direction of armed conflict. Once we could effect and insure the peace, we could all be relieved of the great anxiety that besets the people of the world, and in that sense other problems would be susceptible of reasonably advantageous solution.

Once the problems of nuclear war have been solved and enduring peace assured, the Nation and the world would not only be relieved of greatest concern, but could bestow undivided attention upon the problems of peace. While these problems in proper perspective would loom large and challenging in more ways than one, they would be a welcome substitute for present repetitious threats of impending nuclear war.

MORE WIDOWS TO BECOME ELIGIBLE FOR VA BENEFITS

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, at the present time, widows of some veterans are eligible for a death pension or death compensation while others are not.

This unfair situation has developed through lack of coordination in the various laws that were passed over the decades pertaining to the eligibility of a veteran's widow to certain benefits as a result of her deceased husband's wartime or peacetime military service.

The purpose of H. R. 3658 is to clear up the confusion and the contradictions; to establish uniform standards of eligibility; and to validate certain marriages, insofar as a widow's entitlement to benefits is concerned, where the two parties married in good faith and lived together, unaware of a legal impediment to their marriage.

It is the opinion of the Committee on Veterans' Affairs that the requirements provided in section 1 of this bill are reasonable and will add no great cost to veterans' benefits. It is estimated by the Veterans' Administration that a maximum of 12,000 widows of veterans of World War I, prior wars, and peacetime service would become eligible for compensation and pension benefits under section 1 of the bill, during the first year, at an estimated cost for that year of $6,559,000. There is insufficient data upon which to base an estimate of the additional pension cost in World War II cases. There will be no additional cost for Korean conflict cases until after January 31, 1965. The Veterans' Administration believes that the cost of section 2 of the bill would be relatively small and favors the section in principle.

As to section 1, the bill recognizes that a veteran's widow should not be excluded from entitlement to benefits because her husband married her later in life and died before a stated member of years had passed. For instance, under present law, the widow of a World War I veteran, who married the veteran after December 14, 1944, must have been married to him for 10 or more years prior to his death or else lose her eligibility.

Widows of World War 2 veterans must have married the veterans prior to January 1, 1957. Widows of Korean veterans must prove that the marriage occurred before January 31, 1965.

This bill would ease these rigid requirements by reducing from 10 to 5 years the length of marriage that would make a widow eligible. She would qualify at any time if a child is born of the marriage.

Concerning section 2 of this bill, the following comment by the VA is convincing:

> A study conducted in 1955 revealed that application of the law has sometimes produced harsh results. The study disclosed a number of cases where a claimant was unable to establish that a prior marriage on the part of either the veteran or herself had been legally dissolved, with the result that benefits were accordingly denied, notwithstanding that in good faith she entered into a marriage with the veteran, cohabited with him for many years, and in some instances bore children in such ostensible marriage relationship.

Under the present hodge-podge of veterans legislation we are declaring that unless a veteran marries before a certain date that marriage is not recognized—in regard to the widow's entitlement to pension or compensation—until the marriage has been in effect for 10 years.

But a widow of a veteran who marries before a given delimiting date qualifies for benefits, even though the marriage is suddenly cut short by the death of the veteran.

It is manifestly unjust to draw these arbitrary distinctions.

When a woman marries a veteran in good faith, she should be recognized as his widow when death takes her husband away.

To remove present disparities and to approximate a uniform rule governing the eligibility of widows for VA benefits, I wish to support H. R. 3658.

THE FEDERAL COMMUNICATIONS COMMISSION

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. DINGELL. Mr. Speaker, next month there will be a vacancy on the Federal Communications Commission with the exodus of George McConnaughey, the Chairman.

Mr. McConnaughey is a former Ohio telephone company lawyer who is winding up one of the most ignominious careers in the history of quasi-judicial regulatory agencies. The story of his leadership is already partially available. In fact, the activities of the Commission seem to have become so nauseating to high administration circles as to prompt a search for a more desirable type of official. I am informed that a Mr. Edward K. Mills of the General Services Administration was considered as a new member of the Commission with a view to having him clean up this most politics ridden of all regulatory agencies. However, it was reported he was to tidy up these Augean stables without getting the chairmanship and politely turned down the offer.

The chairmanship, Mr. Speaker, is said to be earmarked for Commissioner John Doerfer, who has worked closely with Mr. McConnaughey in giving the Commission the reputation it has acquired in the Congress and in the industry. Mr. McConnaughey and Mr. Doerfer have demonstrated a penchant for endearing themselves to the networks and the bigger telecasters—the people, in short, whom the FCC is supposed to regulate.

I think it essential that the Congress have the facts on the record of these two men, and the way in which they have dragged the Commission down into its present situation. It will certainly be in the interest of the people to expedite the inquiry by the House Commerce Subcommittee into the conduct of this and other regulatory agencies and the manner in which they are discharging their responsibilities.

Mr. McConnaughey is a man who tries to take good care of his friends. Thus a Commission investigation of the telephone company's charges for television transmission has been kept under wraps, possibly because of the Chairman's ties with the people he formerly represented as attorney. Mr. McConnaughey has also been kind to the networks. The record will show that at one gathering, he discussed with the networks and other broadcasters, FCC staff investigations of obvious concern to the networks. He placated network fears telling them they need have no anxieties about the investigation. He had the gall to prejudge a matter in which he might sit as chief judge.

Mr. McConnaughey should also be brought before the House Commerce Subcommittee to explain favors he has sought from broadcasters who are subject to regulation by his agency, and who in fact had matters pending before his agency.

He should also be asked to explain certain decisions of the Commission in which he and 3 others of the 7-man group have voted together in shocking disregard of policies underlying the award of television construction licenses, including the infamous decision this past April 25 to award a television license in Boston to an interest controlled by adjudicated monopolists.

Three weeks before that decision, on April 2, I called to the attention of the House the reports in the television industry press about the skids being greased at the Commission to award a television channel in Boston to the monopolists. In these remarks, I outlined the efforts of the Boston Globe, an independent newspaper, and not an applicant for a TV channel, to intervene in the case after indications that the Chief Examiner of the Commission, who had rated the monopoly interests—the Herald-Traveler—a tie for a poor third, would be overruled by a majority comprising Commissioners McConnaughey, Doerfer, Lee, and Mack.

Mr. Speaker, the intent and will of the Congress calls for the award of broadcasting licenses in the public interest, not to promote the newspapers owned by adjudicated monopolists. The intent and will of the Congress and the acknowledged responsibility of the Commission are to diversify ownership of media of mass communication, not to concentrate them in the hands of a single outfit—especially a firm like the Herald-Traveler which is controlled by one Sidney Winslow who together with his company, the United Shoe Machinery Company, have a notorious record of violations of the antitrust laws.

The Commission soft-pedaled this flagrant record of the Herald-Traveler

ownership. Instead the McConnaughey majority apologetically observed that the practices engaged in by Winslow's company, the United Shoe Machinery Co., were not predatory. The United States Government demonstrated otherwise. In the Supreme Court of the United States, in response to questions by Chief Justice Warren, Government Counsel cited practices which he described as harsh and ruthlessly restrictive. The Court, in fact, unanimously upheld a decree compelling the United Shoe Machinery Co., a classic example of the old-line trusts that gave rise to the Sherman and Clayton Acts, to make drastic changes in its peculiarly monopolistic way of doing business. As recently as last February, Mr. Speaker, the Winslow interests settled out of court a treble damage suit brought by a competing firm. Among other things, the plaintiff charged that its customers were forced to pay royalties to the United Shoe for use of competitive equipment.

The proclivity toward monopoly of the Winslow interests is reflected in the activities of another of their offspring, the Herald-Traveler. Nor are the business ethics of the Herald-Traveler any better than those of the other Winslow activities.

In this connection, the Boston Globe filed affidavits of illegal efforts by the Herald-Traveler to accomplish a newspaper monopoly in Boston, and of threats by the Herald-Traveler management to use the television station to achieve this end. The Globe also submitted evidence of Herald-Traveler business methods, such as secret, discriminatory joint advertising rates for space in its three newspapers and time on its two radio stations, as well as the practice of denying competing independent stations the right to have their program logs published in the newspapers. In addition, the publisher of the Herald-Traveler, Robert Choate, testified that the primary purpose of channel 5, if awarded to the Herald-Traveler, would be to promote the morning Herald, the afternoon Traveler, and the Sunday Herald.

At the time of my earlier remarks on this subject I pointed out that the Boston Herald-Traveler and its management had attempted to interfere with the efforts of the Globe to secure financing for a new plant which the Globe management was constructing. It appears that these efforts by the management of the Herald-Traveler have gone further, and it also appears at this time that the Boston Globe has been browbeaten by the insurance companies doing the financing on the construction of the new plant into dropping the court action which the Globe contemplated to seek reversal of the unusual ruling by the Federal Communications Commission granting the license to operate channel 5 to the Herald-Traveler interests.

Another equally startling development in this matter still further illustrating the need for a thorough investigation has been the resignation of Massachusetts Bay Telecasters' attorney, McKenna. It has been reliably reported that Mr. McKenna has been compelled to resign. This happened when he received a call from his principal client, the ABC network, whose president informed Mr. McKenna that if he continued to represent them he would have to resign as counsel for Massachusetts Bay Telecasters in their effort to have the court overthrow the ruling of the Federal Communication Commission granting the license for channel 5 to the Boston Herald-Traveler. The reason for this is that the American Broadcasting Co. is trying to make a deal with the Boston Herald-Traveler for channel 5 in Boston as one of its outlets.

The ostensible Commission policy in cases involving more than one applicant, of considering the factor of diversification of ownership in media of mass communications, is founded in the belief that the widest possible dissemination of information from diverse sources and the promotion of competition are in the public interest. It is based on the fact that such concentration tends to create an editorial monopoly, tends to prevent competing ideas from reaching the market place of men's minds and concentrates economic power which may be used to destroy competition. This policy goes to the heart of the preservation of our democratic institutions. It is by far the most important criteria of comparison to be considered by the Commission. And yet in the Boston case the Commission awarded the grant to an applicant which operates morning, evening and Sunday newspapers and FM and AM radio stations, each of which is dominant in the area.

There is another remarkable thing about the award to the Herald-Traveler group in the face of the Commission's policy against the concentration of mass media. While deploring the concentration of media, the Commission decided in favor of the Herald-Traveler group, because of the experience which that group and its personnel have acquired in operating their newspapers and radio stations. Thus, while on the one hand recognizing the danger to the public of a concentration of mass media, the McConnaughey, Doerfer, Lee, Mack decision nullifies the Commission's policy against such concentration by finding that the experience gained thereby overbalances the danger to the public interest. It completely overlooks the fact that the danger from concentration of mass media is permanent while experience can be easily and quickly acquired or hired.

That the concentration of economic power which will result from this award will be used to crush competition is evident from Winslow's United Shoe Machinery Co.'s practices and from the monopolistic and predatory practices of Winslow's Herald-Traveler newspapers and radio stations. We are not left to surmise as to what will happen if this group starts operating a TV station. Mr. Choate, who acts at the direction of Mr. Winslow, has made it clear, and I quote him:

> We will adapt the programing of the television station to the best possible promotion of the Herald-Traveler wherever it is possible to do so.

Thus Choate baldly admits that the station will be operated to promote a private interest and not the public interest, as required by law.

It is clear beyond doubt that the decision rendered by the Commission in the Boston proceedings is not honest, impartial, or fair. The whole elaborate apparatus of the majority opinion running for 125 pages was, on McConnaughey's instructions, cunningly drafted by Commission personnel to conceal from the public the true considerations which actually motivated the decision. Throughout, the opinion plays up the merits and plays down the shortcomings of the chosen applicant, and conversely, plays down the merits and plays up the shortcomings of its competitors. Furthermore, information that the staff was drafting an opinion favorable to the Herald-Traveler was leaked out in March—over a month before the decision was officially announced. As a result of this leak, the stock of the Herald-Traveler jumped from $16 to $23 a share, allowing a few insiders to make a killing.

These activities by a Government agency in the purported performance of its judicial function are poison in the body politic and ought to be exposed for what they are.

Among attorneys who are practitioners before the present Federal Communications Commission, it is now believed that a case is arranged rather than tried, and the winner is the party with the most political strength. The Boston case happens to be an intraparty fight, with Republicans fighting Republicans for the most part. But apparently, the winning side had the advantage in the support of the Secretary of Commerce, Sinclair Weeks, who has close ties to Mr. Winslow and other members of his group.

It is distressing, to me as an attorney, to hear lawyers talking of arranging cases. Such talk is shockingly widespread in Washington, and it behooves us, Mr. Speaker, as lawmakers, to crack down on those regulatory bodies, or officials in those bodies, whose conduct is less than completely proper.

That is why the Commission should be thoroughly investigated, and insofar as antitrust violators are concerned, the Antitrust Division of the Department of Justice should also be questioned. Thus in the Boston matter, the Assistant Attorney General in charge of the Antitrust Division, Victor R. Hansen, behaved in the most peculiar fashion.

I submit, Mr. Speaker, that Mr. McConnaughey and Mr. Hansen should be asked to enlighten the new House Interstate and Foreign Commerce Subcommittee on Administrative Oversight about their joint roles in FCC proceedings with antitrust aspects.

Here are a few questions that should be posed:

Why did not Chairman McConnaughey ask the Justice Department about the grave antitrust issues which were raised in the Boston case?

Why did not Assistant Attorney General Hansen inform McConnaughey completely about the merits of these antitrust issues?

Why did Mr. Hansen fail to inform Mr. McConnaughey that the charges against the Herald-Traveler were still under investigation?

Why did Mr. Hansen in an admittedly "summary" offhand manner simply kiss off the antitrust implications of this mat-

ter in his discussion with McConnaughey?

Why was Mr. Hansen so reticent about exercising the function of his office as head of the Antitrust Division of the Department of Justice?

Surely Mr. McConnaughey and Mr. Hansen must have known the consequences of the Commissions' decision in the RCA-Westinghouse case—the deal whereby RCA acquired Westinghouse's properties in Philadelphia in exchange for the far less desirable RCA-NBC stations in Cleveland, and a cash consideration. This decision, which we can ascribe chiefly to Commissioner Doerfer, the writer of the majority opinion, led to grand jury action and an antitrust case which Mr. Hansen's Antitrust Division is prosecuting in Philadelphia—I hope with more energy than Mr. Hansen has pursued the matter in Boston to date.

It is possible that Mr. Doerfer's performance in the NBC-Westinghouse deal may be explained by his tours around the country at broadcasters' expense, telling them what wonderful people they are. Having written the decision in the RCA case, he has won something of a reputation in the industry as an advocate for RCA and the National Broadcasting Co. Small wonder that elements of the industry look with favor on the prospect of his promotion to Chairman of the FCC.

Commissioner Lee has also been equally consistent in ignoring policies of the Commission concerning diversification. He has been utterly apathetic to the fact that applicants with histories of antitrust violations should not be given preference over more desirable applicants. And like Doerfer, Lee has very friendly relations with the networks. For instance, on one occasion, as the House Small Business Committee revealed, Mr. Lee, after becoming a Commissioner, not only relayed secretly to the head of the Columbia Broadcasting System, Commission thinking about a pending case in Chicago, but made it clear that he (Lee) was doing everything possible to advance CBS's cause in that matter.

Commissioner Mack seems to have been picked for a Democratic place on the Commission solely by reason of his having been an Eisenhower Democrat.

Through the efforts of Commissioners McConnaughey, Doerfer, Lee, and Mack, the FCC has become unique in the annals of the Federal Government's independent offices. It has adopted a new philosophy of regulation—to make decisions in favor of those who seem to have the most powerful political muscles. It is a philosophy which is causing dismay and disgust among members of the bar. Even more sinister is the influence of such insidious handling of quasi-judicial responsibilities on the American way of life. For appointment to such agencies could in time become something to be desired as a means of gaining ultimate employment and favors from industries subject to their regulation.

Perhaps certain of the President's advisers, aware of the black mark that he may suffer inadvertently as a result of the conduct of such appointees in his administration, are bent on correcting the situation by recommending improvements in the selection of newcomers to the Commission. But this is hard to believe in view of the pains taken to save Mr. McConnaughey's face as he returns to private life. He has been authorized to state that he leaves of his own volition, that he could have remained, had he chosen to be reappointed.

In this Chamber on April 2, Mr. Speaker, I stated that I would urge a thoroughgoing investigation of the Commission in the light of the Boston case which then promised to be a most brazen flouting of the public interest. Events since that time have only served to emphasize the impelling need for the most searching congressional scrutiny into the operations of this agency.

THE PRIVATE CALENDAR

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the call of the Private Calendar on Tuesday next week be dispensed with and that it may be in order to call the Private Calendar on Monday next.

The SPEAKER. Is there objection?

There was no objection.

HONOR CONFERRED UPON MR. FOGARTY, OF RHODE ISLAND

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, I have noted with great pleasure the additional honor recently conferred upon our distinguished friend and colleague, the gentleman from Rhode Island [Mr. FOGARTY], when he was admitted into Omicron Kappa Upsilon, a national honorary dental society, which action was taken by the faculty of the Georgetown University School of Dentistry.

This recognition given to our friend is one he richly deserves. In honoring him the society honors itself.

The gentleman from Rhode Island [Mr. FOGARTY] is one of the ablest as well as sincere and trustworthy Members of the Congress. He is highly respected by all of his colleagues.

His outstanding work in the Congress of the United States in behalf of our people covers many fields of legislative and humane activities. His able and courageous fight for years, resulting in success, in the field of medical research and the proper place of the Federal Government therein, is one known far and wide. In this respect alone, the gentleman from Rhode Island [Mr. FOGARTY] has made his name in American history.

The part played by the Federal Government in the advancement of medical research in recent years has been an important one as well as the progress that will be made in the years that lie ahead. For it is not only Americans who have and will benefit, but human beings everywhere throughout the world.

It was under the leadership of the gentleman from Rhode Island [Mr. FOGARTY] that the necessary appropriations were made for the prominent part that the Federal Government has played in such progress, and will also play in future advancement in this important field.

The leadership of the gentleman from Rhode Island [Mr. FOGARTY] is the result of his strong faith, his deep love of his fellowmen, particularly the sick and the ill. His fight for such appropriations is humane leadership on the highest level humanly possible.

In congratulating our friend the gentleman from Rhode Island [Mr. FOGARTY] on the honor he has received, I know I express the thoughts and sentiments of all of my colleagues.

HOSPITALS AT WALTHAM, MASS., AND ARKANSAS

The SPEAKER. Under previous order of the House, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 5 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I have asked for this time because when the gentleman from Michigan [Mr. FORD] said he was going to move to strike from the bill the provision that would keep Murphy General Hospital at Waltham, Mass., in operation and also the one that would keep the hospital in Arkansas in operation, it struck horror to my soul, because we have had that battle before. Before Korea, Murphy General Hospital was closed. It was done at great expense. It was only about a month afterward that the Korean war came and they had to reopen the hospital, also at great expense and hardship. The care of the patients was delayed. To my mind it would be unforgiveable to cut out the money for the hospitals in Arkansas and Massachusetts.

We have had a very serious shortage of nurses and doctors in Massachusetts. If a dependent should come to a civilian hospital, as they are entitled to do under the law, they could not find beds. At one very important hospital in Massachusetts only last month, one entire floor was closed and another will be closed in the summer. That is due to a shortage of nurses and doctors. A good many of my friends seriously have to await hospitalization in civilian hospitals and many are turned out of hospitals too soon to provide beds for others.

I just talked to the Bureau of Medicine and Surgery of the Navy. They said that if any patient should be taken into the naval hospital at Chelsea, Mass., they would have to open wards and have to get an additional number of nurses and doctors. So any saving that would be at the Murphy General Hospital would be simply added to the expense at Chelsea, for the doctors and nurses that would have to be employed at the naval hospital, in addition to what they now have. I do not believe they want to take these patients. They are satisfied with the patients that they have.

As for Fort Devens, it is partly in the district represented by my colleague [Mr. PHILBIN] and partly in my district. They have asked for a new hospital at Devens showing that they feel their present hospital is inadequate and, of course, that is not built yet, and it will take some time to build it.

I know, of course, both of us would like to have more patients there at Fort Devens. Devens is a large post and has very important personnel activities there. They may at any time need all the beds they have. Additional nurses and doctors would have to be added.

So where is the saving?

It would be a hardship for these dependents of the service people to go to Fort Devens, 40 miles from Boston. They should be hospitalized at the Waltham Hospital if they wish. We have learned by experience the expense of closing and reopening the hospital. I was shocked a while ago, when the office of the Surgeon General of the Army told me they were not allowed to give out any information about the Waltham Hospital, that it must come from Secretary Brucker's office. Oh, how terribly, terribly foolish to close that hospital. There would be no saving of money; there would be additional expense and great hardship.

How can I go back to Massachusetts? I came from memorial services yesterday at Lowell. I talked about the men, of the care that they had had. How can I, on Memorial Day, say to these soldiers and to their families who will be listening that they cannot be taken care of, that their families cannot be taken care of? But you can spend billions and billions of dollars for munitions of war and billions of dollars for installations other than hospitals.

The least we can do is to provide hospitalization for our men and their dependents. It is part of the law that we are to take care of the dependents of the soldiers as well as the soldiers themselves.

Those of you who worked in any military hospital through the flu epidemic of 1918 know very well what an epidemic does—the loss of life because of lack of beds and care. I was at Walter Reed Hospital during the flu epidemic there. The men were dying almost like flies. We did not have enough nurses—I was not a nurse, but I was helping out—we did not have enough doctors or nurses to take care of them; and you know what the situation was for the civilian population.

We must keep these hospitals open, Mr. Speaker. This country has not ever been bombed, but it might be at almost any time. Perhaps Russia does not want war at this time but the world is a tinderbox. In spite of the best laid plans we might be in a war—what then would we do for hospitals for the military and for civilians as well?

This huge appropriation bill is supposed to be for our defense. The argument is used we must be prepared because we were not prepared for Korea. We were not prepared for World War II. We were asleep. We should be prepared in medical care, or will we never learn, Mr. Speaker?

THE FEDERAL FLOOD INDEMNITY ADMINISTRATION

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 15 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, on Wednesday of this week the House will have before it the conference report on the third supplemental appropriations bill. In this bill is an item of great national importance and I should like to make a few brief remarks about it. The item is $14 million for the Government's flood insurance program. The Government had originally asked for $50 million.

The House rejected this item by a teller vote of 127 to 97 when this issue was before us 2 weeks ago. The Senate restored the $14 million.

Now, what is this $14 million for? First of all, it is not for hiring more people or even for paying the salaries of the few men and women now employed by the Federal Flood Indemnity Administration which Congress established last year.

Part of the $14 million is to pay commissions to agents of private insurance companies if, of course, they sell these policies. Another part of the $14 million is for expenses of insurance companies for issuing and servicing policies, underwriting, and accounting and statistical work on behalf of the Government. Another portion of the $14 million is for expenses to be paid claim adjusters for their services in handling settlement of claims. I want to stress the fact that these adjusters are paid only if and when they adjust these claims.

In short, the bulk of this program will be done by the private insurance companies who will handle this business on an out-of-pocket cost basis. They won't make a dime of profit out of this program.

Arrangements made with the insurance industry eliminate the need for the Federal Flood Indemnity Administration to organize a large staff, recruit, develop, and train personnel and employ a large group of claim adjusters, whose time would not be fully utilized as their services would be needed only when and if losses occur.

The Government's insurance program was developed by the FFIA staff with the advice and assistance of the best insurance talent available in the Government and the private insurance industry. All are of the opinion that the program is workable, urgently needed, and will make the benefits of self protection available at reasonable rates.

The Congress has been talking about this issue for more than 6 years. Surveys and studies were made. Hearings were held all over the country. Government economists, hydrologists and those skilled in insurance all participated in the development of the legislation which was the end result of the labors and best thinking of the insurance industry and the Government.

We passed the flood-insurance law last summer. We appropriated $500,000 to the FFIA to give this subject further study, particularly regarding premium payments which will vary from area to area, depending on the risks involved. The House Subcommittee on Appropriations, in denying the $14 million, requested the FFIA to continue its studies.

In my opinion, we know as much about the theory of flood insurance as we will ever know. The only way we will ever know anything about the practicalities of flood insurance is to put this program into practice and that can be done only by the appropriation of the $14 million which I mentioned before. Having adopted this measure, I think we have a moral duty to millions of home owners and small-business men to put it into operation. Frankly, I am puzzled about the position taken by some of my colleagues. We all wanted this law last summer and now some Members, very distinguished and able Members of the House—are balking at appropriating the necessary $14 million to set the flood-insurance machine in motion.

The Government is not competing with private insurance companies. The law is very clear on that point. Section 12 (a) reads as follows:

> No insurance or reinsurance, or loan contract, shall be issued under the provisions of this act covering risks against which insurance is available on reasonable terms from other public or private sources.

The statute makes it mandatory on the FFIA Commissioner to submit annual reports to the Congress. It was the further intent of the Congress in passing the law that this program, if it proves feasible after a 5-year trial run, should be turned over to the private insurance industry, lock, stock, and barrel. This provision is clearly spelled out in section 21 of the statute.

There is nothing new about the Federal Government starting insurance programs in areas which private insurance companies did not deem profitable. There are many precedents for the Government's flood-insurance program. Indeed, arguments similar to those now being made against the FFIA were made against the Home Owners Loan Corporation, the Federal Deposit Insurance Corporation, the Federal Housing Administration, and others. No one today could seriously question the effectiveness of the work done by these agencies. The FHA, to cite only one example, had to borrow millions and millions of dollars from the Treasury for the first 6 years of its existence. Today it has almost $500 million in capital and reserves.

The flood-insurance program is ready to be put into operation promptly. Believe me when I say that. I have checked this thoroughly. Fiduciary agreements can be mailed to several thousands of fire and casualty companies on 5 minutes' notice. Various documents essential to the program's proper operation, including the insurance application, the contract, rates, underwriting rules and regulations, loss adjustment procedures, accounting and statistical rules, and other forms are completed.

Many safeguards have been built into this program to minimize the Government's potential liability:

First. The amount of insurance which can be sold to any person or corporation is limited to $250,000 and $10,000 on a dwelling and its contents.

Second. Flood indemnity contracts will contain a $500 deductible, plus 5 percent of the remainder of the loss. Moreover, most losses arising under these contracts will in all probability be partial losses; therefore, the total amount of insurance in force will not be the measure of the Government's liability.

Third. A spread will be obtained by selling flood indemnity contracts nationwide. Since all exposed places will not have damaging floods at the same time, the fundamental principle of insurance will apply: namely, contributions of the many to pay for losses of the few.

Fourth. It was never the intent of the Congress in passing this law that flood insurance policies would be issued indiscriminately and to property owners in areas where there are abnormally high risks of floods. A flood zoning provision was specifically written into the statute. This provision was inserted after meetings with State officials and committees of the Council of State Governments, in an effort to reduce Government liability. Section 12 (c) of the statute reads as follows:

> After June 30, 1958, no insurance or reinsurance shall be issued under the provisions of this act in any geographical location unless an appropriate public body shall have adopted and shall keep in effect such flood zoning restrictions, if any, as may be deemed necessary by the Administrator to reduce, within practicable limits, damages from flood in such location.

In addition to the foregoing safeguards, we should also consider the effect of this program in reducing direct Federal aid to flood victims. By means of this program, a measure of self-protection is available to the American people, and, to the extent that it is used, it will tend to reduce the amount of direct Federal and State aid for relief, rehabilitation and charity.

From available data, a separate set of rates has been established for each major river basin in the United States, and the more highly exposed areas along the Atlantic and gulf coasts. In addition, differentials have been fixed applicable to buildings only, buildings and contents, or simply contents. A differential is applied between residential and commercial property, and between frame and nonframe construction. A classification—piers, wharves, and property over water—will carry a substantially higher rate. A rate differential is fixed between contents insured above and below the grade floor. Also there is a minimum premium of $25.

These rates reflect varying degrees of exposure, and are marketable, as required by the Federal Flood Insurance Act.

These rates have been reviewed carefully by the industry, by the two industry advisory committees, and have their concurrence as to reasonableness and marketability. These rates are calculated to produce sufficient premium income to meet budgeted requirements.

The rating system we have devised will, of course, be refined as experience is gained.

Some people mistakenly believe that floods confine themselves to certain areas—California, for example, or Texas or Kansas and Missouri, or Ohio, or Connecticut. These are areas where floods are damaging and making headlines. The truth is, however, that floods, like lightning, strike anywhere. For example, in October 1955 parts of the District of Columbia were flooded and many homes were damaged. Outside of Washington, nobody ever heard of this flood.

You do not have to live on a riverbank to run the risk of damaging floods.

In view of the factual material which I have here submitted, I sincerely hope that the House will restore the $14 million so necessary to start the flood-insurance program.

RETURN OF BILL TO SENATE

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the resolution (S. Con. Res. 33) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That the President of the United States is requested to return to the Senate the enrolled bill, S. 1463, to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle subject to the motor carrier safety regulations of the Interstate Commerce Commission. If and when said bill is returned by the President, the action of the Presiding Officers of the two Houses in signing said bill shall be deemed rescinded; and the Secretary of the Senate is authorized and directed, in the reenrollment of said bill, to make the following correction: In line 3 of the Senate engrossed bill strike out "38" and insert "33."

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DIGGS (at the request of Mrs. GRIFFITHS), for today, on account of official business.

Mr. MILLER of Maryland (at the request of Mr. MARTIN), for the remainder of the week, on account of illness.

Mr. KITCHIN (at the request of Mr. ALEXANDER), for today, on account of illness in family.

Mr. AUGUST H. ANDRESEN (at the request of Mr. O'HARA of Minnesota), indefinitely, on account of death in family.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. LONG in two instances and include related matter.

Mr. SHUFORD (at the request of Mr. RIVERS) and include an address by Mr. WHITING.

Mr. SHEEHAN (at the request of Mr. BYRNE of Illinois).

Mr. NEAL and in two instances to include editorials.

Mr. BROWNSON, the remarks he expects to make in Committee of the Whole today and include extracts from newspaper articles.

Mr. HENDERSON.

Mr. AUCHINCLOSS.

Mr. MULTER (at the request of Mr. ALBERT) in three separate instances, in each to include related matter.

Mr. ANFUSO (at the request of Mr. ALBERT) and include related matter.

Mr. SCHWENGEL (at the request of Mr. WIGGLESWORTH).

Mr. NORRELL.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 2146. An act to amend the Small Reclamation Projects Act of 1956; and

H. J. Res. 247. Joint resolution for the relief of certain aliens.

BILL AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill and a joint resolution of the House of the following titles:

H. R. 2146. An act to amend the Small Reclamation Projects Act of 1956; and

H. J. Res. 247. Joint resolution for the relief of certain aliens.

ADJOURNMENT

Mr. McCORMACK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to. Accordingly (at 4 o'clock and 54 minutes p. m.) the House adjourned until tomorrow, Tuesday, May 28, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

891. A letter from the Administrator, General Services Administration, transmitting a draft of proposed legislation entitled "A bill to amend section 203 (c) of the Federal Property and Administrative Services Act of 1949 and to permit the exercise of options contained in certain leases of Government property"; to the Committee on Government Operations.

892. A letter from the Under Secretary of the Interior, transmitting a proposed concession contract with Oregon Caves Co., which, when executed by the Director of the National Park Service, will authorize it to provide facilities and services for the public in Oregon Caves National Monument, Oregon, for a period of 15 years from November 1, 1956, pursuant to the act of July 14, 1956 (70 Stat. 543); to the Committee on Interior and Insular Affairs.

893. A letter from the Chairman, Federal Power Commission, transmitting a copy of its newly issued publication entitled "Typical Electric Bills, 1957, Cities of 50,000 Population or More"; to the Committee on Interstate and Foreign Commerce.

894. A letter from the Under Secretary of the Interior, transmitting a copy of an order canceling certain charges existing as debts due the United States by individual Indians and tribes of Indians, pursuant to the act of July 1, 1932 (47 Stat. 564; 25 U. S. C. 386a); to the Committee on Interior and Insular Affairs.

895. A letter from the Administrator, General Services Administration, transmitting a draft of proposed legislation entitled "A bill to increase the authorization for appropriations for the Hospital Center and facilities in the District of Columbia, and for other purposes"; to the Committee on the District of Columbia.

896. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated October 19, 1956, submitting a report, together with accompanying papers and illustrations, on a review of reports on the Delaware River between Philadelphia and the sea, with respect to modification of channel dimensions and anchorage areas, requested by resolutions of the Committees on Public Works of the House of Representatives and of the United States Senate, adopted March 1, 1954, and March 16, 1954, respectively (H. Doc. No. 185); to the Committee on Public Works and ordered to be printed with three illustrations.

897. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated March 15, 1957, submitting a special report, together with accompanying papers and illustrations, on a study of local cooperation in the part of the central and southern Florida project authorized by the Flood Control Act of 1954, section 203, title II, to determine the basis for cost sharing between Federal and non-Federal interests which would be equitable to both, and in the light of current Federal policy and practice for cost sharing in water-resources development (H. Doc. No. 186); to the Committee on Public Works and ordered to be printed with two illustrations.

898. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated June 16, 1956, submitting a report, together with accompanying papers and illustrations, on a review of report on Shell Creek and tributaries, Nebraska, requested by resolutions of the Committee on Commerce, United States Senate, and the Committee on Flood Control, House of Representatives, adopted November 5, 1945, and November 15, 1945, respectively (H. Doc. No. 187); to the Committee on Public Works and ordered to be printed with nine illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JONES of Alabama: Committee on Public Works. S. 1428. An act to authorize furniture and furnishings for the additional office building for the United States Senate; without amendment (Rept. No. 482). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of Alabama: Committee on Public Works. S. 1429. An act authorizing the enlargement and remodeling of Senators' suites and structural, mechanical, and other changes and improvements in the existing Senate Office Building, to provide improved accommodations for the United States Senate; without amendment (Rept. No. 483). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of Alabama: Committee on Public Works. S. 1430. An act increasing the limit of cost fixed for construction and equipment of an additional office building for the United States Senate; without amendment (Rept. No. 484). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. HARRIS:

H. R. 7778. A bill to amend section 31 of the Securities Exchange Act of 1934, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. MAILLIARD:

H.R. 7779. A bill to authorize free transit at the Panama Canal for vessels operated by State nautical schools; to the Committee on Merchant Marine and Fisheries.

By Mr. MORANO:

H. R. 7780. A bill to provide in the Department of Health, Education, and Welfare for a loan service of captioned films for the deaf; to the Committee on Education and Labor.

By Mr. REUSS:

H. R. 7781. A bill to increase the normal tax and surtax exemption, and the exemption for dependents, from $600 to $700, without inflation, and to reduce the percentage depletion for natural resources; to the Committee on Ways and Means.

By Mr. ROBERTS:

H. R. 7782. A bill to provide for the establishment of Fort Strother, Fort Lashley, Fort Williams, and Fort Jackson as national monuments; to the Committee on Interior and Insular Affairs.

By Mr. BECKWORTH:

H. R. 7783. A bill to amend title II of the Social Security Act to permit policemen and firemen in positions not covered by an existing retirement system to obtain social-security coverage on the same basis as other State and local employees; to the Committee on Ways and Means.

By Mr. BENNETT of Michigan:

H. R. 7784. A bill to amend part III of Veterans Regulation No. 1 (a) to increase the income limitations applicable to veterans eligible for pension thereunder; to the Committee on Veterans' Affairs.

By Mr. DAVIS of Georgia:

H. R. 7785. A bill to provide for the appointment of an additional judge for the juvenile court of the District of Columbia; to the Committee on the District of Columbia.

By Mr. TEAGUE of Texas:

H. R. 7786. A bill to authorize the utilization of a limited amount of storage space in Lake Whitney for the purpose of water supply for adjacent cities; to the Committee on Public Works.

By Mr. FRAZIER:

H. R. 7787. A bill to transfer to the Postmaster General the duties and functions currently vested in the Administrator of General Services for the care, maintenance, operation, and upkeep of those buildings occupied in whole or in part by the Post Office Department; to the Committee on Government Operations.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. FORAND: Memorial of the Rhode Island General Assembly memorializing the Congress of the United States to provide national scholarships for talented young men and women; to the Committee on Education and Labor.

By the SPEAKER: Memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to the granting of statehood to Hawaii and Alaska; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Florida, memorializing the President and the Congress of the United States urging that no restrictions be placed upon the import of crude and residual fuel oils; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Illinois, memorializing the President and the Congress of the United States condemning and protesting any action which would surrender William Girard to the jurisdiction of the Japanese courts for trial; and condemning any status of forces treaty which subjects American servicemen to foreign jurisdiction and deprives them of constitutional rights and privileges as American citizens; to the Committee on Foreign Affairs.

Also, memorial of the Legislature of the State of Nebraska, memorializing the President and the Congress of the United States to amend the Labor-Management Relations Act to end completely certain types of unfair labor practices, etc.; to the Committee on Education and Labor.

Also, memorial of the Legislature of the Territory of Hawaii, memorializing the President and the Congress of the United States to amend the organic act so that subagents, clerks, and other employees of the Commissioner of Public Lands of the Territory of Hawaii shall continue in employment as provided in the civil service laws of the Territory of Hawaii; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the Territory of Hawaii, memorializing the President and the Congress of the United States relative to authorizing and requesting the Commissioner of Public Lands to exchange lands for said claimants' rights in and to Mokauea Fishery as determined by exchange data August 6, 1952, should said claims be bona fide and valid; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the Territory of Hawaii, memorializing the President and the Congress of the United States to amend section 80 of the Hawaiian Organic Act regarding boards of a public character that may be created by law; and further requesting ratification and confirmation of trustees of the employees' retirement system heretofore elected by the officers and employees of the Territory and counties; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the Virgin Islands memorializing the President and the Congress of the United States for the extension of Federal aid to highways programs to the Virgin Islands; to the Committee on Public Works.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHLEY:

H. R. 7788. A bill for the relief of Sheung Jeung; to the Committee on the Judiciary.

By Mr. BENNETT of Michigan:

H. R. 7789. A bill for the relief of Jon Patrick Weslin; to the Committee on the Judiciary.

By Mr. HIESTAND:

H. R. 7790. A bill to provide for the forfeiture of the right-of-way located within the State of California heretofore granted to the Atlantic & Pacific Railroad Co. by the United States; to the Committee on Interior and Insular Affairs.

By Mr. McFALL:

H. R. 7791. A bill for the relief of Mrs. Choy Lin Tseng; to the Committee on the Judiciary.

H. R. 7792. A bill for the relief of Kei Lai Man; to the Committee on the Judiciary.

By Mr. METCALF:

H. R. 7793. A bill for the relief of Bernardine M. A. de la Motte; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

257. By Mr. BUSH: Petition of 265 residents of Lycoming County, Pa., urging favorable action of legislation to insure humane slaughter methods by compelling the meatpacking establishments of the United States to render a method of painless killing of livestock; to the Committee on Agriculture.

258. By Mr. SMITH of Wisconsin: Resolution approved by the National Eighth District Conference of the Disabled American Veterans assembled in Milwaukee, Wis., April 28, 1957, urging deletion from the social security laws providing for benefits to totally disabled persons at age 50, the clause which reduces the social security benefit by any amount a veteran receives from the Veterans' Administration for his disabilities; to the Committee on Ways and Means.

259. By the SPEAKER: Petition of Marie L. Smith and others, Austin, Tex., requesting a Congressional investigation of the Food and Drug Administration to correct abuses and restrain this branch of Government from trying to destroy the Hoxsey treatment for cancer; to the Committee on Interstate and Foreign Commerce.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308 (b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

QUARTERLY REPORTS

The following reports for the fourth calendar quarter of 1956 were received after January 20, 1957, too late to be included in the published reports for that quarter:

A. Active-Retired Lighthouse Service Employees Association, P. O. Box 2169, South Portland, Maine.
D. (6) $341. E. (9) $295.99.

QUARTERLY REPORTS

The following quarterly reports were submitted for the first calendar quarter 1957:

NOTE.—The form used for reports is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed and are indicated by their respective letter and number.)

File two copies with the Secretary of the Senate and file three copies with the Clerk of the House of Representatives.
This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.
Place an "X" below the appropriate letter or figure in the box at the right of the "Report" heading below:
"PRELIMINARY" REPORT ("Registration"): To "register" place an "X" below the letter "P" and fill out page 1 only.
"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19------

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

	QUARTER			
P	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) In General: This "Report" form may be used by either an organization or an individual, as follows:
(i) "EMPLOYEE".—To file as an "employee," state in Item "B" the name, address, and nature of business of the "employer." (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee.")
(ii) "Employer".—To file as an "employer," write "None" as answer to Item "B."
(b) Separate Reports.—An agent or employee should not attempt to combine his Report with the employer's Report.
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING.—(1) State name, address, and nature of business; (2) if this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers; except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—Section 302 (e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place ☐ an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed, in connection with legislative interests, set forth: (a) description; (b) quantity distributed; (c) date of distribution; (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed.)

4. *If* this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. *If this is a "Quarterly" Report, disregard this Item "C 4" and fill out Items "D" and "E" on the back of this page.* Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D".—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302 (a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expand except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter
5. $_____Received for services (e. g., salary, fee, etc.)
6. $_____TOTAL for this Quarter (Add items "1" through "5")
7. $_____Received during previous Quarters of calendar year
8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302 (a).

9. $_____TOTAL owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during the Quarter
12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?
Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor*
	("*Period*" from Jan. 1 through_____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N. Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302 (b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6"), and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures
9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year
11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302 (b).

12. $_____TOTAL now owed to person filing
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More
In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3314 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blatten, 3127 Gremlin Bldg., Washington, D. C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Claris Adams, 1701 K Street NW., Washington, D. C.

REGISTRATIONS

The following registrations were submitted for the fourth calendar quarter of 1956:

(NOTE.—The form used for registration is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3" and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19------	REPORT PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT	QUARTER				
		P	1st	2d	3d	4th
		(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report.

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Rports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302 (e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed.)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report disregard this item "C 4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

EXTENSIONS OF REMARKS

Legislative Branch Appropriation Bill

EXTENSION OF REMARKS
OF
HON. FRED SCHWENGEL
OF IOWA
IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. SCHWENGEL. Mr. Speaker, last week we voted on the legislative branch appropriations bill. One amendment was offered to recommit the bill and strike from it, $7,500,000, which would permit the work on the third House Office Building to go ahead. I felt obligated to vote for the recommittal. Although several of my colleagues felt the same way, there were not enough of us, unfortunately, to approve the amendment.

My action was based not so much on the fact that I might be opposed to this expenditure, as it was to the apparent disregard which has been shown for the legislative procedure which we are supposed to use in determining these expenditures.

As a member of the Public Works Committee, I expected further hearings to be held on a project of this magnitude. I know that many of my colleagues on the committee, many of whom are experts in the field of construction, wanted to testify on this program. Some of them favored the project; others did not. Be that as it may, I am still of the opinion that these programs will be better carried out when they have the benefit of the deliberate pro and con discussion of a committee hearing.

If such hearings had been held, the recommendations would have undoubtedly have a truer relation to the actual needs. The recognition of the needs, and the best ways of meeting them would have had thorough review and I feel confident that it is possible we could have saved the taxpayers some money.

It is not clear to me, Mr. Speaker, how we as Members of Congress can, in good faith, vote for Capitol Hill improvements which benefit us more directly than anyone, and then put the pruning knife to the programs which deal with the welfare of all the people.

We look mighty selfish carrying out this building program as long as there is such a need for post office buildings, dams, water and soil conservation projects, and other internal improvement programs any place in the country.

When Congress starts to build a monument to itself, it is high time that we take another look, pull ourselves up short, and ask ourselves if it is in the public interest. I wish to go on record as being against any more building here

until we have provided for new post office buildings where they are so sorely needed for adequate handling of this important service and giving post office employees better working conditions.

The Overton Canal Waterway

EXTENSION OF REMARKS
OF
HON. GEORGE S. LONG
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 27, 1957

Mr. LONG. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

WASHINGTON, D. C., *May 8, 1957.*
Maj. Gen. EMERSON C. ITSCHNER,
Chief of Engineers, Corps of Engineers, Department of the Army, Washington, D. C.

DEAR GENERAL ITSCHNER: I am writing relative to a considerable amount of confusion which continues to exist over the feasibility of the Overton Canal in Louisiana.

When I first campaigned for a seat in Congress from the Eighth Congressional District of Louisiana, I advocated a deep waterway from that area to the gulf. The principal question remaining in my mind was to seek the best route and I have refrained from endorsing the Overton Canal because there were several questions in my mind as to its feasibility and from an economic standpoint.

My position with respect to the Overton Canal has been one which has brought considerable criticism upon me. My answer to this criticism has been the same, that is, I wanted to be sure that the Overton Canal was the best answer to the deep waterway problem.

In your recent speech before the Red River Valley Association in Shreveport, La., I gathered the impression that a resurvey and a reevaluation of the Overton Canal and recently been conducted and that on the basis of this resurvey and reevaluation the canal had been fully justified and established as the most feasible waterway. Further, it was my understanding, based on your speech, that the resurvey and reevaluation took into full consideration the possibility of using the Red River as an alternative waterway. The impression received from your speech was that the resurvey and reevaluation definitely justified the Overton Canal and established that the Red River was not feasible to be used as a deep waterway.

Subsequent to the Shreveport meeting, where I received the impression that the justification for the Overton Canal was based on a recent resurvey, I have been criticized publicly and in correspondence for apparently softening my attitude in opposition to the Overton Canal.

Under date of February 20, 1956, I wrote to General Hardin, posing several questions, to which he replied, in part, as follows: "The project as of this date is in the planning stage. Since no funds have been made available for start of construction, the project has been inactive for a number of years owing to lack of funds. Planning funds were made available for fiscal year 1956, and at the present time the cost of the project and benefits to be derived therefrom are being studied with the view of arriving at a current cost-benefit ratio at present price levels. This study is nearing completion, and as soon as it has been reviewed and approved by the Chief of Engineers, I shall be pleased to make the results available to you."

To date, I have not received this information. Now, have they made such a survey? Is there such a thing as this resurvey and reevaluation? I do not wish to go back and use the old House Document 320 survey which was made some 10 or 12 years ago, as a basis of justification for the Overton Canal. I asked for a new evaluation of the river and the cost of the canal. I asked them to take a new look at the river which they said they would do and give me a report in January. I have not as yet received this report nor a complete answer to my questions.

Now, General Itschner, in order for this matter to be clarified and to know just exactly where we stand, I would appreciate very much receiving the following specific information from you:

1. An appropriation totaling $530,000 was voted for the purpose of resurveying and reevaluating the Overton Canal, and also to examine the feasibility of the Red River serving as a deep-waterway route to the gulf. Has this money been used for the purpose of reexamining the deep-waterway problem with which we are concerned, especially the $150,000 which was voted for fiscal 1957?

2. In your recent speech before the Red River Valley Association in Shreveport, I received the impression, and I think others did also, that the justification outlined by you was based on a recent resurvey and reevaluation and not upon the original justification as set forth in House Document 320, 80th Congress. I would like to know which justification was used in the facts which you outlined in your speech.

3. If the resurvey and reevaluation for which this appropriation was recently voted has not been completed, please give me the best possible estimate you can as to when these further studies are expected to be completed.

Inasmuch as in your speech you said you had justified the Overton Canal, and realizing that you had spent in the neighborhood of $530,000 for this purpose and to evaluate the river, I want to know if you were speaking from a second survey or were you speaking from the first survey. I said in my speech that if and when the Corps of Engineers made the second evaluation and it was proven to be justified, I would be for it, but to date I have not been informed as to whether or not this justification is based on a second survey, or on the original survey and report.

I shall appreciate very much your early response to this letter because I find myself in a rather embarrassing position and am anxious to get the facts regarding this all-important matter.

Thanking you for the attention I know you will give this request, and with kindest regards, I am,

Sincerely yours,

GEO. S. LONG,
Member of Congress.

Golden Jubilee of Slovak League of America

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 27, 1957

Mr. MULTER. Mr. Speaker, today, May 27, marks the date on which the Slovak League of America was organized 50 years ago.

The following is a letter which I addressed to Mr. Philip A. Hrobak, president of the Slovak League of America on the occasion of this anniversary:

It is with a great deal of pleasure that I extend my greetings to the Slovak League of America on the happy occasion of its golden jubilee.

All Americans know that in the bloodstream of our Nation flows the aspirations, dreams, and loyalties of men and women of all nationalities. The Slovaks have contributed their share to the growth and greatness of our country. The Slovak League of America, especially, has done much in promoting the welfare and security of the United States of America.

For the past half century, you have enriched American life by your cultural and civic achievements. You have shown your dedication to the American way of life by urging and aiding Americans of Slovak descent to become loyal citizens of this country.

Although Americans first, you are justly proud of your Slovak ancestry. Through the Slovak League of America, the American people have become aware and have learned to appreciate the noble culture, traditions, and achievements of the Slovak nation and its gallant and hard struggle to gain freedom.

Unfortunately, today, the land of your ancestors is suffering under the godless tyranny of communism. Consequently, there is sadness as well as happiness at this golden jubilee. But there is also determination in this group; a determination to fight communism and its conspiracy against free humanity.

On this golden jubilee day, I would like to join with the members of this American institution in denouncing the tyranny of communism; in praying for the freedom of enslaved Slovakia, and in hoping for continued success of the Slovak League of America.

Results of a Public Opinion Poll

EXTENSION OF REMARKS
OF
HON. JOHN E. HENDERSON
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, May 27, 1957

Mr. HENDERSON. Mr. Speaker, during the past several weeks, I submitted a questionnaire on issues confronting the Nation to a cross section of the residents of the seven counties of southeastern Ohio whom I have the honor to represent here. For the purposes of this poll, the recipients were selected at random without regard for political affiliation. This sample of public opinion now has been tabulated and I believe its results reflect a valuable expression of the prevailing feelings in this area which is marked by divers urban and rural interests.

I believe the opinions of the people of the 15th Congressional District of Ohio are typical of many areas of this Nation, since the residents share sentiments and aspirations common to tens of millions of their fellow Americans. For this reason, I feel certain that many of my colleagues will find the results of this poll to be of considerable interest.

The questionnaire was divided into three parts. The first portion sampled opinion on various specific questions. The second dealt with the order of im-

portance with which various general issues are regarded. The third part afforded an opportunity for the expression of relative approval or disapproval of Federal programs and the funds recommended for them in the 1958 budget estimates.

The results of the poll are as follows:

PART I

	Percent of those answering question	
	Yes	No
1. Do you favor United States membership in the Organization for Trade Cooperation, an international organization which would influence tariffs on foreign imports into this country?	65.89	34.11
2. Do you believe Communist China should be admitted to the United Nations?	7.72	92.28
3. Do you favor the sale or barter of United States surplus farm products to Iron-Curtain nations?	29.22	70.78
4. Do you favor the continuation of our foreign aid program which is recommended for $4,500,000,000 next year?	24.94	75.06
5. Would you support economic and military assistance to friendly foreign countries at a reduced cost?	75.39	24.61
6. Should a greater number of Hungarian refugees be admitted to the United States?	17.94	82.06
7. Do you believe Congress should authorize the admission of a greater number of immigrants from all nations?	10.88	89.12
8. Do you believe that the 22d amendment to the Constitution should be repealed to allow future Presidents to serve more than 2 terms?	17.73	82.27
9. Would you support Federal aid for school construction to be paid for out of Federal taxation in preference to such programs financed by State and local effort and taxation?	36.90	63.10
10. Do you favor reducing the present postal deficit by increasing postage on 1st-, 2d-, and 3d-class mail?	57.71	42.29
11. Are you in favor of the continuation of the soil-bank program?	50.72	49.28
12. Would you favor a tax reduction to stimulate expansion and modernization of small business?	86.41	13.59
13. Do you support a recommended Federal program costing approximately $9,000,000 to assist States and cities combat juvenile delinquency?	48.18	51.82
14. Do you believe that persons over 70 years of age should be eligible to receive social security payments regardless of their income from other sources?	56.61	43.39

PART II

The following is a list of 10 issues listed on the questionnaire which have been arranged in the order of importance in which they were ranked by those responding. The numbers shown are the averages of the relative importance assigned by those who provided opinions on this portion of the poll:

1. National defense	2.95
2. Need for reduced Federal spending and taxation with a balanced budget	2.97
3. Inflation and the cost of living	3.52
4. Maintenance of an honorable peace	4.43
5. Communist subversion in the United States	4.80
6. Preservation of opportunity for small business	5.75
7. Farm prices and policies	6.01
8. Federal protection of civil rights	6.05
9. United States foreign trade policies	7.09
10. United States foreign aid programs	7.80

PART III

In this portion of the questionnaire, an opportunity was provided for the expression of opinion on the level of Federal spending as represented in the budget recommendations for 1958. In each of the 49 programs listed, the budget recommendations were provided. Three choices were presented. The first afforded an opportunity to indicate support of the budget recommendations. If reductions in spending or the elimination of the program was felt desirable, blank spaces for these opinions were provided.

Running through the responses there was a strong trend for reduction in Federal spending.

The first portion of these questions dealt with major national security items—recommended for $43,335 million or 60.3 percent of the budget—and showed general support for these programs. However, a running current favoring reduced spending was noticeable. For instance, 59.8 percent of those responding supported the $12,273 million recommended for the purchase of aircraft, ships, guided missiles, and other military equipment. Thirty-nine percent favored reducing expenditures here. Atomic-energy programs spending received 67.4 percent approval with 30.4 percent calling for reduction. Recommendations for military assistance for nations abroad received 19.5 percent approval, while 59.1 percent called for reduced spending, and 21.4 percent expressed the belief that this aspect of our foreign-aid program should be eliminated.

A total of 61.7 percent favored reducing technical assistance to foreign nations with 13.5 percent favoring the level of recommended expenditures and 24.8 percent calling for the elimination of the program.

Recommended funds for the Post Office Department received 55.1 percent approval while the highway program was supported by 67.6 percent.

With respect to recommended spending for agriculture, farm price supports and related programs—estimated to cost $2,490 million—were favored by 24.5 percent. Forty-eight percent recommended a reduction in spending for this purpose and 27.5 percent believed the program should be abolished. Feeling concerning spending for the soil bank ranged from 32.3 percent in support to 37.3 percent recommending a reduction of spending, and 30.4 percent favoring the abolition of the program.

Federal spending for public assistance for needy persons was supported by 56.5 percent and funds for the promotion of public health met 61 percent approval.

Funds recommended for veterans' programs met with the general approval of the majority. Of these programs, 74.8 percent expressed support of funds for hospitals and medical care for veterans, 67.8 percent approved recommendations for the insurance and indemnities program, and 65.3 percent favored the recommended spending level for compensation and pensions.

The Army and Navy Hospital at Hot Springs, Ark.

EXTENSION OF REMARKS

OF

HON. W. F. NORRELL

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. NORRELL. Mr. Speaker, the Army and Navy Hospital at Hot Springs, Ark., is the best physical plant of any Army hospital in the United States. This positive statement was made by the Surgeon General of the Army. At that time he said that it was the second best hospital the Army operated anywhere in the world. The only one better was the new hospital in Honolulu. Our inquiry has revealed that this new installation cost somewhere between fifty and seventy million dollars. Following this statement the Army Surgeon General reiterated that the Army and Navy Hospital at Hot Springs was the best hospital facility he had in the country. It certainly is difficult to understand why the best hospital facility would be closed. From a purely good business standpoint, in any business where there are multiple operations, when there is apparent overproduction, business does not close the best operating unit it has.

Unlike the conception that some people may have, who are not personally familiar with the Army and Navy Hospital, it is not the same building that was erected in 1870. At that time the hospital was built here as the first Army general hospital because of the strategic central location and because it afforded the Army the use of the famous hot mineral baths. The present hospital was built in 1933 and is a complete integrated, modern "general" hospital. It is almost identical to the basic unit at Fitzsimons and Brooke and is larger than the latter. It is not, by any stretch of the imagination, a glorified bathhouse as some of you may have been led to believe. The hospital has had exceptionally good care and looks even newer than it is. Modern air conditioning and other improvements have been installed within the past 3 years. The instruments and installed medical and surgical equipment are of the very finest, equal to those at Walter Reed or Bethesda.

The second point, and one which seems of utmost importance, is the strategic location of the hospital. Unlike most Army hospitals which are located in coastal areas, the Army and Navy Hospital is located in the interior central portion of the United States with natural protection. The Department of Defense has quite appropriately been asking defense industries to move some of their operations off the coast. In fact, some airplane manufacturers have been told that in order to be eligible for future contracts, their point of manufacture will have to be off the coast and out of potential attack areas. In addition, the Federal Civil Defense Administration has been urging the maintenance of interior defense areas which can be used in event of coastal attack. Even here in

the city of Washington, a huge underground retreat area has been provided away from the present area to which the nerve center of our Federal Government can be dispersed. If it makes sense, and we think it does, to think of defense in terms of safeguarding war production and other Government operations, then it also makes sense to provide for relatively safe hospital care of military personnel. In Hot Springs, Ark., the Army and Navy Hospital can be maintained and operated with a moderate number of patients and at the same time be the center in which additional hundreds can be cared for overnight. The hospital alone cared for as many as 1,777 patients at one time during World War II. In addition, 3 hotels were taken over as a redistribution center which cared for some 2,000 personnel at one time. This is only the beginning of potential use. There are approximately 300 hotels, motels, and apartments which provide accommodations for 37,000 in this resort at one time. These can be made available if and when needed. This hospital can be expanded from 250 to 2,500 beds overnight. It could be made the medical treatment center for up to 30,000 beds. There is no other military or industrial organization that would be competing for expanded facilities in the event of mobilization. The Army and Navy Hospital would have first priority on every facility in the community.

One of the reasons given by the Department of the Army for wanting to close the hospital is the fact that it is not located near a troop concentration. Rather than being a reason to close it, we think it is a strong reason to maintain it. Certainly there was no troop concentration at the time the hospital was built and there has never been a troop concentration here. No Army general hospital has been built in a troop-concentration area for that reason alone. The philosophy on which we are told Army general hospitals were built was one of general central location to take patients from posts, camps, and stations and troop-concentration areas. Located as it is, it is easily accessible from all sections of the country and yet is not within any so-called target area.

This central location provides the basis for answering the question of where should patients for the Army and Navy Hospital come from. The Department of Defense, early in December 1955, issued a directive stating that those hospital facilities nearest to any post, camp, or station should be used regardless of the branch of service involved—an order which made good business sense and was in keeping with the intended unified use of common services within the military. The hospital at Hot Springs is the only Army general hospital between Fitzsimmons at Denver, Walter Reed here in Washington, and Brooke at San Antonio. A major segment of the central United States, then, is the area from which such patients would come, according to this Department of Defense directive. Such troop concentration areas as Fort Benning, Ga.; Fort Sill, Okla.; Fort Leonard Wood, Mo.; Fort Campbell, Ky.; Fort Chaffee, Ark.; and many others would be a source of patients since they are closer to the Army and Navy than to any other Army general hospital. If the class II beds presently allocated to the post hospitals at these and other stations were reassigned to Army and Navy, it would produce both patients and staff. At Little Rock, Ark., some 50 air miles away from the Army and Navy, the Little Rock Air Force Base has some 7,000 to 8,000 military personnel. Instead of making use of the Army and Navy Hospital, the Little Rock Air Force Base is paying to send the great majority of its patients to a Veterans' Administration hospital in Little Rock and thereby creating a shortage of Veterans' Administration beds in Arkansas. It can be shown that transportation, which is readily available from the Air Evacuation Squadron, can be provided from the Little Rock Air Force Base to the Hot Springs Municipal Airport and thence by ambulance to the Army and Navy Hospital as easily and quickly as patients can be transported by ambulance through the metropolian areas of North Little Rock and Little Rock to get to the Veterans' Administration hospital. The Air Evacuation Squadron has offered any amount of service at any time needed directly to and from the runway at the Little Rock Air Force Base.

The greatness of the United States military organization has been due largely to its ability to expand rapidly. Expansion time in recent years has dwindled from months to hours. The Army proposes to put the hospital on a standby basis so that it can be reactivated within 60 days. In this day of atomic weapons and guided missiles, I can find little comfort in knowing that the hospital can be reopened within 60 days. We are told repeatedly by these same military experts that there will be virtually no time to prepare for attack. The Army and Navy Hospital is in the safest location of any of our hospitals and must be continued in operation, readily equipped to be expanded in a matter of hours. While we are asking for continued operation of the hospital, let us provide for continued operation on a more satisfactory level. No hospital designed for 500 patients can operate economically on 75. With very little additional cost, primarily in terms of personal service of attendants, this hospital can care for 250 patients. With this kind of patient load it can show an operation cost on the level with any other institution of similar size.

Government of, by, and for the People

EXTENSION OF REMARKS

OF

HON. WILL E. NEAL

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. NEAL. Mr. Speaker, after the adoption of the Constitution, Benjamin Franklin, on being asked what kind of government had been adopted, replied: "A republic, if we can keep it."

His reply implied both a knowledge of world history and a deep appreciation of human reaction to mass psychology.

Were he here today, he would marvel at the rapidity with which we, the people, have veered from the original concept of republican form of government. We, the people, negligent of our civic obligations, overlooking our constitutional duties, permitting our elected officials to secure positions of responsibility by a minority of voters, and failing to interest ourselves in their political and economic behavior in their official capacities, have permitted our executive and legislative bodies to succumb to the pressures of minority interests until the average citizen has relinquished most of his claim to government of, by, and for the people and surrendered little by little to what is now an overgrown system of bureaucratic agencies and departments.

Most of us have been too occupied with our day-to-day well being to realize how our individual freedoms are being usurped by rules, regulations, and administrative orders issued by department heads where authority stems from the actions of Congress, members of which, under the Constitution, are their only direct representatives in matters of government.

Throughout the years, the Congress has delegated much of its original powers to the departmental bureaus and to executive agencies. With such delegated authority, the execution of laws passed by Congress become increasingly subject to the interpretation of officials holding their positions by appointment and who therefore are not directly responsible to the people.

There are 2¼ million persons employed in our Government today in its various bureaus and agencies.

Legislation instead of being initiated by the leadership in Congress, without advice, consent, and approval of bureau heads and executive officials, depends largely upon bureaucratic leadership to suggest blueprints and objectives.

The result is that laws or legislative changes sought by individuals and groups are determined in their final form by the respective agencies entrusted with their administration.

Now agencies and bureaus, interested in self-preservation, are selfishly impressed with the advantages of expansion of activities and the accompanying need for additional employees and appropriations with which to pay their salaries and the added expense for facilities in which to operate.

To persuade Congress and the public to support their demands, many top echelon officials of these bureaus and agencies spend a large portion of their time and energies appearing before committees and communication centers for the purpose of sponsoring their programs and convincing the Congress of the necessity of authorizing expanded operations and appropriating the necessary funds.

In many instances, the Congress and the public have been told these new ventures are only needed as temporary emergency measures, but experience bears out the fact that once an emergency increase is authorized, it invari-

ably finds convincing reasons why it should be continued.

The bureaus and agencies of Government seem to have successfully sold the Congress on the advisability of not only maintaining existing agencies, but, in recent years, have succeeded in having more and more special branches of Government created annually.

The result is a big overgrown Federal Government which today requires the income from two days of a week's work to support. Even though the Federal budget is in balance as of today, there is little prospect that any part of our tax contribution will be left over to apply to the $275 million national debt. With present tempo of Federal spending, there can be little hope of tax reduction.

There can be only one answer—reduce spending programs, both domestic and foreign. That means, cut the proposed $71.8 billion budget and refuse to appropriate new money for more bureaus and departments. Public demand for such action is now at an all-time high. It has impressed Members of Congress as to that great need.

Yet, I would add a word of caution.

This Congress can wield the cleaver of the butcher in trimming the budget and with a consequent grave danger to the precarious security we have built up for ourselves and our Free World allies in a perilous age.

Or, it can apply the surgeon's scalpel to our fiscal affairs by trimming away an admittedly great amount of financial fat in this budget and retain our posture of present security.

I would remind the House that this is no time to play the role of partisan politician in trimming the budget. The times are too dangerous, the imminence of global disaster too close each hour, for us to heedlessly use our constitutional power of the purse to embarrass and hamstring those portions of the executive branch entrusted with our defense and security.

Brooklyn Shows the Way to Good Labor-Management Relations

EXTENSION OF REMARKS

OF

HON. VICTOR L. ANFUSO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. ANFUSO. Mr. Speaker, it was my happy privilege last Thursday, May 23, to be present at a heartwarming event in my district in Brooklyn which noted significant advances both for business and labor in our community.

In a spirit of friendly cooperation, the members of a labor union agreed to forfeit half of their accrued vacation pay in order to enable a large plant from another State to move into Brooklyn and establish itself in our community. A vice president of the company frankly stated that his firm was influenced in its decision to move to Brooklyn by the cooperation offered by the union.

The astute labor leader who managed this feat was Mr. James Landriscina, president of Local 452 of the Candy and Confectionery Workers Union. He was ably assisted in this effort by the local's vice president, Miss Anna Rizzo, and its secretary-treasurer, Mr. John R. Alaio. The enlightened businessman who took advantage of this offer from the union was Mr. Leonard Stone, executive vice president of the Sweets Company of America.

Those who stand to gain most are 700 members of the union and their families who had been forced out of work last March when another candy manufacturing firm, Rockwood Co., had closed its plant in Brooklyn and left its employees without work. Now these and perhaps many others will return to their jobs. The Sweets Co. gained, too, because Brooklyn provides an excellent quality of workers, skilled and dependable, devoted to their families and to the community in which they live and work.

A ceremony to welcome the new plant in Brooklyn took place on Thursday, May 23, in front of the plant. On hand at the welcoming ceremonies were the Honorable Carmine G. De Sapio, secretary of State of New York; Ambassador Richard C. Patterson, Jr., Commissioner of Commerce and Public Events of the City of New York; the Honorable Edward T. Dickinson, New York State Commissioner of Commerce; Commissioner Frank Nolan, representing Borough President John Cashmore of Brooklyn; Mr. Chester Allen, president of the Brooklyn Chamber of Commerce, and Mr. Howard Swain, executive director of the chamber of commerce; and Congressman Victor L. Anfuso. Also present were many prominent labor leaders representing various unions in New York.

Mr. Speaker, I am pleased to call attention to this matter because I feel that it is this kind of labor-management relations, this kind of give-and-take negotiations, which will help strengthen both business and labor. It is in this spirit of true cooperation that a real service can be rendered in promoting the welfare of the American people and the security of our country.

Appropriations Item Veto, H. R. 830

EXTENSION OF REMARKS

OF

HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. MULTER. Mr. Speaker, the following is the text of my statement which I submitted today to the House Judiciary Committee in support of my bill, H. R. 830, to provide that for the purpose of disapproval by the President each provision of an appropriation bill shall be considered a separate bill:

STATEMENT OF REPRESENTATIVE ABRAHAM J. MULTER, DEMOCRAT, NEW YORK, BEFORE THE HOUSE JUDICIARY COMMITTEE, MAY 27, 1957

Mr. Chairman and members of the committee, thank you for this opportunity to submit to this honorable committee my views on the subject of the principle of the item veto of appropriation bills generally and in support of my own bill, H. R. 830 specifically.

To me it is inconceivable that our Founding Fathers, at any time during the constitutional debate on the veto power, could have visualized the magnitude and complexity of today's appropriation problems. In the principle embodied in article 1, section 7, clause 2 and 3 of our Constitution, they vested exclusive veto power in the Chief Executive, but, at the same time, preserved to the legislative branch the final determination of the fate of legislative measures.

This is a basic point and may be determinative of the power of Congress to provide an item veto by statutory action.

Since the adoption of the Constitution, no one has ever contended that the President has power to veto items of appropriation. If this power is ever to be exercised, it must be granted either by a constitutional amendment or by statute or joint resolution of the Congress.

No one challenges the sufficiency of the constitutional amendment to accomplish the purpose. In the interest of saving time, I shall confine my statement to the exposition and defense of my measure, H. R. 830, which is designed to permit by statute the exercise of this power.

Under the Constitution, article I, section 1, "All legislative powers herein granted shall be vested in a Congress of the United States" and, under article I, section 8, clause 18, the Congress shall have power "to make all laws which shall be necessary and proper for carrying into execution the foregoing powers." "Whenever, therefore, a question arises concerning the constitutionality of a particular power, the first question is whether the power be expressed in the Constitution. If it be, the question is decided. If it be not expressed, the next inquiry must be whether it is properly an incident to an express power and necessary to its execution. If it be, then it may be exercised by Congress. If not, Congress cannot exercise it" (*United States* v. *Harris* (1883), 106 U. S. 629, 636.)

The power of Congress to grant the President the privilege of vetoing items of an appropriation bill is certainly nowhere expressed in the Constitution, nor is it necessary for carrying into execution the clearly expressed limited veto power granted the President in the Constitution.

However, the absolute control of the moneys of the United States, including the terms and conditions under which they are made, is in the Congress. (*Hart's* case (1880) 16 Ct. Cl. 484, affirmed 118 U. S. 62). The power to appropriate Federal funds has been exclusively entrusted to Congress. (Constitution, art. I, sec. 9, cl. 7; *State of Ohio* v. *U. S.* (1946), 65 F. Supp. 776, 780.)

In view of the incredible magnitude and complexity of the financial operations of our Government, the Houses of Congress, acting under their responsibility to the citizens in the operation of exercising their constitutional powers of spending the taxes wisely and well, are entirely within their constitutional powers to employ legislative methods that will best enable the Chief Executive to perform his function of recommending laws thought wise and vetoing laws considered bad.

By presenting appropriation legislation in the form and manner prescribed in my bill, H. R. 830, we are not delegating our legislative authority to appropriate, since Congress must act finally upon the legislation. Instead, we are employing as an incident to the exercise of our express power to appropriate, a device made necessary by the growth of this Nation.

There is nothing in our Constitution and nothing in good reason or logic which should prevent the Congress from adopting a rule

(even though not binding on a subsequent Congress) providing, as my bill does, that every part of an appropriation bill should be considered and treated, for veto purposes, as a separate bill.

It is my firm belief that a provision could be written into every appropriation bill so providing.

There can be no doubt that the result sought could be obtained by insisting that each separate item be the subject of a single bill.

For the sake of expeditious action, we put many items in one bill.

The Congress can, if it so desires, direct that, for veto purposes, each item be treated as a separate bill. The Congress would still retain the right to override each veto.

I thank you, gentlemen, for the privilege of presenting my views.

Public Opinion Survey, 11th Congressional District of Illinois

EXTENSION OF REMARKS
OF
HON. TIMOTHY P. SHEEHAN
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. SHEEHAN. Mr. Speaker, for the seventh consecutive year I have conducted a public opinion poll of my constituents in the 11th Congressional District, on the northwest side of the city of Chicago.

This year, 54,711 questionnaires were mailed, and, as of this date, 7,452 have been tabulated—a return of nearly 14 percent. The questionnaires were sent to every fourth name on the polling list of voters of every precinct in the 11th District which list is put out by the Board of Election Commissioners of the City of Chicago.

We have no means of knowing the political affiliation of the recipients of the questionnaire, and this, in our opinion, results in an impartial distribution which most nearly reflects a proper cross section of the voters in the 11th District.

The 1957 survey results are as follows:

	Yes	Percent	No	Percent	No Answer	Percent
1. Are you in favor of the United States continuing as a member of the United Nations?	5,282	70.9	1,747	23.4	423	5.7
2. Do you favor the proposed $4,400,000,000 foreign-aid bill?	1,027	13.8	5,946	79.8	479	6.4
3. Do you approve of the Republican foreign policy in general?	2,674	35.9	3,738	50.2	1,040	13.9
4. Do you approve of the Eisenhower administration to date?	3,104	41.7	3,113	41.8	1,235	16.5
5. Do you approve of the recent action of Congress in giving the executive department the power to use troops under the so-called Middle East doctrine? (The Constitution reserves to the Congress the right to declare war, and this action practically transfers this right to the Executive. This legislation also included $200,000,000 of additional foreign aid for the Middle East.)	1,441	19.3	5,349	71.8	662	8.9
6. Do you approve of United States participation in the International Atomic Energy Agency to broaden the exchange of peaceful atomic information?	4,834	64.9	2,107	28.3	511	6.8
7. Do you approve of the performance of John Foster Dulles as Secretary of State?	2,631	35.3	3,324	44.6	1,497	20.1
8. Do you favor the President's proposal of Federal aid to education for school construction to be distributed on the basis of local need? (Present bills under consideration provide from $2,000,000,000 to $3,600,000,000 of aid over a period from 4 to 6 years. Illinois citizens will contribute an estimated $24,000,000 and receive back about $12,000,000.)	3,681	49.4	3,192	42.8	579	7.8
9. Do you favor the President's proposal asking Congress to enact a strong civil rights program to enforce the voting rights of all citizens, to establish a Civil Rights Division in the Justice Department, and to create a bipartisan commission to investigate violations of the law?	4,405	59.1	1,998	26.8	1,049	14.1
10. Have you ever had any personal experience wherein you felt you were deprived of your civil rights?	847	11.4	6,163	82.7	442	5.9
11. Do you favor more adequate laws providing for full disclosure to the public and to the U. S. Government of the operation of union pension and welfare funds?	6,722	90.2	463	6.2	267	3.6
12. Would you favor a "right to work" law which permits citizens to work regardless of whether or not they belong to a union?	5,552	74.5	1,502	20.2	398	5.3
13. Do you think the President's budget of $72,000,000,000 is too high?	6,078	81.6	757	10.2	617	8.2
14. Do you favor as a means of controlling spending under the budget that Congress temporarily fail to authorize new legislation creating projects not already in existence?	4,363	58.5	1,512	20.3	1,577	21.2
15. Do you agree with Senator BYRD of Virginia when he said "I think the present deal is going to finally land somewhere midway between the New Deal and the Fair Deal"?	3,774	50.6	1,309	17.6	2,369	31.8

Four of the questions on this year's questionnaire are a repetition of previous years, and a comparison of the trend during the years is as follows (the 1957 results having been compiled by a division of International Business Machines, Inc.):

	1957			1956			1955			1954			1953		
	Yes	No	No opinion	Yes	No	No opinion	Yes	No	No opinion	Yes	No	No opinion	Yes	No	No opinion
1. Are you in favor of the United States continuing as a member of the U. N.?	70.9	23.4	5.7	73.2	24.0	2.8	69.5	28.3	2.2	67.0	29.9	3.1	64.1	35.9	------
2. Do you favor further arms and military aid for foreign nations?	------	------	------	------	------	------	44.9	49.8	5.3	45.7	46.4	7.9	44.7	55.3	------
3. Do you favor continued economic aid (point 4) to foreign nations for development of backward areas?	------	------	------	------	------	------	50.0	46.0	4.0	54.4	38.8	6.8	43.3	56.7	------
4. Do you favor the proposed $4.4 billion foreign aid bill ($4.9 billion in 1956)?	13.8	79.8	6.4	22.3	72.4	5.3	------	------	------	------	------	------	------	------	------
5. Do you approve of the Republican foreign policy in general?	35.9	50.2	13.9	62.3	29.6	8.1	56.9	30.3	12.8	52.9	36.6	10.5	78.5	21.5	------
6. Do you approve of the Eisenhower administration to date?	41.7	41.8	16.5	76.4	16.1	7.5	65.3	23.9	10.8	58.0	25.9	16.1	84.2	15.8	------

An Observation on Immigration

EXTENSION OF REMARKS
OF
HON. JAMES C. AUCHINCLOSS
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. AUCHINCLOSS. Mr. Speaker, it is no secret that we Members of the House of Representatives receive a great deal of mail on the subject of immigration, expressing views about the McCarran-Walter Act, whether it should be modified or amended, and sometimes it is difficult to answer these letters. We certainly do not want our country flooded with persons promoting communistic ideologies who may disturb our security as well as our economy, nor do we want the indolent or the incapacitated who may become at any time dependent on us for a living. We must secure ourselves from the influx of such people and be guarded against them. People from all the countries of the world want to come to America to escape from tyranny and oppression, a feeling that is understandable and rouses our sympathy, and I believe the great question we must ask and which must be answered is what will these people contribute to the strength of our economy as well as to our security? What will they do to make us even a greater Nation, dedicated to peace and good will, and enhance our belief in the dignity of man and his personal liberty? These are searching questions, but the answers must be known if we are to hold secure the ideals of our country and its destiny to lead the world into the paths of peace and amity among nations.

Citizens of the United States are all descended from emigrants who came here from all parts of the globe. Our forebears did not come to our shores to run away from anything; they came to be able to do something for themselves and for others and by working together create a Nation "indivisible under God with liberty and justice for all." They set high standards of morality and fair play, and thereby planted the seed of a great Nation whose influence is felt the world over, yet whose power is never used in oppression, but in the promotion of liberty and truth.

May I point out to my colleagues an example of how an immigrant to this country came here and contributed much to our country's welfare? I find stimulating courage in the examples of such

people and my friend, Arnold L. van Ameringen, is typical of many citizens like him. He came here to work and do what he could to aid in the growth of America, and he has contributed much.

Mr. van Ameringen will celebrate his 66th birthday in October of this year, having been born in Holland. There he received a public school education, was active in a Netherlands organization equivalent to our Boy Scouts, and served in the Dutch army. He worked for a manufacturer of perfume materials and in 1917 he was sent by his employer to sell his products in America, arriving in this country on Memorial Day. On his way over he became acquainted with a Mr. Pfalz, an American citizen, who was met at the dock by his sister Hedwig, of Newark, N. J. She was the first American girl he met in this country and 3 years later they were married. It is easy to see he really appreciated the good things to be found in the United States. Mr. van Ameringen immediately saw the opportunities offered by our country and realized that if he worked hard for himself and his community, he could own his business and prosper through his own efforts. He realized, also, that he would have the opportunity to contribute something to the growth of the United States and play some part in the development of our great Nation. So he stayed and in November 1926, became a naturalized citizen and has proved his worth ever since.

What has this man accomplished in accepting the opportunities presented to him by America? He started his own business with 2 employees and 500 square feet of space—a small-business man indeed. His business prospered, he merged with another firm, and became the leading spirit not only in the new firm but was a dominant figure in the entire industry of the manufacture of fragrances for perfumes, colognes, creams, powders, soaps, lipsticks, and such products in which fragrance plays a part, and in addition various food flavors. Here are a few of the voluntary positions he has held for the benefit of his fellow citizens:

President of the Essential Oil Dealers Association.

Member of the board of directors, Toilet Goods Association.

Governor of the board of Synthetic Organic Chemical Manufacturers Association.

Secretary of the Fragrance Foundation.

Trustee of the College of Pharmacy, Columbia University.

Teacher in the College of Pharmacy.

He cooperated in World War II with the United States Army by furnishing supplies to Armed Forces.

He received a certificate of achievement from the United States Navy and a letter of commendation from the Quartermaster Corps.

He is now the chairman of the board of directors of van Ameringen-Haebler, Inc., which employs more than 400 people with 64,000 square feet of office space in New York City, and 2 factories in New Jersey. He and his business have grown with our country and are no longer small business.

But this is not all, as though these contributions of self-sacrifice and service are not enough. Mr. van Ameringen became interested in the study of mental health which he believes to be one the great problems of humanity, which indeed it is. It was through his friend, the late Dr. James Plant, a noted child psychiatrist and director of the Essex County juvenile court of New Jersey, that his active service in this field was aroused. For 20 years or more he was served as treasurer and a member of the executive committee of the National Committee for Mental Hygiene which was later merged with the National Association for Mental Health. He is still active in this important movement to make the future generations of Americans better equipped to face the challenge of life and contribute their share for the benefit of mankind.

America wants and needs such men and women as citizens, and we must be careful not to prevent their coming to our country. They rejuvenate our lives of service, they bring us new hope, and by their example, keep fresh before us the basic faith in personal liberty on which our forefathers built our future. So, when we consider legislation about immigration, let us bear in mind the value of people like Arnold van Ameringen who came here to do business and stayed because he wanted to play a constructive part in the promotion of individual liberty and in service to our great Nation.

Address by Hon. Basil L. Whitener to 11th Congressional District Chapter of Postmasters, Rutherfordton, N. C., May 25, 1957

EXTENSION OF REMARKS

OF

HON. GEORGE A. SHUFORD

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. SHUFORD. Mr. Speaker, our colleague, Congressman BASIL L. WHITENER, delivered an address to the 11th Congressional District Chapter of the North Carolina Postmasters Association at a meeting in Rutherfordton, N. C., on Saturday, May 25, 1957.

This address by our distinguished colleague points up some of the principal problems faced by the Congress and the Nation in the postal-service field. His address follows:

ADDRESS BY HON. BASIL L. WHITENER TO 11TH CONGRESSIONAL DISTRICT CHAPTER OF POSTMASTERS, RUTHERFORDTON, N. C., MAY 25, 1957

It was with a great deal of pleasure that I accepted the very generous invitation to speak to the postmasters of the 11th Congressional District tonight.

Your branch of the Government has been in the news in a very substantial way in recent days. As we tonight have a common interest in the postal service and its future of service to our people, it is fitting that we should think together on some of the problems which face you as postmasters and your elected representatives in the Congress of the United States.

There is much debate today about your service. This debate seems to revolve around two propositions. First: What is proper policy under which to view post office operation? Is it primarily a public service which should not be expected to produce revenues to cover its cost? Or, secondly, is it an organization which, in spite of its public service aspects, should cover as much of its costs as can be covered?

When we resolve those basic questions we then begin to reach the point at which a decision can be made by the people and their representatives.

A brief glance at the history of your service is essential to an understanding of the development of the postal policy of the United States. Time will not permit a detailed discussion of the various historical developments in the postal service, but I think that in a few minutes we can run down some of the major steps in its development.

The Congress has always recognized that the provision of the postal service is a necessary function of Government. It has always attempted to maintain low postal rates but has constantly increased services, regardless of deficits.

The Continental Congress, in 1775, established postal services, and Benjamin Franklin was named as the first Postmaster General. The Continental Congress said: "The present critical situation in the Colonies renders it highly necessary that ways and means * * * be devised for the speedy and secure conveyance of intelligence from one end of the continent to the other."

During the period of the Continental Congress, between 1775 and 1778, very little postal revenue was received, and the cost of the service was met by the Treasury.

In preparing the Articles of Confederation it was set forth that Congress was "expressly forbidden" to raise more revenues than would meet the expenses of the service. It appears on the face of this provision that a deficit was not prohibited but a surplus was not to be permitted.

In 1787 the writers of our Constitution provided in article I that: "The Congress shall have Power * * * to establish Post Offices and post Roads." The Constitution is silent about expenditures and revenue policies of the postal service.

Initially, Congress attempted to provide postal services which would pay their own cost. By the Act of February 20, 1792, the Postmaster General was authorized to enter into contracts for carrying the mails, *"Provided,* That no such contract shall be made to the diminution of the revenue of the general post office." Congress further provided that any surplus at the end of the year was to be applied against future deficiencies.

Again, in 1794, Congress passed an act which read: "That it shall be lawful for the Postmaster General to provide for the carriage of a mail on any road on which a stage wagon or other stage carriage shall be established, on condition that the expense thereof shall not exceed the revenue thence arising".

In 1797 Congress liberalized its policy by continuing all money-losing postal routes except one "which shall not, after the second year, from its establishment, have produced one-third of the expense of carrying the mails on the same."

In 1814 Congress further relaxed the policy by stating that a postal route be established "to the courthouse of any county which is now, or may hereafter be, established in any of the States or Territories of the United States, and shall not or will not otherwise be accommodated with the mail".

In 1851 Congress made a real break with the old policy of making the postal service pay its way.

In that year Congress stated: "That no post office now in existence shall be discontinued, nor shall the mail service on any mail route in any of the States or Territories be discontinued or diminished, in consequence of any diminution of the revenues * * * and it shall be the duty of the Postmaster General to establish new post offices, and place the mail service on any new mail routes established, or that may hereafter be established, in the same manner as though this Act had not passed."

The Act of 1851 further ordered that weekly newspapers be carried through the mails free of charge to subscribers within the county of their publication.

Succeeding Postmasters General alternately supported and condemned the service-first, revenue-last, policy provided for by the 1851 Act. Nevertheless, Congress gave increasing support to the service function even though deficits were the result.

Registration of letters was authorized in 1855. The uniform rate of postage for all like mail, regardless of distance transmitted, was established in 1863. Free delivery of mail in cities began in 1863. The money order system was established in 1864. Congress authorized the use of postal cards in 1872.

In the Act of 1879 Congress established the classifications of mail matter which are still in effect. Special delivery services and a 2-cent letter mail were provided in 1885. Funds were provided for rural free delivery in 1896.

The fact that there were deficits in postal operations did not prevent these new functions and lower rates from being established.

1910 brought about the authorization of the Postal Savings System. Parcel post was authorized in 1912 and air mail loomed upon the horizon in 1918.

During World War I the Government used the post-office organization to sell war savings certificates and thrift stamps. Enemy aliens were registered by the Department. Third- and fourth-class postmasters served as recruiting officers for the Army, Navy, and Marine Corps.

Postal notes were inaugurated as a service in the Post Office in 1945. The air letter sheet in 1947 and the air parcel post in 1948 became further services of the post office.

During World War II the Post Office Department had other wartime services. It sold war bonds and stamps and automobile tax stamps. It registered aliens and carried mail from soldiers without charge.

During the first 50 years of operation the Post Office Department earned reasonable surpluses. But from 1841 until the present it has only experienced surpluses in 12 years.

Postal surpluses were checked in 1845 by the reduction of rates and the extension of postal service. The surpluses of 1849, 1850, and 1851 disappeared when the mail rate was reduced from 5 to 3 cents per half ounce. Surpluses appeared again in 1882 and 1884, and the letter rate was dropped first, 2 cents per half ounce and then to 2 cents per ounce.

On other occasions the opportunities to earn a profit have been foregone in order to expand the service along new and often costly lines. Railroad mail was established as soon as the locomotive proved workable.

In the interest of popular education, the postal service has subsidized newspapers and magazines by distributing them at less than cost. In addition to subsidizing the railroads, it has subsidized airlines during their periods of development by the grants of more-than-cost mail contracts. From the close of the Civil War until 1936, mail subsidies contributed greatly to maintaining the American merchant marine fleet.

It is in this historical setting that we find ourselves as we look to our postal service in 1957 and future years.

It must be in the light of the lessons in history that we determine whether presently existing legislation to increase postal rates shall be approved.

To be sure, the first step to be taken in determining this whole problem is that of reaching a decision on the question of the proper post-office policy of this Nation.

I feel strongly that the service aspect must be kept in mind constantly. It seems inconsistent to me that the Post Office Department should be the one department of our Government which is expected to earn money for services rendered to the millions of American citizens.

But I do feel equally strong that the Post Office Department should be run as economically and with as much business acumen as one would expect of a private business.

That brings us to the recent outcries that we have had from our present Postmaster General with reference to the attitude of Congress on the matters of appropriation. He has given to the public a distorted picture of the financial provisions which the Congress has made for the operation of this vital branch of our Government.

The proposed budget for 1958 called for an appropriation of $3,250,000,000 for the postal service. When a hearing was concluded by the Appropriations Committee of the House of Representatives it was determined that this figure could be reduced by $58 million. Thereupon, the committee recommended an appropriation of $3,192,000,000. You have perhaps been led to believe that this was an unwarranted cut in the funds for Postmaster General Summerfield's Department during the fiscal year of 1958.

But that is far from true. The 1957 appropriations for the Post Office Department were $2,984,340,000, and the amount recommended by the House Appropriations Committee was $3,192,000,000, an increase of $207,660,000 above the appropriations available to the Post Office Department in 1957.

So, you see, my friends, the Congress has dealt very generously with the Post Office Department.

My chief concern with the recent outbursts of the Postmaster General is that it tends to destroy the esprit de corps which has been so high among the 500,000 postal workers in some 41,000 post offices throughout the Nation. You and I, as officials in the Government, owe a duty to prevent this demoralization of a great service.

Nothing can break down the morale of our postal workers more quickly than a hodgepodge of false economy. We are all interested in saving the taxpayers money and giving our citizens their mail sooner and oftener.

But, it seems to me, that there is room for grave doubt as to whether the alleged economies introduced from on top are, in fact, economies. I fear that there is a basic incapacity of some of our top-rank planners to understand the problems confronting the postmasters and mail carriers of our Nation.

What are some of these highly advertised alleged economies? There are many of them that we could discuss, but I will limit my remarks to just two of them.

The first that comes to my mind is this sudden penchant of the Postmaster General for little gasoline junk toys called scooters.

These are ¼-ton, 3-wheeled, covered-type vehicles. Except for the fact that they delight the children of a neighborhood, and serve as an extra provocation for barking and biting dogs, they constitute—for the mail carrier—nothing but a cumbersome nuisance. That, it seems to me, is one of the demoralizing factors in a great segment of the post-office personnel.

These men do not want the scooters because they are a hindrance rather than a help. I am told by those who have used them that they would much prefer walking with their mail bags to the use of these gasoline go-carts. They just are not suitable for house-to-house delivery in congested areas.

But what is the Post Office Department doing about this situation? There are, as I speak to you, 300 of these contraptions now in service.

But more alarming, is the fact that the Department proposes to purchase some 1,500 more of them.

These ridiculous comic pieces of apparatus cost upward of $917.50 apiece. Some cost one or two hundred dollars less.

Eighteen hundred of these 3-wheeled monstrosities at almost $1,000 apiece seem to me to be very poor economy. It constitutes a waste of the Post Office Department money and an abuse of the morale of the post-office employees.

Perhaps this foray into the land of fancy by our present Postmaster General will be recorded in history as "Summerfield's Scooter Folly."

Another far graver error in the administration of the Post Office Department during the past year is one which I prefer not to refer to as a "folly." It is rather to be called a "tragedy."

It is another instance of false economy that completely ignores the historical concept that the postal service is a public service.

The tragedy of which I speak is the discontinuance of no less than 713 of our 14,185 fourth-class post offices in the United States.

By cutting down the postal service for scattered segments of the American people through the elimination of their fourth-class post-office facilities and calling it an economy is just about the worst possible misuse of power.

The removal from the service of 713 fourth-class post offices strikes me as brutal hatchet-man tactics to make a good financial showing at the expense of an indispensable service to the people in the fourth-class postal category. It is a callous indifference to the public weal.

The necessity of service to our rural people through the fourth-class offices is not to be dealt with as a strict matter of bookkeeping. I am sure that there are some of these fourth-class offices which may be wisely discontinued, but I hardly think that it is reasonable to say that we can afford to eliminate 713 out of a total of 14,000.

If the kind of logic which the Postmaster General has applied in his policy toward fourth-class post offices is to be followed to its ultimate conclusion, then he could effect even greater savings by eliminating all of the post offices. The burden of my thinking is that we must not cripple the postal service, whether it be in the urban centers or in the rural areas.

Perhaps it would be well to call to the attention of Mr. Summerfield the words of the late Will Hays, a former Postmaster General, and—I hasten to add—a Republican, who said: "The post office is not for profit nor for politics, but for service."

It is my earnest hope that our Postmaster General will revise his thinking and correct his action as he approaches a solution to the many problems which are presented to the people of this Nation by the current post office situation. The mere pointing out of a $515 million estimated deficit for 1957 does not warrant the hacking away of services to our people.

The problem should be approached in a state of mind which would lead to real economies and not the alleged economies which I have already mentioned to you.

There are no more dedicated men and women to be found in America than the postmasters and employees in the various post offices of all classes in the United States. They are entitled to the same type of dedicated leadership on the executive and legis-

lative fronts as we seek to reach a solution to our problems.

I commend you postmasters of the 11th Congressional District. You have done an excellent job. I believe that you can be of great service in bringing about the proper answer to these questions which I have outlined to you tonight.

But whatever the ultimate legislative decision shall be, it is my firm conviction that the people of the Nation will always feel that the post office is an institution of service and not a mercantile establishment.

Address by Vice President of United States to American Iron and Steel Institute

EXTENSION OF REMARKS
OF
HON. LEVERETT SALTONSTALL
OF MASSACHUSETTS
IN THE SENATE OF THE UNITED STATES

Monday, May 27, 1957

Mr. SALTONSTALL. Mr. President, on Thursday, May 23, the Vice President delivered a significant address in New York City at the annual meeting of the American Iron and Steel Institute. I think that what he said will be helpful in clarifying in people's minds the issues in the present controversy over the Federal budget. I ask unanimous consent that the text of his address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE VICE PRESIDENT OF THE UNITED STATES BEFORE THE 65TH ANNUAL MEETING OF THE AMERICAN IRON AND STEEL INSTITUTE, HOTEL WALDORF-ASTORIA, NEW YORK CITY, MAY 23, 1957

Six years ago when I last had the privilege of appearing before this organization, I was asked to give a report from Washington on the most burning issue of the day. We were in a war at the time, and taxes and Government spending were at a higher rate than today. But there was little question that on that occasion there was another issue which was of even greater interest to the majority of the American people. I spoke on that subject, as you will recall—the controversy over President Truman's discharge of General MacArthur.

Tonight I would like to give you a similar report. Just as in the spring of 1951, there is no question today as to what issue is uppermost in the public mind. It is the administration's budget for 1958.

I will admit at the outset that I can think of a number of other subjects which would be more pleasant for me to discuss. I am sure many of you are probably tired of hearing about the budget. And some of you may have reached conclusions which will not be changed by anything that I say.

But because I believe the decisions we make on the budget, particularly as they relate to our national defense, are so important to the Nation, and because there has been so much misunderstanding as to the administration's position, I would like to take this opportunity to help set the record straight.

It is necessary to begin by examining the basic economic philosophy of this administration. We find ourselves in the incongruous position of being subjected to attacks from groups holding completely opposing points of view.

On the one hand, the advisory council of opposition party charged in Washington a few days ago that this was a probusiness administration under whose policies the rich are getting richer and the poor are getting poorer.

On the other hand, certain business groups have charged recently that this is a New Deal-Fair Deal administration which is bent on spending the Nation into bankruptcy.

Now, obviously both of these charges cannot be true. I submit that neither is true. Our attitude toward business is simply stated.

We believe that America enjoys unprecedented prosperity today because we have based our economic and political policies on the sound principle that the most productive source of national wealth is private rather than Government enterprise.

We reject the New Deal-Fair Deal attitude of baiting and penalizing business and using it as the scapegoat for all the economic sins of whatever administration happens to be in power.

Instead we believe that Government should encourage free competitive enterprise. It should promote private economy activity rather than penalize it. Regulations, controls, and Government activity should be reduced to the minimum demanded by the general welfare so that individuals can make their maximum contribution to the Nation's productivity.

We do not favor big business or little business. We are for good business and opportunity for all.

We have acted upon this philosophy.

We are getting the Federal Government out of many activities which properly belong to private enterprise.

We have left labor-management relations to the field of free collective bargaining. There have been no Government-imposed labor contracts under this administration.

We have faithfully administered laws which have been passed to prevent abuses by businesses such as those relating to securities, antitrust, pure food, and drugs. But in contrast to the New Deal and Fair Deal, we do not believe in penalizing the good with the bad. We try to adjust regulations to sound business practices in an industry and not merely impose them from above without consulting those affected by them.

Let us see how we have applied our basic economic philosophy to the problems of the Federal budget.

When we came into power we found that in the preceding 20 years there had been only 3 balanced budgets. Deficit financing had come to be accepted not as a necessary evil but as sound fiscal policy.

We rejected this philosophy completely. Our first budget with its inherited carryovers showed a $9 billion deficit. Our next three budgets, including the one for this year, were balanced budgets. In addition, the Federal Government has taken $25 billion less in taxes from the people during the past 3 years as a result of the tax cut we passed in 1954. We have reduced the national debt by $5 billion.

We believe that these fiscal policies have helped to create the confidence which has resulted in the greatest expansion of our economy in history during the past 4 years.

Let us now examine the 1958 budget. It is a balanced budget. It takes less from the economy than the budget of 4 years ago. But the fact remains that in dollars it is still the highest peacetime budget in our history.

I want to make one thing clear beyond question at this point. The budget as originally submitted by the President to the Congress represented the administration's best estimate as to how much we had to spend for our national security and to carry out the laws which the Congress had enacted.

But, consistent with the attitude we have adopted since we came into office in January 1953, we have pledged that we would continue to make every effort to keep actual expenditures below the estimated amounts.

That is why the President has instructed all agency heads not only to keep within their budget estimates but to effect any additional economies they can.

That is why he not only did not oppose but actually invited the cooperation of the Congress in finding any items in the budget which could be eliminated or reduced without damaging the national interest.

And that is why on his own initiative he has already indicated that on the basis of additional information he believes his budget estimates can be reduced by $1.8 billion.

May I for a moment digress to indicate my own as well as what I believe to be the administration's fundamental position with regard to Federal Government expenditures.

First, I believe that Government enterprise is by nature less efficient than private enterprise. Federal Government activity, therefore, should be limited to those areas in which private enterprise or local government cannot or will not render the services the people want and need.

Second, big government just like big business, and even more so, has a tendency to become inefficient and wasteful as it increases in size. We must constantly fight against waste, inefficiency, and duplication in Government operations.

I completely reject the phony fiscal philosophy of those who suggest that as the national income increases the expenditures of the Federal Government should increase in proportion. It is true that to the extent that a larger population requires larger expenditures the budget will necessarily increase. But it is sheer nonsense to suggest that Government should always take as much out of the national economy as the economy can stand. We should spend for Government only what we need to spend, even if this may be less than we are able to spend.

A sound American economy is as essential as a strong national defense if we are to defeat the forces of international communism. Our Government expenditures must never be allowed to reach or to remain too long at a level where they destroy the productivity of our economy. The present tax level, if continued indefinitely into the future, could seriously weaken the economy. Consequently, our objective must always be to reduce Government expenditures so that we can increase the amount individuals can invest in private enterprise which is the solid bedrock upon which real progress in America is built.

That is why I believe that the current discussion which is taking place throughout the Nation on the Federal budget will in the end prove to be a healthy development. In the past, the public generally has not been sufficiently aware of the fact that when the Federal Government does something the people pay the cost. As a result of the wave of tax consciousness which is sweeping the Nation the political demagogs who in the past have thrived on the slogan of "Let the Government do it," regardless of the cost in money or freedom, will find their audiences much less receptive than previously.

With these general principles in mind, I suggest we examine the reasons why the budget is as large as it is.

First, let me dispel two widely held misconceptions on this point. The increased size of this budget is not due to the initiation of new so-called New Deal spending programs. If all the new programs which had not previously been approved in the Congress were taken out of the budget, less than $300 million would be saved. And the size of the budget cannot be attributed to increases in foreign aid. The amount requested is actually $4.1 billion less in 1958 than in 1953.

The primary factors contributing to the size of the current budget are these: Eighty percent of the decrease is directly attributable to the higher prices the Government has to pay for both material and personnel. The other major factor is the increase in population of 12 million which has occurred since 1953 which results in increased demands on the Post Office and other service departments of the Government.

Turning now to the basic question, what cuts should and can be made in the 1958 Federal budget? As I have already indicated, the President has himself suggested a cut of $1.8 billion. To date, the Congress has approved cuts averaging approximately seven percent in the money bills which have been acted upon by both Houses. Up to this time, however, Congressional action has been completed only on bills covering appropriations for other than so-called defense expenditures.

This, then, is the heart of the matter. Unless Congress decides to discontinue domestic programs it previously has approved, budget cuts as high as five to six billion dollars, which some have suggested, cannot be made unless the items for national defense are substantially reduced. Anyone who contends otherwise is just kidding himself and the public as well, because approximately 75 percent of the entire Federal budget goes for the Defense Department, Atomic Energy Commission, interest on the debt, foreign aid, and other defense-related items.

How much can we safely cut from the amounts the President has asked for in these fields? The President has asked for $38 billion for the Army, Navy, and Air Force. No one would be so presumptuous as to claim that this or any other figure is exactly the right amount to spend for national defense. And no one would contend that in an establishment of this size there does not exist some inefficiency and duplication.

Under the circumstances, I believe these factors should control our decision. The major guaranty against war today is the strength of the United States and its Free World allies.

As I have indicated, reasonable men will disagree as to what the level of our military strength should be. But when men with the combined military, diplomatic, and business experience of Dwight Eisenhower, Arthur Radford, Charles Wilson, George Humphrey, and Foster Dulles, after months of study of information available to them from all parts of the world, agree that $38 billion is the minimum we should spend for our own security, I say that cutting the defense budget in any substantial amount below the level they have recommended would be a reckless and foolhardy action which on sober reflection the American people will not and should not support.

But now we come to the more difficult question. There are many people who say spending for defense at home is one thing, but the place to cut the budget is in the so-called foreign giveaway programs. It has been suggested that these programs could be cut anywhere from one to three billion dollars without risking any serious damage to the United States.

I believe the President gave an effective answer to these critics on Tuesday. I would like to underline what he said by stating simply that, in my opinion, the $4 billion we spend for our programs abroad is as essential a part of our national defense as the $38 billion we spend for our Army, Navy, and Air Force at home. And despite the waste and mistakes which are inevitable in such programs, we are getting more for our money in security for the United States in what we are spending abroad than we are in what we are spending at home.

Let us examine this amount item by item.

Approximately three of the four billion dollars goes to Korea, Indochina, Formosa, Thailand, Pakistan, Turkey, and other countries to assist them to maintain the armed forces needed for their own defense.

Most of these countries have common borders with Communist nations. If they were not able to defend themselves, the chance that they might be attacked would be increased. If they are attacked, we would inevitably become involved.

We had one experience of this type in Korea. That war cost us $18 billion and 157,000 American casualties. Putting it bluntly, it costs less to equip a few Korean divisions than to fight another Korean war.

In other words, if we do not help them to develop the strength which will enable them to defend themselves, our national security will require that we assume that burden ourselves. This would mean that we would have to spend billions more for defense than we presently are spending.

I submit then that cutting the defense portion of our foreign-aid programs can under no stretch of the imagination be held sound economy.

This leaves us with approximately $1 billion of the total foreign-aid program which is earmarked for economic assistance unrelated directly to military-aid programs.

Why should the American people be taxed to aid the economies of other countries who may not even be allied with us militarily? To find the answer to this question, let us examine the balance of power in the world today. There are approximately 1 billion people allied on the side of the free nations. There are approximately 900 million people under Communist rule, and there are another 700 million people in Asia, the Near East, and Africa who are classified as uncommitted or neutral.

It is to these uncommitted countries that the greater part of this billion dollars in economic assistance will go. I have visited most of these countries. I have seen our various programs in operation. I agree that some of them have been wasteful and badly executed. You can be sure that acting on the recommendations of the Fairless report and other studies, we shall devote every effort toward eliminating waste and increasing efficiency. But we don't scuttle the fleet because one ship proves to be unseaworthy.

I can state with complete conviction that I know of no expenditure being made by our Government which is more essential to our national security than this one.

The Soviet Union, Communist China, and the satellites are bending every effort to win these people. They are using offers of economic aid. They are spending millions for propaganda. For example, they consider Africa today as important a target as China was to them 25 years ago, and we know what happened there. They realize that if they can win a substantial number of the uncommitted nations to the Communist side they will gain the balance of power and people and resources in the world which will enable them to bring the free nations to their knees without the necessity of fighting a war.

The major danger which confronts the free world today is not defeat in a shooting war. We must never forget that the Communists gained over 600 million people since World War II through means other than overt aggression.

The people of the uncommitted nations are determined to have economic progress. They would prefer to gain that progress and keep their freedom and independence at the same time. I am convinced that if we do not help them, they will turn elsewhere for help. They will be forced to listen to the Moscow line which promises plenty at the cost of freedom.

This, then, is what is at stake—700 million people plus the greatest undeveloped natural resources in the world today. By helping these countries to help themselves through technical assistance, by making loans available to them for development as a supplement to the funds which will be invested by private enterprise, by standing ready to assist countries like Iran and Jordan when they are confronted with an economic emergency, we will effectively stop the Communists in their efforts to increase their sphere of domination, and we will, at the same time, help these nations to acquire and retain the economic and political independence with which international communism is completely incompatible.

We have been discussing our problems. Let us examine for a moment the problems of the Communists. There are definite signs of weakness in the Communist empire of today. The economic strain of armament and their foreign-aid programs are beginning to tell on their economy. The education given to their executives is leading to demands for freedom.

History tells us that a dictatorship must have new victories in order to give its people reasons for their sacrifices in living standards. It must expand or its internal strains will ultimately tear it asunder. From 1945 to 1950, the Communists gained a vast empire and domination over 600 million people. In the past 7 years, they have been brought to a halt and the inevitable strain is beginning to tell.

I believe that we are now winning the battle for the world. Our military strength has been built to the point that the Communists are deterred from launching an attack. Our economic strength has aided in stopping their expansion by means other than war. If we can continue on our present course, we have a chance to win the victory we want without war.

This is no time to announce to the Communists and the world that we are tired of the struggle. This is no time to lose our vision and our courage. We Americans react magnificently when we are threatened with disaster. The Marshall plan, the aid to Greece and Turkey, the support of the Formosa resolution, our resistance in Korea, are all examples of this national characteristic. What we must do now is to demonstrate to ourselves and the world that we have the same will to win and willingness to sacrifice when we are inspired by the opportunity for victory without war as we have when we are frightened by the threat of defeat in war.

This, then, is the case as I see it for our defense and foreign-aid budgets. The President is the man primarily responsible for our national defense. He has indicated what he believes to be the minimum we should spend both at home and abroad if we are adequately to protect our security. The Congress has the power to appropriate less than he requests, but in doing so it must assume its share of responsibility in the event world developments prove those cuts to have been unwise. I am glad to report tonight that I believe support for the President's position is growing among both Democrats and Republicans in the Congress and that the prospects for approval of his program have substantially improved.

I indicated at the outset of my remarks that I could think of a number of subjects which would be more pleasant to discuss than the budget. I recognize that there has developed a great ground swell of opposition to Government spending all over the Nation and that this opposition is directed with particular vehemence against our foreign-aid programs. I realize that it would be far more popular either to ignore the subject or to go along with the tide of opposition.

But I believe it is the responsibility of the members of an administration to analyze the facts on such an issue, reach decisions which we consider to be in the national interest,

and then to fight for enactment of our program by the Congress.

It is on that basis that I present the case for our defense in foreign-assistance programs tonight. I believe that they are necessary for our survival and that substantial cuts in the amounts we have requested will jeopardize not only our safety, but our chance for victory in the world struggle.

I have faith that as the American people know the facts they will not fail to meet the challenge which confronts them in this moment of destiny.

International Trade Promotes World Peace

EXTENSION OF REMARKS
OF
HON. THOMAS H. KUCHEL
OF CALIFORNIA
IN THE SENATE OF THE UNITED STATES
Monday, May 27, 1957

Mr. KUCHEL. Mr. President, last Wednesday I made a speech in Los Angeles at the annual luncheon of World Trade Week before the Foreign Trade Association of Southern California on the subject International Trade Promotes World Peace. I ask unanimous consent that the text of my speech be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

INTERNATIONAL TRADE PROMOTES WORLD PEACE

(Address by Senator THOMAS H. KUCHEL, Foreign Trade Association of Southern California, Los Angeles, May 23, 1957)

I am honored by your wish that I should speak at this annual luncheon of World Trade Week. This celebration originated in Los Angeles 30 years ago, and is now proclaimed each year by the President of the United States.

American trade and American industry have built the foundation upon which this Nation has assumed an undeniable position of economic and political leadership in the world, and our expanding commerce with sister nations has elevated steadily both their and our living standards, and—far more important—has contributed materially to the cause of freedom of their peoples and ours.

I salute the Chamber of Commerce whose leaders long ago recognized that California would continue to expand her interest in trade abroad. The planning and construction of Los Angeles and Long Beach harbors are splendid testimony to the vision of Southern California pioneers. Harbor development there now encompasses a $101 million series of improvements, designed to double cargo handling capacity and increase berthing by 20 percent; $50 million of improvement at our International Airport will prepare this area for jet aircraft travel to every section of our planet. The Los Angeles Collector of Customs reports dutiable collections here are running well over a million dollars a week. The whole history of our State has been intertwined with foreign trade since the days when our forbears relied on sailing ships which beat their way around the Horn to come here from across the seas.

Ocean shipping and commerce overseas are more vital to the well-being of our 14 million people than ever before. Last year, California exported over $1 billion worth of goods and services. In the 1890's, a billion dollars represented the entire export value of the Nation. America's exports for last year are estimated at $23 billion, a vast increase over the $19.9 billion for 1955. Today, over half the employees of our State work in industries which figure significantly in foreign trade—such as aircraft, shipping, motion pictures, canned and processed foods and electrical machinery.

In the early days of our Nation, the struggling colonies had to trade to live. We fought the War of 1812 to confirm that right. But, by the period just prior to World War II, we had such a large domestic market and such ample domestic production, that our export trade was relatively less important. The roughly 10 percent of our production which we disposed of overseas was vital to a few industries but it was not a matter of economic life or death to most.

Now, we are compelled to make certain that we receive strategic raw materials from abroad, including not only such materials as rubber and tin but the new metals and metallic products essential in this nuclear age. And the margin between profit and loss is written for an increasing number of industries in their sales abroad. In this connection, I believe the Federal Government, through such agencies as the Export-Import Bank can be of real assistance to some California, and American, manufacturers, like our aircraft producers, in the stiff competition in which they are now engaged for foreign sales. Attractive credit arrangements are an important incentive for purchase here just as they are when a housewife considers buying furniture. The Export-Import Bank has been of great assistance in maintaining American sales abroad in the past and will, I feel sure, supply additional help in the expanding overseas trade of the days ahead, which, of course, will add to the stability of our employment here at home.

It is stimulating to think that American products and American know-how are raising standards of living abroad and find their way into hitherto remote parts of the globe. For no nation has more to offer the world, nor needs so many of the world's products, than our own United States.

Since California borders on Mexico, I think it is appropriate to note that world trade trends are changing. Whereas Europe was long the United States' best customer, it is interesting to note that Latin America is today, although by no very great margin. And one of the countries in that area which has developed fastest in recent years is, I am happy to say, our sister Republic just south of us.

When the Suez Canal crisis occurred last fall, the interdependence of nations on foreign trade stood out in bold relief. Complete economic strangulation to all the countries of free Europe became an immediate hazard. Fuel for travel, for heat, and for the industrial complex of each of these nations suddenly began to diminish. Gasoline rationing went into effect. Buildings and homes went unheated in a winter of severe temperature.

The interruption of foreign trade brought on by the ominous moves of Egyptian dictator Nasser brought on a grievous crisis in the Middle East and in Western Europe and, beyond that, poised for all the world the horrible possibility of a third world war. That it did not ensue, the peoples of the world may be grateful. The canal closing and the hostilities which followed brought home, once again, that diplomacy and international relations cannot be conducted in a vacuum, and that foreign trade is indispensable for nations to maintain their freedom.

Egypt's intransigence of last fall had the most far-reaching effects on foreign trade. The interruption of normal channels of commerce required wide diversion of oceangoing vessels from usual routes, and necessitated longer runs through the Panama Canal or around the Cape of Good Hope. More ships were called for to perform essential services. There was an impetus for planning of larger and longer range oil tankers. Consideration was given—and is being given—to alternate passages to the Suez. Great numbers of dry cargo ships came out of mothballs—all due to the sudden shipping shortage which followed the arbitrary closing of the waterway linking the Mediterranean and the Red Sea.

Congress, by a bipartisan vote, adopted President Eisenhower's Middle East resolution which in the intervening weeks, in my judgment, has contributed to the prevention of international hostilities and to restraining the growth of Soviet influences in the Middle East. The whole complex problem brought on by the Nasser move remains a most serious threat—for example, her immoral and illegal refusal to permit Israeli ships to utilize the canal, and now, paradoxically, the troubles she is encountering from her erstwhile friends, the Soviet, Czechoslovakia, and Poland, over canal payments—but I do not believe the canal question is insoluble. I mention it here to indicate its impact not alone on peaceful trade, but, beyond that, on peace.

A substantial number of the cargo craft hauled out of our laid-up fleet has been used most successfully in a foreign-trade program approved by Congress 3 years ago. Its first full year of actual operation ended last June 30, and Congress is presently considering continuing it.

Under this legislation, the Federal Government is disposing of food and fiber stored in Government warehouses in foreign trade. The act is designed to assist in solving a particular problem. It is not a permanent undertaking. It benefits American shipping and American labor. The so-called 50–50 provision requires one-half the exports—with a notable exception of direct significance to California—must be moved in American bottoms.

The law permits foreign-flag vessels to carry fruits and vegetables, warranted, I think, by the fact that refrigerated ships must be used, an important time element frequently is involved, and consignments often cannot be handled on regular routes and regular schedules.

World Trade Week is an appropriate occasion to look closely at what this program has achieved. Since its inception, we have made 87 agreements with 30 countries. Normal commercial procedures are followed, based largely on letters of credit. American financial houses participate, American workers benefit, American shipping is utilized, overseas market development is stimulated, and the clouds over American agriculture are breaking up.

Recent improvement in agricultural trade has been general in nature. Last year, intensified demands from abroad for American agricultural commodities carried shipments to an alltime peak. They comprised nearly one-fourth of the entire nonmilitary export total and jumped in value by $1 billion to $4,200,000,000.

Under the act, through last February, agreements had been negotiated to sell $1,769,000,000 worth of products. These included items produced in California, such as rice and cotton.

The aggregate cargoes in the fiscal year 1956 amounted to $427,000,000 in value. They represented 12 percent of all United States agricultural exports. This year, the proportion is expected to rise to 16 percent. Of the crops in which California has most interest, rice is going to 7 countries, cotton to 17, and fruits and vegetables to 4. In the process, ocean transportation costs amounted to $221,000,000, a good share going to United States carriers under the 50–50 clause.

Secretary of Agriculture Benson just a few days ago said it is noteworthy that since the start of this program under Public Law 480 we have been able to hang up the "sold out"

sign for a sizable list of commodities, including cottonseed oil, cottonseed meal, hay and pasture seeds, soybeans, linseed oil, and tung oil. He added that stocks of grain sorghums, rice, barley, butter, dry milk, and wool have been reduced to low levels.

In this accomplishment, incidentally, there is relief for the taxpayer. Only a couple of years ago, it cost our Government $1 million a day for storage charges on farm surpluses which it held. In addition, our country has swapped a billion dollars' worth of surpluses for strategic materials for our defense.

Under the original law, Congress laid down a condition that our Government could barter only with friendly nations independent of Communist Russia. Due to a feeling of hopefulness stemming from events last fall in Hungary and Poland, suggestions have been made that the anti-Communist restriction be discarded. For my part, I believe the restriction is justified. I voted to keep it. There is, in my view, abundant reason for this condition. I do not believe our Government should be a party to bartering with a government which is subservient to the U. S. S. R. While I was in the minority in the Senate on this issue, I note the House Agriculture Committee put the limitation back in the bill. House action is still to come.

In the era through which we now journey, foreign trade by Americans is not a simple business of going abroad, selling what one has to sell and buying what one has to buy. We, all of us, recognize the deadly menace which international communism poses to the very existence of every free Government and every free man throughout the world. Recognizing it, our Government, over the years, has taken steps to reduce and to resist the menace. That is why the United States has entered into agreements with free friends to stand together, to pool our defensive strength, and to treat a Communist attack against one of us as an attack against the rest of us. That is why, also, the Congress has adopted legislation regulating the manner in which foreign trade can be carried on with Communist Russia and her satellites, those unfortunate countries whose governments and whose independence have been enveloped and destroyed through Soviet infiltration and subjugation.

Under the Export Control Act, the United States maintains selective controls over exports to the U. S. S. R. and its European vassal states. Since 1949 we have participated with other governments in an international control system, on a selective basis, in the interests of our mutual security. These conditions are designed to prevent the shipment to potential aggressors of materials which would contribute to their military potential. Goods thus embargoed include arms, ammunition, atomic-energy materials and, generally, such industrial commodities and equipment as would contribute significantly to war potential. Our laws do not prevent trade between our people and people in the Soviet bloc. They may export nonstrategic goods to those destinations as they may desire. Those are business transactions between peoples, as distinguished from governments, where I indicated earlier, our present policy requires our Government to barter farm surplus for strategic material only with countries free from Soviet domination or control. Congress has preserved the right of our Government to relieve famine and to alleviate distress among peoples as we did in the feeding of Hungarian refugees in Austria and in aiding the victims of floods in Iran and Afghanistan.

In all our Federal laws on this subject of foreign commerce, we must constantly consider the question of whether we strengthen the slave yoke of communism by trade with the Soviet and its satellites.

We on the West Coast are keenly aware of the enslavement which communism has brought to the Chinese mainland. The Chinese people have been good friends with us throughout our history. Historically, we have enjoyed mutually profitable trade relations with them.

Our national ties run with the Republic of Free China. We sit with her representatives in the United Nations. We have a mutual security pact with her. Red China, on the other hand, has been branded by the United Nations as an aggressor in the Korean struggle. This slave state continues to hold in Communist prisons American military and civilian personnel in contravention of the most fundamental principles of moral law. She has been repeatedly refused membership in the United Nations. America does not recognize her diplomatically. Our two great political parties have repudiated her totalitarian regime.

I wish to recall the problem of the security of our country, as it pertains to the Far East in the words of General MacArthur. He referred to a chain of islands—including the Free Chinese area of Formosa and the Pescadores—as constituting a protective shield to the America. He said:

"The holding of this littoral defense line in the western Pacific is entirely dependent upon holding all segments thereof, for any major breach of that line by an unfriendly power would render vulnerable to determined attack every other segment * * *

"For that reason, I have strongly recommended in the past as a matter of military urgency that under no circumstances must Formosa fall under Communist control. Such an eventuality would at once threaten the freedom of the Philippines and the loss of Japan and might well force our western frontier back to the coasts of California, Oregon, and Washington."

Those same views are shared by your Government in Washington. They are some of the reasons which prompted me to vote against the Red Chinese regime. Our Government does not permit trade with Communist China, North Korea, or North Vietnam. America's overriding interest, in trade as in all else, is the maintenance of our own freedom. And the protective shield concept of MacArthur is sound. Meanwhile, rumblings of discontent come from Red China. Some ideological cleavages with Moscow are in the making. And we are not without good friends, aside from Free China, the Philippines, Japan, and Korea, among the peoples of Asia.

Listen to the sturdy words of the gallant President of the Republic of Vietnam as he spoke to Congress earlier this month:

"Our Republic was born among great suffering. She is courageously facing up to economic competition with the Communists, despite heavy and difficult conditions, which become daily more complex. Vietnam nevertheless has good reason for confidence and hope. Her people are intelligent, have imagination and courage. * * *

"Your and our fight is one and the same. * * * We too will continue to fight communism."

Thus, did the President of Vietnam express the same fundamental concern which is in the hearts of Americans and freedom-loving human beings wherever they may be. The fight against communism will continue. It has required of all of us great sacrifices—sacrifice of American men in the wars in which we have lately been engaged, sacrifice of money to maintain a competent deterrent in our defense department.

This country is now at peace, however, difficult and disturbing it may be. The Congress is now confronting the question of cost of our Government with particular emphasis on the needs of our own security. All of us want our Government to be strong so that all of us may be free. But I have no doubt that our people also want our Government to live within its means and to promote a healthy national economy by practicing economy in its own affairs. In this regard, I wish to recall that your Government balanced its budget in the year ending last June 30, 1956. This coming June 30, our budget for fiscal year 1957 will be balanced. Aside from the balanced budget of the 80th Congress, these are the only times in the last quarter of a century that our Government has lived within its means. The President has recommended a budget for the fiscal year ending June 30, 1958, which again will be in balance. In the consideration of that budget, I assure you, Congress will painstakingly endeavor to find any areas in which curtailment of expenditures can be achieved without damaging our national interest. So will I. Last week the Senate reduced two appropriation measures below the level approved in the House of Representatives after it had cut them. Of this, I give you my word: We will reduce expenditures wherever consonant with the national interest. We will again balance the national budget, and I venture to predict, if all goes well, the Congress next year will consider and approve tax reduction legislation.

By far the largest portion of Federal expenditures is in the field of defense and foreign policy. In the field of defense I believe President Eisenhower is uniquely qualified to determine the needs of the Nation. This does not mean that Congress or its membership should abdicate its constitutional responsibility carefully to sift each spending proposal. It does not mean that Congress should be a rubberstamp. Neither our people nor the President want that. It does not mean that Congress should refuse to consider recommendations from creditable sources in the interests of economy. For example, on one point, in the field of defense, I find myself in utter disagreement with the Bureau of the Budget of the administration. The head of a Defense Department committee, Mr. Ralph Cordiner, president of the General Electric Co., has stated that 87 percent of the technically skilled Armed Forces personnel leave the Armed Forces as fast as they can for greater incentives in civilian life, and that 4,000 Air Force pilots left the service in the fiscal year 1955, representing, according to his figures, a training loss of almost half a billion dollars. Modern weapons of defense require skills and training far greater than in years gone by. The committee recommendations are for a pay system in the Military Establishment based on skills rather than on seniority. Speaking for his committee, he says that approval of these recommendations would save $5 billion a year by the fiscal year 1962. Whether that is a correct figure or not, there is no question in my mind but what his proposal merits the most careful Congressional consideration and I regret very much that the Budget Bureau turned it down. Incentive legislation to help skilled men in peacetime military service is both good defense and good economy. I mention this to indicate to you an example of current fiscal problems connected with defense upon which men disagree, and upon which I have, as one of your representatives in the Senate, my own views as to what best serves your interests.

The problems of foreign policy and foreign aid become increasingly complex and far more subtle as the years go by. I cannot honestly indicate to you what will be the final outcome of this year's foreign policy and foreign aid proposals. I can tell you of my own feelings. I believe it can be clearly demonstrated that much of our foreign-aid program has been of direct benefit to the security of the American people. I believe the strength we have contributed to the North Atlantic Treaty Organization has been a major deterrent against Communist infil-

tration and destruction of Free Europe. Free Europe contains 200 million people whose salvation from the ugly fate which has befallen their satellite neighbors works in the interest of our own Nation. Foreign aid has underwritten a portion of the cost of maintaining defensive armies in Korea, in Formosa, and in Turkey. To feed, house, clothe, and pay an American GI requires an annual expenditure of $3,350. To do the same for a Korean soldier in Korea cost $234, for a Free Chinese soldier on Formosa $127, and for a Turkish soldier in Turkey $235. I believe that our military assistance to such nations as these has been both economical and in the interest of American freedom. In a real sense helping to maintain the defensive strength of those countries adds economically to our own defense.

In my view, foreign aid must continue. I believe, however, that it should be upon a more selective basis, and I shall vote accordingly. A special Senate committee has recommended that, consistent with national security, efforts should be made to reduce the rate of expenditures for military and supporting aid. I agree. It suggests that economic aid should be on a loan basis. I agree again. Indeed, I have voted in this fashion in past sessions. These are some of the considerations which will guide me in the Senate when the problem is before us in the weeks ahead.

Whether you are engaged in foreign trade or in business here at home, your interests and your country's interests rest upon a sound national economy which our Government should encourage, and upon a peace with justice in the world which our Government should strive to attain. These are the objectives which are set before us and which we intend to reach.

More About the Gerry Murphy Case and the Dominican Republic

EXTENSION OF REMARKS

OF

HON. GEORGE S. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. LONG. Mr. Speaker, I am indeed sorry that my good friend and colleague, Mr. PORTER, of Oregon, sees fit to continue this unfriendly controversy with regard to one of our foremost neighboring republics to the south and one of our stanchest friends in the free world, the Dominican Republic and its President Trujillo.

What I have been trying to do in my articles and in my association with our Latin American friends, is to work toward building up a friendship and an understanding of our way of thinking and our way of life, which would be mutually beneficial. It behooves all of us in the Western Hemisphere to build friendly relations and to eliminate, so far as possible, all traces of the godless philosophy of communism. Without a doubt Communists are at this very moment working with all the forces at their command, and using every possible subterfuge to distort and confuse the minds of our peoples in a concerted and frantic effort to create dissension and dislike between the United States and our Latin American neighbors.

It is unfortunate that the Gerry Murphy case ever occurred but at the same time it is unthinkable for us to attack and to attempt to convict one of the great leaders of a democratic and progressive Republic with hearsay evidence. I, for one, cannot bring myself to sit idly by and see our good neighbors and stanch friends attacked and maligned in such a manner.

In the interest of good will and friendly relations with another of our fine Latin American neighbors, which also is known to be democratic, Christian, and anti-Communist, I recently had breakfast with several of my colleagues in the House of Representatives and a number of esteemed officials both local and abroad. This breakfast was given by the Honorable JIMMIE MORRISON. It was an honor to breakfast with such outstanding leaders as the majority floor leader of the House of Representatives, the Honorable JOHN MCCORMACK, of Massachusetts. Four of my esteemed colleagues from Louisiana were present: Congressman JIMMIE MORRISON, Congressman EDWIN E. WILLIS, Congressman T. ASHTON THOMPSON, and Congressman F. EDWARD HÉBERT. A spirit of friendship and goodwill prevailed at this meeting, which included as honored guests officials from the Republic of Mexico, our own State Department and one of our national associations, as follows: Hon. Abelardo de la Grajaies, head of all Government employees of Mexico, who was the guest of honor; Hon. Senor Don Manuel Tello, Ambassador of Mexico to the United States; Hon. Rafael Avelyra, Minister-Consular of the Mexican Embassy; Hon. Don Justo Sierra, Consul, of the Mexican Embassy; Hon. Robert Hill, our new Ambassador to Mexico; Hon. Donald Barnes, of the Department of State; Hon. John Fishburn, of the Department of State; Hon. Anthony Albrecht, of the Department of State; Hon. William B. Macomber, Jr., the new Assistant Secretary of State; and Mr. William Doherty, president of the National Letter Carriers Association.

I have been privileged to enjoy many outstanding gatherings, but this was one of the most inspiring that I have ever attended. These men have faith in their fellow man and are seeking ever constantly to spread confidence and good will among the nations of the Western Hemisphere. They are striving, with marked success, to afford their country an exemplary government and their people the highest possible standards of living and the peace of mind and comforts of life which go hand-in-hand with a stable and progressive government. All of these men are outstanding in their efforts to stamp out communism and the evils of the communistic concept of life. Most of the troubles that we find in governments today have their roots in communism and the communistic theories and practices. This was true of Guatemala when that country experienced trouble. The Communists put out their insidious propaganda to try to destroy those patriots who were fighting to liberate their country with all the force at their command. Those same communistic influences are now at work in an effort to create unrest and dissension in the Dominican Republic. A so-called exile government has been established in Puerto Rico, which is working day and night in its efforts to overthrow the present great and democratic Government of the Dominican Republic. The efforts of this group become evident in many shapes and forms. The Gerry Murphy case is one in point. Professor Jesus de Galindez apparently was kidnapped and transported out of this country supposedly by Gerry Murphy and an accomplice, in a rented plane which he was not licensed to fly. The drugged Professor Galindez was picked up near New York and transported by air to Miami and thence on to obscurity.

It is unfortunate that the heads of the Dominican Republic have been saddled with the responsibility for the disappearance of Professor Galindez. Gerry Murphy, who was clearly connected with a nefarious group, lost his life. There have been charges and countercharges as to who is responsible. It is unthinkable to take the side of an irresponsible and exiled group who are out to fight democracy and to agitate against the word of our friends who are trying their best to maintain a progressive, free, and democratic form of government. I expect to use every power that I possess to see to it that the kind of suspicion that has been attempted to be cast on the good names of our friends in the Dominican Republic is completely removed.

When I addressed this House of Representatives on April 17, concerning our friendly relations with the great people and Government of the land where America began, the Dominican Republic, I expressed the hope that the publicity and notoriety connected with the disappearance of Gerry Murphy would cease to continue its prominent place in the press, magazines, and so forth. Incidents such as the Gerry Murphy case come and go in this complicated world and for this case to be hashed and rehashed and kept alive long beyond its logical closing could only be attributed to those communistic forces which seize upon any and every morsel to feed its growth and spread its propaganda. The facts in the case are clear that Gerry Murphy succumbed to greed and became involved with the criminal element to the extent of joining in a conspiracy and being guilty of kidnapping. The regettable part is that innocent and outstanding public officials continue to be maligned and abused, in the traditional communistic way, through twisting the facts.

I deeply regret that these irresponsible and concerted attacks upon the people and government of the Dominican Republic, to whom we are so firmly bound, not only by the mutual affinity of our Christian religion, but by solemn treaties as well, continue unabated. Actually these attacks on a friendly government constitute a smear upon the honor and integrity of our own country, but it is wishful thinking to expect this matter to wane and fade as it rightfully should. Continued attacks appear containing biased and prejudicial statements against our friendly neighbor, the Dominican Republic, based upon pure

hearsay. Recently in a national magazine a sensational article appeared about the Dominican Republic, an article that is a lurid rehash of ancient and hoary tales which had been circulated throughout the Caribbean by the dissident pamphleteers for so many years, material which is not only hoary with age, but which reeks with its communistic origin. Included in the article was an almost unbelievable attack with reckness abandon and disregard of the facts upon one of the greatest of contemporary statesmen, a man who enjoys the greatest respect of his colleagues on both sides of the aisle—an honest and kindly man—the Democratic floor leader of the House of Representatives, the Honorable JOHN MCCORMACK, of the State of Massachusetts.

Mr. Speaker, it is obvious that the author of this article, Representative PORTER of Oregon, did not understand the gravity of his actions in casting reflections, even by implication, upon JOHN MCCORMACK. I also state that I cannot believe that any Member of this House could have any feeling whatever about the gentleman from Massachusetts [Mr. MCCORMACK], other than the highest regard and affection, nor could any Member of this House entertain the slightest question as to his honor and integrity.

In his article in the June 1957 issue of Coronet magazine, my distinguished colleague, Representative PORTER, of Oregon, states, and I quote:

> Consequently, for as long as I persist in carrying on my campaign against Trujillo, I intend to carry a gun.

Now, I would like to ask the gentleman from Oregon, does he carry that gun on the floor of Congress? I was on the House floor when the Puerto Ricans shot at the Members of Congress and was in direct line of fire, yet, I have never found it necessary or desirable to carry a gun.

It is those of us who have taken the trouble to keep ourselves informed who know that out of the 5 predominant political parties in the Commonwealth of Puerto Rico, the next-door neighbor of the Dominican Republic 3 of them—Partido Independentista, Partido Nacionalista, and Partido Comunista—all cooperate and make common cause not only among themselves but with the "Vanguardia Revolucionario Dominicana," the largest group of Dominican professional exiles who carry on their nefarious work from the island of Puerto Rico and whose self-styled President, Dr. Miguel A. Prado, the possessor of a long criminal record, has taken me to task by means of a long and scurrilous letter for standing up and being counted on the side of decency, honor, God and country. Why this group, as well as the renegade Romulo Bethancourt, one-time President of friendly Venezuela, and probably the most dangerous Communist or leftwinger in our hemisphere, are permitted to ply their nefarious machinations and plot revolution against our friendly neighbors on soil under our jurisdiction, is quite beyond my comprehension. I hasten to add, Mr. Speaker, that Gov. Luis Muñoz-Marín, of the Commonwealth of Puerto Rico is not a member of any of the three dangerous leftwing parties mentioned. Governor Muñoz-Marín heads the Partido Popular Democratico, a political party much more liberal than the Partido Estadista, headed by the patriotic Luis Ferre, but in no way connected with the three anti-American parties named, and the Dominican exiles living in Puerto Rico, which constitute one radical atheistic block, and from whence came the cowardly assassins who attempted to take the life of the President of the United States and Members of this House. Likewise, Mr. Speaker, events are very significant and point to a concerted drive going on by leftwing elements to bring about chaos and confusion in the Caribbean. The undoubtedly dictatorial but fiercely anti-Communist President of Nicaragua was assassinated a few months ago. The government of our nearest island neighbor, the Republic of Cuba, is even now under attack by a man reputed to be a Communist, and who is certainly pursuing exactly the same tactics as were displayed by the Communist Ho Chi-Minh and various other trained Communist revolutionaries over the world. Recently two reporters from our own country gratuitously broadcast a highly biased telecast from his secret headquarters, during which a young man from our own country, serving under the rebel leader, described his motives for joining that movement in exact and timeworn Communist terms.

The small Negro Republic of Haiti, sharing the island of Hispaniola with the Dominican Republic, has been, for many months, in a state of complete political chaos, completely "strapped" financially, and unable to form a government or hold national elections. Our neighboring Republic of Mexico has a continuing and dangerous Communist problem. The Republic of Honduras has long been without an executive and is being ruled by a military junta, while all-out war between that country and its neighbor, Nicaragua, has just been narrowly averted by the Organization of American States. The people and Government of the Republic of Panama continue to be stirred up on the completely unrealistic issue of sovereignty over the Panama Canal, stirred up by those evil anti-Americans who thrive on chaos. The canal issue is unrealistic because it is, in fact, nonexistent. Of course, the Republic of Panama, however, in the exercise of that sovereignty, long ago made a binding and honorable contract concerning the canal and the Canal Zone, a contract made with our own Government, a contract made between sovereign equals for their mutual profit and interest.

Mr. Speaker, as one who has lived practically next door to the nations of Central America and of the Caribbean all of my life, and thus having gained some little insight into Communist intrigue in that area, I would like to touch briefly and factually, upon the classic Communist takeover of power in our sister Republic of Guatemala. In explaining what happened in Guatemala and what we may expect to happen in the Dominican Republic if communism has its way, I ask my esteemed colleagues to remember, to paraphrase a somewhat famous statement of an officer of the executive department, that I firmly believe that what is good for Central America and the Caribbean is good for us. As a Christian, I am concerned with the welfare of all people everywhere, and particularly with those Latin American peoples and nations who are our neighbors. First, however, I am concerned with the security and welfare of our own United States, and I am realistically convinced that we must never again, whatever the price, permit a Communist government in any of the Americas. Bishop Fulton Sheen, a great American and a great Christian, has said that history never changes; that rather, the same thing happens to different people. I believe we can all agree with that meaningful statement by Bishop Sheen, and by looking briefly at what led to the tragedy of Guatemala, we can determine what would happen to the Dominican Republic—if we should permit it—or even to us.

Prior to 1944 the Republic of Guatemala was ruled by a fiercely anti-Communist but benevolent strong-man dictator, General President Jorge Ubico. In its issue of November 18, 1940, page 37, Time magazine had this to say about President Jorge Ubico on the occasion of his 62d birthday:

> Jorge Ubico has made Guatemala the glamour girl of the Central American Republics. He has reduced the national debt 50 percent, has got his paper currency covered 100 percent by gold, has built and paid for public works. * * *
>
> President Ubico introduced a probity law, requiring that public officials register their assets upon taking and leaving public office. * * *
>
> Though he loves his own power, he has made love to the ideals of democracy.

Little did the world then know that the Kremlin had already picked Guatemala as its first American conquest and that the downfall of benevolent "Dictator" President Jorge Ubico was, in the face of our own ignorance and complacency, inevitable.

In its issue of July 3, 1944, Time—page 42—in an article entitled "Tyrant Defied," refers to the same President Ubico as a tyrant and takes credit for an article about the tyrant which it ran the previous week. In its issue of July 10, 1944—page 43—in the lead article under Latin America, entitled "Tyrant Down," Time uses an entire column to detail the downfall of the dictator of whom it had spoken in such glowing terms 4 years earlier. Jorge Ubico, admittedly a dictator, but a stanch friend of our own country and a courageous anti-Communist, lies buried in an unmarked grave in New Orleans. A dictator and controversial figure while he lived, he was a great American patriot nevertheless. Since death removed him many years ago from the realm of controversy, his memory is entitled to better treatment at the hands of our own country as well as his own. Probably no better way could be devised to demonstrate to our Latin American friends that we are dedicated to them in their fight against communism than to return the mortal remains of this Guatemalan hero to his

own country aboard one of our own great warships.

President Ubico was succeeded immediately by a military man, then by the suave Communist Juan Jose Arevelo, who was in turn succeeded by another Communist, Jacobo Arbenz Guzmann, who was overthrown in the restoration of June 1954, and whose fate it was to become the first Communist leader in history to lose his country for communism. Juan Jose Arevelo and Jacobo Arbenz Guzmann today wander about the world, living proof of the fact that communism is not invincible, that Communist governments can be overthrown and liberty and decency restored to a Christian people.

But Guatemala's experience in communism cost her dearly in suffering, terrorism, loss of life and financial ruin. Every "do-gooder" in our Nation, be he public official or otherwise, should know and understand all of the facts of the work performed by Mr. Phieffer at Ciudad Trujillo which cannot, perhaps, be gone into. That his work was important and was material in the defense of our country is apparent to every thinking American. Those of us who love our country are grateful to Ambassador Phieffer. I am sure this sentiment is shared by every Member of this House, including my distinguished colleague from Oregon.

In conclusion, Mr. Speaker, let me point out to my distinguished colleague from Oregon, that, as a freshman Member of this House, he has made at least two mistakes, mistakes which I sincerely hope will not prove fatal to his future political career which looms before him so brilliantly. The first mistake was to impugn, if only by implication, the honor and dignity of our distinguished majority floor leader, JOHN MCCORMACK. Only by the exercise of the greatest of Christian charity can he be forgiven by his colleagues who know and love Representative MCCORMACK. Our colleague made his second grave mistake when he permitted the use of his name in connection with a scandalous and trite article in a national magazine, an article intended by that cynical magazine for one purpose and one purpose only: increase in its circulation. If our distinguished colleague believes that he has gained any fame by that course of conduct, he is badly mistaken. Notoriety, perhaps, but not fame. There is a vast difference. By his reckless and unwarranted statements that he must carry a gun he has, in effect, impugned the honor of every Member of this honorable House, and he has provided the enemies of our country with a valuable propaganda weapon. Such conduct is difficult for the patriotic Members of this House to forget.

Mr. Speaker, again I reiterate my sincere wish that we hear no more of the infamous Gerry Murphy. As a Christian, I shall humbly pray that my young colleague from Oregon shall see the error of his ways and that he shall be moved by God to turn his undoubted ability and aggressiveness to fighting our atheistic Communist enemy, and that in the future he render unto the great leaders of this House the respect which is their due. But, Mr. Speaker, while I shall so make my prayers to God, in my humble way, let there be no mistake: Our great Christian Nation shall live up to its obligations. It shall continue to honor and respect our neighbors in Latin America who tender to us the hand of friendship. It is quite beyond the power of our distinguished colleague from Oregon to make it otherwise. In all Christian charity, I do not believe that our colleague from Oregon would want it otherwise. I am sure that his actions heretofore have grown out of a lack of understanding of the tense peril in which we live. I am sure that his further efforts in this direction could and would result only in further notoriety, of which he already has too much.

The Small Business Act of 1957, H. R. 7474

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, May 27, 1957

Mr. MULTER. Mr. Speaker, on May 22, 1957, I appeared before the House Banking and Currency Committee in support of my bill, H. R. 7474. The following is my testimony before that committee:

STATEMENT OF HON. ABRAHAM J. MULTER, REPRESENTATIVE IN CONGRESS FROM THE STATE OF NEW YORK

Mr. MULTER. Mr. Chairman, for the record, I am ABRAHAM J. MULTER, Representative from the 13th District of New York.

I appreciate the opportunity you give me to appear here as a witness, rather than as a member of this committee, and I hope to be able to give you the benefit of the thinking of the Subcommittee No. 2 of the House Small Business Committee, as well as that of many of the members of the full committee.

As you know, 12 of the 13 members of the House Small Business Committee have introduced bills identical with H. R. 7474, which seeks to set up the Small Business Administration as a permanent agency, and to work changes in the existing statute which we trust will make the agency a more effective one in accomplishing the intent and purpose of the Congress.

So that the record may be complete on what has been done by the Small Business Committee, I would like to indicate that after fairly lengthy hearings by Subcommittee No. 2 of the House Small Business Committee, all of which have been printed and I believe are before this committee, consisting of some 429 pages, a notice was sent on May 4 to the members of that subcommittee, and to the ranking minority member, Mr. HILL of the full committee, and to the chairman of the full committee, Mr. PATMAN, advising them that executive sessions of the subcommittee would be held on May 8 and 9, 1957, and inviting them to attend.

I might also indicate that under the rules adopted by the Small Business Committee, the chairman and ranking minority member are not only ex officio members of the subcommittee, but have a right to vote therein. For that reason both the chairman and minority member were invited to attend and participate in the work of subcommittee No. 2.

Subcommittee No. 2 agreed unanimously after 2 days of executive session on the form and substance of H. R. 7474. In accordance with what had been done in prior years, copies of that bill were sent to all members of the full committee so that all of those who desired to do so could join in cosponsoring it. The result is we have a bill cosponsored by all of the 6 Republican members of the full committee and 6 of the 7 Democratic members of the full committee.

I think that speaks well for the desire of that committee to do a good nonpartisan job in bringing before this committee a bill which will best serve the small-business men of the country and at the same time to present a bill which is most likely to meet the objections and include the suggestions of all members who are interested in furthering the small-business enterprises of our country.

I would like to briefly touch upon some of the changes that are effected or will be effected if H. R. 7474 is enacted. I will follow the mimeographed copy of the bill, because in that bill we have indicated very clearly by underlining the changes from existing statute to the proposed bill.

On page 1, there is a technical change, which is approved by the administration.

It merely clarifies what we say is the intent and purpose of Congress, not in giving small business a preferred position, but trying to give it an equal competitive position with big business in our economy.

In section 102, which begins at the bottom of page 1 of the mimeographed copy of the bill, we find the change in the language as to definition. For many years, the House at least has been almost unanimous in agreeing that the arbitrary 500-employee definition, as adopted during the World War II years, was not doing the job it was intended to do.

We recognized that during the war we had to have some kind of a definition, arbitrary though it might be, that would simplify the work of the procurement agencies. But ever since that, every committee of the Congress that has looked into the matter, certainly on the House side, has determined that that definition was unfair and does not do justice to small business.

The Government Operations Committee of the House has repeatedly found fault with that definition. Every time the House Small Business Committee has considered the matter, we have unanimously reported that that definition was unrealistic and unfair and should be changed.

When we wrote into the last enactment of the Small Business Act, a provision requiring the Small Business Administrator to promulgate a definition of small business, which would be different than the arbitrary 500 employee definition, we thought that we had moved a long way toward accomplishing the intent of Congress.

After much urging and prodding by the Small Business Committee, the Administrator did promulgate a definition. He broke it up into two parts. One definition covered the financial assistance program, and the other applied to procurement.

While he found no difficulty in making a definition which ignored the 500 rule, and tried to be realistic, so far as financial assistance is concerned, in the definition, in the second part of the definition, applying to procurement, he adhered to the precise definition we had been finding fault with all through the years. The Small Business Committee, through subcommittee No. 2, conducted a public hearing on the proposed regulation setting up that definition. We heard all of those who participated in making the definition.

As you were told, the Small Business Administrator, Mr. Barnes, convened a task

force representing all the agencies of government. No small-business man nor any representative of any small-business association, was invited to participate on that task force or in any of its deliberations.

It was, therefore, not surprising that although one agency, the General Services Administration, indicated that the 500 rule was a bad rule and that there would be no difficulty in adopting a more realistic one, all the other agencies apparently followed the Defense Department lead of insisting that only the 500 employee definition was workable.

As a result of that hearing, the subcommittee unanimously agreed, and the full committee unanimously agreed, and so reported to the Congress, that that part of the definition, which adhered to the old Defense Department rule and statute of 500 employees should be abandoned—it should not be promulgated as an effective regulation, and that at least temporarily the Small Business Administration should follow the same rule for procurement as it had promulgated for financial assistance and then come up with a better definition if it found the financial assistance definition did not work well in procurement.

We were very much disappointed and surprised to find that, nevertheless, the Small Business Administrator promulgated and made effective the very definition we had unanimously condemned as to procurement.

Mr. BROWN. What is the difference between your definition and the definition in the Hill bill?

Mr. MULTER. His definition permits adherence to the old statute which we repealed in 1955, saying any business of less than 500 employees is small business and anything over that is big business, for the purpose of procurement.

The definition which the Administrator promulgated for financial assistance, breaks the economy down by industries and in certain industries he uses as a first guide, 250 employees. In some industries such as the electronics industry, he says as many as 1,000 employees may be small business. We wrote into the statute in 1955 a provision—and all the bills before you contain that same provision—whereby in any instance any procurement agency or small business or any competitor or big business, for that matter, who finds fault with the determination or the regulation as affecting a particular company, that they have a right to go to the Small Business Administrator and present the facts and on the facts of the particular case, either involving a company or an industry, then the Small Business Administrator is authorized by law to make a determination that the particular situation calls for, and issue a cerificate accordingly, as to whether or not the particular firm or industry is small business.

The CHAIRMAN. What is the difference in the definition with reference to loan requirements and procurement? Is there a difference?

Mr. MULTER. Yes.

The CHAIRMAN. What is that difference?

Mr. MULTER. For financial assistance the Administrator starts by breaking down the economy into different industries and he has a different rule as to each industry.

I would like to have Mr. Irving Mannes, who is counsel to the Small Business Committee, and assigned to the committees Nos. 1, 2, and 3, sit with me. If Mr. Dalmas is in the room or when he does come in, I would like to have him join me. Mr. Parke Dalmas is the minority adviser to the committee.

I might say that both of these gentlemen were of extremely important aid and assistance to the committee, in all of its work. To come back to your question, in House Report No. 2964 by subcommittee No. 2 of the House Small Business Committee of the 84th Congress, we have set forth in full, as appendixes, beginning at page 11 and through page 20, the definition as promulgated by the Small Business Administrator. There you have the small business size standards set up by him for financial assistance. You will find it is broken down by industries. As I indicated to you, in most industries, a concern is said to be small business if it has no more than 250 employees. In some instances it may have as many as 1,000 employees.

That was the determination of the Small Business Administrator, after he had had this task force meeting and we had our hearing.

Nevertheless, as to procurement, he takes the same language as his starting point, of the old statute which we repealed, of 500 employees. As I indicated, the statute permits him to make a different finding in any case in accordance with the information submitted to him, whenever anyone comes in in either the financial or procurement program and submits proof that the rule should be different as to any particular company.

Mr. BROWN. I understand the number of employees will not be any test at all.

Mr. MULTER. No, sir. In the proposed new bill, we say that the number of employees—let me give you the exact language.

After continuing the existing language of the statute, which says he may use these criteria, among others, to wit, "number of employees and dollar volume of business"—now mind you, that is the way the statute has read ever since we enacted it, that in setting up the definition of small business—and this is the language of the statute—a small business concern shall be one that is deemed to be independently owned and operated and which is not dominant in its field of operation.

In addition to the foregoing criteria, the Administrator, in making a detailed definition, may use these criteria, among others: Number of employees and dollar volume of business.

That is the way the statute has read up to now and still reads, but SBA has ignored dollar volume of business, or any other criterion, and used solely the number of 500 for that definition for procurement.

So we now add to that language, having in mind he has continually refused to follow the recommendations of the Congress in that regard, we add this proposed language in the bill before you, and I quote: *"Provided, however,* That no definition promulgated by the Administrator for any purpose whatsoever shall be based solely on the number of employees; *And provided further,* That without undue delay, the Administrator shall establish a definition of small business which definition shall be consistent with the intent of Congress. The definition presently in use by the Administrator for financial assistance is hereby continued as the definition for all purposes until the Administrator adopts a new definition based on the criteria stated herein."

In other words, if this language is written into the law he can still use the number of employees as one of his criteria but may not use it as his sole criterion, as he is doing now, for procurement purposes.

The CHAIRMAN. But the committee never decided on any definite rule. The committee was disappointed that both of them left it to the Administrator.

Mr. MULTER. When you say, "the committee," you mean—do you mean the Small Business Committee, sir?

The CHAIRMAN. Yes. You did not. In your bill there is no definition. You supplant those definitions.

Mr. MULTER. Yes; to this extent.

The CHAIRMAN. What is the definition in the bill?

Mr. MULTER. I have just read to you, sir, the new language of the bill. I will read it again. This is the additional language added to the existing statute by this bill:

"Provided, however, That no definition promulgated by the Administrator for any purpose whatsoever shall be based solely on the number of employees: *And provided further,* That without undue delay the Administrator shall establish a definition of "small business" which definition shall be consistent with the intent of Congress. The definition presently in use by the Administrator for financial assistance is hereby continued as the definition for all purposes until the Administrator adopts a new definition based on the criteria stated herein."

In other words, we will say to him, by this statute this financial assistance definition as now promulgated and in effect and as set forth on pages 11 to 20 of House Report 2964 shall be the definition for procurement purposes as well as financial assistance purposes, until he comes up with a new definition.

The CHAIRMAN. You say you are dissatisfied with that definition and define a better one?

Mr. MULTER. Yes; but since we say also that the financial program is a good one and working, until he finds it cannot work in procurement, he shall use that definition. We think that is a fair approach.

Mr. RAINS. Let me me ask you this, Mr. MULTER. It seems to me what you really do is maintain the criteria for the definition presently in the act and add to it one additional requirement that he shall not base it solely on the number of employees. It seems to me you are going to make it more difficult to arrive at the decision whether it is small business, if you say he shall not base it solely on that. Maybe he could arrive at the definition of small business easily as to number of employees, but when you say it can't be based on that solely, don't you think it would be better to say in the bill that criteria he must consider in determining shall be not based solely on the number of employees.

It seems to me you are telling him even though you may be convinced it is small business now under it, we are now adding another step you cannot act until you find it is not based solely on numbers.

I get the impression you are tying it up and making it a little more confused than it is. You are giving him another way out by saying wait a minute, this is small business based on the number of employees, but I can't take that solely.

If you were to say he shall consider those facts, it seems to me, in making his determination, that would be better. But I don't think you ought to eliminate all of the others but saying he cannot find it small business, until he considers all of these others.

Mr. MULTER. The difficulty, as I explained before you came in, is that the statute required him to use his discretion in arriving at a definition. We said he may use these criteria among others, number of employees, and dollar-volume of business. We did not limit him to either one of them. But he limited himself to the number of employees, and in spite of a unanimous report of the full committee and of the subcommittee against his using solely the number of employees, he nevertheless insisted on promulgating that definition, at the same time promulgating a different definition as to financial assistance.

It may be we can improve the language——

Mr. RAINS. It seems to me it would be better to say in language, it shall not be designated, or shall not be excluded simply as small business, solely because he has more employees than 500. But if the criteria are clear, it is now small business, why tie it up more. We would like the definition a bit broader and that is what I think you want to do.

Mr. MULTER. That is what we are trying to do. In this definition he promulgated after

the task force met with him, he found most of the small-business concerns have less than 250 employees. Some, as I indicated, have as many as a thousand. But when he gets to the procurement side, purely as a matter of convenience to the procurement agency, he says let's stick to this 500 figure.

Mr. RAINS. I see your point.

Mr. MULTER. I think possibly we can adopt your suggestion, and put that language in the reverse way, so that he knows he still may use it, but must look to other criteria, too.

Mr. RAINS. That is right.

Mr. MULTER. And again I would like to indicate that there is language in the statute now, which we are not changing, which permits anyone who finds fault with the definition as it applies to any particular concern or industry, to come in and on a presentation of facts, ask for and obtain, if entitled to it, a different certification.

So we have not tied his hands. He may take all of the facts as they apply throughout the country, or as they may apply in a particular industry, or a particular company. He will retain full discretion and right to act. What we are trying to do is stop him from continuing the old 500 employees rule, which we took out of the statute and which we have several times told him is not a realistic approach to procurement.

The CHAIRMAN. Does not the number of employees, whether a large or small institution, depend upon the character of the business?

Mr. MULTER. Yes.

The CHAIRMAN. A grocery store with 500 employees would be a very large institution but a steam plant with 500 employees would be a small institution?

Mr. MULTER. Yes. We have that in mind in the language we use in the bill.

Mr. SEELY-BROWN. Is it not true that the testimony before the subcommittee indicated the definition used in providing financial assistance was working out reasonably well, and that that definition had a degree of flexibility that made it work? What we tried to do was to suggest since that definition with its flexibility has worked out well for loan assistance, let us see if we cannot write an equally flexible definition which will provide bona fide help to the recognized small business community for procurement purposes.

If I understand Mr. RAINS' argument, his only question was that the language of the bill might preclude a small business, rather than make it possible for it to come in under the terms of the act.

Mr. RAINS. Of course, a glance at it, and reading of the bill, indicates to me you are adding a restriction instead of broadening the base. I think you are trying to broaden the base.

Mr. MULTER. We are trying to broaden the base and not limit it. Mr. SEELY-BROWN is quite right the testimony before the subcommittee indicates the financial assistance definition is working well. None of the procurement agencies, all of whom appeared before the committee, could indicate why they could not work satisfactorily with that definition, but they were just reluctant to try it. We think what they should do is try the financial assistance definition for procurement.

If it does not work out, the Administrator has the right to change it overnight. At least they ought to give it a trial.

The next change suggested in the bill is a purely technical one at the bottom of page 2. There is no objection to the language change. It refers to the Federal Executive Pay Act. There is no increase of pay called for, but it merely makes the same language applicable to this agency as to all the other agencies.

We simply put in the same language that applies to other Federal agencies. On the next page, page 3, we increase the authorization to $70 million, instead of as it presently appears in the act.

Mr. Barnes has indicated that if in the judgment of this committee, that should be the amount, he will go along with it, although he has recommended a smaller sum. We believe this is the more realistic sum to be asked for, having in mind he still must go before the Appropriations Committee and justify his request for appropriations.

An authorization like this making money available for loans is actually not spending of money. Nevertheless, we follow the language of the various statutes that apply to almost all the other lending agencies, of requiring the agency to come in before the Appropriations Committee and justify their request for the amount needed for the new fiscal year.

Twice now, the Small Business Administrator has been compelled to come in and ask for more money because his original request and our authorization was not enough.

Mr. BROWN. What is the maximum loan now?

Mr. MULTER. The maximum loan now is $250,000, and in our proposed bill we do not change that.

Mr. BROWN. What about $500,000? Do you think that would be better?

Mr. MULTER. I think you will find, sir, in this economy-minded Congress, and I am not saying that to find fault—I think we must be economy-minded—I voted for some cuts, as many of these Members did, and I voted against others, but in this economy-minded Congress, I don't believe you can convince most of the Members that a $500,000 loan is a loan for a small-business man.

In our hearings, before this Banking and Currency Committee I asked Mr. Burger, who represents one of the largest small-business men's associations in the country, one of the most effective ones, if he knew of any cases of a small business concern who sought a loan of more than $250,000 and he said he knew of no such instance.

If the time comes when small business does need a loan of more than $250,000 from this agency, and it will be able to make out a case I think the Small Business Administration will call it to our attention. At no time, in our hearings either in the field or in Washington, have we had anybody approach us and say the $250,000 maximum loan from the Small Business Administration is too little. Even with the limitation of $250,000 from the Small Business Administration they can get a much larger loan by getting a bank to participate. They can get as much as $500,000 if the bank takes half and the Small Business Administration takes half. As a matter of fact, the bank can lend anything up to 90 percent with the agency making the other 10 percent of the participating loan, as long as the agency's limitation does not exceed the $250,000.

Mr. BROWN. I notice Mr. PATMAN is in favor of taking off the limitation altogether. What do you think about that?

Mr. MULTER. Our committee does not agree with him. I am now talking about the subcommittee—and I think most of the members of the full Small Business Committee would not go along with that thinking at this time. If at some future time a case can be made out for it, we would be the first to recommend it, but as it stands today, we say no. If you take the limitation off this is no longer a Small Business Administration bill. That is a principle that the Banking and Currency Committee will have to determine.

If you want to do that, let's take the word "small" out and call it a business administration bill. But I don't think we will agree to that. I think the principle we are agreed on is that we must give this special assistance to small business. Taking the limit off will not do that job. Bear in mind you can get a $5 million loan under this very act for small business, if you will get 20 small business concerns together, each one of whom will be entitled to $250,000, and if they qualify, they can get as much as $5 million.

That is helping them get into a very strong competitive position with big business.

Mr. RAINS. Talking about the bank participation, the trouble is, they won't have it on too short a term, and it is my observation they will not participate in too small amounts, or any time you find one that will participate above 25 percent, you will find it a rarity. Isn't that about true?

Mr. MULTER. I think that is right, Mr. RAINS.

Mr. RAINS. I don't know what you said before, but I would like a couple of questions and maybe you could straighten me out on them. In the first place, I can't see the necessity of making this a permanent organization. I can't see the wisdom of that. Would you mind discussing that?

Mr. MULTER. Yes. When we first brought this agency into being, it was the feeling we should do this on a temporary basis and see how it worked out. I think the experience has been good. While the agency got off to a slow start, I think they are now making progress and doing a better job. As they get more experience with the functions assigned to them, they continue to improve their service. There is still room for much improvement, but I think the time has come when we must decide either to make this a permanent agency, or abandon it.

Mr. RAINS. You take these agencies in the field who represent the Small Business Administration. Under your bill would they be blanketed into civil service, or are they already under it?

Mr. MULTER. They are already under civil service.

Mr. RAINS. Who in this agency is not under civil service?

Mr. MULTER. The Administrator, his deputies, and I believe his counsel.

I think everyone else is civil service. I am not sure, sir, whether the regional directors are exempt or not, but I can get that information for you and supply it to you.

Mr. RAINS. I would like to have it.

Mr. MULTER. I have been told that while the regional directors are in the classification of exempt positions, they nevertheless must qualify under civil-service rules.

Now, may I continue for a moment in answer to your question about why this should be a permanent agency?

Mr. RAINS. Yes.

Mr. MULTER. If this agency is to continue to do a job for small business in procurement, it must have the status of a permanent agency in order to be able to get the attention and the treatment it deserves and should be able to get from other permanent Government agencies.

In both the procurement field and in the financial assistance field, if we did not make this a permanent agency, we will never be able to build up a corps of employees who will be able to render the kind of service we demand from that agency. It must have permanency in order to keep good men for a fair length of time.

As it is now, men come to them, particularly the financial officers, come to them on a temporary basis. The agency loses them almost as fast as it can train them. If we really want this agency to do a good job, we must be able to say to the men they recruit, that this is a permanent agency where you can make a career.

Mrs. GRIFFITHS. Mr. Chairman, may I ask a question?

The CHAIRMAN. Mrs. GRIFFITHS.

Mrs. GRIFFITHS. May I ask you, Mr. MULTER, have you done any checking in the Small

Business Administration on their role in procurement?

Mr. MULTER. Yes; we do that constantly.

Mrs. GRIFFITHS. Just exactly what has been their experience?

Mr. MULTER. In some areas their experience has been good. For instance, in the Jacksonville Naval Air Base, their experience there is good because the commanding officer, the military officer, is in tune with our thinking, in tune to Congressional thinking in helping the small-business man. He goes out of his way to do a good job. He has a small-business specialist on his staff who thinks the way he does and believes that small business has a real place to fill in Government procurement. There the Small Business Administration gets the utmost cooperation from everybody in that procurement office.

Mrs. GRIFFITHS. But it is because of an individual, it is not because of any method of the armed services, generally, nor is it because the Small Business Administration is doing anything.

Mr. MULTER. In any number of other procurement offices it is bad. Philadelphia and New York are typical of the resentment which procurement has against small business. They go out of their way to disqualify small business from participating in procurement.

There we find the Small Business Administration is doing a job against opposition, but they go in there and fight with the procurement officer. Many times they have to go so far as to issue a certificate of competency to a small-business concern that is obviously qualified, but the procurement officer does not want it to get the business. He disqualifies the concern. It goes to the Small Business Administration, and they make a complete check and issue to him a certificate of competency, which under the law—which will continue if we enact any of the present bills, as we all agree on this—the Small Business Administration issues a certificate of competency which is binding on the procurement offices.

Mrs. GRIFFITHS. You mean the procurement officer can send in his own inspection people to say this business cannot be handled under this plan. But they have to accept the Small Business Administration certificate.

Mr. MULTER. Yes.

Mr. SEELY-BROWN. Mr. MULTER mentioned the name of the Naval Air Station in Jacksonville—is it not also true that certain agencies of the Government, such as Atomic Energy Commission and General Services Administration in particular, and other Government agencies as well have done a very good job in the field of procurement help to small business?

I think it is also true, as the testimony indicated, that a special task force has been set up to see if it could not be possible to come up with a program which would meet the desire that all of us have to help small business participate to an even greater degree in Government procurement. There was filed with our subcommittee a preliminary report, which was encouraging certainly to the members of the subcommittee, who read the report carefully and listened to the testimony.

So I agree with you, we have a problem. You put your finger on the problem, but I think that proper steps have been set up to help resolve that problem and the Small Business Administration, and the Administration with the help of the committee are working together on a task force program which I think will help answer to a very large degree the question you raise, and I think the testimony——

Mr. MULTER. Mr. SEELY-BROWN is absolutely right. As he points out, General Services Administration and the Atomic Energy Commission are doing a good job. As a matter of fact, they lead the way and the Small Business Administration has learned from them how they can go to other procurement agencies and do a better job for small business.

Mr. ADDONIZIO. To what extent is small business participating?

Mr. MULTER. Today about 17 percent of all procurement is going to small business and everybody agrees that is not enough.

Mr. ADDONIZIO. Is it your contention if this is made a permanent agency they would participate to a greater extent?

Mr. MULTER. I believe the Small Business Administration, if made a permanent agency, can do an even better job than they are doing, for the small-business man. For the first half of 1957, the percentage was 16.4 percent that went to small business. Last year it was 19.6. So it has fallen off.

We find as each 2-year period comes to a close, there is a falling off. Which is another reason we feel it should be a permanent agency. The fellows in procurement feel it is going to fold up and proceed to ignore them. If this were a permanent agency, and they knew it was going to be sitting on them all the time, we could get the percentage up and keep it up.

Mr. RAINS. I don't want to be a prophet of doom, and I don't want to prognosticate, but don't you think if conditions continue as they are, interestwise, tight moneywise, hurts to small business, that 2 years from now what we are talking about now of this $700 million will be—oh, just chips in the bucket, and that instead of a small-business deal such as you are talking about making permanent, that it may become absolutely essential for us to go back to—we won't call it RFC, but it made a success in its day, and therefore it might be wise to continue this on a temporary basis—I don't say the day will come, but it will come if we continue to go down the road we are on, and not fasten on ourselves a permanent agency which as a small-business operation shall be too small to do the job that ought to be done. Don't you think that the job that is to be done could be greater than even contemplated in this particular bill?

Mr. MULTER. If you are right, and none of us can prognosticate that far ahead, that tight money will continue for 2 years, even if we set this up as a permanent agency, you can be sure this agency will be back before this Banking and Currency Committee 2 years from now or sooner and ask for an additional authorization, at which time you can review their activities and decide what they are doing and what they should do.

When we set it up as a permanent agency that does not mean it will continue forever and a day. Subsequent Congresses can always abolish it or put a time limit on its existence.

Mr. RAINS. I feel it takes it out from under the Congress, though, and my feeling is this is merely an experiment. It is not a deal big enough to meet the need. Everybody agrees with that. I feel if we establish it in a degree of permanency we have put the stamp of approval on an agency much too small to do the job that Congress says has to be done.

Mr. MULTER. This has been an experimental program. I think it has proved itself. The time has come now when we must decide what to do with this agency. We believe we should take the position to continue this agency as a permanent one. Whether or not it is going to be big enough only time can tell.

If money eases, and I can foresee that it may ease, if not this year, next year, there won't be as great a demand on the agency for money as there is today. If the tight-money policy is going to continue and the demand continues to increase as it has in the past 6 months, certainly in the next 2 years they will be back asking for an additional appropriation and in a substantially larger sum.

Mr. SEELY-BROWN. Will Mr. RAINS yield?

Mr. RAINS. Yes.

Mr. SEELY-BROWN. As I understand your comments a moment ago, you indicated a very proper concern, one which I share, that the banks were not participating in the small-business loans to the degree we would like to see. I think one of the reasons they have not participated was because of the fact that the agency was not a permanent agency. In other words, they recognize any participating contract they sign would obviously be good because it was backed by the United States Government, but the testimony certainly indicated to our committee, that by making this agency permanent, giving it a permanent status, even though we may change the rules under which it operates in each Congress, as we always can do, that permanency might encourage the banks to participate to an even greater degree and I believe Mr. MULTER will agree that was the testimony presented before our committee, and was another reason it would be helpful to make it a permanent agency.

Mr. MULTER. I do agree. I expressed during the course of the public hearings a suggestion that one day this agency will attain Cabinet status. I think it should. I think if the economists of the country are right that the backbone of our economy, of our free-enterprise system, is the small-business man, we must have a permanent agency of this kind to watch out for them. Big business is taken care of by Commerce. Labor is taken care of by the Labor Department. At least that was the theory in setting up those departments. There was a time when we thought the Commerce Department would take care of small business. It has never done so. It had a small-business office, but it was merely an office with a man in charge. I do not know of anything it ever did for small business.

I think this agency has proved itself. I think we can say this agency is the spokesman in Government for small business.

The CHAIRMAN. Do you think Congress would have less day-by-day control over it as a permanent agency, than it has if it is solely a temporary agency?

Mr. MULTER. I think there would be more control over this agency by Congress than most agencies. Most agencies find themselves under the jurisdiction of one committee. The Reorganization Act of 1946 charges the Banking and Currency Committee to examine and continually review the activities of all the agencies about which it may legislate. The Small Business Administration is one such agency. In addition, we have the House Select Committee on Small Business. I think that committee has proved itself and one of these days will be made a permanent committee. But whether as a select committee or a permanent committee, it will continue to do the job during the year, in the field and in Washington, of making sure the agency does the work and the job that Congress intends it should do.

The CHAIRMAN. Do you have any statistics on the proportion of the national income that comes from small business—and what percentage is that compared to the contracts?

Mr. MULTER. I don't think there are any complete statistics on small business. The Commerce Department, through its Census Bureau, did gather statistics on the manufacturing corporations. I stress the word "corporations." I think Commerce found there were some 245,000 manufacturing corporations, which accounted for between 40 and 50 percent of the gross national product.

I think they found that 92 percent of those manufacturing corporations employed less than 100 people. I am relying on my memory; my statistics may be slightly wrong, but I believe they are approximately correct.

We are told that there are 4 million small-business concerns of every type throughout the country. I think that our economists are right when they say that small business is the backbone of our free-enterprise economy.

Mr. KILBURN. Of course, there are an awful lot of those that would not have anything to do with procurement, like the grocery store.

Mr. MULTER. You are quite right. Four million includes the retail merchant who does not deal with the Government. It includes the small manufacturing company which does not deal with Government and does not want to deal with Government. You know, you must have a pretty strong financial position in order to deal with Government, the way they take their time inspecting and approving, and then in paying when they get ready. That was one of the problems we had to sit on in these agencies, to see that they paid promptly, so the small-business man could operate.

Mr. KILBURN. They would have to have the line of goods they want.

Mr. MULTER. That is right.

Mr. KILBURN. A gas station would not become part of procurement or a grocery store.

Mr. MULTER. There you get into the question of whether you are going to let the local Government offices buy gasoline locally in small quantities, or in tank-car lots at wholesale. There is always that problem, whether the Government should buy in large quantities at wholesale and warehouse and distribute, or buy from the small-business man at retail. You can't have it both ways.

Mr. KILBURN. I imagine the taxpayer would want us to buy as cheaply as possible.

The CHAIRMAN. You would give us the policy board which consists of the administrator, a typical small-business man, and a typical small-business banker, and it provides no qualifications, with no experience for either one of them.

The only qualification they seem to have is that they are typically small, but I don't know just what a typically small banker is, or a typically small-business man is. Does it mean a small-business man without ambition, who always wants to remain typically small? If that is so, I don't think you have a very good Board. I don't see any argument for that. What is the argument for that?

Mr. RAINS. Could I add one word to what the chairman said, so you will have a full one before you. I can't see how you can get away from the argument we should not have w. o. c.'s in Government, instead of Government employees.

The CHAIRMAN. They are day-to-day employees. They have no permanent association with the Government and no responsibility, and I would like to have some argument in favor of it.

Mr. MULTER. Let me answer you, Mr. Chairman, and the other gentlemen who have some doubts about this, by saying first, for a long time, the Small Business Committee has felt that the Loan Policy Board, as set up by the statute, has no place in this law. As a matter of fact, we reported out from this Banking and Currency Committee in accordance with the recommendation of the Small Business Committee one bill which eliminated the Loan Policy Board. None of us have any objection, and as a matter of fact, there is a specific requirement in the statute and this bill, that there must be consultation between the Small Business Administrator, and other Government agencies, having in mind particularly the Secretary of Commerce and the Secretary of the Treasury.

But consultation is one thing and giving them control of making policy is another, and we feel that this agency cannot be a truly independent agency and cannot truly do the job for small business if the Secretary of the Treasury or the Secretary of Commerce or their designees are going to be in control of the Loan Policy Board.

So what we are mainly concerned with is eliminating the Secretary of the Treasury and the Secretary of Commerce as the two controlling members of the Loan Policy Board.

Now, if the Administrator feels he should have a Board—he does have one now, a review board, which reviews loan applications. The Loan Policy Board is not charged with that and does not do that. It makes the overall policy. But if the Loan Policy Board is controlled by two Cabinet officers, then obviously the Administrator is subservient to them. The best proof the Loan Policy Board does not serve a good purpose, in my opinion, is demonstrated by the fact that at every meeting of the Loan Policy Board the resolution has always been presented as to policy, and those are the only resolutions they consider, by the Administrator, and in every instance it has been unanimously adopted.

If there is such unanimity of thinking on the Board, and if the Administrator's view always prevails, then he does not need the Secretary of the Treasury or the Secretary of Commerce to do more than to advise with him.

On the other hand, if there is unanimity because he bows to their will, then the will of the committee and the Congress is not being fulfilled.

The CHAIRMAN. That is not a very strong argument for the reason you want to dispose of the present Board, for which you substitute a small-business man and a small banker.

Mr. MULTER. I am coming to that.

The Administrator should be charged with making the policy and administering it. But there is division among our committee and we came up with this as the alternative of having two small-business men sitting on the Board with him to make policy.

Mr. BROWN. They would be appointed by the Administrator?

Mr. MULTER. They would be appointed by the President, by and with the advice and consent of the Senate.

Let me read to you the language as it appears at the top of page 4 of the proposed bill. "The Policy Board shall establish general policies in the financial assistance, procurement, disposal, and general assistance to small-business programs of the Administration."

In other words, we are calling for a Policy Board which will make all policy for the agency. It will have nothing to do with administration. It will have nothing to do with personnel. It will make all policy as to procurement and financial assistance. We believe with a Policy Board of that kind, we will not have this difficulty, that we are now having with the definition.

Let me continue reading from the proposed bill:

"The members of the Policy Board representative of small banks and small-business concerns shall be appointed from civilian life by the President by and with the advice and consent of the Senate, and they shall be persons of outstanding qualifications in their respective fields of operation known to be familiar and sympathetic with the needs and problems of small business. The members of the Policy Board other than the Administrator shall be actively engaged as full-time operating officials of (1) small bank and (2) a small-business concern which shall be small business as defined in section 102 of this act."

Now, with reference to the possibility there will be w. o. c.'s or others working without compensation I think this committee knows I am opposed to the w. o. c.'s working in Government, except in times of war or emergency.

These men will not be w. o. c.'s. These men, as provided in the previous sentence on page 3, are paid as follows:

"Members of the Policy Board other than the Administrator shall be paid a per diem allowance of $100 for each day spent away from their home or regular place of business for the purpose of attendance at meetings of the Policy Board and the necessary travel; and while so engaged, they may be paid actual travel expenses and not to exceed $25 per diem in lieu of subsistence and other expenses. The maximum time spent for such attendance is not to exceed 50 days in any one calendar year."

There is also a provision: "The Policy Board shall meet at least monthly and at such other times as the Board may determine or on the call of the Administrator to determine administrative programs and policies relating to loans, procurement, disposal and general assistance to small business."

It was the feeling of the committee you could not get a small banker or small-business man of the type you wanted who would give up his banking or business connection and come to Washington full time and the only way you could get him was to compensate him fairly for his time and get him to come down here on a part-time basis.

I appreciate the force of the argument that men who make policy should be full-time employees. If we could get, instead of these 2 small-business men working parttime, if we could get 2 men, say, called Deputy Administrators, appointed to work fulltime, not as a loan policy board, but as a policy board, I think we could accomplish what we are looking for, and eliminate the Secretary of the Treasury and Secretary of Commerce, except for consultation. I am afraid we can't get that. The next best thing, when it comes to the job of making the policy in accordance with the intent of the Congress, let us have two men who are part-time employees but who are on the payroll and who will not have any exemptions on account of conflict of interest. There is nothing in here to give them any exemption on account of conflict of interest. They will have to toe the mark and operate without that exemption.

The CHAIRMAN. The success or failure of the organization depends upon the policies.

Mr. MULTER. I think it does.

The CHAIRMAN. Favorable policies would be very essential for the successful operation of it. And these men who are part-time employees have entire control over that.

Mr. MULTER. I realize the force of the argument that these two part-time employees can outvote the Administrator. There is much to that argument. I can't——

Mr. RAINS. Mr. MULTER, let me ask you one other question. First, I want to compliment you for the hard work and good job you have done on this bill, and with 1 or 2 exceptions it seems to me to be a real good bill. I know you gentlemen have worked very hard and the bill shows it. But it is always the setup in Government that the Congress must hold some Administrator responsible for the work of the Agency. That is true in housing and everything we have.

The appointment of the two men you are talking about would come about by the President, as I understand it.

Mr. MULTER. That is right.

Mr. RAINS. We all know, as a matter of course, the head of the Agency would recommend to the President, whoever the head of the Agency wanted appointed in this policy business, so the result would be these two men, however they came in, would be men whose thinking was along the lines of the thinking of the Administrator. He would not be that dumb, and pick out somebody at variance. So why don't we wipe out the policy board completely and totally and just leave it up to the Administrator.

Mr. MULTER. I hope that my colleague on the Small Business Subcommittee will not think I am underselling this part of the bill, when I tell you that was precisely my suggestion to them. As a matter of fact, when I could not get them to go along with that, I suggested we have a bipartisan board or commission to run the Agency.

My thinking was along the line of your suggestion but we now came along with this, as our best thinking for a compromise. While yours is the way I would have liked to see it work, we agreed on this instead as to the views of the committee I tried to make the best argument I could in accordance with that decision.

Mr. WIDNALL. Would it not have been best to have set up an advisory council and retain the Secretary of the Treasury and Secretary of Commerce on the Loans Advisory Council?

Mr. MULTER. We have now in accordance with the existing language, advisory boards. There is a national advisory board and in each region we have an advisory board. We also continue the language of the existing statute requiring that those boards be really representative, truly representative of small business.

We found on the national level the advisory board, despite the language of the statute, was made up of 20 men, 11 of whom were big-business men. That was a condition contrary to the intent of Congress, and the explicit language of the statute.

We strengthened the language in the statute so as to require these advisory boards and committees, when appointed, to be truly representative of small business. At the same time we have a provision permitting the Administrator to consult with whomever he pleases in or out of Government, so he can get the advice of big-business men who are sympathetic to small business and want to help them.

Mr. WIDNALL. Of course, they would have that power to consult with anybody whether you wrote that in the law or not.

Mr. MULTER. We found it necessary to write it into the bill because the General Accounting Office raised the question he had no right to do this—he had no right to consult with outside persons, or with Government agencies, unless the statute authorized them to do it. They raised the question that it was a technical violation of the law, if he consults with people other than as set out in the statute. So we wrote it in.

Mr. WIDNALL. I don't quarrel with that, but I think if you set up a national advisory board or national advisory council with the Secretary of Treasury and Secretary of Commerce and the two representatives of small business and left the final decisions on policy in the hands of the Administrator, you would have a better set-up than you have today and it would help meet some of the objections raised by you.

Mr. MULTER. I would have no objection to it being done that way, Mr. WIDNALL.

Mr. WIDNALL. I think that might be the type of compromise you would get through the Congress, too.

Mr. MULTER. I agree with our distinguished chairman, Mr. SPENCE, who has so frequently said that good legislation is always the result of compromise. No one of us is vested with all the wisdom of what makes a good bill, I think our Small Business Committee proceeds on that basis, trying to compromise on the best language that will express most nearly the intent that we seek and the purpose that is sought to be accomplished.

Mr. WIDNALL. I have one other question. In connection with procurement for small business, is it not true that thousands of small businesses have the know-how or ability to produce, but they cannot afford the engineering personnel in order to put them in a competitive position with big business?

Mr. MULTER. There is a lot to that. We find it repeatedly.

Mr. WIDNALL. And one of the reasons for shortage of engineers and the fact that big corporations are bidding as high as they can for engineering personnel is the tragic duplication of engineering work in preparation for Government bids. Where you are going out to procure an item and it is all of the same item, all of the engineering has to be done all over again by every single company that bids on that item. The Government purchased that engineering in the first place. It seems to me that the specifications purchased in the first item of procurement can be made available the second time, so that others would not be required to provide for new engineering in their bids.

Mr. MULTER. Typical of what you have in mind is a complaint that came to my desk only yesterday. This concern spent $4,000 in engineering and drafting expense in order to be able to make a bid in accordance with specifications that had been issued and they are now the second low bidder. The first low bidder has been disqualified because it has no plant and sought to get the contract in order to sell it to someone else.

The second low bidder, apparently now qualified, is now told by the procurement agency we are not going to give you this contract. We are going to give it to the third lowest bidder because the specifications were written for the third lowest bidder. They said, "Why do you ask us to bid? It cost us $4,000 to prepare our bid. If you intend it for some particular company, why don't you negotiate with that company and don't have us come in and waste all this money which represents mainly engineering time and money."

Mr. WIDNALL. Isn't it true in these re-bids where you are using the same specifications as the original bid, you have scores of engineers all over the country working on the same problem and coming up with the same answer, with a tragic waste of engineering services and tragic increase in cost, when it comes to the final bid?

Mr. MULTER. There is no doubt you are right.

Mr. WIDNALL. I think we ought to try to work something out to make available to small business the engineering background after the first bid.

Mr. MULTER. We continue in this bill the language now in the act, authorizing the Small Business Administration to give, wherever possible, engineering, technical, financial, and accounting advice to the small-business man who comes to them for it.

To be sure, we don't want it to go out and push itself on small business and tell them how to run their business, but where the small business comes to the SBA office, and asks for help, their setup permits them to give it, though in many of the local offices, they, too, have difficulty getting men who can render that type of service.

But they are doing the best they can with what they have.

Mr. WIDNALL. I have just one other question, Mr. MULTER. You have a suggestion in here that the maximum rate of interest for the Small Business Administration portion of participation in direct business loans shall be no more than 5 percent or the prevailing rate if lower than 5 percent.

Mr. MULTER. Yes.

Mr. WIDNALL. That actually means the Small Business Administration would not be in competition with the banking interests, would it?

Mr. MULTER. That would not put them in competition with private enterprise or banking because we continue the language in the existing statute that the loan applicant must be turned down first and there must be no private financing available for him on reasonable terms before the Small Business Administration can take the application. In practice the Small Business Administration requires he be turned down not only by his regular banking facilities, but by at least one other before they will take his application.

Mr. WIDNALL. And this applies to participating loans, too?

Mr. MULTER. Yes. In practice what the Small Business Administration does is this. When the applicant first comes in for a loan, SBA goes over his statement and puts it in such shape that he has a statement a bank would be willing to look over and consider. Then they ask him, "Have you been to your own bank?" And if he says, "Yes, and they turned me down," they call his bank and find out why they turned him down.

"Is he a bad credit risk, or can't you make the accommodation for any one of a number of reasons?" They try to sell the bank. When the bank says, "No, we won't make the loan," SBA tries to sell the bank on a participating loan. If the bank still says "No" on participation, they send the man to another bank in the community and if that bank turns him down, they follow the same procedure, and say, "Why are you turning him down?"

The bank may turn up something confidential which indicates he is a bad risk. They try to sell the bank on making the loan first, or if not a loan, taking a participating interest in it. When they find the bank will not take the loan in full or in part, then they process the application as a direct loan.

So there can be no competition ratewise. Even today there are participating loans where the bank is charging 7 percent. They are charging 6 percent. There is no difficulty in that.

Mr. WIDNALL. Mr. MULTER, I think you and your committee has come up with a good recommendation and made an honest, sincere effort to assist small business and small-business men and I compliment you on it.

Mr. MULTER. Thank you, Mr. WIDNALL. May I make 1 or 2 more comments on changes in the bill. If there are other questions, I will be glad to answer them either now or as I go along. The suggestion has been made in the course of the public hearings that possibly this agency should charge a fee for the filing of an application as many other agencies do. Our committee has not considered that, but I think this committee, on whatever bill you report, should suggest to the agency that they explore the possibility of charging a fee in connection with the filing of an application and make recommendations as to what that charge should be.

I think it should be a charge which would be reasonable and would cover at least the expense of processing and closing loans.

I realize in the smaller loan, they probably will never be able to charge enough to cover it, because as you know, a loan of $1,000 or $10,000 will cost as much to close as a $100,000 or $150,000 loan. We cannot expect the small-loan applicant to pay the full cost. I do hope SBA will come up with a recommendation about what fee, if any, should be charged for filing and processing.

Mr. SEELY-BROWN. That relates particularly to business loans?

Mr. MULTER. Yes; not to the disaster loans. That is definitely a relief measure. That is why we make it 3-percent interest. But on business loans, I think they should come up with a recommendation.

One other matter, that concerns itself with the question of whether this should be a permanent agency or not. Our committee did not consider, but this committee might consider, whether or not it wants to put a limitation on the term of office of the members of the board, if you have an independent board. There is nothing in the bill on that now.

I believe the President would have a right to remove any administrator who is not doing the job he expects him to do.

At the same time, you would accomplish some of the things you have in mind about continuing this as a temporary agency, if you put in the bill a term of years for the service of the Administrator. In other words, it may be a 2- or 4-year term, so that he, too, knows he must make good before he is reappointed.

The CHAIRMAN. Is he appointed without tenure now?

Mr. MULTER. He is appointed without tenure now, because as it is now, the act, itself, expires at a definite date and his term of office runs out at that time. If we take out the expiration date, we may want to put in a provision that he shall have a term of office for a fixed number of years.

I have tried to cover all of the changes that might be controversial. I think I have done so, with the exception of the provision for pooling loans. There, too, we have tried to liberalize the provisions so as to make sure the Administrator has the right to make the kind of loans that we intended he should make.

For instance, when he made the pool loan for the production of starch, there was some question raised as to whether or not he had the right to do that. He made the loan, nevertheless.

He made a loan for—a pool loan for Boston Fisheries. There was some question raised about that. I don't think the question was properly raised, but the question was raised whether or not he had the right to make the loan for that particular industry.

He has had inquiries about making a pool loan for the newsprint industry.

He has made some very valuable suggestions to the industry in connection therewith, but they have not come forward with a plan or an application. He has considered an application, or rather an inquiry, with reference to making a pool loan for the purchase and resale of groceries and foodstuffs.

Mr. KILBURN. Mr. MULTER——

Mr. MULTER. Yes.

Mr. KILBURN. I don't like to interrupt you here, but there is one point: On page 10 of your bill, down at line 18, it says, "All loans made shall in the judgment of the Administrator offer reasonable assurance of repayment." Isn't that a change from your present language?

Mr. MULTER. Yes.

Mr. KILBURN. Will you explain why there is that change?

Mr. MULTER. May I come back to that in just a minute and finish the thought on the pooling situation.

We have put into the bill some new language with reference to the pooling provision, which we think clarifies the authority of the Administrator to make such loans. I think it goes as far as it possibly can to meet the questions raised by Mr. PATMAN with reference to the cement industry.

If enough people are going to get together who have the know-how or can otherwise qualify, whether it be the cement industry or any other industry, they will qualify under the language we have written in the proposed bill at page 9 and which has been approved by the Administrator.

I want to throw out this thought, before I get to Mr. KILBURN's question, with reference to the pooling loans. I have the utmost respect for my colleagues in the legal profession, but if I as 1 or 2 lawyers were to get together with 4 or 5 businessmen and we had 2 lawyers and 4 or 5 businessmen who wanted to go into some new industry, I don't think that the Congress intended we lawyers were to qualify as small-business men in a business venture to get this kind of a loan.

If there is disagreement with that on the part of this committee, I think it ought to say so. But the Administrator, as he is interpreting it now, I think properly, says, where you are getting a group together for a pool loan, they should all be businessmen who know something about and have some experience in the particular and related lines of endeavor in which they intend to engage in this pooling operation.

If you intend to open the door wide and let anybody come in under this, as long as he can qualify with security, then I think we ought to say so in the pooling provision. The language as we continue it in the statute would not, I don't think, permit that much broader interpretation.

To come back to Mr. KILBURN's question on page 10 of the mimeographed sheet, we do very deliberately propose a change there, by changing subdivision (7) so it will read, "All loans made shall in the judgment of the Administrator offer reasonable assurance of repayment."

The language we have dropped are the words "sound value or." In other words, the statute presently provides that the loan must be of sound value or—and I emphasize "or" in the alternative—offer reasonable assurance of repayment.

The Administrator very frankly told us, when he testified publicly—I am sorry I dropped out some words. Let me give it to you again. The statute now reads, "All loans made shall be of such sound value or so secured as reasonably to assure repayment."

The proposed bill drops out the words "such sound value or so secured."

The CHAIRMAN. That first definition was the one you took from the Reconstruction Finance Corporation?

Mr. MULTER. That is correct. And the Reconstruction Finance Board, and when it had an administrator, he, and then again when it had a board again, it always interpreted that to mean just what it said, that "or" was in the alternative, not in the conjunctive. Or did not mean "and," but meant "or." But Mr. Barnes has told us in the public hearings he interpreted "or" to mean not "or," but "and," and the loan must be——

Mr. KILBURN. How can he interpret "or" to mean "and"?

Mr. MULTER. He did and that is his testimony, and that is why some loans are being turned down.

Mr. KILBURN. Along that line, does this new language mean you cannot take security, if the man has got security?

Mr. MULTER. Oh, no. Where the security is there, he should take the security. I think he would be derelict in his duty in not taking security where the security is available. The language is new to this bill, but not new to the law. This is the precise language in the Export-Import Bank Act which they have always operated under, and if it has been all right in the million dollar loans and they have worked well under it, and the testimony of Mr. Waugh, as President of the Export-Import Bank, was they were doing a good job there for big business as well as small business, because while many of the loans there are in large amount, many of the purchases made out of the large loans were made from small businesses.

They gave us some instances where some purchases were as low as $100 each. There were thousands of purchases out of a million dollar loan. If that language is good there, I am sure it is not too restrictive and much better for this Administrator to use in his operation.

Mr. TALLE. Mr. Chairman——

The CHAIRMAN. Mr. TALLE.

Mr. TALLE. In that connection, if such a change is made, lawyers will look at the new act, and they will find that the language which was in the RFC Act and which is in the Small Business Act now, has been changed so as to take away the words which, in the law, require security and sound value.

I am sure some sharp lawyer is going to say, these are character loans, now, and collateral is no longer required.

Mr. MULTER. If a lawyer does come up with that argument, the administrator can say to him he is wrong. Look at what was testified to before subcommittee No. 2, and look at the testimony before the House Banking and Currency Committee. He will say to the lawyer, you have no right to determine that. Bear in mind it is the administrator's judgment which will make the decision whether or not the loan is to be made. Our committee has been very careful in telling every complainant we are not going to sit in judgment on the judgment of the administrator.

We are going to see whether he fairly interprets the intent of Congress but we are not going to take his place and determine whether a loan is good, bad or indifferent. We are not going to replace his judgment with our judgment. We are not the lending officer.

Mr. TALLE. Don't you think the lawyer is going to ask the question, "Why did Congress make that change?" He is going to raise that question, I am sure.

Mr. MULTER. And let me give to you the answer that you can give to him.

If you insist that it must be of sound value, and so secured as to offer reasonable assurance of repayment——

The CHAIRMAN. It was not "and." It was "or."

Mr. MULTER. That is right. If SBA interpreted is as "or," we need nothing more. We would not have to change the statute. But since SBA is interpreting it as "and," we must put in the law what we want him to do.

Mr. KILBURN. Why don't you put language in there and say, "or" is "or."

Mr. MULTER. I think that would make us a little bit ridiculous, don't you think?

Mr. KILBURN. Don't you think he is being a little ridiculous?

Mr. MULTER. Yes, but he is the Administrator. Let us put it in there in such a way that he must interpret it our way, without making ourselves ridiculous.

Mr. BROWN. Why can't we handle that in the report and keep the definition like it was in RFC?

Mr. MULTER. That will probably serve the purpose.

I just wanted to make this brief comment to Mr. TALLE's question and then I will leave you to the next witness, sir.

There are many instances where the sound value of the loan is not sufficient to warrant SBA making a loan in and of itself. But if SBA takes the guaranty of someone else who is just as financially responsible, who would on his own right be entitled to come in and get a loan, and who will guarantee the loan which does not have sound value, SBA then has reasonable assurance of repayment.

I wonder if I make myself clear. In other words, if I can get somebody to guarantee my loan, even though I, myself, cannot give him ample security, and the guaranty does give ample security, he should make the loan. As it is today, he can look at my collateral and say it is insufficient and I don't care whether you bring in 50 guarantors, your loan is not of sound value and he will not make the loan. Certainly we did not intend that.

That is the way it is being interpreted and we did not intend that.

Thank you for your patience.

The CHAIRMAN. I think a little reduction in taxation might help the small-business man.

Mr. MULTER. I am sorry we cannot touch on that. But it is one of the sore points that needs attention.

The CHAIRMAN. We did not want to introduce that in the course of the evidence here.

Mr. MULTER. No, sir. I am sure the Ways and Means Committee would object, if we did.

SENATE

TUESDAY, MAY 28, 1957

(Legislative day of Monday, May 27, 1957)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Eternal Father, strong to save, in days of old Thy prophets of righteousness summoned Thy fearful and often faithless children to the altar of the Most High for cleansing and strength. In these days, when ancient foundations are being shaken and are crumbling, we would seek our refuge and salvation where they found it, at the altar of the living God. Thy word of old is sounding in our ears today: "If My people who are called by My name shall seek My face and pray and turn from their wicked ways, then will I hear and forgive their sins and heal their land."

In the fight to make and keep men free, open our eyes, that we may see not only the encircling hosts of evil, but also on the hills about us the chariots of God's truth and the horsemen thereof. We ask it in the name of that One by whose invincible might we are made more than conquerors. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Journal of the proceedings of Monday, May 27, 1957, was approved, and its reading was dispensed with.

MESSAGE FROM THE HOUSE— ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 93. An act for the relief of Dominic Steinhauser (Hiroshi Tsuruda);

S. 687. An act for the relief of Stylianos Lecompies;

S. 696. An act for the relief of Aiecos Markos Karavasilis and his wife, Steliani Karavasilis;

S. 707. An act for the relief of John Leary; and

H. R. 5786. An act making appropriations for the executive office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes.

ORDER FOR ADJOURNMENT TO TOMORROW AT 10:30 A. M.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its deliberations today, it stand in adjournment until tomorrow at 10:30 a. m.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORTS OF A COMMITTEE

The following favorable reports of nominations were submitted:

By Mr. BUSH, from the Committee on Armed Services:

Malcolm A. MacIntyre, of New York, to be Under Secretary of the Air Force, vice James H. Douglas, elevated.

Mr. STENNIS. Mr. President, from the Committee on Armed Services I report favorably a group of nominations of flag and general officers in the Army, Navy, and Air Force.

In the Navy are the nominations of Rear Adm. Robert E. Dixon to be Chief of the Bureau of Aeronautics; of Rear Adm. James S. Russell for 3-star grade in connection with his assignment as deputy commander in chief and chief of staff of the Atlantic Fleet; and of Rear Adm. John H. Sides to have 3-star grade while serving as deputy to the special assistant to the Secretary of Defense for guided missiles.

Army general officer nominations include those of Maj. Gen. William S. Lawton to be a lieutenant general by virtue of his proposed assignment as Comptroller of the Army; Maj. Gen. Paul D. Harkins to be a lieutenant general in connection with his proposed assignment as commanding general, Allied Land Forces, Southeastern Europe; of Maj. Gen. Aubrey S. Newman to be a permanent major general, and of Col. James H. Forsee and Col. Robert H. McCaw to be temporary brigadier generals.

Air Force general officer nominations include those of Lt. Gen. Frank F. Everest and Lt. Gen. Thomas S. Power to have the rank of general in connection with their assignments as commander in chief of United States Air Forces in Europe and commander in chief of the Strategic Air Command; of Maj. Gen. William E. Hall to be lieutenant general in connection with his assignment of commander of the Continental Air Command and to be senior Air Force member of the Military Staff Committee of the United Nations; of Maj. Gen. Walter E. Todd to be lieutenant general in the position of chief of staff, United Nations Command, Korea; and of Maj. Gen. John K. Gerhart to be lieutenant general in the position of Deputy Chief of Staff, Plans and Programs, Headquarters, United States Air Force.

I ask that these nominations be placed on the Executive Calendar.

There being no objection, the nominations were ordered to be placed on the Executive Calendar, as follows:

Rear Adm. Robert E. Dixon, United States Navy, to be Chief of the Bureau of Aeronautics in the Department of the Navy;

Rear Adm. James S. Russell, United States Navy, for commands and other duties determined by the President, in the rank of vice admiral while so serving;

Rear. Adm. John H. Sides, United States Navy, for commands and other duties determined by the President, in the rank of vice admiral while so serving;

Maj. Gen. William Stevens Lawton and Maj. Gen. Paul Donal Harkins, United States Army, to be assigned to positions of importance and responsibility designated by the President, in the rank of lieutenant general;

Maj. Gen. Aubrey Strode Newman, Army of the United States, for appointment in the Regular Army of the United States, with the rank of major general;

Col. James Hedges Forsee, and Col. Robert Hall McCaw, United States Army, for temporary appointment as brigadiers general in the Army of the United States; and

Lt. Gen. Frank Fort Everest, and sundry other officers, to be assigned to positions of importance and responsibility designated by the President.

Mr. STENNIS. Mr. President, in addition to the flag and general officers, I report favorably the nominations of 406 Military Academy cadets for appointment in the Army; 135 Military Academy cadets for appointment in the Regular Air Force; and 217 Naval Academy midshipmen for appointment in the Air Force, as well as 969 officers for appointment in Regular Army grades not above major and 112 officers for appointment in the Regular Air Force not above the grade of captain.

These names have already appeared in the RECORD. In order to save the expense of printing on the Executive Calendar, I ask unanimous consent that they be ordered to lie on the Vice President's desk for the information of any Senator.

There being no objection, the nominations were ordered to lie on the table, as follows:

Franklin D. Bell, and sundry other persons, for appointment in the Regular Army of the United States;

Jack Emerson Adams, and sundry other cadets, United States Military Academy, for appointment in the Regular Army of the United States; and

James D. Boyle, and sundry other persons, for appointment in the Regular Air Force.

The VICE PRESIDENT. If there be no further reports of committees, the nominations on the calendar will be stated.

DEPARTMENT OF JUSTICE

The Chief Clerk read the nomination of J. Lee Rankin, of Nebraska, to be Solicitor General of the United States.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

ASSISTANT COMMISSIONER OF PATENTS

The Chief Clerk read the nomination of Maurice Augustus Crews, of Pennsylvania, to be an Assistant Commissioner of Patents.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

UNITED STATES MARSHALS

The Chief Clerk read the nomination of William B. Somers, of North Carolina, to be United States marshal for the middle district of North Carolina for a term of 4 years.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Albert W. Saegert, of Texas, to be United States marshal for the western district of Texas for a term of 4 years.

Mr. JOHNSON of Texas. Mr. President, I desire to congratulate the administration and Mr. Saegert for their joint decision that he continue in office for another 4 years as United States marshal for the western district of Texas. Mr. Saegert is a loyal Republican. For many years he has been a very close personal friend of mine. He is is an extremely able, competent, and courteous public official, having served for many years as sheriff of one of the larger counties of Texas. We are very fortunate to be able to prevail upon men of his type to serve our country in such capacities.

The VICE PRESIDENT. The question is, Will the Senate advise and consent to this nomination? Without objection, the nomination is confirmed.

POSTMASTERS

The Chief Clerk proceeded to read sundry nominations of postmasters.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the postmaster nominations be considered en bloc.

The VICE PRESIDENT. Without objection, the postmaster nominations will be considered en bloc; and, without objection, they are confirmed.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the President be immediately notified of all nominations confirmed today.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

ANNOUNCEMENT CONCERNING THE VISIT TO THE SENATE BY CHANCELLOR KONRAD ADENAUER

Mr. JOHNSON of Texas. Mr. President, I desire to call the attention of the Senate to the fact that Chancellor Konrad Adenauer will appear in the Senate Chamber at 2:30 p. m. today. I ask unanimous consent that it be in order for the Chair to declare a recess at approximately that time, and thereafter that the Senate shall reconvene at the call of the Chair.

The VICE PRESIDENT. Without objection, it is so ordered.

SENATOR THEODORE FRANCIS GREEN, OF RHODE ISLAND

Mr. MARTIN of Pennsylvania. Mr. President, I read with great interest and real pride the nice things said on yesterday concerning our distinguished colleague the senior Senator from Rhode Island [Mr. GREEN]. However, no Senator made any reference to the military service of our distinguished colleague.

I desire to call the attention of the Senate to the fact that Senator GREEN was a company commander in the Spanish-American War. Our distinguished and able colleague has always rendered full voluntary service to our country.

I have just noted an editorial entitled "I Am Proud To Be a Spanish-American War Veteran"; and in honor of our colleague, I ask unanimous consent that the editorial be printed at this point in the RECORD as a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

I AM PROUD TO BE A SPANISH WAR VETERAN

A veteran in America's first war for humanity.

A veteran of the only 100-percent volunteer army the world has ever known.

A veteran of the only war in history that has paid dividends.

A war that was not fought to a draw—we dictated the terms.

It was responsible for the building of the Panama Canal.

It was responsible for the passage of the National Defense Act.

It caused the abolition of yellow fever and kindred diseases.

It united the North and the South so that there now is no North, no South, no East, no West, but one people united under one great and glorious flag.

It furnished every commander in the World War from the Commander in Chief down.

It was the first campaign fought on foreign soil.

We did not bring the flag home—we left it where we put it and it is there yet.

We fought the war with poor equipment, poor food, antiquated guns, and black powder.

It caused the improvement in maintenance of the Army and Navy and for the formation of a standing army through training camps.

It marked the industrial reconstruction of the South.

It taught the lesson of unpreparedness that claims more lives than war.

It caused the United States of America to take the head of the table in the concert of nations.

It marked the rebirth of a nation.

It marked the last great conflict between the people of a free, self-governing republic and that of the last absolute monarchy.

The commands preserved their State entity and were responsible for the honor of their State.

Four hundred and fifty-eight thousand were engaged in this conflict, exceeding in number those engaged in the Revolutionary War, the Mexican War, or the War of 1812.

The losses in deaths from all causes were 4.3 percent as compared with six-tenths of 1 percent for the Civil War and seven-tenths of 1 percent for World War I.

The average length of service was 14 months, as compared with 9 months for World War I and 11 months for the Civil War.

The pay was $15.60 a month as compared with $30 for World War I.

We received no bonus, no war-risk insurance, no adjusted compensation, no vocational training, and no hospitalization until 1922, 20 years after the Spanish War was over.

The cost of the war was $1,800,000,000; the Civil War, $8,500,000,000; and World War II, $50,800,000,000.

Property was acquired valued at $8 billion as compared with none for the Civil War and none for World War I.

Sixty-one percent saw foreign service as compared with 46 percent for World War I veterans.

Seventy-three percent of our veterans were sons of Civil War veterans and 42 percent saw service in World War I.

The duration of the war with Spain and the Philipine Insurrection was 4 years and 2 months, as compared with 4 years of Civil War and 1 year and 7 months for World War I.

Our motto is, "Freedom, patriotism, and humanity."

TRANSACTION OF ROUTINE BUSINESS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that there may be the usual morning hour, during which Senators may introduce bills and transact other routine business; and in that connection I ask unanimous consent that statement be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT ON REVIEW OF RICHLAND, WASH., APPRAISAL OFFICE

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of the Richland, Wash., Appraisal Office, Federal Housing Administration, Housing and Home Finance Agency, September 1956, regarding the appraisal of commercial properties in Richland (with an accompanying report); to the Committee on Banking and Currency.

AUDIT REPORT ON FARM CREDIT ADMINISTRATION

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Farm Credit Administration, for the fiscal year ended June 30, 1956 (with an accompanying report); to the Committee on Government Operations.

RECREATIONAL FACILITIES IN ALASKA

A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation to amend the act of May 4, 1956 (70 Stat. 130), relating to the establishment of public recreational facilities in Alaska (with an accompanying paper); to the Committee on Interior and Insular Affairs.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented and referred as indicated:

By the VICE PRESIDENT:

A joint resolution of the Legislature of the State of California; to the Committee on Interior and Insular Affairs:

"Senate Joint Resolution 18

Joint resolution relative to the granting of statehood to Hawaii and Alaska

"Whereas the San Francisco Bay area and the State of California derive from, and share with, the Territories of Alaska and Hawaii great economic and commercial advantages; and

"Whereas the peoples of the Territories of Alaska and Hawaii have expressed their desire through constitutional processes to join the brotherhood of the United States; and

"Whereas their future is an integral part of the economy, defense and general welfare of the United States; and

"Whereas the peoples of the Territories of Alaska and Hawaii have long since fulfilled all the requirements for statehood: Now, therefore, be it

"Resolved by the Senate and Assembly of the State of California (jointly), That the Legislature of the State of California respectfully memorializes the Congress of the United States to enact legislation providing for admission to statehood of the Territory of Alaska and the Territory of Hawaii; and be it further

"Resolved, That the secretary of the senate be hereby directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

The petition of Mrs. C. T. McFarland, of Oakland, Calif., relating to governmental spending; to the Committee on Appropriations.

A resolution adopted by the council of the city of Tucson, Ariz., favoring the continuance of the operation of the air primary training station at Marana Air Base, Marana, Ariz.; to the Committee on Armed Services.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RUSSELL, from the Committee on Armed Services, without amendment:

H. R. 7143. An act to amend the act of August 3, 1950, as amended, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces (Rept. No. 383).

By Mr. SMATHERS, from the Committee on Interstate and Foreign Commerce, without amendment:

S. 1027. A bill to authorize the Secretary of Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes (Rept. No. 385).

By Mr. BUTLER, from the Committee on Interstate and Foreign Commerce, without amendment:

S. 695. A bill providing for the revision and printing of a compilation of Federal laws relating to the regulation of carriers subject to the Interstate Commerce Act (Rept. No. 384).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CLARK:

S. 2164. A bill for the relief of Elpis Maria Stephanou Fryback; to the Committee on the Judiciary.

By Mr. EASTLAND:

S. 2165. A bill for the relief of Gertrud Mezger; to the Committee on the Judiciary.

By Mr. KENNEDY:

S. 2166. A bill for the relief of John J. Griffin;

S. 2167. A bill for the relief of Alberto Caira; and

S. 2168. A bill for the relief of Armas Edwin Jansson; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 2169. A bill to declare that the United States holds certain lands in trust for the Minnesota Chippewa Tribe; to the Committee on Interior and Insular Affairs.

By Mr. KEFAUVER:

S. 2170. A bill authorizing the transfer of certain property of the Holston Ordnance Works (at Kingsport, Tenn.) to the State of Tennessee; to the Committee on Armed Services.

S. 2171. A bill to authorize the Secretary of the Interior to consummate desirable land exchanges; to the Committee on Interior and Insular Affairs.

By Mr. RUSSELL:

S. 2172. A bill for the relief of Walter Harry Hurt; to the Committee on the Judiciary.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. LONG:

Address delivered by him before the Red River Valley Association Convention, in Shreveport, La., on April 23, 1957.

Address delivered by Representative OVERTON BROOKS, of Louisiana, before the Red River Valley Association Convention, in Shreveport, La., on April 23, 1957.

BOUNDARIES OF EVERGLADES NATIONAL PARK, FLA.—NOTICE OF HEARING

Mr. O'MAHONEY. Mr. President, I desire to announce that a public hearing will be held in the committee room of the Committee on Interior and Insular Affairs on Tuesday, June 11, beginning at 10 o'clock a. m., on Senate bill 1790, a bill which has been introduced by the senior Senator from Florida [Mr. HOLLAND] on behalf of himself and his colleague [Mr. SMATHERS].

This is a bill to fix the boundary of the Everglades National Park, Fla., to authorize the Secretary of the Interior to acquire land therein, and to provide for the transfer of certain land not included within said boundary, and for other purposes.

I make this announcement because a great deal of interest has been expressed in this measure, particularly within the State of Florida, and I desire that all who wish to be heard on the measure, as proponents or opponents, may have full notice that the hearing is to be held in this city.

Mr. HOLLAND. Mr. President, I should like to express appreciation, for myself and on behalf of my colleague, to the distinguished Senator from Wyoming. We appreciate his giving us this opportunity for a hearing on our bill, and we shall try to expedite the hearing in every reasonable way.

The VICE PRESIDENT. Is there further morning business?

CALL OF THE ROLL

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Allott	Capehart	Curtis
Barrett	Carlson	Dirksen
Beall	Carroll	Douglas
Bennett	Case, N. J.	Dworshak
Bricker	Case, S. Dak.	Eastland
Bridges	Chavez	Ellender
Bush	Church	Flanders
Butler	Clark	Frear
Byrd	Cotton	Fulbright
Goldwater	Lausche	Saltonstall
Gore	Long	Schoeppel
Green	Malone	Scott
Hayden	Martin, Iowa	Smathers
Hickenlooper	Martin, Pa.	Smith, Maine
Hill	McClellan	Smith, N. J.
Holland	Monroney	Sparkman
Hruska	Morse	Stennis
Humphrey	Morton	Symington
Ives	Mundt	Talmadge
Jackson	Murray	Thurmond
Javits	Neuberger	Thye
Johnson, Tex.	O'Mahoney	Watkins
Johnston, S. C.	Pastore	Wiley
Kefauver	Potter	Williams
Kennedy	Purtell	Yarborough
Kerr	Revercomb	Young
Knowland	Robertson	
Kuchel	Russell	

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Nevada [Mr. BIBLE], the Senator from North Carolina [Mr. ERVIN], the Senator from Missouri [Mr. HENNINGS], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MANSFIELD], the Senator from Michigan [Mr. MCNAMARA], and the Senator from West Virginia [Mr. NEELY] are absent on official business.

Mr. DIRKSEN. I announce that the Senator from Vermont [Mr. AIKEN] and the Senator from Kentucky [Mr. COOPER] are absent on official business.

The Senator from Indiana [Mr. JENNER], the Senator from North Dakota [Mr. LANGER], and the Senator from Maine [Mr. PAYNE] are absent because of illness.

The PRESIDING OFFICER (Mr. TALMADGE in the chair). A quorum is present.

STATE, JUSTICE, JUDICIARY, ETC., APPROPRIATIONS

Mr. JOHNSON of Texas. Mr. President, I wish to announce for the information of Senators that the conferees on the appropriation bill for the State and Justice Departments, the judiciary, and related agencies, agreed yesterday, and the conference report will be filed in the House today.

I am informed that it is the intention of the leadership to attempt to have the House consider the conference report tomorrow. Inasmuch as the House must act first, of course, the Senate will not proceed to the consideration of the conference report until the House has disposed of it. However, I should like to inform Senators that it is planned to take up the conference report in the Senate tomorrow as soon as the House has acted upon it.

MORALITY OR LACK OF MORALITY IN GRANTING OF RAPID TAX AMORTIZATION CERTIFICATES

Mr. GOLDWATER. Mr. President, much has been said on the floor of the Senate, on national television shows, before the Jefferson-Jackson Day dinner in Detroit, and as recently as yesterday before the meeting of the Democratic women, about the lack of morality involved in the granting of rapid tax amortization certificates. As I mentioned once before during remarks on this subject, I do not necessarily feel

that these certificates should be issued in peacetime, but because they are allowed by law there certainly is nothing illegal in granting them. It is strange that what is immoral in Idaho is moral in Oregon; at least, nothing so far as I recall, has been said about the 97 firms in Oregon that have received these certificates in the past 7 years. So that my colleagues may be able to study this list, I ask that it be inserted at this point in my remarks in the body of the RECORD. My action in introducing this list into the RECORD in no way is to be considered as a reflection on the honesty, the integrity or morality of the firms who received these certificates.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

[From the Idaho Daily Statesman of May 18, 1957]

ODM LISTS WRITEOFFS FOR 97 OREGON FIRMS

WASHINGTON—Nearly 400 corporations in the Pacific Northwest have been granted certificates during the last 7 years for an accelerated rate of depreciation on construction for tax purposes.

The Office of Defense Mobilization has said the effect of the program is to allow the companies to take larger than normal depreciation deductions during the first 5 years.

This is offset by smaller-than-normal deductions after the first 5 years. A committee of the Senate currently is considering repeal of this provision of the tax laws in favor of a more limited program.

ODM reports showed that 35 certificates had been issued in Idaho; Montana had 43, Oregon had 97, and in Washington State there were 223.

ODM lists these certificates in Oregon, with corporations, estimated cost of facilities and amounts subject to amortization in parentheses:

Hanna Coal Ore, Riddle, $3,566,000 ($3,031,000); Paulus Bros. Packing, Salem, $177,000 ($97,000); Lamb-Weston, $241,000 ($60,000), $222,000 ($56,000); Roseburg Lumber, Roseburg, $1,543,000 ($463,000), $1,667,000 ($667,000); C. D. Johnson, Toledo, $127,000 ($51,000), $59,000 ($24,000), $755,000 ($302,000);

Pope & Talbot, Oakridge, $149,000 ($59,000), $86,000 ($26,000); Weyerhaeuser Timber, Springfield, $2,760,000 ($1,380,000), $2,296,000 ($918,000); Weyerhaeuser Timber, Klamath Falls, $3,046,000 ($1,218,000); W. A. Woodward Lumber, Cottage Grove, $523,000 ($288,000); Gardiner Lumber, Gardiner, $863,000 ($259,000), $1,950,000 ($780,000);

L. Edwards, Garden Home, $12,000 ($7,000); Portland General Electric, Portland, $2,750,000 ($1,375,000), $22,260,000 ($14,469,000); and Pacific Power & Light, Portland, $26,170,000 ($19,628,000).

LOCAL GOVERNMENTS AND FEDERAL SPENDING

Mr. GOLDWATER. Mr. President, the Federal Government has been taking more and more of the income of the people under the mistaken idea that the Federal Government can perform local functions better than the local governments themselves. As local governments are deprived of their sources of taxes, it is only natural to expect that they turn to the Federal Government. I suggest to my colleagues that this was never the intent of the Constitution, and that the future of local governments at all levels is being seriously threatened by continued squanderbust government. A statement typical of the plight in which most of the States find themselves is contained in the May issue of Arizona Progress, and I ask unanimous consent that this compilation be printed at this point in my remarks.

There being no objection, the compilation was ordered to be printed in the RECORD, as follows:

LOCAL GOVERNMENT NEEDS MAKE CUT IN FEDERAL SPENDING IMPERATIVE

Budget time is here again—which makes it an appropriate time to talk about taxes. Criticism of the proposed Federal budget is due in part to concern over local government finances. It is impossible for taxpayers to support both in the manner contemplated by the budgeteers—and many people feel that local needs are now much more urgent than national.

State and local taxes in Arizona have increased from $42 million to $152 million over the past 10 years. This would not cause undue hardship if there was any prospect of local expenditures leveling off or if Federal spending was properly reduced. Neither seems likely, which means continued and ever-increasing bad news for taxpayers. In this same 10-year period Federal taxes in Arizone rose from $75 million to $185 million. Believe it or not, Arizonians now pay 2½ times as much Federal taxes as during World War II.

Taxation in the United States has gradually gone from the incredible to the intolerable. When the tax yoke becomes excessive, petty chiseling ultimately develops into grand larceny and small oversights into bald evasion. In France taxpayers have long since said "to heck with it."

When individuals must work from 4 to 10 months out of each year for the Government, and when corporations must operate over half of each year to pay their taxes, we are about as close to totalitarianism as a nation can get and still maintain the fiction of a private enterprise system.

Having got that off our chest, and we mean every word of it, let us take a look at some Arizona statistics. The following tables show the increased costs of operating Arizona's public schools, county governments, and 2 largest cities compared with 10 years ago. Unfortunately, in the words of a famous vaudevillian, "You ain't seen nothin' yet."

Growth of municipal expenditures

Cities	Fiscal year 1945–46	Fiscal year 1955–56	Percent increase
Phoenix	$5,797,990	$14,301,464	146.7
Tucson	1,570,771	4,435,673	182.4

NOTE.—In this period the incorporated area of Phoenix was increased from 10 square miles to 30 square miles and that of Tucson from 9 square miles to 20 square miles. Population of the city of Phoenix advanced from 92,000 to 156,000 and that of Tucson from 40,000 to 95,000.

Growth of public-school expenditures

County	1945–46	1955–56	Percent increase

DEVASTATING EFFECTS OF RECENT FLOODS—FLOOD CONTROL APPROPRIATIONS

Mr. JOHNSON of Texas. Mr. President, the morning newspapers again carry the story of death and destruction in the great Southwest.

Floods—caused by abnormal rainfall—are raging down the rivers and sweeping all before them. People are fleeing their homes—and when they return there will be little left but debris.

The terror of flash floods is little known in this part of the country. That may explain why the great public works projects which prevent loss of life and property are usually described—with a sneer—as the "pork barrel."

Mr. President, I ask unanimous consent that the Associated Press article in this morning's New York Times describing the flood damage be printed in the RECORD at this point as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FLASH FLOODS RIP SOUTHWEST TEXAS—CLOUDBURSTS SWELL RIVERS—8 INCHES FALL IN UVALDE—SAN ANTONIO HARD HIT

DALLAS, May 27.—Flash floods raged down streams in southwest Texas today after cloudbursts had dumped up to 8 inches of rain.

The new floods drove hundreds from their homes and brought to 7,500 the number of persons in 4 States who have fled their homes.

Up to 8 inches of rain fell in an area around Uvalde, Tex., where former Vice President John Nance (Cactus Jim) Garner lives. It is west of San Antonio. At Kenedy, Tex., 3½ inches of rain fell in 40 minutes and blocked streets. John Syring, 7 years old, was lost and feared drowned when a truck in which he was riding was hit by a wall of water.

Other cloudbursts fell at Elgin, with 5½ inches, Laredo, 1½ inches in less than 2 hours; Sonora, 5 inches in 24 hours; Corpus Christi, 1½ inches with a windstorm; the Eagle Pass-Laredo area, and San Antonio. These areas stretch from central Texas south and west to the Mexican border.

RESCUES IN SAN ANTONIO

Flash flooding occurred at San Antonio where several persons were rescued from their cars. More flooding was expected. Similar flooding was expected on the middle and upper Nueces River in southwest Texas. Evacuations of nine families at Laredo were caused by flash floods. Texas reservoir operators again were juggling water, trying to keep downstream areas from flooding while trying to release enough water to ease the misery of upstream residents.

Lake Texoma on the Texas-Oklahoma border was at spillway level. The dam was designed for use of the spillway only about once in 100 years. Resorts around the lake were under water.

Many of today's Texas cloudbursts occurred in areas that have not benefited greatly from Texas' wet and violent spring weather.

Most of Oklahoma breathed in relief at the second day of rainless weather. Most flooding rivers were falling. About 200 persons were evacuated at Waurika, Okla., during the weekend, and a dozen families were evacuated at Arkhoma, Okla.

A few miles north of Arkhoma, at Moffett, Okla., the 400 residents fled last night as a foot of water washed over the town.

ARKANSAS FLOODING

The Arkansas River, which caused the Arkhoma and Moffett damage, sent a few families from their homes at Fort Smith, Ark., and 400 fleeing at North Little Rock, Ark., during the weekend.

Floodwaters covered an estimated 100,000 acres in delta land between the Missouri and St. Francis Rivers in the southeast corner of Missouri and the northeast corner of Arkansas after levees crumbled.

Crop damage in the Missouri sector alone was estimated at $15 million. About 550 residents of Hornersville, Mo., were evacuated.

A 13-year-old boy was drowned while swimming in the swollen Little River in southeast Missouri.

At the Texoma Dam on the Oklahoma-Texas border engineers had closed floodgates to hold back water from the already swollen Red River below the dam.

Boat plants immediately below the dam were evacuated in expectation of water going over the spillway.

The series of lakes of the Lower Colorado River Authority were absorbing water from heavy rains in the Abilene area and other areas in its watershed.

FLOOD-CONTROL APPROPRIATIONS

Mr. KUCHEL. Mr. President, the vagaries of weather during recent weeks have demonstrated once more in the Southwest and South the fundamental truth of the observation by William Shakespeare that rain falls alike on the just and the unjust.

The great suffering and heavy losses which have been sustained in the State of Texas and in some of her adjoining sister States have been commented on in this body and regrettably have helped fill the front pages of American newspapers for many days running. The tragedy which has been inflicted on a number of households in Texas has evoked the sympathy of fellow citizens in all parts of our country, as well as that of Members of Congress.

The people of my State of California share particularly the feelings of their fellows in Texas, for only a little more than a year ago a wide area of California was deluged and swamped by unprecedented runoff of rain and unseasonable snowmelt, with damage running in the vicinity of $300 million and nearly 70 lives lost.

After the 1955 to 1956 floods, those of us from California renewed efforts to expedite completion of various flood-control and flood-prevention works then underway or authorized but not yet started. At the time, we took the position that such projects were essential to the protection of homes, farms, utilities, transportation, and the very lives of our people. We maintained that expenditures for such purposes were sound investments which would pay dividends and promote the economic welfare not only of the areas to be protected but of the entire Nation.

On two recent occasions, the distinguished majority leader has pointed to the value of such projects as demonstrated by experiences in his own State of Texas. I noted with interest that last Friday the majority leader declared in rather strong language—in which I heartily concur—that it is demagogic to use the opprobrious term "pork barrel" in describing such undertakings as storage dams, reservoirs, levees, and reinforced channels to handle tremendous volumes of rainfall and runoff.

Our colleague from Texas aptly expressed my own point of view on this matter. In fact, almost at the time he was first calling the attention of this body to the deplorable floods in his home State I was making an appearance before the Subcommittee on Appropriations urging favorable action on the President's budget request for flood-control funds for various California projects. In my statement to that committee I used language very similar to that which the majority leader employed in the Senate in registering his opinion about the worth of such Federal expenditures.

After the 1955–56 floods in California I had occasion to discuss the problem of flood prevention in a recorded interview with Maj. Gen. E. C. Itschner, now the Chief of the Army Engineers and then head of the civil works division. The general pointed out that the corps had underway in the section of California which was most hard hit by the extraordinary rains and melting snow 3 projects which would cost $88 million. He added that if all the flood projects in central and northern California authorized for construction had been completed there would have been a return of 10 percent on their cost through property damage averted. The general also noted that Folsom Dam, which had been completed only a short while earlier, was able to hold back 890,000 acre-feet of water in the Sacramento River, an amount equal to 290 billion gallons.

I particularly subscribe to the position taken by the majority leader with ref-

erence to the worthwhile nature of flood-control programs and Federal outlays for their completion. I desire to remind my colleagues that these activities are not the wasteful sort of "crash program" in which our Government sometimes is compelled by circumstances to participate. Far from being "pork barrel" items, the appropriations for flood prevention are voted after careful study, for thoroughly investigated and carefully engineered projects. Furthermore, in virtually every instance, the local people of the area affected as well as the States share a substantial part of the overall final cost and then assume responsibility for maintaining and operating these works.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point excerpts from my statement last week before the subcommittee of the Committee on Appropriations which was considering the 1958 public works bill.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

Normally we do not enjoy a plenitude of water in California. To the contrary, a pressing problem is to provide a sufficient supply of this indispensable commodity in most parts of our State. As to our rainfall, Californians know all too well the meaning of the expression, "a feast or a famine." This year we appear before you not against a background of rampaging floods and excessive water as was the case early in 1955, but after a winter when too little rain fell upon our land out there.

As to either situation—too much water or not enough—the earliest practicable completion of a comprehensive system of flood-control works is of the most genuine importance in the life of California. The necessity for attending to the full, wise use of our water resources increases rather than diminishes, for we continue to grow as to population at the astonishing rate of almost half a million people per year. I need not argue before this committee how important it is to give protection to our communities, old and new, to our farms and to our State where over 14 million Americans now live. Nor need I labor the importance of the conservation effects which are corollary to flood control works soundly planned and permanently built.

In accomplishing the control, conservation and wise use of the water resources of California, we have benefited from a series of far-sighted decisions made by the Congress of the United States and by the government of my own State. I allude, of course, to the decision embodied in the Flood Control Act of 1936 that there is a national interest in the prevention of flood damage, to the acts of 1944 and the following, which implement this policy, and to the Water Resources Act adopted by California in 1945 under which the State guaranteed and provided for the local participation, which the United States rightfully asks and requires, in flood-control projects.

Under our act, and under more recent State legislation establishing a completely separate department of water resources, California has undertaken to send to Washington for these Appropriation Committee hearings each year a group of State and local officials and civic leaders—whom I have the honor to present today—to present the bona fide needs of our State for flood control assistance. Several months prior to coming here, these men and others from every county in California where there is a flood control problem hold a 2-day meeting at Sacramento, our capital. At this California Water Conference, they work out a coordinated program under which our flood-control projects may go forward in an orderly manner. Their deliberations are conducted under the auspicies of the State water board and the State reclamation board, and with the assistance and technical advice of engineers, hydrologists and economists of both State and local government. The policy which guides the California Water Conference every fall is to screen the requests of the various flood control districts and counties for Federal funds with great care, in order that every dollar recommended may be conscientiously and vigorously justified before the United States Army engineers, the Federal Bureau of the Budget, and the Congress.

This procedure has been followed with respect to the requests which are now before you. The State water board, following the California Water Conference last July, recommended appropriations aggregating some $61 million. The Bureau of the Budget, following its own consultations with the Army engineers last fall and winter and in line with national fiscal policy, approved requests for California flood-control projects in a total of $47 million.

In a word Mr. Chairman, the budget which you are considering today for this particular national purpose—the prevention of flood damage in California—has been most carefully prepared. It has already been thoroughly screened. These are minimum requests. They represent genuine needs.

Although we were spared from great floods this past winter, we know in California that we must work diligently year in and year out to provide for our people all possible protection from such disasters as the one we suffered in the winter of 1955–56, and on many other occasions in the history of our State. We have only to read in this week's newspapers of the tragic troubles of our great sister State of Texas to be reminded that Nature can go on a rampage without any warning whatsoever.

To protect the soil, the cities, and the homes of America, and the lives of the American people from floods is not, in my humble opinion, to spend money but to invest it—to make wise use of it—indeed, to anticipate an increment and a profit. I think it needs to be emphasized that no flood-control project is asked by our State government nor agreed to by the United States unless it has a favorable cost-benefit ratio. I grow a little impatient, frankly, when some, who have not followed the development of a sound national flood-control policy, allude to our work under such a policy as having the characteristics of a "pork barrel." The fact that Congress legislates as to flood-control authorizations and as to flood-control appropriations for all the States of the Union simultaneously is simply evidence that you and I and all other Members of the Congress are dealing with a national problem, and that we seek to be fair to every State and considerate of the need for protecting all the people and their natural resources. Every dollar expended upon a flood-control project benefits our Nation. It conserves our soil. It helps to assure our water supply. It adds to the recreational opportunities of the American public. It even beneficiates our climate. The time had come in 1936, in truth it had passed long since, for the United States to bring to a halt the waste of our soil and other natural resources from this cause—from floods wherever they had been or had become a public hazard.

California has no apology for the requests for flood-control assistance which are in the budget you are now considering. They have been carefully—indeed, scientifically—determined. They are in the national interest as that interest is stated in the Flood Control Act of 1936 and the other laws of the United States.

It is a comfort to me and my fellow citizens with me this afternoon to realize that this honorable committee has always understood and approved the methodology of our approach: Our statewide water conference, our consultation with experts on every flood-control proposal and project, the retention of our requests to logical, justifiable sums. You have been good enough to say that our efforts to bring a coordinated program to your attention have been of assistance to the committee throughout the years. We appreciate this.

The people of California are desirous as are all good Americans to avoid waste in the use of Government funds, State or Federal or local. We are not interested in pork barrels or boondoggles or spending for spending's sake. We are convinced that the investments now proposed in flood-control works in California are in the interests of a better economy for our State and the United States, and that they therefore represent true savings to the people and the Government.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield.

Mr. JOHNSON of Texas. When the distinguished Senator from California was addressing the Chair, I was conferring with the senior Senator from Louisiana [Mr. ELLENDER], the very able chairman of the Subcommittee on Public Works of the Committee on Appropriations, about the serious conditions which exist in the Southwest.

This weekend a number of Members of the House are going to Texas to inspect at firsthand the devastating effects of the recent floods. For a period of many years we have suffered from a lack of rainfall. Now we have had to suffer from too much rainfall.

I understand the situation to which the Senator has referred in his own State. I wish to assure him of my complete understanding and cooperation in an attempt to see to it that adequate funds are provided for the control of floods in all the States of the Union. I appreciate very much the generous statements my colleague has made about me, and I assure him that I reciprocate his feelings.

Mr. KUCHEL. I thank the Senator very much.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield to my friend the able Senator from Louisiana.

Mr. ELLENDER. I should like to state to my good friend from California that I appreciate his appearance before the committee and his statement with reference to projects to control the floods which are now ravaging various States of the Union.

About 2 weeks ago I asked the Army engineers to make a study of the floods in various parts of the country, with a view to their coming before our committee to show justification, if they could, for perhaps more money to take care of the situation to which the Senator has referred.

It is my hope that by about June 10 or 12 we may be able to have the engineers appear before our committee, so that we may go over the study they will have made in the intervening 2 or 3 weeks.

It is my hope that a sufficient case will be made so that many of these projects will be justified and that we will be in

a position to incorporate in the bill more money than the budget estimates call for.

Mr. KUCHEL. I wish to say to the very able Senator from Louisiana, who is the chairman of the subcommittee of the Appropriations Committee which handles these problems, that he has the gratitude not only of the people whom I have the honor in part to represent in the Senate, but also the gratitude of the people of the Nation as a whole, for the constructive way in which he has dealt with these problems.

Mr. JOHNSON of Texas. Mr. President, I appreciate the interest of the junior Senator from California. I made public reference to the debt of gratitude that we in the Senate owe the distinguished minority leader for the way he handled the public works bill on the floor. I have asked the Army engineers to make a survey of the savings which have resulted in my State during the past month as a consequence of the investments made by the Government in dams on many major rivers of Texas.

I believe it is particularly interesting to point out, that in one river basin alone, under the leadership of the distinguished minority leader and the Senator from Louisiana [Mr. ELLENDER], flood-control works costing about $68 million have been constructed. In the area of the Fort Worth-Dallas-Trinity Basin, the engineers estimate that that expenditure of $68 million has saved $65 million in flood damage this year alone.

In the lower Colorado River area in Texas, near my home, a series of dams have been built. The total cost of those dams is in the neighborhood of $55 million. The Bureau of Reclamation built one, and the others were built largely from PWA funds. It is the opinion of the senior Senator from Texas that, except for those dams, that area of Texas would have suffered more than $55 million in damage during this year alone.

Therefore, I think that those who refer to public works projects as "pork barrel" fail to realize what confronts the people who live in these river basins. And they fail to realize the true economic value and great savings these projects represent. If this is pork barrel, then what we need is more pork.

Mr. KUCHEL. In the flood which ravaged the northern part of California last year, the great capital city of the State was protected by reason of the completion by the Federal Government of the great dam at Folsom. That dam was authorized, I might say, by the Senate under the leadership of my colleague, the senior Senator from California [Mr. KNOWLAND]. The protection afforded by this dam lends great emphasis to the force of the argument made by the senior Senator from Texas, that these expenditures are an investment both in America today and in America of the future.

Mr. JOHNSON of Texas. An estimate will be submitted for some half billion dollars or so for the public works bill, or whatever the exact amount will be. I venture the prediction that if a careful study were made throughout the United States where serious floods have occurred, a substantial part of that half billion dollars would be shown to have been saved this year alone by virtue of the flood control dams already built.

Mr. KUCHEL. In my judgment the Senator from Texas is entirely correct.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield.

Mr. CASE of South Dakota. The people of the United States are fortunate indeed that in both the majority leader, the Senator from Texas [Mr. JOHNSON], and the minority leader, the Senator from California [Mr. KNOWLAND] we have men who understand this problem. In the leadership in the Appropriations Subcommittee which deals with this matter we have the understanding treatment accorded to the problem by the senior Senator from Louisiana [Mr. ELLENDER] and the senior Senator from California [Mr. KNOWLAND], and their associates on the committee.

In connection with the estimates which the committee is considering, and to which the Senator from Louisiana has alluded, I trust consideration will be given to the amount appropriated for the small projects. I refer to projects covered by section 212, as amended, of the Flood Control Act of 1950, which permits projects to be undertaken by the Corps of Engineers when the total cost is within, I think, the amended limit of——

Mr. ELLENDER. Four hundred thousand dollars.

Mr. CASE of South Dakota. With projects of that nature, much immediate good can be accomplished. Sometimes we think in terms of large flood-control projects. I do not belittle them in the least; they are important and necessary. But in many instances whole towns and communities can be saved by a relatively minor project constructed within the section 212 classification. Under that section the engineers are enabled to go ahead when they consider a project to be meritorious.

So I hope, as a result of the review which the able Senator from Louisiana has mentioned, small projects will not be overlooked, but will be undertaken.

Mr. ELLENDER. I may say to my good friend from South Dakota, with the permission of the Senator from California, that when the engineers appeared before the committee, I asked them specifically whether they could use more than the $3 million budgeted. I was given to understand that that amount was about all they could use, but I expect to look into the matter again in the light of the floods which we have been discussing this afternoon. It is entirely possible that program can be enlarged, and also that the funds for projects which have not even been surveyed can be increased.

As the Senator from South Dakota knows, there are two laws under which action may be taken. One is limited to $400,000 for projects which have been authorized and the other for smaller projects which are not authorized. It is my purpose to make a further study of both programs, with a view to increasing the amount proposed to be appropriated, if there is justification for doing so after the engineers have submitted their report.

Mr. CASE of South Dakota. I thank the Senator from Louisiana for his assurance. I appreciate having the Senator from California yield to me.

Mr. KUCHEL. I concur in the comments made by my friend the distinguished junior Senator from South Dakota. So far as the leadership on both sides of the aisle and the leadership in the Committee on Appropriations, in the person of the distinguished senior Senator from Louisiana are concerned, the problem of flood control and the responsibility which the Federal Government has in carrying forward flood control projects has been considered, during the time I have been a Member of the Senate, on merit, and the merit alone. We are not only protecting American life and American property today, we are permanently investing in America's future in our national program of flood control.

MODERNIZATION OF AIR TRAFFIC CONTROL FACILITIES

Mr. MONRONEY. Mr. President, one of the most serious transportation crises the Nation has ever faced confronts it now in the overcrowding of air space. Every day the number of near-misses reported to the Civil Aeronautics Authority by the airline pilots increases.

Congress is moving in the direction of taking some action about the vast overcrowding of the limited amount of space in which more and more planes are daily being routed.

A very important bit of testimony was given yesterday morning before the Committee on Interstate and Foreign Commerce in connection with the Curtis report. Unfortunately, not many members of the press were present, and not many members of the committee could be there. But Mr. Clarence N. Sayen, president of the Air Pilots Association, testified regarding the need and the necessity for an organizational structure to bring some order out of the chaos which exists today, by modernizing, bringing up to date and increasing the capacity of the national airways.

I believe Mr. Sayen and his fellow airline pilots are perhaps the most competent witnesses in the United States to testify to the necessity and the kind of an organization to correct the dangers and to modernize the airways. His testimony strongly favors giving authority to a single agency of the Government to correct the situation which has been allowed to develop during the past several years.

I shall read a few paragraphs from the statement, and then I shall ask unanimous consent to have the entire statement printed in the RECORD:

The authority to allocate airspace should be possessed in the same agency which has

the responsibility for the operation of the airways system and for research and development to keep the system competent to meet the current requirements of the users. Unless research and development is to be conducted in an ivory tower removed from everyday realities, current operating problems, including the extremely critical problem of allocation of airspace or restriction on the use of airspace among the users, must be considered. A fine program, developed in theory, may fail if authority to utilize the airspace in question is not available.

We were pleased to note again that the long-term program envisioned by the Curtis committee adopts this conclusion; however, the immediate program would leave the authority for the allocation of airspace as it is presently practiced, with the acknowledged difficulties of decision making. The adoption of S. 1856 without further steps would perpetuate for at least 3 years the present organizational structure under which 6 agencies of Government must reach unanimous agreement on controversial aviation problems and, failing such agreement, the President must review and resolve the deadlock.

This, of course, is cumbersome and time-consuming. Further, this would mean that the present program of the Civil Aeronautics Administration must be implemented under the recognized handicaps of the present system. Any research and development would have to be predicated upon the tenuous premise that the present system might be perpetuated in the event Mr. Curtis' recommendations for future changes are not accepted.

We believe it is obvious that the authority to allocate airspace must be vested in the same individual who has responsibility for the operation, reliability and safety of the airways system, and we believe that this was the original intent of Congress.

Mr. President, the bill, S. 1856, is now before the Committee on Interstate and Foreign Commerce. It is the result of a thorough study made by General Curtis, consuming many months.

In the study, General Curtis recommends a separate airways-modernization board which will be completely outside the regular working regulatory board for aviation, the Civil Aeronautics Authority.

Although it is true that General Curtis found it would be necessary to establish a single agency to control all the airways and to have decisions made by it, he recommended a delay of this single agency for 3 years while the airways-modernization board is developing as a separate agency. Later it would be combined with the new aviation agency.

The time is later than we think. This matter should be placed now under one central authority having power to act, rather than to have the problems concerning airspace navigation and development placed upon the overcrowded desk of the President of the United States as the only person who can resolve conflicts.

Because of his experience, his understanding, and his everyday working knowledge of air problems as representative of the men who fly the airliners of the Nation, I ask unanimous consent to have printed at this point in the RECORD the complete statement made by President Sayen before the Committee on Interstate and Foreign Commerce yesterday.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF CLARENCE N. SAYEN, PRESIDENT, AIR LINE PILOTS ASSOCIATION, INTERNATIONAL, AND INTERNATIONAL FEDERATION OF AIR LINE PILOTS ASSOCIATIONS, BEFORE THE SENATE INTERSTATE AND FOREIGN COMMERCE COMMITTEE ON LEGISLATIVE BILL S. 1856, A BILL TO PROVIDE FOR THE DEVELOPMENT AND MODERNIZATION OF THE NATIONAL SYSTEM OF NAVIGATION AND TRAFFIC CONTROL FACILITIES TO SERVE PRESENT AND FUTURE NEEDS OF CIVIL AND MILITARY AVIATION, AND FOR OTHER PURPOSES

I am Clarence N. Sayen, president of the Air Line Pilots Association and the International Federation of Air Line Pilots Associations. A brief description of these organizations and my background is attached to this statement.

We appreciate the opportunity to appear and state our views on the important legislation contained in S. 1856. We always welcome the opportunity to assist in programs for improving safety and we are particularly appreciative of the opportunity to discuss this bill, as it deals with a subject with which the airline pilots have been deeply concerned for a number of years, have devoted much of their energy and resources, and which closely affects their personal safety and that of their passengers.

We concur completely with previous witnesses and public statements of informed people as to the critical nature of the airways and airspace problem. The system and facilities for handling air traffic are now inadequate and have been inadequate for some time. The steady growth in air traffic which has been described by previous witnesses will aggravate the problem. The result produces serious safety problems, a deterioration in the standard of air service, and serious limitations in our ability to meet our national defense requirements. The net cost of these inadequacies is a burden which this country cannot, in our opinion, tolerate.

Our association has been convinced of the foregoing for some years and we are hopeful that the growing realization of the seriousness of the problem will bring at least two results: (1) An alleviation of the currently critical situation in airspace use, and (2) the creation of a governmental structure which will be capable of continuously coping with such problems and preventing them from reaching such emergency proportions in the future.

There have been a number of reviews of aviation problems conducted during recent years which have involved overall national aviation policy and, in some instances, narrower studies of specific aviation problems, such as that of aviation facilities and air traffic control. With specific reference to the aviation facilities problem, a study in this area was undertaken by the so-called Harding committee in 1955 (officially the Aviation Facilities Study Group), which stated in its report that general aviation was in a state of emergency due to the inadequacy of air navigation facilities and traffic control services. It was as a result of this report that General Curtis was named Special Assistant to the President for Aviation Facilities Planning, and the so-called Curtis committee was formed. Mr. Curtis and his associates have now set forth their findings and recommendations in a series of reports. As we read the reports, Mr. Curtis has recommended: (1) That the program presently planned by the Civil Aeronautics Administration be supported for immediate relief from the airways problem; (2) authorization for the beginning of immediate research in the field of aviation facilities planning so as to provide essential equipment and systems to solve the long term airways problem; and (3) a reorganization of the governmental structure for handling aviation problems to provide for an effective independent agency capable of providing for continuous research and development planning and administration of aviation policy.

We are generally in agreement with the problems as stated by the Curtis committee and with the necessity for action in all three areas if they are to be solved. This association desires to commend General Curtis and his associates on the thoroughness and courage with which they have confronted the technical, organizational, and administrative problems involved in aviation facilities planning and related areas. We have been happy to cooperate in this project and we hope that there will be early and effective action to resolve those problems. However, we believe that there are a number of areas in which the specific proposal contained in S. 1856, examined from the overall and long-run view, may be strengthened and better adapted to immediate and continuous solution of these problems. We would like to devote our attention, therefore, to the specific areas in which we think the program might be modified, improved, or strengthened:

1. We believe that any research and development program should first be concerned with the immediate practical problems. By solving immediate problems and anticipating their extension, we believe that the most practical approach and efficient utilization of funds will be made. In this regard, we believe that maximum utilization should be made of the experience and knowledge of existing agencies and all users of the airspace, including the military and the various civil users. We believe the users have a great contribution to make in terms of practical knowledge of deficiencies in the present system and in the evaluation of new procedures and equipment and that any program should provide for close consultation with such groups to guarantee its practicality and acceptability.

2. We concur that the present program of the Civil Aeronautics Administration should be supported by the Congress and all other interested parties to expedite the solution of present problems and alleviate the currently critical areas. We believe that if the Civil Aeronautics Administration is provided with the funds to develop, purchase and install presently known devices and methods, the capacity and ability of our present airways system may be greatly enhanced. For that matter, methods, facilities and knowledge presently available can do much to provide for a safe and effective transition of our airways system to the handling of future problems.

3. We believe that a separation of the research and development agency (Airways Modernization Board) from the implementing and administrative agency (Civil Aeronautics Administration) will not provide for the most effective coordination of effort. Past experience has indicated the difficulty of dealing with development in one organization and the responsibility for operating requirements in another organization. This has been true of the Air Navigation Development Board, which the proposed Airways Modernization Board would largely replace. The proposed Airways Modernization Board would have many of the same characteristics as the Air Navigation Development Board and many of our representatives, who have been active in the air traffic control field, feel that the confusing relationship of the Air Coordinating Committee to the Air Navigation Development Board and the fact that operating people and technical people did not work together under a common organization was

a basic cause of the failure of the Air Navigation Development Board.

We believe that a more practical program would emerge if the individual having the responsibility for the implementation of the program also had the responsibility for keeping the research and development ahead of operating requirements. In this manner there is assurance that continuity of operational know-how will be combined with continuity of research and development. We were pleased to note that in the complete Curtis committee reports, the foregoing conclusions are recognized, although deferred for future study and action.

4. It has long been our view that the responsibility for aviation facilities should be in a single agency with a single head, and that this individual should be appointed by the President, confirmed by the Congress and responsible to both of them. We were pleased to note that in the complete reports of the Curtis committee this conclusion is recognized; however, in connection with S. 1856, the legislation here under consideration, a tripartite board is recommended. It would appear practical that the organizational concept envisioned for the solution of long-run problems would also be the most efficient for the solution of immediate problems.

We are aware of the criticism that the foregoing organizational concept would exclude the military from joint consideration of airways and airspace problems, but we do not believe that this is a valid conclusion. It is normal in our governmental scheme for civil agencies to exercise decision-making authority in fields closely allied with the military. The military would have the right to demand that their problems be given full and equal consideration with those of all other users of the airspace, and in our view would have as strong a voice as envisioned in the tripartite board, where they may be out-voted by the third member. Provisions could be inserted in any program providing for consultation on any items of mutual interest and joint utilization of research facilities wherever the public interest requires it. Congress has recognized the national defense requirements in the Nation's airways and airspace from the beginning, and clearly stated its policy and intent in the Civil Aeronautics Act of 1938. Section 302 (a) of that act states:

"The Administrator is authorized and directed to designate and establish such civil airways as may be required in the public interest. The Administrator is authorized, within the limits of available appropriations made by the Congress, (1) to acquire, establish, and improve air-navigation facilities wherever necessary; (2) to operate and maintain such air-navigation facilities; (3) to arrange for publication of aeronautical maps and charts necessary for the safe and efficient movement of aircraft in civil air navigation utilizing the facilities and assistance of existing agencies of the Government so far as practicable; and (4) to provide necessary facilities and personnel for the regulation and protection of air traffic. In exercising the authority granted in this subsection, the Administrator shall give full consideration to the requirements of national defense."

Under the single agency, single-head concept, the decision-making responsibility and authority would lie in a single individual, and there could be no evasion of responsibility by virtue of overlapping areas of authority. We believe that this was the intent of Congress in adopting the Civil Aeronautics Act of 1938 and that it would remain the most effective.

5. The authority to allocate airspace should be possessed in the same agency which has the responsibility for the operation of the airways system and for research and development to keep the system competent to meet the current requirements of the users. Unless research and development is to be conducted in an ivory tower removed from everyday realities, current operating problems, including the extremely critical problem of allocation of airspace or restriction on the use of airspace among the users, must be considered. A fine program, developed in theory, may fail if authority to utilize the airspace in question is not available. We were pleased to note again that the long-term program envisioned by the Curtis committee adopted this conclusion; however, the immediate program would leave the authority for the allocation of airspace as it is presently practiced, with the acknowledged difficulties of decision making. The adoption of S. 1856 without further steps would perpetuate for at least 3 years the present organizational structure under which 6 agencies of Government must reach unanimous agreement on controversial aviation problems and, failing such agreement, the President must review and resolve the deadlock. This, of course, is cumbersome and time-consuming. Further, this would mean that the present program of the Civil Aeronautics Administration must be implemented under the recognized handicaps of the present system. Any research and development would have to be predicated upon the tenuous premise that the present system might be perpetuated in the event Mr. Curtis's recommendations for future changes are not accepted.

We believe it is obvious that the authority to allocate airspace must be vested in the same individual who has responsibility for the operation, reliability, and safety of the airways system, and we believe that this was the original intent of Congress.

6. We believe it is imperative that continuity of development be insured in this important and expensive responsibility of Government. A number of research and planning efforts have been undertaken in the past in this field have not been successful and the investment and results have been lost. We have attempted to analyze the reasons for their lack of success to determine the best pattern for the future. We have come to the conclusion that one of the main reasons was a division of responsibilities. With the present division of authority on aviation matters in our governmental setup, research and development by one group may never be implemented by another group.

We are apprehensive that there will be a lack of continuity and possible loss of results under the proposed Airways Modernization Board in the event the remainder of the proposed program is not adopted. The Airways Modernization Board as a separate agency would have to organize, recruit a staff in the short labor market, and establish procedures for operation. With a limited and indefinite future, we feel that these difficulties would limit the progress that could be made in a 3-year period. If such board would then be discontinued, the personnel would be dispersed and many of the conclusions would probably not be implemented, and more time would have been lost.

On the other hand, the Civil Aeronautics Administration is an established agency. The addition of the number of staff people necessary in the technical fields to supplement present research and development programs would place no unreasonable burden on CAA's administrative functions. The Airways Modernization Board could be created as a functioning department under the Administrator and utilize the facilities now available in that organization. Procedures for close coordination with the operating personnel could be established. The necessity to meet military needs is clearly established in the Civil Aeronautics Act and facilities of the military or other agencies of the Federal Government could be made available.

A summary of the foregoing points leads us to the conclusion that the present airways problems would best be resolved by immediate legislation which would place the responsibility for research and development in aviation facilities planning, the operation of the airways, the allocation of airspace and allied responsibilities under a single agency having a single head.

We believe that this can best be accomplished by clearly establishing this authority and responsibility under an existing, organized, and operating agency such as the Civil Aeronautics Administration, headed by a single administrator. In our view, this is the concept intended by the Congress in the original enactment of the Civil Aeronautics Act of 1938 and that, because of a series of separate and unrelated steps to solve individual problems since that time, the effectiveness of the basic structure has been destroyed.

We believe that one of these steps, which we strongly opposed at the time, was the passage of Reorganization Acts No. 4 and No. 10, which destroyed the independence of CAA and placed that agency under the Department of Commerce. Actions since that time, including Executive Order 9781 on September 17, 1946, creating the nonstatutory Air Coordinating Committee, have diluted the authority of the Administrator until it has become confused and lacks a clear definition of the responsibilities for aviation functions. In order to make the Administrator directly responsible for this and other important functions under his jurisdiction, we believe that the Civil Aeronautics Administration should again be made an independent agency directly responsible to the Congress and the President.

In summary, we endorse many of the conclusions and objectives recommended by the Curtis Committee. We endorse the immediate need for full implementation of the present program of the CAA for airways improvement; the need for accelerated research and development and funds for that purpose. We support the recommendation for an independent Federal Aviation Agency. However, we believe that most of these objectives can be accomplished more rapidly and more efficiently by the immediate creation of an independent agency from the currently existing Civil Aeronautics Administration, with appropriate clarification of its areas of authority and responsibility. The authority for the operation of the airways system and the allocation of airspace, along with the research and development organization to keep the system current with user and national defense demands could be placed in an existing, organized agency.

The need for fast, decisive action to resolve the aviation facilities problem is now generally agreed. General Curtis and his associates have rendered a most valuable service in pointing the way to a three-step program to cope with these and other problems. We applaud these decisions, but we believe that a more realistic, expeditious, and practical implementation of them may be achieved with the revisions we have recommended.

We greatly appreciate the opportunity afforded to us to make our views known on this important legislation.

QUALIFICATIONS OF WITNESS CLARENCE N. SAYEN, PRESIDENT, AIR LINE PILOTS ASSOCIATION, INTERNATIONAL, AND INTERNATIONAL FEDERATION OF AIR LINE PILOTS ASSOCIATIONS

The Air Line Pilots Association is an association of the professional airline pilots of the scheduled United States air carriers. At present, it has a membership of over 15,000 active and inactive members employed by 51 airlines. The association represents airline pilots in all aspects of their professional life. It is their bargaining agent under the Railway Labor Act, maintains an extensive air safety organization in 145 councils scattered throughout the United States and a number

of foreign countries, and is spokesman for the airline pilot in his relationship with municipal, State, Federal, and international organizations.

The International Federation of Air Line Pilots Associations is a federation of the pilot-representing organizations of 25 countries and represents the professional pilots of practically all civil aviation in the world outside the Iron Curtain countries.

By way of personal background, I hold B. A. and M. A. degrees in geography and economics. I have been a teacher and an airline pilot. Some current activities include membership on the committee on operating problems of the National Advisory Committee for Aeronautics; executive committee of the National Air Transport Coordinating Committee; war air service pattern committee of the Defense Air Transportation Administration; National Aviation Noise Reduction Committee; executive committee of the Radio Technical Commission for Aeronautics; the Chicago Aero Commission; industry advisory committee of the Interdepartmental Aviation Manpower Committee; and the 1957 long-range planning committee of the Radio Technical Commission for Aeronautics.

PROGRESS ON THE ST. LAWRENCE SEAWAY

Mr. HUMPHREY. Mr. President, it is of intense interest to the citizens of Minnesota, and particularly to the great port of Duluth, that progress on the St. Lawrence Seaway now has passed the halfway mark and is running on schedule, and that the ships of many nations are now moving forehandedly to establish routes into and out of America's great heartland.

In fact, today in Detroit there is to be a ceremony commemorating the deepening of the Great Lakes channels. It was my privilege to submit to the Senate a resolution asking for a survey looking to the deepening of the channels of the Great Lakes to connect with the St. Lawrence Seaway. I am happy to note that progress has been made under the authorization and the appropriation which Congress made subsequently.

It will really be another year or two before all the channels will have been deepened to 27 feet and the port cities of the Great Lakes will have become an integral part of the great Atlantic port system.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an article entitled "Seaway Surge: Ship Lines Scramble for Great Lakes Routes, Start Expanding Fleets," written by Ray Vicker, and published in the Wall Street Journal of May 23, 1957. The article very dramatically points up the plans for converting the landlocked seas of the Midwest into America's fourth coast.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SEAWAY SURGE: SHIP LINES SCRAMBLE FOR GREAT LAKES ROUTES, START EXPANDING FLEETS—AIM IS TO GET INTO POSITION TO TAP INCREASE IN TRADE WHEN CHANNEL IS DEEPENED—CRUISING ABOARD THE "COLONIA"

(By Ray Vicker)

CHICAGO.—On the bridge of the motorship *Colonia* bound for Venezuela, dark-goateed Capt. Detlef Meestenburg, 31, dashing skipper of this German-flag Ahlmann Transcaribbean Line ship, studies the twinkling lights of Chicago abaft and off the port beam.

At his elbow, Capt. Paul Tetrault, 46, a happy-go-lucky French-Canadian pilot from Montreal, slides the handle of the engine room telegraph to "half ahead" (halb on the German language dial).

Leaving Chicago behind, the *Colonia* cuts north up Lake Michigan toward Milwaukee, Detroit, Toronto, and Montreal on a water route which is fast taking on an international character.

The Great Lakes-to-Atlantic passage is not new, of course. Small ocean-going ships have navigated the ways for many years, often offering shippers cheaper transportation rates than competing rail-water routes. But now, with construction of the St. Lawrence Seaway well underway and the prospect of a heavy increase in lake-to-ocean traffic, shipping lines already are scrambling to establish a firm toehold on the route.

Until the seaway project is completed, sometime early in 1959, only ships that can navigate the 14-foot-deep St. Lawrence locks can make the run. Deepening of the seaway will permit much larger ships, with drafts up to 27 feet, to sail the lake route

But shipping companies aren't waiting. Many are operating small ships over the route now; others are laying plans for doing so.

"Small ships that can squeeze through the present seaway are so much in demand that some are being chartered for more than the cost of obtaining big vessels four times their size," reports H. M. Holden, president of Great Lakes Overseas, Inc., Chicago-based agents for the Fjell, Oranje, and Swedish Chicago Lines.

This year, the 27 lines operating between Great Lakes and foreign ports have scheduled 450 sailings. Last year there were only 23 lines, and they had 384 sailings. In 1946 the 2 lines then in business had only 2 dozen sailings. Shipping men predict there will be 60 lines in the trade by 1960, a year after the seaway is completed.

BEER, CHEESE, FISH

This shipping boom is of growing importance to thousands of manufacturers in the Middle West, an area that originates nearly half of the Nation's exports. For Midwest consumers, it's providing an increasing flow of German beer, Dutch cheese, Norwegian canned fish, and hundreds of other foreign products cargoes that might have difficulty competing in these markets were it not for the savings of the direct water haul.

It's also laying the groundwork for much heavier traffic after the seaway opens. One of the problems in building this business is finding items both here and abroad that can compete in this trade. R. L. Kohl, president of the Midwest Steamship Agency in Chicago, which is agent for Ahlmann Transcaribbean, says: "We recently counted 125 ports of call between Quebec and Chicago where cargo could be developed."

Seaway construction now has passed the halfway mark and is running on schedule. Although costs thus far have been nearly 50 percent above original estimates, seaway backers say the tolls to be charged will not make the new route uneconomical. Lewis G. Castle, administrator of the St. Lawrence Seaway Development Corp. in Washington, nothing that the amortization period originally planned for 30 years can be stretched out to 50 years, declares, "Toll rates will be economic for users."

The current shipping surge, evidence that there will be heavy traffic over the lakes route when the seaway is completed, promises to produce a bonanza for shipbuilders.

Swedish Chicago Line now is asking for bids for five large cargo ships which would be placed in service after the spring of 1959. The Belgian Line has ordered several 8,000-ton vessels for Lakes-Belgium-Belgian Congo service. Norwegian America Line and the Fjell Line, both Norwegian-flag lines, will operate a joint service to Scandinavian ports with several modern cargo liners of between 7,000 and 8,000 tons deadweight, says a spokesman.

FRENCH LINE ON THE SEAWAY

The French Line is ordering two new vessels, the *Chicago* and *Cleveland*. Andre Bouteille, Chicago manager for the line, says the new ships will go into service when the seaway opens. Each ship will be 7,500 tons deadweight (total weight of the ship, including cargo-carrying capacity) and 450 feet long. The present system of St. Lawrence River canals limits the size of ships to about 1,500 tons deadweight.

Anthony Veder, owner of the Oranje Line, Rotterdam, and co-owner of the Fjell-Oranje Line, which now offers service to United Kingdom and continental European ports from the Great Lakes says: "Fjell-Oranje Line is arranging to provide deluxe passenger service between the Great Lakes and Europe. Our plans call for construction of 2 large vessels of the combination freight-passenger class which will accommodate 100 passengers each."

American shipping companies, up to the present, have been slow to enter the lakes-overseas trade. Now that the United States Maritime Board has approved the European and the Caribbean routes for subsidies, five companies are seeking ships for service.

"There is an enormous traffic potential," says Matthew S. Crinkley, executive vice president of the Isbrandtsen Co., Inc., of New York. He adds:

"Upon the opening of the St. Lawrence Seaway, Isbrandtsen is prepared to build or otherwise acquire suitable oceangoing vessels of 8,000 to 8,500 tons deadweight and fitted with refrigerator space, deep tanks for the carrying of bulk liquids, adequate hatches for bulky, large-dimension cargoes, and facilities for heavy lift." Estimated total cost of the 8 ships planned: Between $35 and $40 million. In the interim before completion of the seaway, Isbrandtsen is seeking to charter eight small vessels from the United States maritime reserve fleet.

"These are the only type vessels under United States registry available for service capable of meeting present requirements of the St. Lawrence River Waterway," says Mr. Crinkley.

Grace Line of New York is seeking four of these ships to connect Colombian and Venezuelan ports to the Great Lakes.

"Our intention is to serve the trade with the small ships until 1959," explains slim, polished Lewis A. Lapham, soft-talking president of Grace Line. "Then, we will transfer C–2's (larger vessels) into the trade. By 1962 or 1963 we expect to have tailormade ships."

Grace Line estimates the cost of building 4 to 6 vessels for the Great Lakes would be $25 to 30 million.

Other lines seeking small ships are: United States Lines of New York, 8; T. J. McCarthy Steamship Co. of Detroit, 4; and Einar J. Crown of Chicago, 2.

IN THE HOLD

Clamber down the steel ladder into the hold of the *Colonia*, and you soon discover why direct foreign trade is booming in Great Lakes ports. Stored in the lower hold is a 131-pound shipment of induction heating equipment consigned from Chicago to La Guaira, Venezuela. A check of freight tariffs show this shipment will reach its destination for $75.60. Shipped via rail to New Orleans and thence by ship, the rate would have been $114.58.

"Since June 1946, railroads east of the Mississippi have initiated 13 general freight rate increases totaling 98.2 percent," says George Weiss, chairman of the Great Lakes Overseas Freight Conference of Chicago, an association of overseas ship agents and operators. "Each increase has made the lakes route more attractive to exporters," he asserts.

Savings to shippers via the lakes route over competing routes vary. But authorities in the trade estimate the savings now average at least 15 percent, and sometimes reach over 50 percent. It often requires more time, of course, since Great Lakes ports are from 2,000 to 2,600 miles farther from foreign ports than east coast facilities. The *Colonia*, for example, allows 30 days for the one way Chicago to Venezuela run, which includes loading and unloading time. By rail, Midwest shippers allow 7 to 9 days to New York, and 14 to 19 days for the ocean haul to Venezuela, for a total time of 21 to 28 days.

Consolidated Food Processors, Inc., of River Grove, Ill., has a consignment of marshmallows aboard the *Colonia*.

"We are saving about 50 percent in freight rates by shipping via the lakes route instead of the rail-Atlantic port route," says Rudy Hernandez, export traffic manager at Chicago for the company.

Twelve hours after leaving Chicago, the *Colonia* eases into Milwaukee harbor, slips past the city's sewage disposal plant and berths at the municipal dock opposite the gleaming silver oil tanks of the Sinclair Refining Co.

Within minutes a heavy lift crane is loading a Geo. J. Meyer Manufacturing Co. bottle washing unit, a filling unit and a cooler destined for a brewery in Valencia with a total weight of 119,000 pounds.

COST COMPARISONS

"Approximately $1,700 will be saved in railroad freight to seaboard on the material sailing in the *Colonia*," says William M. Hodgins, of the Meyer sales department.

Also loaded is a consignment of 10 air-cooled engines.

"The savings on this shipment of 10 engines amounts to about $220 forwarding via the *Colonia* as against a rail shipment to New York and ship from there," reports Len Ruta, assistant export manager for Wisconsin Motor Corp., of Milwaukee, subsidiary of Continental Motors Corp.

He explains that the $3.22 per 100 pounds rail freight charge to New York is eliminated, for a savings of $103. A $17.50 cartage haul at New York also is eliminated. The firm can do without export packing when engines are loaded directly onto a vessel at Milwaukee. Shipments go in ordinary domestic packing at a savings of about $10 per engine. The ocean rate from Milwaukee to La Guaira of $157.50 is about the same as the rate from New York to La Guaira, so the rail, cartage and packaging savings represent a net gain.

Four and a half hours after docking at Milwaukee, lines are cast off. The *Colonia* chugs northward, bucking heading seas which burst in spray over her bow.

Twenty-two hours after leaving Milwaukee, the *Colonia* sails through the Straits of Mackinac which connects Lake Michigan and Lake Huron. Overhead the cables of the uncompleted $100 million bridge being built over the straits sway in the north wind.

That wind makes the voyager acutely conscious of the main limitation facing the St. Lawrence Seaway: For 4 months of the year the Great Lakes-overseas route is icebound.

"I draw my unemployment check every week through the winter," says Pilot Tetrault, a $42.50-a-day man when working 7 days a week through 8 months of the year. He confesses he would prefer his winters in Florida rather than in Montreal. "But the unemployment compensation office in Montreal won't forward my checks to Florida," says he.

Evening finds the *Colonia* on Lake Huron. The vessel, built in Bremen, Germany, in 1953, can haul 2,170 tons of cargo; but she can't load over 1,500 tons and still get through the 14-foot locks to the Atlantic.

Leaving Lake Huron, the *Colonia* threads down the winding channel of the St. Clair River, past a steady parade of long ore boats. Forty-four hours after leaving Milwaukee, the ship docks at Detroit Harbor Terminals in Detroit, just below the Ambassador Bridge linking Detroit and Windsor, Ontario. Waiting on the dock are 96 disassembled and crated Plymouth autos bound for La Guaira, plus an assortment of 3,800 pounds of Kerr Manufacturing Co. dental plaster and X-ray developer.

David Zajac, cargo agent at Detroit, says: "We could have booked considerably more cargo for this trip but there wasn't any more space."

Leaving Detroit, the ship passes the Detroit River Light and enters Lake Erie, shallowest of the Great Lakes. With the Canadian shore a dim, misty line off the port beam, the vessel sails the downbound ship lane, reaching Port Colborne, Ontario, and the Welland Canal at the lower end of the lake in 19 hours.

Here the voyager is made aware of another possible bottleneck when the deep-draft seaway brings a rush of additional ships into the lakes. Five ships are in the Welland Canal ahead of the *Colonia*. So the *Colonia* must tie to a dock at Port Colborne, awaiting her turn to navigate the eight locks.

Lake Erie drains into Lake Ontario over the 167-foot drop of Niagara Falls. It is the Welland Canal which allows ships to bypass the falls.

For many years the single lane of locks was sufficient for traffic on the lakes. Now, with foreign ships plying the lakes, bottlenecks already are occurring. Canada is proposing to build a second set of locks at a cost of $100 million. But, that's still in the future.

Where a normal passage might take 8 hours, the traffic-delayed *Colonia* requires 16. "Sometimes a ship may lose a day here," says pilot Tetrault.

Once in Lake Ontario, easternmost of the Great Lakes, it is only a short run to Toronto. At this port, with its 12 miles of steel and concrete berths, the *Colonia* picks up about 300 tons of powdered milk and steel forgings.

CHANGING PILOTS

In darkness the *Colonia* slips out of the harbor past Gibraltar Point, her 8-cylinder, 1,400-horsepower diesel engine vibrating steadily. In 14 hours the vessel is at the eastern end of Lake Ontario under the dandelion-sprayed bluff of old Fort Henry at Kingston, Ontario. Here pilots are changed for the St. Lawrence River run.

Impeccable, thin-moustached Capt. Vinton Keogh clambers up the ship's Jacob's ladder from a bobbing launch, wearing a homburg and a well-tailored suit.

The telegraph clangs and the ship chugs into the Thousand Islands where the St. Lawrence is gathering the waters of the Great Lakes for a rush to the sea.

In a few hours the river's speed warns of rapids ahead. Then comes the first of 21 locks which help ships bypass the fast water. These rapids form an effective barrier between Lake Ontario and the ocean port of Montreal. It is here that the widely heralded St. Lawrense Seaway is being constructed, where the swift river separates Ontario from upper New York. In effect the seaway is merely a 27-foot-deep replacement for the present set of 14-foot draft locks.

As the *Colonia* leaves the last lock she is within sight of Montreal's sprawling environs. With her voyage into America's heartland over, she points her stubby nose toward the channel which will take her to the Atlantic and thence to Venezuela.

ENFORCEMENT OF THE ROBINSON-PATMAN ACT BY PRIVATE PARTIES

Mr. HUMPHREY. Mr. President, Mr. Lee Loevinger, an eminent member of the Minnesota bar, recently delivered an important address before the section on antitrust law, of the New York State Bar Association. The title of Mr. Loevinger's address was Enforcement of the Robinson-Patman Act by Private Parties. Mr. President, I was particularly interested in the address because under my chairmanship of the Subcommittee on Retailing, Distribution, and Fair Trade, I found that the address pointed very directly to one of the most important laws on our statute books, namely, the Robinson-Patman Act, and its relationship to curbing monopolistic practices.

Although the address was delivered to a group of lawyers specializing in the practice of antitrust law, I feel that Mr. Loevinger's remarks have a social and economic significance of broad public appeal. It is important that all of us who are striving to preserve a free and competitive system of private enterprise in our Nation understand fully the role played by private antitrust enforcement in attaining such an objective. This seems particularly true at this time, in view of the determined campaign being conducted by the enemies of antitrust legislation to curtail the effectiveness of private remedies as a means of antitrust law enforcement.

Therefore, I ask unanimous consent that Mr. Loevinger's address be printed in the RECORD at this point in my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ENFORCEMENT OF THE ROBINSON-PATMAN ACT BY PRIVATE PARTIES

(Address by Lee Loevinger, of Larson, Loevinger, Lindquist, Freeman & Fraser, Minneapolis, Minn., delivered before the section on antitrust law of the New York State Bar Association, January 24, 1957)

Fortunately it is unnecessary to comment on the obvious contrast between the eminence of the preceding speakers and the present speaker since this is irrelevant to the topic. However, this disparity should not be taken as indicative of any corresponding difference in the significance of the respective modes of enforcement or groups represented. A principal purpose of permitting private enforcement of a law such as the Robinson-Patman Act obviously is the dual one of giving those who are the objects of the law's concern sanctions for protection against violation and redress in case of injury from violation of the law. In the case of the Robinson-Patman Act it is clear that the primary objective of Congress was the protection of small business. My task is to attempt to determine from the cases in what manner and how effectively the law has operated to afford such protection and redress.

Achievement of the objective of protecting and preserving small business is, in my view, of fundamental importance. The survival of a free economy, which is ultimately essential to our civil and political liberties, depends upon the maintenance of conditions in which small businesses can be born and live. Protection of the public against exploitation and against high or discriminatory prices, however worthy that goal is, may be less important to our ultimate welfare than securing multiplicity and diversity in the enterprises of our business community. From which it seems to follow that the objectives of private enforcement of this law may be quite as significant as those of public enforcement.

The first problem that arises in connection with private enforcement of this act is: Who is protected? Who may bring an action charging violation? The language of the statute is all inclusive, stating that anyone who may be injured in his business or property by violation of the act has a cause of action. However, the decisions somewhat limit this broad language. The courts have refused to include within this provision a stockholder, officer, or director claiming injury to the business of a corporation, or a creditor claiming damage to his debtor's business. Purchasers from a discriminatory seller are, of course, clearly entitled to private remedies, and a typical case under the act involves a suit by service-station operators against a gasoline refiner or distributor based on a claim that gas was sold to competing station operators at a lower price or with larger discounts. It is not necessary that the purchaser be a retailer or that the discrimination be in favor of a competitor of the purchaser if there is discrimination injurious to the purchaser. A wholesaler whose business is injured because the seller gives lower prices to some retailers than to the wholesaler is likewise entitled to a remedy. On the other hand, a trade association of purchasers, not being a real party in interest, is not entitled to bring suit in its own name.

In a number of cases the courts have distinguished between a purchaser and a customer, or a purchaser and a past purchaser or prospective purchaser. There must be an actual sale and purchase of a kind forbidden by the act, and a refusal to sell or to negotiate, or even the quoting of a discriminatory price, is not an actionable discrimination under this act. Similarly, it has been held that a purchaser from a purchaser has no right of action against the original seller. Although the court in this case says the plaintiff has no right of action because he is not a purchaser, a much sounder basis for the result seems to be the fact that there was no discrimination between purchasers from the defendant. The cases are clear that a competitor of a discriminating seller may sue if he is injured, as by losing business on account of the discriminatory price. A competitor need not be a competing seller, but may be the distributor for a competing seller. On the other hand, the competitor of a purchaser who is not himself a purchaser from the seller has no remedy against the seller merely because the seller gives terms or services which the competitor of the purchaser would like to receive.

The principles established by the Robinson-Patman Act for the protection of purchasers are not, of course, confined to small purchasers. In one case a seller engaged in commercial bribery of the president of a large purchaser in order to secure the business of the purchaser. Upon discovering the facts, the corporate purchaser was able to recover from its then former president and the seller three times the amount which it had paid in excessive prices on account of the commercial bribery. Sometimes the protection of the law is invoked by the seller, as in the case where a publisher claimed redress against a distributor of its publications for exacting a rebate from the publisher which was not exacted from other publishers. In this case the court answered the argument that the aim of the law was only to restrict sellers and protect buyers by pointing to subsection of section 1, which the court said was passed primarily to deal with the situation of a large buyer exerting economic pressure on a seller to obtain a rebate.

It is, of course, indispensable to a private right of action under the act that first there be a substantive violation of the actual terms, rather than the general principles, of the act. The mere fact that someone may be injured by some form of discrimination or price cutting not within the prohibitions of the act does not give rise to a cause of action. For example, the manufacturer of a building material brought suit against a contractor because the contractor was using a more expensive competitive building material in houses which he contracted to build at the same or a lower price than houses in which the plaintiff's material was used. The court held that there was no grounds for relief since the transactions involved construction contracts rather than sales, and so were not within the act. However, the complexities of the substantive provisions of the law will be fully explained and clarified by the able speakers who follow on this program, and happily lie outside the scope of my topic.

There are 2 or 3 substantive points that are peculiarly involved in the private rights of action and therefore deserve mention. One of the most interesting issues is whether section 3 of the Robinson-Patman Act is one of the antitrust laws for the purpose of affording a private remedy. This issue had been considered in a number of district court opinions up to November of 1956, and the preponderant majority held that a private action could be founded on section 3. On November 1, 1956, the Court of Appeals for the Seventh Circuit handed down two opinions holding squarely that no private action would lie for damages caused by violation of section 3. The seventh circuit based its opinion on the legislative history of the Robinson-Patman-Borah-Van Nuys legislation, upon the comments of the Attorney General's Committee, and, to some extent upon the opinion and reasoning of the district court in the case of *Vance* v. *Safeway Stores*. But apparently unknown to the court, the Vance case was then pending on appeal before the 10th circuit. Less than a week later, on November 6, 1956, the 10th circuit rendered a decision reversing the district court opinion in the Vance case and holding that section 3 was one of the antitrust laws for which a private civil remedy was available. The 10th circuit did not mention the 7th circuit decision, which it presumably had not yet seen, but based its opinion on the legislative history and purpose of the law and on the weight of district court authority. At the present time there is a clear and irreconcilable conflict between the circuits that must be resolved by the Supreme Court. I am not going to relieve the Supreme Court of its responsibility by undertaking to say how this issue should or will be decided. The points at issue are nice ones, though time will not permit their consideration now. However, for purposes of taking a present position, I would venture the guess that the odds favor the position of the 10th circuit. I say this because the majority of district court opinions support this view; the Supreme Court has clearly assumed, although not expressly decided, that section 3 can support a private action for damages; and since the conflicting opinions of the 7th and 10th circuits have been published, a district court in New Jersey has handed down a decision holding the 10th circuit position to be the more persuasive. Perhaps one footnote should be added to this topic. Regardless of how the Supreme Court finally decides this issue, one of the seventh circuit decisions suggests the possibility that section 3 refers to conduct of a sort which, regardless of statute, will give rise to a common law right of action if it results in injury to another's business.

A juridictional requirement for suit under the Robinson-Patman Act is that the defendant be engaged in interstate commerce although *Moore* v. *Mead* made it unmistakably clear that it is not necessary for the plaintiff to be engaged in commerce or even in activities effecting commerce. One district court has indicated that *Moore* v. *Mead* leads it to the conclusion that a plaintiff engaged in interstate commerce may have a private remedy against an intrastate competitor who engages in discriminatory practices. This seems somewhat dubious, particularly in view of the fact that the courts generally have been somewhat stricter in requiring a showing of interstate commerce activity in private actions under the Robinson-Patman Act than in other types of antitrust actions.

A plaintiff who seeks a private remedy under the Robinson-Patman Act must establish that the defendant's illegal conduct was the proximate cause of demonstrable injury to plaintiff. But it is not necessary that the plaintiff go further and show that defendant's illegal acts have also caused injury to the public. In most cases it would probably be impracticable for a plaintiff to make such a showing within the scope of the issues open in a private suit, except insofar as a violation of the antitrust laws in itself constitutes an injury to the public interest, which perhaps is as much as a plaintiff is required to show in any case.

Some of the opinions suggest that the reason for permitting private enforcement of any of the antitrust laws is to assist the public agencies by providing an auxiliary force of private investigators, and, presumably, plaintiffs. Although this may well be a consideration involved in legislative policy, it is certain neither the origin nor the foundation of the right of private parties to invoke these laws in private litigation. On the contrary, the historical fact is that the antitrust laws grew out of private rights asserted in litigation, rather than out of policies enforced by public authorities.

The origin of the doctrine of restraint of trade is in the Dyer's case, decided in 1415, in which the defendant avoided the payment of damages for breach of contract by successfully asserting that the contract was invalid because contrary to public policy as in restraint of trade. A long line of both English and American cases have developed this doctrine in cases between private litigants, and it is still the law that contracts in unreasonable restraint of trade are unenforceable, regardless of statute. Similarly, the first legal denunciation of monopolies was by the judges of the king's bench in the private suit of *Darcy* v. *Allen*, decided in 1602. The first legislative prohibition of monopolies was by the Statute of Monopolies, passed by Parliament in 1623; and according to Blackstone, this statute made monopolizing an offense punished by the award of treble damages and double costs to anyone who might be injured thereby. The principles embodied in these cases and statutes are part of our judicial heritage, and became part of the American common law following the Declaration of Independence. So the private enforcement of the antitrust laws is not an innovation engrafted on a basic scheme of public enforcement, but a traditional part of our legal procedure with a history as old as the principles of the laws themselves.

The variety of legal procedures by which private enforcement of the Robinson-Patman Act may be undertaken is about as wide as the scope of modern practice and the ingenuity of the legal profession. The most ancient and traditional common-law method of private enforcement of such rights is by their assertion as a defense to a claim based on contract or tort rights. However, the scope of such a defense has been definitely limited by the Supreme Court decision in the Bruce's Juices case. The Court held in that case that, as a matter of Federal law, discriminatory pricing in violation of the Robinson-Patman Act is not a defense to an action for the price of goods sold and delivered. The majority opinion points out that discrimination must be proved by at least two sales, so that the illegality is not inherent in the contract or transaction at bar, and refers to a line of authority holding that antitrust violation is a defense to an action on a contract only where the contract is intrinsically illegal. It should be noted that

the Bruce's Juices decision does not eliminate a Robinson-Patman defense altogether. The defense of illegality under the act can still be raised in either Federal or State courts where the illegality is inherent in the contract, as in the case of a provision for payment of brokerage to a buyer contrary to subsection (c) of section 1. Further, if a State should hold as a matter of the public policy of the State that discriminatory pricing contrary to Federal law is a defense to an action for the price of goods sold and delivered, as the North Carolina court held under the Clayton Act, it would appear that such a defense would be effective in the courts of that State. In the absence of such a ruling by the State courts, the Federal courts will undoubtedly follow the rule of the Bruce's Juices case. It is an open question whether the Federal courts would not be required to permit such a defense in a case arising in a State whose courts have allowed such a defense.

In any event, it is clear that affirmative relief for damages or an injunction cannot be given in the State courts for violation of Federal antitrust laws, the Federal courts having been given exclusive jurisdiction to grant such remedies by Congress. Judge Hand has stated that this exclusive jurisdiction implies that even where the same issue as to Robinson-Patman violation is raised as a defense in a State court action and as a basis of a claim in a Federal court action between the same parties, the Federal courts will not be bound by the State court's determination of the issue. Emphasizing further the complete independence of action and attitude of State and Federal courts in such a situation are cases holding that where a Robinson-Patman defense is raised in a State court action at the same time that a Federal court suit is pending between the parties based on the same facts, the State court will not stay its proceedings pending determination of the Federal court action, the Federal court action cannot be stayed pending determination of the State court suit, and the Federal courts have no jurisdiction to enjoin the State court proceeding.

Where a Robinson-Patman violation is asserted as a defense to a suit other than a contract action, the court will recognize the defense only if the violation bears an intimate, immediate and necessary relation to the relief sought or the claim asserted. So such a defense will not be available in most patent and copyright suits, or other similar litigation. It is worthy of note that the Lanham Trademark Act of 1946 specifically recognizes the use of a trademark to violate the antitrust laws as a defense or defect, although it does not specify what the effect of such a defense or defect is or in what type of action it may be raised. So far there has been no authoritative determination as to what use may be made of antitrust violation as a defense, or grounds of opposition, in trademark litigation.

The basic procedural means for enforcing private rights under the Robinson-Patman Act, and other antitrust laws, is, of course, the action for treble damages, which is specifically authorized by the Clayton Act. Under the 1955 amendment to this act, the United States Government has the right to recover the amount of actual damages sustained by it as a result of antitrust violation. But the assertion of a defense against a claim, or a demand for damages by no means exhausts the procedural arsenal of one alleging a Robinson-Patman violation.

Private enforcement of the act may also be sought by means of a declaratory judgment action, either to have a seller's pricing practices declared improper or to invalidate the executory part of an existing contract between the parties. A number of cases have sought a prohibitory injunction against the continuance of practices alleged to violate the Robinson-Patman Act. However, the courts have been reluctant to issue injunctions, particularly preliminary injunctions, against such practices for two reasons. It has been said that it is not the business of the court to regulate an industry or impose its judgment as to past events on the operation of the market in the future, and in addition, any damages that a plaintiff may suffer by reason of such practices are measurable in terms of money, and therefore not irreparable. On principle, as the cases have recognized, there is no reason why a court which has found an established practice to violate the Robinson-Patman Act in a private suit should not issue an injunction against continuance of the practice. However, I have found no reported case in which an injunction has actually issued.

A Robinson-Patman violation may be asserted as well by way of counterclaim as by way of original action against the adverse party, under the broad provisions of rule 13 of the Federal rules. In view of the limitations on the use of such allegations as a defense, a plaintiff would seem well advised to assert such a claim as a counterclaim when an action is in Federal court. When action is brought in State court, however, the exclusive jurisdiction of the Federal courts to award affirmative relief would preclude the pleading of such a counterclaim.

The principles of pleading a defense or grounds for relief under the Robinson-Patman Act appear to be the same as those applicable to other antitrust actions. Because of the potential range of issues and evidence, the courts require the facts and their relation to each other to be stated in somewhat greater detail than in ordinary cases. But only ultimate facts, and not evidence, are required to be pleaded, and apparently no harm is done if conclusions are pleaded. Although the Robinson-Patman Act permits certain discriminations or differentiations in price, a plaintiff is not bound to negative in his complaint all of the justifications or defenses. When the pleadings have been deficient, the courts have generally been liberal in allowing amendment.

Where the practices complained of affect a number of enterprises an interesting problem arises as to the scope of permissible joinder of parties and the possibility of a class action. Two cases have held that where the practices of a single seller affect a number of purchasers in the same manner, several of the purchasers may join in bringing a spurious class action under rule 23 on behalf of all similarly situated parties. However, damages can be awarded only to those members of the class who intervene individually and assert and prove damages to themselves. On the other hand, where the allegations indicate that the class involved is vague, indefinite or limitless, a class action will not be permitted.

With respect to damages, apart from the general problems involved in establishing by satisfactory evidence that plaintiff has been damaged and how much, the principal issue that has arisen in Robinson-Patman cases is whether recovery should be permitted on the theory of general damages or of special and consequential damages. General damages would, of course, limit the damages to the amount of the discrimination in price, or the cost or value of the services furnished. Special or consequential damages would permit recovery, upon proper proof, of loss of business or anticipated profits by plaintiff. General damages have been allowed in at least one case. But the decisions have unanimously said that consequential or special damages are recoverable; and several cases, including a recent second circuit decision, hold that the plaintiff must prove special damages in order to recover at all. The second circuit position now is that the general damages may set a limit to the recovery, but special damages are the only proper measure of recovery.

An interesting problem of damages is presented in the case of *Sun Cosmetic Shoppe* v. *Elizabeth Arden*. There the plaintiff was engaged in intrastate business and the defendant in both interstate and intrastate business. Plaintiff alleges damages resulting from discriminatory allowances given by defendant to other purchasers who were competitors of plaintiff both in the same and in another State. The question then arose whether or not plaintiff could recover damages for diversion of customers to competitors located in the same State, as well as to competitors located in another State. (Not mentioned by the court, but possibly more troublesome to plaintiff's lawyer might be the problem of showing what amount of damage is attributable to these different competitors.) The Second Circuit left this question open, but the decision of the Supreme Court in *Moore* v. *Mead* seems to be a clear holding that damages are recoverable for the business lost to intrastate as well as interstate competitors.

The substantive defenses to a charge of Robinson-Patman violation, such as meeting competition, cost justification, and equal availability, are, of course, available in private civil actions. Indeed, one court has said in such a case, that a seller in competing may not only meet the equally low price of a competitor but may go below it without incurring liability for violation of the act. On the other hand, a district court has held in a "gas price war" situation that the act permits discriminatory pricing in order to enable a seller to meet price competition, but does not permit discriminatory allowances by a seller in order to enable his customers to meet competition. There is conflict among the decisions in private actions as to what must be shown for purposes of cost justification; but two recent opinions in private suits hold that a seller who shows his price was to meet competition need not show that the competitive price was lawful, and that conjectural accounting estimates of "intangible cost savings" are admissible in support of a cost justification defense, even in the absence of supporting records.

Defenses asserted only in private actions are pari delicto, and unclean hands, or complicity on the part of plaintiff. But in *Kiefer-Stewart* v. *Seagram* the Supreme Court severely limited such defenses by holding that infraction of the antitrust laws on the part of plaintiffs is not a defense to a private action based on antitrust violation by defendants. This rule clearly applies to Robinson-Patman Act cases. Indeed it is dubious whether anything is left of the pari delicto defense now, although it is still asserted occasionally. The Kiefer-Stewart and Bruce's Juices rules seem to indicate that, in this field at least, the attitude of the Supreme Court is that when a claim is asserted, either ex contractu or ex delicto, it shall be met on its own merits and not by pointing out derelictions in the conduct of the adversary.

The most important defense peculiar to private antitrust actions is the statute of limitations applicable to damage suits. Fortunately this requires little comment now. Prior to 1955 there was no statutory limitations period in the Federal antitrust laws, and Federal courts had reference to State laws to determine the period of limitations. This resulted in diversity and confusion as to the length of the limitations period, the principles by which it was to be determined, and even as to whether it depended on the law of the forum (which was the majority view), or the law of the place where the cause of action arose. As a result, Congress passed the act of July 7, 1955, which became effective in January 1956, providing that any cause of action for damages under the Federal antitrust laws should be barred unless suit was commenced within 4 years after the cause of action accrued, or within 1 year

after termination of a Government suit based upon the same conduct.

In considering private suits for enforcement of the antitrust laws, including the Robinson-Patman Act, some courts have said that these statutes are to be regarded as remedial, at least insofar as they afford private remedies. Other courts have openly indicated skepticism and suspicion of such actions, suggesting that the evidence requires the closest scrutiny, that suits should be allowed only in the rarest cases, and that proof should be stronger than in an ordinary civil action. Although neither the statutes nor common law principles seem to justify such an attitude, there can be little doubt that many courts do regard private actions, particularly damage suits, under the antitrust laws with skepticism or suspicion.

In the period of roughly 20 years from the enactment of the Robinson-Patman Act to the end of 1956 there have been, as far as I can determine, about 75 reported cases in which some form of private enforcement of the act has been sought in the Federal courts. This represents the approximate number of cases or controversies, not the number of opinions, since many cases have resulted in several opinions at various stages of the litigation, and a few opinions have disposed of more than one case. Note that this represents only the cases that have been reported at some stage, since I have had no means of making a systematic investigation of unreported cases. However, it seems fair to take this group of cases as reasonably representative of the efforts at private enforcement of the act.

Of the total number of approximately 75 cases involving private suits under the act, the reported disposition is as follows: No final disposition is reported for 28 cases in which interlocutory rulings of one kind or another have been made. Seventeen of these 28 rulings have favored plaintiffs, but not much significance can be attached to these since most of them involved merely the denial of a motion to dismiss the complaint, or some similar preliminary action. Apparently some of these cases were settled and some were abandoned by the plaintiff.

Final judgments for defendants were entered in 41 of the 75 cases; the judgment for defendant having become final in the district court in 13 cases, and judgment having been entered after an appellate court ruling in 28 cases.

Final judgments for plaintiffs were entered in just 6 of the 75 cases. Judgment for plaintiff became final in the district court in one of these cases. This involved a summary judgment in a declaratory judgment action to declare illegal and unenforceable the executory portion of a contract between the parties. No damages were involved.

In 5 reported cases, out of the total of 75, a money judgment in favor of plaintiffs has become final, in all of these after an appellate court ruling. In *Elizabeth Arden* v. *Gus Blass*, the court of appeals affirmed a judgment for plaintiff in the amount of $3,030 plus attorney's fees. The Supreme Court denied certiorari, after which the plaintiff was presumably paid. This judgment represented three times the amount of the difference in allowance for a demonstrator paid by the defendant to plaintiff and to plaintiff's next-door competitor.

In the American Cooperative Serum case the plaintiff recovered damages based upon the amount lost by being forced to reduce its prices to meet the competition of another association that was given a lower price than plaintiff. This lower price was also lower than the public price schedule of defendant that had been filed with the Agriculture Department under the Federal Serum and Virus and Anti-Hog Cholera Serum Acts. In this case the plaintiff presumably collected its judgment in the amount of approximately $15,850 after the Supreme Court denied certiorari.

In the cast of *Moore* v. *Mead*, after the plaintiff was driven out of business by discriminatory price cutting of his competitor, he brought suit in Federal court. At the close of plaintiff's case the district court dismissed the action. The court of appeals affirmed. The Supreme Court reversed. The court of appeals then receded from its position and remanded the case for trial. Plaintiff had a verdict in the district court. The court of appeals reversed. The Supreme Court again granted certiorari and reinstated the judgment of the district court. After two trials, two district court decisions, three court of appeals decisions, and two Supreme Court decisions the plaintiff had a judgment for treble the loss of his business and attorney's fees in the total amount of $68,400.

The Kentucky-Tennessee Light & Power case involved commercial bribery in which the defendant had paid a commission to the former president of plaintiff in order to make sales of coal at excessive prices to plaintiff over a period of years. The facts were apparently virtually undisputed and some of the defendants paid a substantial sum to plaintiff prior to trial. This amount was credited against the final judgment which was affirmed by the court of appeals in the amount of $176,364.

The largest reported judgment was recovered by Bruce's Juices in a treble damage action brought after it had failed to establish discriminatory pricing as a defense in a suit brought for the purchase price. The first suit involved decisions in the State trial court, the Florida Supreme Court, and the United States Supreme Court. The treble damage action involved a district court decision and two court of appeals decisions. After certiorari was dismissed plaintiff had a final judgment for treble its total damages plus all attorney's fees in the aggregate amount of $220,000.

Although this undoubtedly represents a prejudiced opinion, my own feeling after examining these cases is that based on the amount of litigation involved and on the reasonable value of legal services in such matters, these judgments were not quite adequate to compensate plaintiffs' counsel for the work involved in securing them, even if the entire amount of each was paid to counsel, which I'm afraid was not the case.

What conclusions can be reached as to the utility and effectiveness of private enforcement of the Robinson-Patman Act after a review of the reported cases? I think these are several. It seems apparent that the interpretation and application of the statute tends to be much more restrained and conservative in private suits than in Government actions. The third circuit has admitted as much in refusing to follow FTC precedents in a treble-damage action. As another example, the conjectural cost justification which secured a defendant's verdict in *Reid* v. *Harper & Bros.*, would probably not have been received in an FTC proceeding, and certainly would not have so far influenced the decision. In any event, it is clear that the courts have not lost their heads in awarding damages to plaintiffs in such litigation, and that the treble-damage provision has been applied most conservatively, both as to the situations in which liability has been imposed and as to the amount of damages awarded. Although private actions could be abused, and many lawyers as well as businessmen fear such abuse, the reported cases indicate that the courts have been very careful to prevent any abuse in this field.

One of the undeniable virtues of private enforcement of the law is that it is automatic and does not require an army of Government agents or a vast bureaucracy. It seems to me that without the aid of the private enforcement process, our Government antitrust agencies would necessarily be much larger than they are. The Federal court for the southern district of New York has suggested that it is the reliance on private enforcement that underlies the elimination of pari delicto and unclean hands as defenses in these cases. If these defenses were allowed, it is said, the public interest would be caught in the crossfire of wrongful conduct by the litigants, with both free to continue their illegal activities until such time as the Government might intervene. Permitting the prosecution of the respective claims by each party, without the interposition of these defenses, results in enforcement action to terminate the illegal activity by both parties. Walter Lippmann contends that our prospects of freedom depend upon seeking the solution to social problems in the readjustment of private rights rather than in public administration. Lippmann says, in substance, that the genius of the common law is the meeting of problems through procedures of private rather than public law enforcement, and that this marks the method of freedom as opposed to the tendency of Government enforcement to become authoritarian. The argument is sufficiently cogent to command consideration.

Private enforcement of the Robinson-Patman Act, particularly by treble damage actions, provides a sanction for enforcement which is probably more effective than the bare statistics as to number of plaintiffs' judgments would indicate. Section 3 of the act carries criminal penalties; but these are very rarely invoked, and, I am sure most of you would agree, should be invoked only in the most extreme cases. On the other hand, under the Ruberoid decision, the FTC cannot secure an enforceable order against Robinson-Patman violations until it has shown at least two successive violations by the same party. Consequently, the possibility of being required to pay damages is the only real penalty risked by violation of Robinson-Patman in most cases. Certainly most businessmen will do their best to comply with the law regardless of whether or not they are threatened with penalties for violation. Actually law enforcement would be quite impossible unless there were such voluntary compliance by the majority of citizens. But a number of marginal situations always remain in which the potential sanctions, or lack of them, provide the impelling incentive to conduct that may fall on one side or the other of the line drawn by the law. Here the possibility of a damage suit may be quite effective. Furthermore, it is essential for the protection of those who do voluntarily comply with the law that there be effective sanctions to control those who will not comply without them. Thus, it seems to me that the sanctions provided by private enforcement are needed in this area.

Yet it is clear that private enforcement of this law does not altogether eliminate the need for public enforcement. Situations are conceivable in which the public interest may requir enforcement action but no private party is both legally and economically able to bring an action. Further, a survey of the cases indicates that private enforcement is effective only where the violation is relatively gross or obvious. The conservatism of the courts both in application of the act and in the fashioning of remedies in private suits may not wholly meet the purposes of the act or the needs of the public interest.

Therefore, an examination of the cases involving enforcement of the Robinson-Patman Act by private parties suggests these conclusions: The redress afforded by such actions has been conservatively awarded with no evidence of abuse in the courts; the existence of such a mode of enforcement has provided an effective and necessary sanction for the act; and such procedure has some advantages over Government action both

for potential parties and for society; but private enforcement as administered by the courts is an important corollary to and not a substitute for public enforcement of the law.

CONSIDERATION OF COMMITTEE AMENDMENT TO THE HOUSING ACT OF 1957

Mr. KNOWLAND. Mr. President, I should like to address an inquiry to the distinguished Senator from Alabama [Mr. SPARKMAN], who is handling on the floor of the Senate the so-called Housing Act of 1957. I wish to be sure that we have a clear understanding of the procedure to be followed in connection with the committee amendment and other amendents.

I understand that the committee amendment or committee substitute has not yet been acted on. I wish the RECORD to show clearly that if the committee amendment is adopted, the customary procedure in that connection will be followed, namely, the bill as thus amended will be treated as a bill de novo, and that subsequent amendments which may be submitted will be considered as being in the first degree, so that no parliamentary right will be waived by adoption of the committee amendment.

Mr. SPARKMAN. It is my understanding that that will be done, and that the Chair will make such an announcement when the committee amendment is called up.

Mr. KNOWLAND. I wanted to be sure that we had that understanding.

Mr. SPARKMAN. That is correct.

CENTRAL PROBLEMS OF THE HYDROGEN AGE

Mr. HUMPHREY. Mr. President, it is safe to say that during recent weeks, public interest and concern over the central problems of the hydrogen age have reached a level unknown before. Whether the question be one of military strategy, defense allocations, continued H-bomb testing, sharing our nuclear knowledge with our friends and allies, implementing the President's atoms-for-peace proposal, or estimating the genetic and other physical dangers from fallout, these are problems which now are uppermost in the minds of the American people.

Undoubtedly one of the clearest and most intelligent voices in this whole field, Mr. President, is that of Atomic Energy Commissioner Thomas E. Murray. He has expressed his views without fear or favor, and his usefulness as a member of the Atomic Energy Commission has been of historic importance to his country and the world. The May 6 issue of Life magazine contained an article by Commissioner Murray on the military uses of nuclear energy. His article is entitled "Reliance on H-Bomb and Its Dangers." I ask unanimous consent that the text of Commissioner Murray's article be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RELIANCE ON H-BOMB AND ITS DANGERS—AEC OFFICIAL ARGUES FOR SMALLER NUCLEAR ARMS TO AVOID SLOW DEFEAT

(By Thomas Murray)

The recent British White Paper on Defense dramatically thrust into the forum of public argument the central issue of our times—the military uses of nuclear energy. It also defined the major focus or argument in this sentence: "The Free World is today mainly dependent for its protection upon the nuclear capacity of the United States."

Will the United States be strong enough to assume the staggering burden thus quietly imposed upon it? Are we moving, with sufficient sureness and speed, toward the development of a nuclear capacity that will be adequate in all respects for the protection of the Free World? These are the grave questions that have now been opened to public discussion. I shall argue that the structure of our defense policies needs revision if we are to discharge successfully the full range of military responsibilities that we now bear.

The protection of the Free World absolutely demands that two dangers be avoided. One danger is the so-called "war of survival," waged with the immense new thermoclear weapons. It is altogether possible, as I shall explain, that no nation would survive such a war. In order to avoid this danger the United States has hitherto laid heavy emphasis on the production of megaton bombs. The hope has been that this air-nuclear-retaliatory capacity will deter an enemy attack massive enough to launch us into a war of survival.

However, this heavy emphasis on megaton bombs has itself created the second danger, namely, the possibility of piecemeal defeat at the hands of international communism. We know that the enemy has made hydrogen bombs. We must suppose he has a megaton stockpile. The umbrella of a nuclear stalemate has been raised over the earth. For all we know, the enemy may have assisted in raising the umbrella precisely in order to provide a cover for a program of cautious aggression. In any case, we can be sure that in the perilous safety of its shade he will continue to act according to his nature, as a criminal outlaw. It is not likely that his outlawry will be so outrageous as to pull down the umbrella upon himself and upon us in a common ruin. But there will be minor outrages, as there have been. Since megaton bombs are designed only for desperate uses, the danger is that in moments of minor outrage our only recourse will be to moral indignation.

That is to say, we shall be defeated, on each successive occasion when a minor aggression occurs, as in Hungary. Moral indignation is no substitute for the ability to protect by force the decencies of human life. Whatever the value of the big umbrella, we urgently need to have that decent, nicely calculated measure of nuclear force, valid as a threat and valid in use, which will deter or halt the minor aggressions of an enemy who in the ultimate instance will yield to no other suasion than force.

Sudden destruction or slow defeat—both of these alternatives must be ruled out with all the certainty that human prudence can achieve. The ruin of the physical fabric of civilization is too awesome a prospect to contemplate. Even more intolerable is the prospect of enforced submission to the injustice of creeping Communist domination. The problem is to find the path of policy that will lead us between these dreadful alternatives.

The presently prevailing policy of emphasis on megaton weapons may have saved us from sudden destruction—so far. But if we are to avoid the risk of slow defeat, we now need a new policy of emphasis on small nuclear weapons. The urgent demand of the moment is for a program of rational nuclear armament. I have been using this phrase to describe a structure of policies that will result in a stockpile that exhibits a properly adjusted balance between large and small nuclear weapons—all manufactured with an eye to their military usefulnesses, as these are calculated in the light of Communist military intentions.

A PATH TO PEACE WITH JUSTICE

Admittedly, perils lurk on both sides of the path of military and moral reason to which I am pointing. Nonetheless, though the path is lined with perils, at least it is not headed straight for them. It can lead us to that measure of military security that may legitimately be hoped for in a world where total security has become a vain dream. Moreover, it can also lead us toward the moral goal described by President Eisenhower in his second inaugural—"the building of a peace with justice in a world where moral law prevails."

Four factors have hitherto diverted us from the path of rational nuclear armament.

The first factor was technological. In the whole course of World War II the Allied air forces let loose upon the enemy 1.5 million tons (one and a half megatons) of explosives. After the experiment at Eniwetok in November 1952, we had the secret of a weapon whose explosive force surpassed by many times the total World War II megatonnage. Weapons technology had hit upon an "open end." The realization was quickly reached that there are no necessary practical limits to the megaton size of H-bombs.

As an engineer, I understand the seduction exerted by a technological "open end." It is the instinct of technology to exploit the maximum possibilities of every discovery. Weapons technology could not have been expected to control its own instinct; the control should have been imposed on it by military policy, which judges the usefulness of weapons.

But here the second factor entered. Weapons technology seemed now to have fulfilled the military planner's perennial dream of the irresistible weapon. In particular, the H-bomb seemed to be the ideal weapon with which to justify the doctrine of strategic air attack and thus to furnish warrant for the dominance of the air arm. So it happened that military policy, under the spell of its own dream, fell captive to the technology that seemed to have realized it.

The captivity was reinforced by the third factor—the impact of world events. For instance, Korea made real the threat of Communist world domination; and it raised the specter of a general war. In response, America had to be made "strong." However, it was not a question of acquiring limited strength for limited wars. Korea created a popular revulsion against the very idea of limited war. A kind of abstract strength was wanted—the kind of "absolute" strength that would match the "supreme" threat of world domination. This abstract strength could now be given very concrete definition in terms of the H-bomb. Further emphasis was thus laid on the production of these "absolute" weapons.

The fourth factor furnished the final emphasis—the powerful factor of costs. The general public is likely to assume that a "big" bomb must cost more than a "small" bomb. Moreover, given the plentiful supply of uranium ore out of which bombs are made, the popular assumption might be that we have by this time manufactured a complete collection of nuclear weapons, adapted to all possible uses—big weapons, and small ones, and middle-sized ones, all stocked and shining on the shelves.

The matter is not so simple. The cost of weapons involves not only money and materials but also a factor called "efficiency" in the use of materials. There is no lack of uranium ore; but there is only a limited number of the plants in which the ore is processed into fissionable materials. Our existent industrial complex for this purpose represents roughly a capital investment of $6.7 billion. In consequence we have only a limited amount of weapons-making material. Here the factor of "efficiency" enters.

A given quantity of material can be utilized in such a way as to produce a very large explosion. The same quantity of material can also be used in another way, to produce a smaller explosion. If the "efficiency" of a weapon is to be measured in terms of the ratio between the quantity of fissionable material used and the explosive results obtained, it is obvious that the small weapon is less "efficient" than the big one. Consequently, the small weapon is also proportionately more costly, in terms both of material and of dollars.

These four factors, therefore—the technological open end, the dream of the irresistible strategic weapon, the desire for abstract strength, and the factor of costs—have hitherto combined together to weigh the scales of policy heaving in favor of the big cheap bomb.

What has been the military value of this emphasis? What military uses are served by these huge weapons, and by the possession of quantities of them? Are there limits to their usefulness? Are there consequently limits to the military value of a constantly enlarging stockpile of them? These are the next questions.

The multimegaton H-bomb was born in a vacuum of military strategy. No one had antecedently determined its uses. After the event the vacuum was filled with confusion. The confusion is not surprising. The multimegaton bomb fits badly, if at all, the standards of military usefulness hitherto accepted. It is by nature a weapon of mass destruction. If you except certain special targets, such as a fleet at sea, it will perform least efficiently against classical military objectives—troops in the field or in reserve, aircraft aloft, supplies, communications. It will destroy airfields, at the price of slaughtering the civilian population in the area. It will be altogether "efficient" in annihilating beyond repair the industrial and human potential of great cities. But this terrible "efficiency" is linked to no reasonable military usefulness. Most theorists today agree that the destruction of industrial potential would make little, if any, sense in a multigegaton war, which would be a war of sudden catastrophe, not of slow attrition.

IF DETERRENCE SHOULD FAIL

The multimegaton weapon therefore had to create its own strategy. It is the old strategy of deterrence and retaliation; but now this strategy has all the newness of the new kind of weapon that gives it military substance. The military value of the strategy lies in the intrinsic link between deterrence and retaliation. "These weapons will either deter you or smash you"—so runs the reasoning. If there is any doubt about the intention of pursuing the second alternative if the first fails, the reasoning trails off thus:

"These weapons will deter you—I hope; if not, you win." But this is the classic formula for a bluff.

America certainly does not wish to rest its national security on a bluff. Therefore the complementary concepts of deterrence and retaliation are a strategy for war. They cannot simply be accounted a strategy for preventing war. The multimegaton weapons in our arsenal are designed for use. Has anyone defined the conditions of necessity under which they will come into use? I do not know. However, to pursue the argument about their usefulness, I shall assume that the conditions are one day fulfilled. Nuclear deterrence has failed. The Strategic Air Command is unleashed. It represents retaliation by multimegaton weapons, used in quantities, directed at the destruction of the enemy. We are precipitated into the war of survival.

That is to say, we are hurled into the midst of absurdity. In the whole doctrine and history of war in the civilized world it is a first principle that survival should never be made the issue of war. Whenever the principle has been violated (in World Wars I and II) the result has been the climatic disaster of war, namely, the failure of war to achieve its political and moral ends, which are peace with justice. In the air-nuclear age this ancient principle has acquired all the evidence of an axiom. To put the question, who will survive, we or they, to the arbitrament of full-scale nuclear warfare is to decide that nobody shall survive, neither we nor they.

It might be that the belligerents could survive the almost immeasurable physical destruction and colossal loss of life immediately resultant from the blast and fire effects of great thermonuclear weapons used in quantities. It might even be that some of them could survive the effects of what is called external radiation (the immediate radiation from one multimegaton bomb alone will expose the population in approximately 7,000 square miles of territory to dangerous levels of external radiation). But under the conditions of unimaginable horror created by our hypothesis the word "survival" has already lost almost all its meaning. And what little meaning remains vanishes when one comes to what is called internal radiation from substances in the fallout.

One of these substances is strontium 90, a radioactive product of nuclear fission that causes bone cancer if it is absorbed in sufficient quantity by the human skeleton. At the moment, by official American acknowledgment, strontium 90 equivalent to 30 megatons of nuclear fission energy has been shot into the stratosphere as a result of test explosions. From the total quantity sent aloft so far, some 3 to 10 units of strontium 90 will be deposited in human bones—particularly children's bones—over large areas of the earth.

ABSURDITY OF WAR OF SURVIVAL

These amounts probably are not hazardous to health. But they afford a standard of measurement. The 10 units are one-tenth of the maximum concentration considered acceptable for the general population, with its large numbers of children, by the National Committee on Radiation Protection and Measurement and also by the International Commission on Radiological Protection.

How many megatons would be exploded in a full-scale nuclear "war of survival"? Let us say that ground bursts releasing 3,500 megatons of fission energy would sufficiently fill out the concept of "destruction" that would be the shared aim of both belligerents. The consequence for the inhabitants of the belligerent countries would be a strontium level in human bones of the order of 50 times the maximum considered acceptable. Moreover, some of this lethal substance would settle slowly and relatively evenly over the remainder of the earth. It would find its way from the soil into human bones, producing strontium concentrations that would be between 2 and 6 times the maximum considered acceptable for the general population. A whole generation, embracing tens of millions of people, in Russia, in the United States, in all the countries of the world, would be affected.

The figures I have used might have to be altered somewhat with the progress of scientific work. Some variation in the figures does not greatly matter. What matters is that some figures have to be put into the concept, "war of survival," in order to test its realism. And when a set of not unreasonable figures is used, the concept blows apart into patent absurdity.

The inherent absurdity of a multimegaton war sets limits to the military usefulness of immense thermonuclear weapons. In consequence, limits are also set to the validity of the strategy based on these weapons. Deterrence-retaliation may, if you wish, be called a strategy of survival—but only as long as the deterrence works, as long as it sustains the nuclear stalemate.

We must therefore have an arsenal of multimegaton weapons sufficiently large to give the strategy built upon them its own limited kind of validity. But this arsenal need only be a limited one. There is a limit, set by the absurdity of a "war of survival," beyond which these "absolute" weapons become absolutely useless.

The military value of the giant H-bomb is also limited from another point of view. It is not a fit means of retaliation against limited military aggressions supported by conventional or small nuclear arms. Instead of repressing a limited and localized aggression its use would tend to provoke the expansion of hostilities in the direction of that fearsome absurdity, "the war of survival." But these limits, set to its retaliatory value, likewise affect its deterrent value. The strategy of deterrence-retaliation, as given military substance only by multimegaton bombs, is no adequate guaranty of the security of the free world against some military version of Communist "salami tactics."

We come now to a more manageable military problem. There are issues, short of the impossible issue of survival, which may have to be settled by arms. Broadly, they are issues of justice, the classical issues of war. They are always limited issues. And limited war is the legal institution available as a last resort for their settlement. In its political and moral meaning war is man's ultimately resolute declaration of his fixed and firm purpose—that he will have peace indeed but only with justice. What then of our preparedness to wage war, in civilized fashion, for limited aims, by limited means?

A GAGE OF SOVIET INTENTIONS

Some people seem to grow nervous when the question is raised in this form, under reference to justice, reason and the values of the civilized tradition. The trouble is, they say, that the free world faces an immoral enemy. Recently, for instance, Mr. Donald A. Quarles, now Deputy Secretary of Defense, gave warning that " * * * it would be unwise in planning for the security of our country to rely on the morality or even the rationality of potential enemies. We must still have security even if others resort to immoral and irrational acts. These have always been truisms but the stark facts of this air atomic age give them vastly greater force."

This distorts the whole military and moral question. Obviously it would be absurd to place any reliance on Soviet morality. But the problem is not whether we should rely on Soviet moral cynicism but whether we can diagnose Soviet military intentions. From the fact that the Soviet Union is immoral does it follow that a massive air-nuclear attack upon the United States is likely? And how likely is it? And what would security mean, if the irrational even were to occur? In terms of the stark facts of the air-atomic age—especially the facts about radioactive fallout—would security be achieved by proportionately massive megaton retaliation against the Soviet Union? These are the things we would like to know.

More pertinently, an appeal to the truism that the enemy is immoral will not justify an idolatrous worship of air-nuclear-retaliatory power based on greater numbers of

megaton bombs. Similarly, a "war in outer space," waged by nuclear missiles, may be a technological possibility. Is it therefore a military likelihood? And is it more likely than a war on the Turkish border? We cannot aim to be secure against every possible contingency, but only against the more likely contingencies. The problem is to make a realistic calculation of what the immoral enemy is likely to do, and then to have on hand the measure and kind of force that will be militarily necessary or useful in stopping him from doing it. This is our military duty; it is likewise our moral duty. Between the two duties there is no divorce.

To assist in performing both duties we have the stark facts of the air-atomic age. We also have the fact that Soviet military policy has a Communist premise, and that Soviet leaders are capable of primitive logic. The premise was stated by Mr. Khrushchev when, speaking with all the seriousness of the Marxist-Leninist faith in the dialectic of history (a faith not born of alcohol nor blurred by it), he said, "We will bury you." I presume that he has no wish to spoil his own pleasure on the occasion by finding himself in the same grave. It is a fair conclusion that he does not intend to dig the grave with several thousand megatons of fission energy.

Do not Soviet scientists know as much as we do about radioactive hazards? Are not Soviet strategists using the criterion of contamination levels in order to test the validity of their strategies of nuclear attack, and also to test the realism of American threats of retaliation? If there are any doubts about affirmative answers to these questions, it would be greatly in our national interest to clear them up as soon as possible.

There is therefore a tenet of Communist ideology on which we can rely. The Communist revolution clearly wishes to put an end to the history of imperialist-reactionary-bourgeois capitalism. But it does not wish to put an end to all history—and therefore to the Communist revolution itself. If the Communist believes that the future belongs to him, can he wish to cancel it out? Unless indeed he be not only immoral but altogether mad. And in that case, how do you deter a madman, intent on chaos, by threatening him with the chaos that he wants?

The Communist norm of morality—the success of the revolution—is not civilized. But it affords us a realistic, and safe enough, premise of military policy. From it I would conclude that Communist invasions of the order of right and justice will be limited. The exchange of an unlimited megatonnage of fission energy occupies no visible place in the Communist strategy of world domination. A classless society of bone-cancer patients would hardly satisfy the dreams of Marxist messianism.

SMALL NUCLEAR WEAPONS NEEDED

Our central problem therefore is to deter limited aggressions and to retaliate by effective but limited force, if deterrence fails. The question is, what have we got in the way of small nuclear weapons to fulfill this limited military mission of deterrence and retaliation?

There is little public information on this subject. Perhaps, consequently, there is a considerable amount of public misapprehension. The extent to which our rigid security regulations have had the happy result of slowing down Soviet nuclear developments (which in any case they cannot stop) is a matter of conjecture. On the other hand it could be argued that they have had the unhappy result of rendering our nuclear armament program unmanageable by informed and responsible public opinion. Moreover, their enforcement at times goes to extremes even within high government circles. For instance, some months ago, I wished to convey certain factual information about the present and future composition of our nuclear stockpile to certain members of the National Security Council. But it was ruled that they had no "need to know" the facts I wished to present.

However, some general information is on record in the press. On February 5, 1957, Senators SYMINGTON, KEFAUVER, and FLANDERS met as a task force of the Senate Armed Services Committee in public session. Frank H. Higgins, an Assistant Secretary of the Army, and Lt. Gen. Carter B. Magruder, Deputy Chief of Staff for Logistics, appeared before them.

As reported by Joseph L. Myler in the Washington Daily News, Mr. Higgins said that the job of equipping the Army with small atomic weapons is progressing very nicely. But he added that it is largely a development program still. General Magruder is quoted as agreeing that it will be 3 to 5 years before the Army has enough tactical atomic weapons to reduce the use of conventional ammunition in war by as much as 25 percent.

The nuclear weapons spectrum in its full sweep is the support of the four basic military missions of the American Armed Forces, defined by President Eisenhower in his budget message of January 1957. Only one of these missions, the first, necessarily calls for a stockpile of multimegaton weapons. This mission is to maintain ready nuclear-air-retaliatory forces so strong that they will deter a potential aggressor from initiating an attack. The other three missions, for their highest efficiency, rest heavily on a vast arsenal of nuclear weapons in the smaller range. The tens of thousands of small weapons which I recommended as necessary or desirable (on April 12, 1956, in testimony before the Subcommittee on Control and Reduction of Armaments of the Senate Foreign Relations Committee) would not exceed the requirements of these three missions—the defense of the continental United States, the waging of ground war by the Army, and the control of the seas.

The Armed Forces cannot fulfill these three military missions with a development program. The immediate need therefore is to move the small-weapons program out of the development phase into the phase of large-scale production.

HIGH COST OF SMALL WEAPONS

This will be somewhat costly. The major requirement would be more fissionable materials. This, in turn, would require an expansion of our present industrial facilities. The size of the new investment in plants would depend upon the extent to which the output of our existent plants is directed away from large weapons into the needed small-weapons program. In any case, the money spent would be well spent, if its amount were measured against the demands of military security, and also against the amount now being spent on other defense programs.

If the small-weapons program is to be moved into the large-scale production phase, the first thing needed is some important change in the sequence and order of our interrelated policies. At present the order is inverted. Military policy has allowed itself to be too greatly determined by technology. And the factor of costs, in alliance with technological factors, has unduly determined the emphasis in the weapons program. But this is to turn the structure of policy upside down.

I do not underestimate the value of technology or the importance of costs. But I do not think that these things should come first in the order of value and importance. Military policy should come first. At present it requires an extensive production program of small weapons. Budgetary policy should be subordinated to effective execution of this military policy. And technology should be the servant and not the master in the military house. The structure of policy should be turned right side up.

The whole foregoing argument about weapons policies has been cast in pragmatic terms. I have been concerned to uncover policies that will work best for America's security and that of the free world. The problem is a practical one; but it does not therefore cease to be a moral problem. Morality is anchored in reality. Often before this I have argued for the governance of our weapons program by a moral norm (what is right in terms of the civilized tradition of just warfare). But the premise of this moral argument has always been a prior practical argument—that the program should be governed by military values (what is necessary or useful, in terms of the likely contingencies of actual warfare, within the supposition of responsible military theory—that military usefulness is not to be defined in terms of sheer slaughter, destruction, and terror).

The military duty of the United States is success, in the face of international communism. But the moral duty of the United States is always justice, in the sight of God. There need be no conflict between these two duties. One cannot, of course, say that whatever is just will be successful. But one can say that whatever is not just will somehow fail to succeed. In the matter of nuclear war the validity of the latter assertion is easily tested. The civilized tradition has always declared that an unlimited and indiscriminate use of force in warfare is unjust. The facts of the nuclear age now declare that such a use of force would be unsuccessful. The success it would achieve, the sheer destruction it would wreak, would be at best useless to the beligerent and at worst disastrous to humanity.

It is within the factual circumstances of the nuclear age, wherein justice is the duty as well as success, that I make my proposals for a program of rational nuclear armament. Will this program fulfill God's purpose for the world, to which America has pledged itself—in reverent participation—the building of peace with justice in a world where moral law prevails? That, I believe, is not the question. To the extent that it is Christian, this Nation knows that it is not required to fulfill God's purposes on this earth. It is only required to be faithful to them.

Mr. HUMPHREY. In a related connection, Mr. President, I have been disturbed over the apparent decision of the Atomic Energy Commission pointedly to refuse to invite observers from India to this month's atomic weapons test in Nevada. I know from my own constituents' mail that this decision by the AEC has disturbed the man in the street, as well. Even though India has been a sharp critic of the bomb-testing program, it seems to me that this is an argument for granting the invitation, rather than refusing it. Even newspapers generally sympathetic to continued bomb testing feel the same as I do. I ask unanimous consent that an editorial which appeared in the St. Paul Dispatch for May 11, 1957, be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the St. Paul Dispatch of May 11, 1957]

The United States has taken an excellent public relations step by its invitation to 47 friendly nations to send observers to this month's atomic weapons test in Nevada.

Fears of atomic fallout and a suspicion that the United States has carried on testing

on an unnecessarily large scale are real and serious in many countries. Russian propaganda has helped promote the picture of Uncle Sam as a reckless operator in this field.

Actually such tests as those about to start in the Nevada desert may in the long run serve to protect the people of the world from nuclear dangers. It was a year ago that President Eisenhower, in refusing to halt nuclear weapons testing, said such experiments are necessary "to find ways and means by which you can limit" the effect of atomic explosions, "to reduce fallout, to make it more of a military weapon and less one just of mass destruction."

By bringing in observers from other nations, the Atomic Energy Commission may be able to discourage the suspicions and fears now prevalent abroad. This attitude also will be helpful to Americans at home in appraising the often contradictory reports on fallout dangers.

However, while exclusion of Russia from the list of countries invited is easily understandable, it is not so plain why the Atomic Energy Commission should so pointedly refuse to invite India. It is true that India has been a sharp critic of the testing program, but it would seem that this should make it all the more desirable for the United States to try to remove India's fears. Placing India in the same category as Russia in this matter is a strange way of trying to increase friendship and good will between India and the West.

Mr. HUMPHREY. Mr. President, on yesterday the Joint Committee on Atomic Energy began its hearings on the entire fallout question. Along with other Senators, I welcome the hearings with enthusiasm. In this connection, Mr. President, I ask unanimous consent that an article entitled "Fallout Hearing Will Open Today," written by John W. Finney, and published in yesterday's New York Times, and which summarizes the problem facing the Joint Committee, be printed at this point in the RECORD, as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times of May 27, 1957]

FALLOUT HEARING WILL OPEN TODAY—CONGRESS STUDY AIMS TO BAR POLITICS AND GET AT FACTS OF ATOMIC TEST DANGERS

(By John W. Finney)

WASHINGTON, May 26.—A special subcommittee of the Joint Congressional Committee on Atomic Energy will set out tomorrow in scientific search for an answer to one of the most vital questions of the atomic age.

The question is whether man is imperiling himself and future generations by continued testing of atomic weapons.

The hearings by the subcommittee may produce no positive answer to a question that is troubling scientists and worrying the public. And like scientists and statesmen before them, the subcommittee members are likely to find there are too many scientific unknowns and philosophical imponderables for any man to make a decisive judgment about the dangers of testing atomic weapons.

The hearings, however, should provide the most definitive study yet made on how much radiation is created in the atomic testings and what effect it is having on man. During the hearings some of the confusion surrounding the weapons testing should be stripped away, and some basic facts and agreements on radiation established.

NO PRIOR JUDGMENTS

Unlike most congressional hearings, the subcommittee study is starting out in an air of scientific impartiality with no preconceived judgments or objectives. Representative CHET HOLIFIELD, Democrat of California, as chairman of the subcommittee, has laid down the ground rule that this is to be a scientific investigation and not a political one.

Witnesses are being cautioned to stick to presenting facts and not to leap ahead to judgments. Some 40 prominent scientists have been scheduled to testify on atomic radiation, from its creation in an atomic explosion to its fallout from the atmosphere and stratosphere and to its final absorption by plant, animal, and human life.

The hearings come at a time when public concern over atomic radiation is mushrooming like an atomic cloud and the debate among scientists is swirling with all the confusion left by an atomic explosion.

The debate has reached such proportions that it is having an impact on the international policies of the three atomic powers—the United States, Britain, and the Soviet Union. The United States and Britain have been placed at a psychological disadvantage. With their atomic tests just beginning, the two countries are sensitive about suggestions that weapons testing should be halted.

With its tests apparently concluded, the Soviet Union is in a position to renew its proposal for halting the atomic tests—a proposal that the United States and Britain say they cannot accept for the sake of the free world's defenses until a safeguarded system of atomic disarmament has been established.

At the core of the international concern and scientific debate is the radioactive material produced in the explosion of an atomic weapon. This material can vary in amount from tons to a few pounds depending upon the explosion.

If the weapon is set off near the ground, tons of dust and dirt are sucked up into the fireball and made radioactive. If the weapon is set off high in the air, the amount of radioactive material produced is small. Then it is about 2 pounds for a nuclear bomb with a force of 20,000 tons of TNT, such as dropped on Hiroshima and Nagasaki, and 100 pounds for a nuclear explosion with a force of 1 million tons of TNT.

On these points the scientists agree. Their differences arise over how soon and how much of the radioactive material returns to earth and what effect it has on man.

The fallout from an atomic explosion varies according to many factors—the size of the explosion, whether the fireball touches the surface, and wind and atmospheric conditions.

In a large explosion near the surface, about 50 percent of the heavy radioactive material sucked up into the fireball falls out quickly within the first 200 to 300 miles. This is known as local fallout. Since the average radioactive life of the material is about 1 month, local fallout poses a danger to the area near an explosion.

In an air burst the radioactive material is much smaller and it falls out much more gradually as it drifts around the earth.

As a rough rule, weapons whose force is measured in kilotons—or thousands of tons of TNT—blast the radioactive material only into the atmosphere and the material falls out within a month or so around the world in the general latitude of the explosion. Weapons with a megaton—or a million tons of force—drive much of the material into the stratosphere, where it can remain for years, gradually falling down over the surface of the world.

It is the worldwide fallout that is the source of most international concern. It also is this fallout about which scientists know the least. The present official estimate is that the radioactive material driven into the stratosphere returns to earth at the rate of about 10 percent per year. This estimate, however, is being subjected to renewed investigation by the Defense Department.

If the material remains in the air for a month or more, it loses much of its radioactivity. There are, however, some materials with a long radioactive life that present a long-term threat. These include cesium-137, which emits penetrating gamma rays, and the much publicized strontium 90, which is chemically similiar to calcium. Strontium 90 can cause bone cancer or leukemia after passing through the food chain, which consists of its being absorbed by plants from the soil, water, or air and eventually becoming a component of human food.

Man can be subjected to radiation from fallout both externally and internally—externally by the increased radioactivity in his environment and internally by radioactive material absorbed in the food chain.

MAY CAUSE MUTATIONS

The effect of the radiation on man can be immediate or stretch over generations. The radiation can cause physiological damage to the present generation, with such effects as leukemia, bone cancer, or shortened life span. The radiation also can affect future generations by causing genetic mutations or changes in the hereditary pattern.

Just how much radiation is necessary to cause physical damage to the present generation or genetic mutations in future generations? Scientists differ sharply on this point. In effect, the two sides part company at the so-called threshold of radiation effects on man.

It is generally agreed that the fallout radiation from the present rate of weapons testing is small in comparison to the radiation to which man is subjected by nature from the earth and air and from medical treatment.

Last year the National Academy of Sciences estimated that if weapons tests were continued at the rate of the last 5 years, the external radiation from fallout would amount to about a tenth of a roentgen over a 30-year period.

A roentgen is a technical measurement of radiation. In comparison, the 30-year dose from natural radiation would amount to an average of 3.1 roentgens, according to the Academy's latest estimates, and 4.6 roentgens from medical sources.

The relatively small dose of radiation from fallout that man receives is repeatedly emphasized by officials who give assurances about the safety of weapons testing.

These officials contend that the radiation from fallout is too small to pose any threat to the present or future generations. Their underlying assumption is that a greater amount of radiation is necessary before the "threshold" is reached at which fallout radiation will begin to have detectable harmful effects.

It is basically this threshold assumption that is challenged by scientists who warn of the danger of continued weapons testing. They assume that any additional radiation, however small, will have some harmful effects.

The potential danger posed by strontium 90 is a good example of how the two schools diverge because of their different basic assumptions. Dr. Willard F. Libby, the scientist member of the Atomic Energy Commission, estimates that the present average level of strontium 90 in the general population is less than 1 percent of the maximum permissible concentration. That concentration also is far short of the level necessary to cause definitely detectable effects, Dr. Libby believes.

The opposing scientific group, however, contends that even the present low level of strontium 90 is causing bone cancer, leukemia, and genetic mutations in a small proportion of the population.

Which assumption is correct is not easy to prove and probably cannot be determined definitely for several generations. Scientists cannot experiment with radiation on human

beings to determine its physiological and genetic effects. In the years ahead it will be difficult to determine whether cases of bone cancer or genetic changes were induced by radiation fallout or resulted from natural causes.

Mr. HUMPHREY. Mr. President, typical of articles illustrating the attention now being paid to the strontium 90 question in Minnesota newspapers is an article by Herm Sittard, published in the Minneapolis Star of May 21, 1957. The article is entitled "Milk Purified Now To Fight Strontium Radioactivity Urged." I ask unanimous consent that the article be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MILK PURIFIED NOW TO FIGHT STRONTIUM RADIOACTIVITY URGED

(By Herm Sittard)

When Bobby, age 2, gulps his milk at dinner tonight, his intake of strontium 90 will be 4 to 5 times as great as daddy's—even though daddy, sitting right across the table from Bobby, drinks milk poured from the same bottle.

What is strontium 90? How did it get into Bobby's milk? If it's harmful (too much of it could be), how do you remove it from milk?

Some answers to these questions were offered Tuesday by a University of Minnesota scientist, Dr. W. O. Caster, assistant professor of physiological chemistry, warns of the danger of strontium 90, and offers a suggestion to meet the danger.

Strontium 90 is radioactive material created by nuclear explosions. It's still coming down from the stratosphere from atomic tests, and will continue falling for years. Too much of it could endanger public health.

Has anyone actually died of strontium 90 yet?

The answer fortunately, is no.

"It'll be close to the year 2000," says Dr. Caster, "before we can see too much or properly evaluate the hazard.

"In 1970 the fallout will reach a high point, and 30 years later its effects would be noticeable.

"I think we are on the safe side as of today," said Dr. Caster on Tuesday, "but in the next 10 or 15 years, we'll reach the danger level—the point where some of the most susceptible people may get bone cancer.

"When children grow up in the Midwest—where the present deposit of strontium 90 is 0.004 microcuries per kilogram of calcium in the soil (microcuries are units of radiation measurement), the children will assimilate 0.004 microcuries of strontium 90. They will have four times as much strontium 90 as the maximum amount that would be safe," said Dr. Caster.

Should parents stop serving milk to their children? Well, Dr. Caster's three small sons had milk for breakfast this morning. John, 3; Bruce, 6; and Charles, 7, drink their milk just as they always did, even though their father is seriously concerned.

"Milk is still the safest source of calcium," said Dr. Caster today.

"The children are building their bones now, and are picking up 4 to 5 times as much strontium 90 as adults. The children are the ones that need to be protected.

"If they eat food grown on this soil through their lives, this continuous exposure (from future fallout of strontium 90) may cause bone cancer.

"It takes 30 years of such continuous exposure to develop a case of bone cancer. After cancer is detected, death occurs in about 18 months."

However, that "continuous exposure may be present because of the fallout (10 percent each year) of strontium 90 floating in the stratosphere from nuclear bombs already detonated.

"We adults will never get to that level (0.004 microcuries of strontium 90)," said Dr. Caster, "but the children will reach it unless something is done.

"Something needs to be done immediately."

Dr. Caster proposes that we destrontify milk.

"You can remove calcium and strontium," he explains, "by passing milk through a water softener. If we could remove from milk the calcium and strontium 90, and return to milk calcium from some safe source, we would reduce the danger."

Limestone, he suggested, would be a safe source of calcium. Most strontium 90 is embedded in the top few inches of soil, so any deeply imbedded rock would be fairly free of strontium 90.

"Since some 80 percent of the dietary calcium (and strontium 90, too) that enters the body comes from milk and milk products," says Caster, "it would seem possible to decrease the intake of strontium 90 by decalcifying milk. * * *

"This procedure (the water softener process, with calcium put back later) would not seriously disturb the calcium balance in the general population, and could provide an immediate fourfold to fivefold reduction in the strontium 90 intake."

"I feel we are pushing close enough to the safety limits," continued Dr. Caster. "Now I feel the Midwest should do something. This destrontifying process would remove much of the danger, and allow the human race to survive in an environment that is contaminated."

What action does he recommend for parents who share his concern over strontium 90? They can do two things:

Urge that more research be conducted immediateley to solve the problem.

Show their interest in destrontified milk. "If there is sufficient demand for it," said Dr. Caster, "large dairies probably would use a process to destrontify milk. In the near future, it will probably be possible to do it in canned milk for small children."

The water-softener process which Dr. Caster suggests involves use of a special resin that filters out nearly 90 percent of both calcium and strontium.

The Midwest probably has the highest concentration of strontium 90 in the world, according to Dr. W. F. Libby of the Atomic Energy Commission.

How come?

After a baby atomic bomb mushrooms on the Nevada desert, windows have scarcely stopped rattling before the radioactive fallout begins.

First, the fireball showers radioactive dirt particles over the immediate vicinity. Scientists call this the local fallout.

But some of the material is not coarse enough to fall of its own weight. This stuff floats along in the atmosphere for a month or two until rain carries it to the ground.

"A great deal of this fallout from western nuclear tests occurs over the Midwest," says Dr. Caster.

As west-to-east winds waft the strontium 90 particles through the atmosphere, the first significant rainfall area they reach is the Midwest.

Raindrops pull the material from air to soil. From the topsoil it goes to the plants. Cows munch the plants, and pass along the strontium 90 to humans in milk.

Finally, there's a third type of fallout. Giant H-bombs pack so much power they puncture the atmospheric ceiling, and shoot radioactive debris into the stratosphere.

Strontium 90 there sifts down into the atmosphere at a predictable rate of about 10 percent each year.

Once it reaches the atmosphere, rainfall pulls it to the soil; the soil gives it to the plants, the plants to the cows, and the cows to humans. We get some strontium from fruit and vegetables, too.

The fallout of strontium 90 from the stratosphere will increase sharply between now and 1970—just from nuclear weapons already detonated—then taper off very gradually till the year 2000 if no more are used.

The rising curve of strontium fallout and the gradually changing estimates of its effect on humans remind Dr. Caster of how the safety factor for X-ray exposure was halved from 1.2 roentgens in 1931 to 0.6 in 1936, to 0.3 in 1949.

A year ago, scientists used 1 microcurie as the danger level for the general population. Last week the National Committee on Radiation Protection and Measurement set 0.1 microcurie as the danger level.

Now, Caster regards 0.01 microcurie as the danger level for individual children.

"When you consider variations that occur in any large group," Caster explains, "the maximum safe average for this group should be about 0.001 microcurie. This would provide a margin of safety for people who assimilate more strontium 90 than others."

Mr. HUMPHREY. Mr. President, during the hearings conducted by the Senate Subcommittee on Disarmament, there have arisen many issues which are relevant to the hearings which the Joint Committee on Atomic Energy is now undertaking. In a letter to Representative DURHAM, the chairman of the joint committee, I listed certain of these questions last month. I ask unanimous consent that the text of a press release which I issued on April 17, containing the text of my letter to Representative DURHAM, be printed in the RECORD at this point in my remarks.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

SENATOR HUMPHREY SEEKS ANSWERS FOR PUBLIC ON RADIATION HAZARD QUESTIONS

An array of questions which need to be answered about the hazards of radioactive fallout have been submitted to the Joint Committee on Atomic Energy as an outgrowth of issues raised during hearings conducted by the Senate Subcommittee on Disarmament, it was revealed yesterday by Senator HUBERT H. HUMPHREY, Democrat, of Minnesota, chairman of the disarmament group.

"We are hopeful the problems to which we are directing attention will serve to encourage a thorough public examination into the seriousness of fallout hazards," Senator HUMPHREY explained.

He made public the following letter he has sent to Representative CARL T. DURHAM, chairman of the Joint Committee on Atomic Energy, along with a summary of questions arising from testimony during the Disarmament Subcommittee's hearings concerning radiation problems:

"The Honorable CARL T. DURHAM,

"Chairman, Joint Committee on Atomic Energy, House of Representatives, Washington, D. C.

"DEAR CONGRESSMAN DURHAM: I noted recently your announcement that the Joint Committee on Atomic Energy is planning to hold public hearings on the matter of radioactive fallout and the hazards it may pose for present and future generations. These hearings are needed, and I am pleased to know that you are going into the problem.

"You are aware, as I am, of the importance of giving the public as complete and as clear

a statement of the present knowledge on radioactive fallout as can be obtained. I believe that your forthcoming hearings will contribute toward this end.

"As you undoubtedly know, the Senate Subcommittee on Disarmament has also gone into the question of nuclear weapons tests and whether they threaten the health and safety of the world's populations. This is one of the considerations in evaluating limited disarmament proposals such as a ban on weapons tests. We have received testimony on the problem from experts as well as interested lay groups. The problem has been raised at hearings the subcommittee held in various parts of the country. It has also been the subject of a large amount of the correspondence I have received as chairman of the subcommittee.

"Our subcommittee hearings have opened up to the members and to the public several problems arising from nuclear weapons tests but this is only one of the many aspects of the problem of disarmament and, therefore, we have not thus far been able to give the subject adequate and sustained attention which it deserves. It is a subject, however, that the subcommittee has felt it essential to examine and on which it should be informed. I hope that the results of your hearings will be available to the subcommittee and that the staff of the Joint Committee can keep the Disarmament Subcommittee staff appraised of the nonclassified portions of your work.

"Since it is unlikely that the Disarmament Subcommittee, in the remaining months of its existence, will itself be able to hold many more hearings, I would like to invite the attention of the Joint Committee to some of the testimony received and issues which have been presented to our subcommittee. They pertain to the fallout problem and also the matter of nuclear weapons tests detection. I know you are familiar with many of these questions which certainly deserve more exhaustive consideration than we have been able to give them. With the thought that the principal issues posed by our hearings deserve further examination by the Joint Committee, I enclose a list of questions which have been raised.

"I shall appreciate what attention the Joint Committee can give these matters. I am sending a copy of this letter to Senators BRICKER, HICKENLOOPER, and PASTORE who are members of the Disarmament Subcommittee.

"The testimony to which I have referred is being sent to you in care of your staff director, Mr. Ramey.

"Sincerely,

"HUBERT H. HUMPHREY,
"Chairman, Subcommittee on Disarmament."

QUESTIONS REGARDING RADIOACTIVE FALLOUT AND NUCLEAR WEAPONS TESTS

1. To what extent is there a danger to the populations of this country and others from the radioactive fallout of nuclear test explosions?

Is it possible to reconcile the different points of view regarding the dangers of radioactive fallout? If not, is there an explanation as to why these differences exist? Would it be feasible for the Joint Committee to undertake to correlate the various studies and opinions regarding the dangers of radioactive fallout? Such a correlation would be helpful to the public and to Members of Congress who are now subject to widely differing points of view on the danger of nuclear weapons tests. Would the creation of a special committee of scientists be a constructive way of trying to resolve the differences of opinion which now exist?

With respect to published findings on the danger of radioactive fallout, all conclusions are based on the presumption that tests would continue at their present rate. Is this a reasonable presumption in view of the number of countries which may conduct their own tests in the future?

In view of the tentativeness of many of the findings on radioactive fallout, is it possible or wise for the Atomic Energy Commission and the executive branch to be so positive in their declarations that nuclear weapons tests do not constitute a health hazard? For example, can we know with certainty the total amount of radioactive fallout being deposited on the earth's surface and the rate at which the deposits are increasing? Is it likely that as research reveals greater knowledge about radioactive substances, such as strontium 90, the maximum permissible concentration levels will be lowered from what they are today?

2. What is the extent of the research being done on problems of radioactive fallout?

How much of the research is being done by Government agencies and how much by private research groups under Government sponsorship and with Government funds?

Must private research groups depend upon the Government particularly the AEC, for most of their data? That is, to what extent does the depth and breadth of research rest on what the Government is willing to turn over to private research organizations?

How much and what kind of data on radioactive fallout remains classified? What justification is given by the AEC and other Government agencies for continued classification of such information?

Is the AEC presented with a conflict of interest when it is required to act on the one hand as an agent in the development of nuclear weapons, and on the other as an agent to provide safeguards to health resulting from nuclear weapons experiments? If a conflict of interest does exist what would be effective ways of removing or at least minimizing the conflict?

If the research being conducted on radioactive fallout is considered to be inadequate should the Congress increase appropriations for such research?

Should the results of research on radioactive fallout be made available to and reviewed by the Joint Committee on Atomic Energy as well as the Atomic Energy Commission?

3. Is it possible for the Congress to receive information, preferably unclassified, on the detection of nuclear tests?

It is important to resolve present conflicting points of view regarding the detection of nuclear weapons tests. Is it true that present methods of detection can identify anywhere in the world a nuclear test explosion of one megaton or higher? Can present methods detect with certainty a test of less than one megaton? If not, what type of a system would detect tests of lower yields? To detect tests of lower yields would the devices need to be located within the country testing, such as the Soviet Union?

Why must detection methods be so highly classified?

Are there legitimate military considerations for not seeking an agreement to ban tests of one megaton bombs or higher? Of 100 kilotons or higher? Can the Congress and the public receive information on some of these military considerations?

Even if valid military considerations against banning large nuclear weapons tests exist, would the United States benefit equally with the Soviet Union if a safeguarded agreement were reached to ban such tests? If not, why not?

Mr. HUMPHREY. Mr. President, the service which the joint committee is about to perform can be of major benefit to all the American people. I know that all of us wish the committee well in this undertaking. Like other Senators, I shall follow the hearings with the utmost interest.

Mr. President, I conclude by saying that I can think of no hearings conducted during the present Congress which will have a more profound effect upon our foreign policy, as well as on our programs of national security, than those now being undertaken by the Joint Committee on Atomic Energy.

THE CIVIL-RIGHTS BILL

Mr. DOUGLAS. Mr. President, it appears that defeat or emasculation by delay continues to be the strategy of those who are opposed to enactment of proposed civil-rights legislation or even passage of the irreducible bill reported from the Constitutional Rights Subcommittee of the Senate Judiciary Committee by a bipartisan vote, and the subject of what with charity may be called extended debate within the whole Judiciary Committee itself.

A virtually identical bill is now on the last lap of a slow journey through the House Judiciary and Rules Committee to the House floor, where debate is scheduled to start about June 5, with floor debate and a probable 2-to-1 bipartisan vote for passage during the week of June 10.

This schedule, if adhered to, will mean perhaps 6 or 7 weeks in which to break a Senate filibuster and get a vote on final passage here in the Senate.

Mr. President, the acknowledged success which the opponents of civil-rights legislation have had to date is costing the American people and our Nation dearly. Not only has it prolonged injustice for millions of Negroes and members of other minority groups here at home, but it has slowed down other vital proposed legislation, such as the school-construction bill and the consideration of more liberal immigration measures. Perhaps most important at this juncture in world affairs, it clouds our moral credentials and standing among free and uncommitted peoples of the world, particularly the three-fourths of the world's population who are colored.

On Sunday, May 27, 1957, Mr. Cabell Phillips, the distinguished New York Times reporter, had published a summary of the civil-rights fight in the 85th Congress to date. The article seems to me and others who have been active in this fight to be an admirable recapitulation because of its perceptiveness, its economy of words, and its remarkable accuracy. I ask unanimous consent that the article be printed in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW TO STALL A BILL: A CASE HISTORY ON CIVIL RIGHTS

(By Cabell Phillips)

WASHINGTON, May 25.—The greatest strategists in Congress are the southerners who, by virtue of their political longevity and shrewdness, generally manage to outwit their far more numerous northern opponents. One of their most useful tactics is that of the stall; the parliamentary foot-dragging which, if it does not demolish its target directly, often softens it up for envelopment from the flank.

For the last 3 months a small band of these southern partisans has been waging just this sort of oblique guerrilla warfare against civil rights legislation while the massed ranks of the supporters of these bills have wrung their hands in helpless dismay on the sidelines.

They have not succeeded yet in killing civil rights legislation for this session—there is a suspicion, indeed, that that is not what they want to do anyway—but they have succeeded in backing it into a corner, so to speak, where the remainder of the battle can be fought on their own terms.

The upshot of all this maneuvering, as it appears now, is that a civil rights bill of some sort is likely to become law before this session of Congress ends, but it will be a law whose terms have been dictated largely by its southern opponents.

SET THE TIMING

The achievement of this victorious paradox derives from the fact that the southerners were able to control the all-important time schedule by which the program wormed its way through the legislative labyrinth. Having been barred from floor consideration until almost the beginning of summer, it will now come up against a legislative calendar crowded with more urgent matters. The threat of a filibuster (the southerners' ultimate weapon) becomes more abhorrent as the end of the session approaches.

So the tendency in the weeks ahead will be either to push civil-rights matters aside or—and this seems the more likely—to make whatever compromises are necessary to get it disposed of quickly and peacefully.

Let us see first how this strategy of delays works, and then take a look at its probable consequences.

Bills almost identical with the four-part civil-rights package requested by the administration were introduced in the House and in the Senate early in this session of Congress. Basically, they call for (1) creation of a nonpartisan study commission; (2) setting up of a special civil-rights section in the Department of Justice; (3) widened authority for the prosecution of civil-rights violations, and (4) new legislation to protect minority voting rights.

Both parties, by their platforms, were more irrevocably pledged to civil-rights legislation this year than they had been before, but the southern opposition was as implacable as ever. With all the ingredients for the annual battle present, here is the way it has gone in the House.

A Judiciary Subcommittee, under Chairman EMANUEL CELLER, Democrat, of Brooklyn, held 8 full days of hearings between February 4 and February 28. Altogether 121 witnesses were heard, either in person or through statements, the majority of them speaking in opposition to the bill. Virtually every governor, treasurer, and attorney general, and other assorted officials from the 11 States of the old Confederacy asked to be heard, and most of them were.

CONGRESSIONAL WITNESSES

In addition, many Members of Congress—including one Senator—from Southern States took their turn on the witness stand.

Chairman CELLER was meticulously courteous to each and held doggedly to his determination that every one who wanted to testify would be given the full privilege. Needless to say, most of the testimony was repetitive—the bill was an unwarranted invasion of States rights; it was unnecessary, immoral, unconstitutional; it would worsen rather than improve race relations. Obviously, an effort was afoot to swamp the committee and to prolong its hearings. The printed testimony filled a book of 1,299 pages, 2 inches thick.

Four weeks were required by the full Judiciary Committee to act on its subcommittee report. These were marked by more southern oratory and by arbitrary refusals of unanimous consent to permit the committee to sit while the House was in session. Ultimately, it was reported out by a split vote on April 1.

RULES ROADBLOCK

According to protocol, the bill was thereupon referred to the Rules Committee, traffic arbiter for floor consideration. Rules is dominated by an ancient foe of civil rights, Chairman HOWARD W. SMITH of Virginia. Contrary to usual procedure, Chairman SMITH decided that the Rules Committee would also hold extensive hearings on the merits of the bill. It took all of the month of April before the committee could get around to this.

Finally, hearings began on May 2. Twenty-two witnesses (most of whom had already appeared in the Judiciary hearings) were heard at 9 sessions extending over a 2-week period.

Last Tuesday, Rules Committee completed its labors and cleared the bill for House consideraiton. It tacked on a couple of gimmicks, however, certainly calculated to eat up some more time: an "open rule" that permits any number of amendments to be loaded on to the bill, and a provision for 4 days of general debate.

Chairman CELLER estimates that debate will begin June 5 and continue from 10 days to 2 weeks. Ultimate passage by the House is regarded as certain—sometime after the middle of June.

The Senate bill was under the management of Senator THOMAS C. HENNINGS of Missouri, Chairman of the Constitutional Rights Subcommittee of the Judiciary Committee. His group heard 70 witnesses (largely the same as had testified in the House) in 13 days of hearings between February 14 and March 5. The bill was approved for consideration by the full committee on March 19.

Chairman of Senate Judiciary is Senator JAMES O. EASTLAND, the canny Mississippian, who is the champion of American white supremacists. He is ably backstopped in the committee by Senator SAM ERVIN, of North Carolina, who owns one of the sharpest legal minds in Congress. Between them they unblushingly laid one snare after another to box in the civil-rights report and prevent action being taken on it.

Their opening gambit was to insist that the mimeographed report be printed. Senator ERVIN proved to be a demon proofreader, and it took a month to get the document back from the printer. Next, Senator HENNINGS found it impossible to gain the floor to move consideration of the measure.

ERVIN'S ADVOCACY

It just happened that at meeting after meeting the chairman would bang the opening gavel and announce: "Senator ERVIN has the floor." Over a period of 4 weeks the erudite Tarheel reviewed the rights of man from Magna Carta, upward. When his declamation began at last to peter out, Chairman EASTLAND managed to un-see the raised hand of Senator HENNINGS and to recognize Senators JOHN MCCLELLAN, of Arkansas, OLIN JOHNSTON of South Carolina, and others to discuss such issues as right-to-work laws.

The chairman could not be moved to hold more than the one stipulated meeting a week, or to extend them a moment beyond the noon bell summoning the Senate into session. And on the days when the agenda was least crowded, a legal quorum somehow could not be recruited.

AMENDMENTS OFFERED

Two weeks ago, Senator HENNINGS managed finally to get the floor for his report, but the committee's time since has been spent debating amendments which various members hope to attach to it. The prospect now is that a greatly diluted civil rights bill will be reported out to the Senate 2 weeks from Monday—close to the middle of June.

This has been the major strategy of the southern opponents of civil rights throughout this battle so far—to block serious consideration of the measure until the session was far advanced. Proponents of the bill recognized at the outset that unless they got consideration early, their cause probably was lost. The southerners have won all rounds handsomely up to now.

It does not follow, however, that they will go on to give civil rights its decisive coup de grace. Nor is it certain that they could, in spite of their interim victory.

SOUTHERN MINORITY

The southern bloc is a minority—the bitter-enders number scarcely more than a dozen in all the Senate. Their nuisance value greatly outweighs their intrinsic political might in a showdown. In the responsible leadership of the Democratic Party, as well as in the Republican Party generally, there is a conviction that some sort of civil-rights legislation must come this year or political penalties will be exacted at the polls. This pro-civil-rights majority lacks the cohesiveness and the emotional impetus of the antis, but they are in a mood to be pushed only so far this year, and the southerners know it. They know, too, that there is a firmer disposition to deal harshly with a filibuster, should it come, than there has been in any previous year.

Above all, the southerners are political realists. Thus they are beginning to show a willingness to compromise: to put up only a token, face-saving resistance from here on to a civil-rights bill shorn of its objectionable features—which is to say, most of its teeth. And a willingness to concede this is showing up on the other side.

Mr. DOUGLAS. Mr. President, I also ask unanimous consent to have printed in the body of the RECORD the text of an address by the Reverend Martin Luther King, of Montgomery, Ala., cochairman of the Prayer Pilgrimage for Freedom, delivered at the Lincoln Memorial, at Washington, D. C., on May 17, 1957, at the conclusion of a program in which a large audience, estimated at between 15,000 and 30,000 persons, participated.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE REVEREND MARTIN LUTHER KING, OF MONTGOMERY, ALA., COCHAIRMAN OF THE PRAYER PILGRIMAGE FOR FREEDOM, DELIVERED AT THE LINCOLN MEMORIAL, WASHINGTON, D. C., MAY 17, 1957

Mr. Chairman, distinguished platform associates, fellow Americans, 3 years ago the Supreme Court of this Nation rendered in simple, eloquent, and unequivocal language a decision which will long be stenciled on the mental sheets of succeeding generations.

For men of good will this May 17 decision came as a joyous daybreak to end the long night of human captivity. It came as a great beacon light of hope to millions of disinherited people throughout the world, who had dared only to dream of freedom.

Unfortunately, this noble and sublime decision has not gone without opposition. This opposition has often risen to ominous proportions. Many States have risen up in open defiance. The legislative halls of the South ring loud with such words as "interposition" and "nullification." But even more, all types of conniving methods are still being used to prevent Negroes from becoming registered voters.

The denial of this sacred right is a tragic betrayal of the highest mandates of our

democratic tradition. So our most urgent request to the President of the United States and every Member of Congress is to give us the right to vote.

Give us the ballot and we will no longer have to worry the Federal Government about our basic rights.

Give us the ballot and we will no longer plead to the Federal Government for passage of an antilynching law. We will, by the power of our vote, write the law on the statute books of the South, and bring an end to the dastardly acts of the hooded perpetrators of violence.

Give us the ballot and we will transform the misdeeds of bloodthirsty mobs into the calculated good deeds of ordinary citizens.

Give us the ballot and we will fill our legislative halls with men of good will, and send to the sacred Halls of Congress men who will not sign a southern manifesto because of their devotion to the manifesto of justice.

Give us the ballot and we will place judges on the benches of the South who will do justly and love mercy. And we will place at the head of the Southern States governors who have felt not only the pang of the human but the glow of the divine.

Give us the ballot and we will quietly and nonviolently, without rancor or bitterness, implement the Supreme Court's decision of May 17, 1954.

In this juncture of our Nation's history there is an urgent need for dedicated and courageous leadership. If we are to solve the problems ahead and make racial justice a reality, this leadership must be fourfold.

First there is need for strong, aggressive leadership from the Federal Government. So far, only the judicial branch of the Government has evinced this quality of leadership. If the executive and legislative branches of the Government were as concerned about the protection of our citizenship rights as the Federal courts have been, then the transition from a segregated to an integrated society would be infinitely smoother.

But we so often look to Washington in vain for this concern. In the midst of the tragic breakdown of law and order the executive branch of the Government is all too silent and apathetic. In the midst of the desperate need for civil-rights legislation, the legislative branch of the Government is all too stagnant and hypocritical.

This dearth of positive leadership from the Federal Government is not confined to one particular political party. Both political parties have betrayed the cause of justice.

The Democrats have betrayed it by capitulating to the prejudices and undemocratic practices of the southern Dixiecrats. The Republicans have betrayed it by capitulating to the brazen hypocrisy of right-wing reactionary northerners.

These men so often have a high blood pressure of words and anemia of deeds.

In the midst of these prevailing conditions we come to Washington today pleading with the President and Members of Congress to provide a strong moral and courageous leadership toward a situation that cannot permanently be evaded.

We come humbly to say to the men in the forefront of our Government that the civil rights issue is not an ephemeral, evanescent, domestic issues that can be kicked about by reactionary guardians of the status quo. It is rather an eternal, moral issue which may well determine the destiny of our Nation in the ideological struggle with communism.

The hour is late. The clock of destiny is ticking out. We must act now, before it is too late.

A second area in which there is need for strong leadership is among the white, northern liberals. There is a dire need today for liberalism which is truly liberal. What we are witnessing today in so many northern communities is a sort of quasi-liberation which is based on the principle of looking sympathetically at all sides. It is a liberalism so bent on seeing all sides that it fails to become committed to either side. It is a liberalism that is so objectively analytical that it is not subjectively committed. It is a liberalism which is neither hot nor cold, but lukewarm.

We call for liberalism from the North which will be thoroughly committed to the ideal of racial justice, and will not be deterred by the propaganda and subtle words of those who say "Slow up for a while, you're pushing too fast."

A third source that we must look to for strong leadership is from the moderates of the white South. It is unfortunate that, at this time, the leadership of the white South depends on the closedminded reactionaries. These persons gain prominence and power by the dissemination of false ideas, and by deliberately appealing to the deepest hate responses in the human mind.

It is my firm belief that this closedminded, reactionary, recalcitrant group constitutes a numerical minority. There are in the white South more openminded moderates than appear on the surface. These persons are silent today because of fear of social, political, and economic reprisals. God grant that the white moderates of the South will rise up courageously, without fear, and take up the leadership in this tense period of transition.

I cannot close without stressing the urgent need for strong, courageous and intelligent leadership from the Negro community. We need a leadership that is calm and yet positive. This is no day for the rabble rouser, whether he be Negro or white. We must realize that we are grappling with the most weighty social problem of this Nation. In grappling with such a complex problem there is no place for misguided emotionalism.

We must work passionately and unrelentingly for the goal of freedom, but we must be sure that our hands are clean in the struggle. We must never struggle with falsehood, hate, or malice. We must never become bitter. I know how we feel sometimes. That is the danger to those of us who have been forced so long to stand among the tragic midnight of oppression; those of us who have been trampled over; those of us who have been kicked about. There is the danger that we will become bitter. But if we become bitter and indulge in hate campaigns, the new order which is emerging will be nothing but a duplication of the old order.

We must meet hate with love. We must meet physical force with soul force. There is still the voice crying out through the vistas of time saying: "Love your enemies, bless them that curse you, pray for them that despitefully use you. Then, and only then, can you matriculate into the university of eternal life." That same voice cries out in terms lifted to cosmic propositions: "He who lives by the sword will perish by the sword." History is replete with the bleached bones of nations that failed to follow this command. We must follow nonviolence and love.

Now, I'm not talking about a sentimental, shallow kind of love; I'm not talking about eros, which is a sort of esthetic, romantic love; I'm not even talking about filia, which is a sort of intimate affection between personal friends; but I'm talking about agape—I'm talking about the love of God in the hearts of men. I'm talking about the kind of love that will cause you to love the person who does the evil deed, while hating the deed that the person does. We've got to love.

There is another warning signal. We talk a great deal about our rights, and rightly so. We proudly proclaim that three-fourths of the peoples of the world are colored. We have the privilege of noticing in our generation the great drama of freedom and independence as it unfolds in Asia and Africa. All of these things are in line with the unfolding work of providence.

We must be sure that we accept them in the right spirit. We must not seek to use our emerging freedom and our growing power to do the same thing to the white minority that has been done to us for so many centuries.

Our aim must never be to defeat or humiliate the white man. We must not become victimized with a philosophy of black supremacy. God is not interested merely in freeing black men and brown men and yellow men. But God is interested in freeing the whole human race.

We must work with determination to create a society, not where black men are superior and other men are inferior and viceversa; but a society in which all men will live together as brothers and respect the dignity and worth of human personality.

We must also avoid the temptation of being victimized with the psychology of victors. We have won marvelous victories through the work of the NAACP. We have been able to do some of the most amazing things of this generation, and I come this afternoon with nothing but praise for this great organization. The work that it has already done and the work that it will do in the future. Although they outlaw it in Alabama and other States, the fact still remains that this organization has done more to achieve civil rights for Negroes than any other organization we can point to. Certainly this is fine. We must not, however, remain satisfied with a court victory over our white brothers.

We must respond to every decision with an understanding of those who have opposed us, and with an acceptance of the difficult adjustments that the court orders pose for them. We must act in such a way as to make possible a coming together of white people and colored people on the basis of a real harmony of interest and understanding. We must seek an integration based on mutual respect.

I conclude by saying that each of us must keep faith in the future. Let us not despair. Let us realize that as we struggle for justice and freedom we have cosmic companionship. This is the long faith of the Hebraic-Christian tradition; that God is not some Aristotelian, unmoved, mover who merely contemplates upon Himself He is not merely a self-knowing God, but an everloving God, forever working through history for the establishment of His kingdom.

Those of us who call the name of Jesus Christ find something of an event in our Christian faith which tells us this. There is something in our faith that says to us: never despair, never give up. Never feel that the cause of righteousness and justice is doomed. There is something in our Christian faith, at the center of it, which says to us that Good Friday may occupy the throne for a day, but ultimately it must give way to the triumph and beat of the drums of Easter. There is something in our faith which says that evil may so shape events that Caesar will occupy the palace and Christ the Cross. But one day that same Christ will rise up and split history into A. D. and B. C., so that even the natal life of Caesar must be dated by his name.

There is somethinga in this universe which justifies Carlyle in saying: "No lie can live forever."

There is something in this universe which justifies William Cullen Bryant in saying: "Truth crushed to earth will rise again."

There is something in this universe which justifies James Russell Lowell in saying: "Truth forever on the scaffold, wrong forever on the throne. Yet that scaffold sways a future, and behind the dim unknown stands God—within the shadow, keeping watch above his own."

Go out with that faith today: go back to your homes in the Southland with that faith today; go back to Philadelphia, to New York, to Detroit and Chicago with that faith today. The universe is on our side in the struggle. Stand up for justice.

Sometimes it gets hard; it is always difficult to get out of Egypt; the Red Sea always stands before you with discouraging dimensions. Even after you have crossed the Red Sea, you have to move through a wilderness with prodigious hilltops of evil and gigantic mountains of opposition. And I say to you this afternoon, keep moving. Let nothing slow you up. Move on with dignity and honor and respectability.

I realize that it will cause a restless night sometimes. It might cause losing a job; it will cause suffering and sacrifice. It might even cause physical death for some. But a physical death is the price that some must pay to free their children from a permanent life of psychological death. Nothing can be more Christian.

Keep going today; keep moving amid every obstacle; keep moving among every mounting of opposition.

If you will do that with dignity, when the history books are written in the future, the historians will have to look back and say there lived a great people, a people with fleecy locks and black complexion, but a people who injected new meaning into the veins of civilization; a people which stood up with dignity and honor and saved western civilization in her darkest hour. A people who gave new integrity and a new dimension of law to our civilization.

When that happens, the morning stars will sing together, and the sons of God will shout with joy.

Mr. DOUGLAS. Mr. President, the press did not completely report the Reverend Mr. King's remarks. Because of their significance, their eloquence, and the sense of sober responsibility and confidence in the ultimate victory of the civil-rights cause here in the United States of America, I urge my colleagues and all the rest of the American people to give careful reading and sympathetic consideration of Reverend King's statement.

Mr. President, one point made by Mr. Phillips early in his report and repeated in his final paragraph, has troubled me; and I have, therefore, checked with colleagues on both sides of the aisle whose commitment to meaningful civil-rights legislation is beyond question.

In the fourth paragraph of Mr. Phillips' report he states that "a civil-rights bill of some sort is likely to become law before this session of Congress ends, but it will be a law whose terms have been dictated largely by its southern opponents."

Mr. EASTLAND. Mr. President, at this point will the Senator from Illinois yield to me?

Mr. DOUGLAS. I am glad to yield.

Mr. EASTLAND. Let me tell the distinguished Senator from Illinois that the southern members of the Judiciary Committee cannot dictate anything. I wish we could.

I should like to make it clear that there is no filibuster in the Senate Judiciary Committee. We had extensive hearings, and there was an attempt made to bring the bill up in the committee before the hearings were printed and available to the members of the committee. In fact, the testimony to substantiate certain provisions of the bill was the testimony of the Attorney General. As I understand, that testimony was among the last testimony available for printing, because the Attorney General corrected his testimony. In fairness, I think the Senator from North Carolina [Mr. ERVIN], who was writing the minority views, in which he desired to cover those particular points, should have had the corrected testimony before him.

Since that time, let me say, we have proceeded, I think, with effective deliberation as to the issues. We have had one vote on an amendment. We would have proceeded yesterday on other amendments had a quorum been present. I should like to tell my friend that the chairman was present in the committee yesterday, and has been present at each of the meetings. We did not get a quorum yesterday because of the absence of members of our own party, the Democratic Party.

I have heard Senators on the other side of the aisle say that if the Democrats had been present there would have been present a sufficient number of Republicans to make a quorum. That was true on yesterday. I remember a few weeks ago the chairman was there and waited 50 minutes. The Democrats were there. There were hardly any Republicans present.

I do not think that either party is subject to criticism. We are proceeding to the consideration of the bill and the amendments. I think the consideration has been very helpful. It is a bill which would change our form of government and deprive the American people of some of their most basic rights, and I think we should go very carefully into the questions involved and submit to the Senate a bill that will protect the liberties guaranteed to the American people in the Bill of Rights.

Mr. DOUGLAS. May I say to my good friend from Mississippi that, of course, we have no infallible Geiger counter to determine the degree of filibustering which may be taking place——

Mr. EASTLAND. I think the Senator is unfair in saying there is a filibuster. There is no filibuster that I know anything about.

Mr. DOUGLAS. I was very careful not to use the term, but I did say, and I stand by it, that defeat or emasculation by delay continues to be the strategy of those opposed to the enactment of civil-rights legislation, subject to what, with charity, could be called extended debate within the whole Judiciary Committee itself.

I marvel at my moderation. While I have to depend on what I read in the newspapers, the accounts of at least 2 or 3 of those meetings indicated to me that something very close to a filibuster has been taking place. I refer particularly to a meeting in which the chairman of the committee promptly proceeded to recognize the Senator from North Carolina, who, in a most amusing fashion, talked about an hour and a half on subjects somewhat extraneous to the issue.

Mr. EASTLAND. The chairman has to conduct the hearings in accordance with the rules of parliamentary procedure, and I do not think any member of the committee, Democratic or Republican, can say that has not been done. When the Senator from North Carolina requests recognition, and requests it first, it is my duty as chairman of the committee, to recognize him. When a Senator, a member of the committee, says he does not want to be interrupted, except for questions, he has the right to proceed without interruption. I know of one meeting where that was done; but, as I told the distinguished Senator, we began to consider and vote on amendments a week ago yesterday. We were willing to vote on amendments yesterday, had a quorum been present.

The Senator from Illinois has mentioned the distinguished senior Senator from North Carolina [Mr. ERVIN]. At the meeting in connection with which he is being criticized, he made this statement or proposition: That it had been announced by the majority leadership of the Senate that the bill would not be taken up in the Senate until the House had acted; and that immediately upon action by the House, the Judiciary Committee would meet from day to day and proceed to mark up the bill.

Mr. DOUGLAS. Who made that statement?

Mr. EASTLAND. That was the proposition made by the Senator from North Carolina at the meeting as to which the Senator from Illinois is criticizing him for talking too long. That proposition was objected to by the members of the committee from the other side of the aisle. I could not think of anything that would be fairer.

Mr. DOUGLAS. The Senator from Mississippi is always courteous and gentlemanly in his manner and conciliatory in his approach, and the Senator from Mississippi and I, as he well knows, have the most pleasant of personal relations.

Mr. EASTLAND. Certainly.

Mr. DOUGLAS. But, as I say, it is extraordinary how everything has been dovetailed in together, whether by accident or design, to prevent any action.

If the Senator from Mississippi will permit me, let me mention a few things. First, it is extraordinary that, while the Senate has been in recess or adjournment on other days, it has never been in recess or adjournment on Monday. Sometimes the Senate does not meet on Tuesday, sometimes it does not meet on Wednesday, sometimes it does not meet on Thursday, it seldom meets on Friday, and almost never on Saturday, but it always meets on Monday at 12 o'clock, and therefore opportunity is afforded——

Mr. CASE of New Jersey. Mr. President, will the Senator yield?

Mr. DOUGLAS. Yes.

Mr. CASE of New Jersey. I call the attention of the Senator to the fact that on some Mondays the Senate meets at 11 o'clock a. m.

Mr. DOUGLAS. That is true. Last Monday it met at 11 o'clock. Thus, that permits some member of the Judiciary Committee—and such a member is always there—to make the point of order at the weekly Monday meeting of the committee that the Judiciary Committee cannot meet while the Senate is in session.

Mr. EASTLAND. Let us take the statement the Senator from New Jersey made that the Senate, a week ago, met at 11 o'clock on Monday. We were "pushed" to a vote on an amendment. I had to make a personal request of the Members to cease talking, and had to accuse two Senators of filbustering, so the committee could vote.

Mr. DOUGLAS. Let us develop this case point by point. The fact is that the Senate has been meeting on Monday at 12 o'clock, and sometimes at 11 o'clock. Therefore on that day dilatory and delaying actions can be carried forward in the committee.

Mr. EASTLAND. Let me be frank with the Senator. Of course, I am opposed to the bill.

Mr. DOUGLAS. I gathered as much. [Laughter.]

Mr. EASTLAND. While I am opposed to the bill, its consideration is proceeding within the limits of the rules of the Senate and the rules of the committee, and——

Mr. DOUGLAS. May I say the rules of the Senate and the rules of the committee——

Mr. EASTLAND. I am not through.

Mr. DOUGLAS. I beg the Senator's pardon.

Mr. EASTLAND. And the consideration is effective. It is deliberate, but it is effective to persons on both sides of the issue, and the Senator should consider that.

Mr. DOUGLAS. This has been going on ever since January. There has been very little other business before the Judiciary Committee, aside from a few private bills.

Mr. EASTLAND. Oh, no. I wish the Senator could see how busy the subcommittees and the full committees are.

Mr. DOUGLAS. Mr. President, I should like to proceed.

Mr. EASTLAND. I apologize to the Senator.

Mr. DOUGLAS. I may say that the rules of the Senate, the procedures of the Senate, and the procedures of the Committee on the Judiciary have all been nicely interlaced to delay and to impede any effective vote on the civil-rights measure. This fact is perfectly well known to the Senator. I am sure when the Senator returned to Mississippi he does not emphasize any speed which he uses in bringing such a bill to the floor. I am sure that when he talks confidentially, or even less than confidentially, to his constituents, he lays due stress upon delay and dilatory tactics to impede a vote on the measure.

Mr. EASTLAND. Mr. President, will the Senator yield?

Mr. DOUGLAS. I yield.

Mr. EASTLAND. Has the Senator seen anywhere anything to indicate that the chairman of the Committee on the Judiciary made any such statement?

Mr. DOUGLAS. I am not trying to get anything on the chairman of the Judiciary Committee, but I think the chairman will not deny the truth of the statement which I have made.

Mr. EASTLAND. Oh, yes. The chairman has made no such statement to his constituents or anyone else. The chairman is just the errand boy of the committee, that is all he is. I merely sit there.

Mr. DOUGLAS. Although on other matters he is the soul of expedition, in this case he is a most dilatory errand boy.

Mr. EASTLAND. The Senator is being unfair to the chairman.

Mr. DOUGLAS. That is the last thing I wish to be.

Mr. EASTLAND. The chairman has to sit there, and when a member of the committee asks for recognition, the chairman has to recognize the member.

Mr. DOUGLAS. Why do his eyes always light on someone from the South?

Mr. EASTLAND. Because he is the first to speak.

Mr. DOUGLAS. Was the Senator from Missouri [Mr. HENNINGS] not equally worthy of recognition, as compared to the Senator from North Carolina?

Mr. EASTLAND. The Senator from Missouri has been recognized several times, when he spoke first. I do not think anybody would say that no one who is not a southern Member is recognized. Other Senators are recognized, when they speak first.

Mr. DOUGLAS. It appears that southern Members are always recognized, so it is said that they do speak first; is that not true?

Mr. EASTLAND. No. When they ask for recognition first they are recognized. That is my duty. I should recognize them under such circumstances.

Mr. DOUGLAS. It is a fine point, as to who speaks first.

Mr. EASTLAND. I do not think there has been any question about that in the committee.

Mr. DOUGLAS. The plain matter of fact is that this bill has been before the committee since January. Hearings were started in February. The hearings were concluded in March. It is now nearly the end of May. If we do not get a bill on the floor very soon, we know exactly what will happen. There will be extended debate for week after week. Then the argument will be made, "Will you hold up the appropriations? Will you hold up the national defense?" So a determined drive will then be made to lay civil rights aside and let the filibuster win.

Mr. EASTLAND. Mr. President, will the Senator yield for a question?

Mr. DOUGLAS. Certainly.

Mr. EASTLAND. Is that not a sound argument?

Mr. DOUGLAS. It is an argument which undoubtedly will be made. What I am trying to say is that we should be moving, and we should get a civil rights bill on the floor of the Senate very soon so that we can act on its whether we vote yes or no.

Mr. EASTLAND. Let me tell my distinguished friend, the Senator from Illinois, that what he has said will have our sincere consideration.

Mr. DOUGLAS. I am sure it will be considered, but I am also sure it will not be acted on.

Mr. EASTLAND. I can say, in all seriousness, that there is no filibuster in the Committee on the Judiciary, that we are now proceeding to vote on the amendments and to mark up the bill.

Mr. DOUGLAS. Is the Senator willing to have special meetings of the Committee on the Judiciary each day from now on and not merely on Monday as has hitherto been the case?

Mr. EASTLAND. Each day?

Mr. DOUGLAS. Each day.

Mr. EASTLAND. The Senator from Illinois knows how hard it is to get a quorum for special meetings of the committee. I tried to get a quorum. We could not get one for the regular meeting. The chairman tried to get an extra meeting last week.

Mr. DOUGLAS. I recognize that the Senator from West Virginia [Mr. NEELY], the Senator from Missouri [Mr. HENNINGS] and the Senator from North Dakota [Mr. LANGER] are ill.

Mr. EASTLAND. That is true.

Mr. DOUGLAS. I recognize that fact.

Mr. EASTLAND. The key members are involved. The Senator from Arkansas [Mr. MCCLELLAN] has offered an amendment, which is the pending question, the right-to-work amendment. The Senator from Arkansas was in New York City to receive the award as Father of the Year.

Mr. DOUGLAS. Which he richly deserved, and which we are delighted he received.

Mr. EASTLAND. That is true. It would have been grossly unfair to call a meeting to consider his amendment, which was the pending question, in his absence.

Mr. DOUGLAS. One device or another can always be found, and has been found. I simply wish to say that time is running out, and patience is being exhausted.

Mr. EASTLAND. We have been very patient, I think.

Mr. DOUGLAS. My patience is running out and so is that of tens of millions of Americans.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. DOUGLAS. I yield for a question.

Mr. HUMPHREY. I have in my hand a copy of the Congressional Directory. I am looking at page 233, where there are listed all members of the Committee on the Judiciary, some of our most able and most distinguished colleagues. I note, for the RECORD only, that there are 1, 2, 3, 4, whom one might call southerners, who come from South of the Mason-Dixon line, if we put it on the basis of geography.

My only point is that the committee has a membership of 15. There are 11 other votes involved. It seems to me that the 11 other Senators who have votes ought to be able to report a bill.

I have said repeatedly that both political parties are committed to a civil-rights platform. There are minorities in each party against civil-rights legislation, but there is a majority in both parties, in convention, committed to a civil-rights program, and the proposed civil-rights legislation which is in the committee represents a moderate—a very moderate—civil-rights program.

All I am asking is that the 11 Senators—the 11 Democrats and Republicans—outside of the 4, who have made their convictions well known, take some

action. I have never deluded myself into believing that I should be able to convince any of my friends from the Deep South they should be voting for civil-rights legislation. I think they should, but I do not think they will. I am not going to waste whatever limited forensic talents or talents of persuasion I have trying to get their votes, because I doubt that I can do it. But I should like to encourage the other 11 Senators to give at least 8 votes for the bill, and that would make an 8 to 7 vote, which would enable the bill to be reported.

The President has asked for civil-rights legislation. The Senator from Missouri [Mr. HENNINGS] introduced his bill, which provides for such legislation. The Senator from Illinois [Mr. DIRKSEN] introduced his bill to provide for it. I joined with my colleagues on this side of the aisle, and on the other side, in introducing a total civil-rights program. The Senator from New Jersey [Mr. CASE] has presented a civil-rights bill. The Senator from New York [Mr. JAVITS] and other Senators have done the same. We all have introduced bills. All we are asking for is a chance, before Labor Day, to vote on a civil-rights bill.

Mr. LONG. Mr. President, will the Senator yield?

Mr. HUMPHREY. I would even be willing to wait until after Labor Day.

Mr. LOUGLAS. I am happy to yield to the Senator from Louisiana.

Mr. LONG. The Senator realizes, of course, that people have civil rights, and civil rights should be preserved in this Nation. I would hate to see a civil-rights bill that stripped Americans of their civil rights enacted into law.

Some persons would like to have a basic right, which was won from old King John at Runnymede, the right to trial by jury, taken away. I understand that right is involved.

Certainly the Senator would not wish to see Americans stripped of the right to trial by jury, without hearings before the committee, would he?

Mr. HUMPHREY. I may say to the Senator from Louisiana that I am never one who complains about the fact that the committees have hearings, and extended hearings, so long as the committees come to a decision. I believe the point which the Senator from Illinois [Mr. DOUGLAS] has been making is that we would like to have a decision from the committee. I think the Senator from Mississippi said that we are going to get a decision from the committee; is that correct?

Mr. EASTLAND. What the Senator said was this: The committee proceeded a week ago yesterday to consider and vote on amendments ,and we would have continued along that line yesterday had a quorum been present.

I will state further that next Monday the chairman hopes to secure a vote on other amendments.

Mr. DOUGLAS. When does the chairman think a bill will be reported from the committee?

Mr. EASTLAND. The chairman does not control the committee. He is in a minority.

Mr. DOUGLAS. For a person who does not control it he is exercising very great control.

Mr. EASTLAND. No, sir. I thank the Senator, but he is incorrect.

Mr. HUMPHREY. Mr. President, will the Senator yield so that I may respond to the Senator from Louisiana?

Mr. DOUGLAS. I yield.

Mr. EASTLAND. I am in a minority.

Mr. HUMPHREY. I know there are honest differences of opinion among our colleagues as to the civil rights bill. The views of the Senator from Louisiana [Mr. LONG] are well known to me. My views are well known to him. That does not mean that we are bitterly antagonistic. It means we have different points of view.

My feeling is that we should have the right to get a bill to the floor of the Senate and debate it, argue it, offer amendments to it, and vote it up or down. I am willing to take my chances.

But we cannot do that when the bill is in the closet. We have to unlock the door and get the bill on the floor.

I am not criticizing a single one of my southern colleagues, and I want that to be crystal clear. On the Committee on the Judiciary there are but 4 southern Senators. If 4 southern Senators are so smart that they can bottle up the other 11 Senators, then, believe me, the other 11 ought to be doing some thinking.

I am simply asking that the other 11 members of the committee get their majority together and report the bill. I do not think it is fair to say that 4 members can stall 11 other members of a committee. There is unlimited debate on the floor of the Senate, under our rules—which rule I do not agree with, on a motion to take up—but in the committee all I am asking is that the 11 Senators take action. There are 11 Democrats and Republicans pledged to a civil-rights program, who campaigned on a civil-rights platform. The political parties, in convention, endorsed a civil-rights program, and the program now being considered provides less than the one we endorsed. All I say is, get the 11 votes. The 4 who are opposed will have to be a minority.

Mr. EASTLAND. We are only a minority of four.

Mr. HUMPHREY. The Senator and his colleagues are like the Spartans at the Pass of Thermopylae. They certainly "mow 'em down." All I ask them to do is to relax for a day or two, and give us an opportunity.

Mr. EASTLAND. Let me tell my good friend from Minnesota that we are a hopeless minority; and all we want is minority rights.

Mr. HUMPHREY. May I say to the Senator——

Mr. DOUGLAS. Mr. President, who has the floor?

Mr. HOLLAND. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Illinois has the floor.

Mr. DOUGLAS. I prefer to complete my statement, and then I shall be glad to yield.

Mr. HOLLAND. The Senator from Illinois has yielded to a number of other Senators.

Mr. DOUGLAS. I know I have. I probably set a very bad precedent. I should like now to proceed in accordance with the precedents and procedures of the Senate. When I conclude my statement I shall be glad to yield.

In the fourth paragraph of Mr. Phillips' report he states that "a civil-rights bill of some sort is likely to become law before this session of Congress ends, but it will be a law whose terms have been dictated largely by its southern opponents."

In conclusion Mr. Phillips wrote:

> Above all, the southerners are political realists. Thus they are beginning to show a willingness to compromise: To put up only a token, face-saving resistance from here on to a civil-rights bill shorn of its objectionable features—which is to say, most of its teeth. And a willingness to concede this is showing up on the other side.

So far as I am concerned, let me say that there is no such willingness on my part. Personally, I will not accept—whatever my voice may amount to—a civil-rights bill which is stripped of its teeth and rendered ineffective.

I believe in the ordinary practices of justice in this matter—the practices followed in the common law in equity proceedings and the practices followed to enforce at least 21 statutes. I believe that no extraneous subject, such as the right-to-work issue, should be injected. As one of 96 Members of this body, let me say that there is no willingness on my part to compromise, unless the result is a meaningful civil-rights bill. If anyone believes that by delay a face-saving process will be carried out, and that those of us who believe in civil rights will sell the substance for the empty form, he is mistaken.

This bill is itself a tremendous reduction below the real need in the field of civil rights. It does not provide for an effective Federal Employment Practices Commission whose findings and decisions would be enforcible through the courts. It provides only a bare minimum of protection of the elementary right to vote, of security of the person, for strengthening the civil-rights section in the Department of Justice and for setting up a Commission to study charges of discrimination and to report thereon.

Of course, we are well aware of the fact that reports have been current, ever since last January, when Time magazine reported that 70 votes can be obtained for cloture to break a filibuster against taking up a civil-rights bill, provided that bill is gutted and cut down to provide only for a study commission lacking the power of subpena.

It is significant that this persistent report, in varying forms, seems to emanate, not from supporters of civil-rights legislation, but from those who are more interested in political realism and winning the 1958 elections than in carrying out the pledges made by both parties in their 1956 platforms.

Enactment of a toothless civil-rights bill would fool no one, least of all the millions of Negro voters whose eyes and ears are fixed upon the 85th Congress and, particularly, the Senate, where the final act in this year's production of the

great American tragedy of civil rights will be played out in the next few months.

Such a bill, even if 1 or 2 teeth were to be left, would not be a compromise, it would not be the practice of the art of the possible. It would be looked upon, Mr. President, as a surrender to avoid a battle, as a political conspiracy to betray our pledges and our honor as political parties and as individuals.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. DOUGLAS. I yield to the Senator from Florida.

Mr. HOLLAND. Mr. President, I have been interested to hear this discussion, and particularly the comments made by my distinguished friend, to the effect that no southern Senator is supposed to support any kind of civil rights legislation.

I want the RECORD to show very clearly that for 8 or 10 years the Senator from Florida has been offering, in good faith, a proposed Constitutional amendment to require that poll tax payments shall not be required as a prerequisite to voting for President, Vice President, Senator, or Representative in Congress.

The Senator from Florida has been supported in that effort by a number of colleagues from the South. As a matter of fact, my distinguished colleague the junior Senator from Louisiana [Mr. LONG], now on the floor, is one of the cosponsors, with me, of such a bill.

There may be room for a real difference of opinion as to whether it is more important, in a civil rights piece of legislation, to think only about protecting the right to vote of people who already have the right to vote, rather than extending the right to vote to a great many people to whom that right would be extended if such an amendment as ours were submitted and ratified.

The Senator from Florida has frequently stated that he stood ready to go before his State legislature and urge the ratification of such a provision by his State. Other Senators have said the same thing with reference to their States.

The Senator from Florida took a similar position when he was a member of the State senate of Florida, in helping to knock out the poll tax as a requirement for voting in any kind of election in our State. So there can be no question as to where the Senator from Florida stands.

My sole purpose in rising now is to call attention to the fact that what my distinguished friends want is not necessarily civil rights legislation, but rather their idea of civil rights legislation. What they want to do is to proceed in the way they wish to proceed, without any consideration for the convictions of others as to what might be a more constitutional or a more adequate and effective method of proceeding.

So I hope my distinguished friends will not, in the zeal of their pursuit of an objective which they think is worth while, reach the point where they cannot see that there are others who are pursuing objectives which we regard as worth while, and which we think are more important and more helpful than the one now suggested by my distinguished friends.

Our objective is to establish the right to vote in five States of hundreds of thousands of people, both colored and white, who are not now allowed to vote, before we reach the point of protecting them, after they are qualified, from interference if they seek to exercise their right.

I want the RECORD to be perfectly clear. There are people all over the South who have knocked out the poll-tax requirement in their respective States as applicable to all types of elections. There are people all over the South who are perfectly willing, in a constitutional manner, to eliminate the poll tax as a requirement to vote for Federal officials; and they have tried for years to do that very thing.

So I hope that my distinguished friends, in their undoubted zeal for their own program, will not become so confined in their views that they will overlook the fact that there are others who have programs, and others who have convictions which they hold just as sincerely as our friends hold their convictions.

At one time or another the Senator from Florida has been supported, in his advocacy of a constitutional amendment with respect to the poll tax, by his friend from Minnesota.

Mr. HUMPHREY. The Senator from Florida still has my support.

Mr. HOLLAND. He was almost persuaded; but when he learned a little later—and I think this was the reason for his change in attitude—that the NAACP wanted a legislative act, which would be perfectly meaningless and unconstitutional, rather than the submission of a constitutional amendment, he appeared to change his views.

My distinguished friend from Illinois has never been willing to give even lipservice to the submission of a constitutional amendment of the type I have described.

So I want the RECORD to show clearly that there are men and women throughout the South who have their own ideas of civil rights, and who have fought pretty hard for the protection of the rights of individuals—to be tried, for example, rather than lynched. The Senator from Florida knows something about that subject. Lynching has gone out of vogue entirely in the South. It has ceased to exist, in our part of the Nation. However, back in the days when unfortunately it was not out of vogue, the Senator from Florida went abroad in the nighttime upon a number of occasions in an effort, sometimes successful, to avert a terrible tragedy of that kind.

The Senator from Florida knows something about civil rights. As Governor of his State he has insisted upon people of all colors having their civil rights protected.

He becomes a little weary when he hears his friends, merely because they have a program, forget that there are other programs here which are good, and which have been effectively used, both in the South and elsewhere.

The Senator from Florida is becoming sick and tired of having Senators say, "You need not expect anything constructive in this field from the people of the South." That is not true. It will never be true. Senators who entertain such a view ought to revise their thinking.

Mr. DOUGLAS. Mr. President, let me say to my good friend from Florida that he may search the records of debates for the 9 years I have been in the Senate, but I do not believe he will find that upon any occasion any Senator from north of the Mason and Dixon line has questioned the conscientiousness or good faith of Senators from south of the Mason and Dixon line. We have leaned over backward to give credit to the sincerity of Senators from south of the line. We continue to do so. I do not believe, moreover, that any of us has adopted an attitude of self-righteousness. We are quite well aware of the weaknesses in our treatment of minority groups north of the Mason and Dixon line. I believe that virtually every one of us has tried, in his own way, in his own section, to diminish the injustices which have been described.

The plain truth of the matter is that the vast proportion of the Negro population lives in those districts south of the Mason and Dixon line, and therefore the incidence of injustice is heaviest in the States lying south of the Mason and Dixon line.

I know that the Senator from Florida has put forward the idea of a constitutional amendment for a number of years. In itself it is not a bad idea, except insofar as it is intended as a substitute for something that is much better.

I should like to point out that there is no assurance that the southern States would ratify such an amendment if it were submitted to them. I have always felt that the test of sincerity would be if there were to be circulated a round robin signed by approximately 200 southern leaders who would say that they would actively work for the ratification of such an amendment in their State legislatures. It is a fact that 13 States, by refusing to ratify an amendment to the Constitution, can prevent such an amendment from going into effect.

However the main point I wish to make is that the disqualification of Negroes from the fundamental rights of citizenship does not take place primarily by means of the poll tax. As the Senator from Florida knows, that is operative in only five States, and the barrier in that connection has been lowered in some of those States. The barrier against Negroes who live in the South voting is intimidation—economic intimidation, physical intimidation—the striking of Negroes from registration lists, and the feeling that if they go to the pools to vote something will happen to them. That is the real intimidation.

It is against this fundamental denial of the basic American right to vote that the civil rights bills are directed, supported both by the administration and by the so-called liberal Members on our

side of the aisle, with both groups working together.

The civil rights bills have a simple purpose. It is to throw the protection of the Federal Government around the basic right to vote, not merely by prosecutions after the fact, but by obtaining injunctions before the act of restraint and intimidation is committed, with the injunctions backed up by the power of the courts to punish for contempt if the injunction is violated.

I know that a great to-do has been raised about the question of jury trials. I do not intend to argue that point at great length at this time. I submitted a very lengthy and, I think, very thorough brief on this subject, showing that the pertinent provision in the civil-rights bills follows not only the ordinary practices of the courts but also the practice of Congress. The great safeguard lies in the ability of the court to punish violators for a contemptuous act.

The only exception is the Norris-La Guardia Act, which, as a matter of fact, has been considerably modified by the Taft-Hartley Act. We can argue that point when it comes before the Senate for debate. However, it is a fact that public opinion became convinced that the Federal courts were in the main prejudiced against the legitimate activities of labor, that they regarded peaceful picketing as illegal, and in the case of collective bargaining itself they threw around the "yellow-dog contract" the protection of the injunctive process. Public opinion became convinced that the courts were biased and prejudiced against labor, and in order to insure justice in a limited class of cases jury trials were provided in instances where injunctions were violated.

Jury trials were provided by the Congress in this very limited area because the Federal judges, in the opinion of the Congress and the public, were not carrying out the intent and the spirit of the law. They were using the injunction and contempt proceedings to defeat rather than carry out the law.

But the jury-trial amendments to the civil-rights bill have been proposed for the opposite reason, namely, because of the fear that Federal judges through the ordinary process of the injunction and contempt proceedings will actually enforce the law and will do justice. It is because they believe that juries will never convict, however grave the offense, that some people are insisting on such jury trials.

The purpose of the Norris-La Guardia Act was to obtain justice. What is the situation today in the South? Granted that our aim is justice, as it should be, would it be furthered by the provision in the civil-rights bill of jury trials in such cases? Not at all.

Why are our southern friends afraid of southern judges? The Federal judges in the South are virtually all southerners. I do not believe there are any carpetbaggers in the South any more. The Federal judges have grown up in southern communities. They live in southern communities. They have the social feelings of the southern communities. They are subjected to social pressures. One of the outstanding judges was Judge Waring, of Charleston, S. C., and he felt the social chill all right, although he stood his ground. These judges, however, by their position on the Federal bench, are somewhat insulated from the prejudices that surround them by the fact that they have lifetime tenure. This has enabled the Federal judges in the South to make, on the whole, a very good record in the matter of civil rights.

But the case is very different with southern juries. In the first place, the selection of jurors can be manipulated so that only those jurors will be chosen who will not convict a white man for preventing a Negro from voting. The jury lists, as we all know, as a practical matter, can be manipulated, and it is possible, therefore, to get just about the kind of jury the community wants. Furthermore, when the jurors have completed their work they go back into the communities in which they live. If they have brought in a verdict supporting a Federal judge in an injunction matter protecting the Negroes right to vote, they know they will be exposed to economic pressure and possibly even physical pressure.

So that, if the aim is justice, as it should be, justice is not served by superseding the courts in equity proceedings and providing jury trials.

Therefore, any provision which strikes out the ordinary powers of the equity courts to enforce the dignity of their rulings, and any attempted compromise along that line, so far as I am concerned is unsatisfactory, unacceptable, and will amount to pulling all the teeth from the law.

I now yield to the Senator from New Jersey.

Mr. CASE of New Jersey. First, Mr. President, I wish to express my appreciation to the Senator from Illinois for bringing this matter to the attention of the Senate and to the attention of the country as a whole. Whatever may be the situation at a particular meeting with regard to the handling of the committee's activities by the chairman on a particular day, the fact is that here we are at the end of May and we seem to be almost hopelessly far away from action on this important subject.

Mr. President, that has not happened by accident, and it is important that the country should know that it has not happened by accident.

I should like to make this particular comment upon the New York Times article which has been discussed by the Senator from Illinois. I, too, was concerned by the statement that there appeared to be a willingness to concede that the so-called objectionable features—in other words, most of the teeth of the bill—would be and should be eliminated from any proposed civil-rights legislation; namely, that those of us who favor civil-rights legislation are showing a willingness to concede it. Like the Senator from Illinois, I have seen no such willingness, and I know of none, in fact.

From conversations with Members of the Senate on this side of the aisle I am convinced that no such feeling exists.

Mr. DOUGLAS. I am very glad to have that reassurance of the Senator from New Jersey. I expected it because the Senator from New Jersey has been in the forefront of those who are struggling to put an effective civil-rights act on the statute books, and he deserves a great deal of credit for his efforts.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. DOUGLAS. I yield.

Mr. JAVITS. Mr. President, I wish to join the Senator from New Jersey in supporting the Senator from Illinois [Mr. DOUGLAS] and the Senator from Minnesota [Mr. HUMPHREY] in this civil-rights struggle, which is distinctly a bipartisan struggle. It is right that men who feel the same way should join together on a bipartisan basis—and that is the only way to succeed.

I may say by way of information that I am hoping very much to get some action in the Committee on Rules and Administration on one of the resolutions pending before the committee, one of which alone has the backing of more than 54 Members of the Senate. The Douglas resolution which I am on would amend the rules so that it would be possible to get a bill before the Senate and actually to debate it and vote it up or down, as the Senator from Minnesota has stated.

In supporting the Senator from Illinois in this fight I pledge my own efforts in that direction of amending rule XXII and I hope that a majority of the members of the Committee on Rules and Administration will pursue that point as a corollary and as an essential activity.

I should like to say something about the legal phases involved. I am a lawyer, and I have been attorney general of the State of New York. I have had opportunity to debate the issue of jury trials in contempt cases with its principal advocate, the Senator from North Carolina [Mr. ERVIN], and others. It is essential to point out that as time honored as is the jury trial, so time honored also are equity proceedings, which are just as effective and just as long lasting for the protection of the individual citizens.

We cannot get lost in a dream world here. We know very well we are proposing to use civil rather than criminal measures, which are at least as legal in their effect, for the reason that criminal remedies have not worked in certain sections of the country. We cannot shut our eyes to the fact that we would be destroying the very civil remedy we would create by this legislation if we lent ourselves to the idea that this now gives new sanction, in a contempt proceeding where the United States is the complainant, to jury trials.

Mr. DOUGLAS. I thank the Senator from New York, whose help has been very constant and important in this matter.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. DOUGLAS. I now yield to the Senator from Florida.

Mr. HOLLAND. In the first place, I thank my distinguished friend from Illinois for yielding to me again.

In the second place, I may say, with reference to my friends across the aisle, the modern Republicans who have just

spoken, the distinguished Senator from New Jersey [Mr. CASE] and the distinguished Senator from New York [Mr. JAVITS], that I am a bit distressed because, while they were handing out their lavish compliments to the ultraliberal Senators on this side of the aisle, they did not see fit to pass out, even sparingly, a word of praise to the sizable group of Senators who have consistently urged the submission and passage of a constitutional amendment on the poll-tax question, such as that which I have just discussed.

It is the first evidence I have seen that the modern Republicans are quite different from their elder brethren, because a look at the platforms of the Republican Party of only a few years ago will disclose that the 1944 platform contained a provision stating that the Republican Party recognized that a constitutional amendment was the only way legally to deal with the poll-tax question, and proposed to see to it that such an amendment was submitted, so that the States could act upon it. I am not quoting the exact words, but that is the substance of the provision.

It is simply too bad that our distinguished friends, the modern Republicans, have become so full of zeal with reference to the objectives of modern republicanism, which seem to be willing to run roughshod over many fine, long-standing American traditions, that they forget the tenets of their own party and forget the commitments of their own party, which, by the way, were not fulfilled when their own party came into power, because they made no serious effort to submit such a constitutional amendment.

Instead, folk from the South, who believe in civil rights in that field, were the ones who submitted such a constitutional amendment; and if there has been a word of comfort or support ever to have come from the other side of the aisle, the Senator from Florida would be glad to recognize it. But he has never heard it.

Mr. EASTLAND. Mr. Pfesident, will the Senator yield?

Mr. HOLLAND. The Senator from Illinois has the floor.

Mr. DOUGLAS. Instead of yielding in the second degree, I prefer to yield in the first degree. When the Senator from Florida has concluded, I shall yield to the Senator from Mississippi.

Mr. EASTLAND. I merely wish to ask the Senator from Florida a question.

Mr. DOUGLAS. The Senator from Mississippi is very seductive in his manner. I can well understand how he is always able to keep bills bottled up; because it is hard to refuse him. He may go ahead and I yield to him. [Laughter.]

Mr. EASTLAND. The Senator from Florida has heard the denunciation of the right of trial by jury from several of our colleagues; has he not?

Mr. HOLLAND. The Senator from Florida has hardly been able to believe his ears, but he has heard that kind of utterance come from both sides of the aisle. Particularly was he astounded when he heard it coming from his modern Republican friends on the other side of the aisle.

Mr. EASTLAND. The sense of that argument is this: That the right of trial by jury will impede and hamstring the administration of justice. Is that not the logic of the argument?

Mr. HOLLAND. It is not only the logic of it; it is the expressed meaning of it, as stated frequently, by the various adherents to the cause which has been so jealously pursued by our friends, the distinguished Senator from Illinois and the distinguished Senator from Minnesota.

I want to remind them and the other Members of the Senate, and I want the people to realize, that there is abundant proof in the record of the voting in the Southern States which have done away with the poll-tax requirement that both the minority group—the Negroes—and the majority group—the whites—have voted in much greater numbers and in a much greater percentage of the mature adult population after the abolishment of the poll-tax requirement.

The figures will have to speak for themselves—I cannot quote them from memory—but in my own State the first election after the repeal of the poll-tax requirement showed a tremendous upsurge in the number of citizens participating. The statistics showed a much greater percentage of participation by our Negro citizens than had ever taken place before. The last election returns—because our books still show the color of the registrants—indicated, as I recall, that approximately 150,000 Negro votes were cast in our State.

Since the passage of the law repealing the poll tax in the State of Georgia there has been a similar occurrence. My authority for that statement is the distinguished senior Senator from Georgia [Mr. RUSSELL]. I wish he were on the floor now, because I would much rather have him verify the statement. But in a discussion with him the other day, I am reasonably certain he stated that approximately 200,000, or upward of that number, Negro voters are now voting in Georgia since the repeal of the poll-tax requirement.

I close by simply bringing again to the attention of my distinguished friends the fact that in their zeal for their particular programs, they are willing to limit the application of such relief as might be there when the courts have finished with the matter to those States which have repealed the poll-tax requirement for all kinds of voting, but are not willing to recognize the fact that the principal problem exists and will continue to exist in the five States which have not repealed the poll-tax requirement.

I dislike to make invidious comparisons, but if anyone wishes to read the record, he can see that the participation in voting in the great Commonwealth of Virginia, the State from which my mother came, where many of my relatives live, and the State which I love next to my own, does not begin to compare in percentage with the percentage of those voting in the State of Florida and the State of Louisiana.

I see on the floor my friend, the distinguished junior Senator from Louisiana [Mr. LONG], who has joined me always in the submission of the constitutional amendment to abolish the poll tax.

I simply suggest that to put first things first would be to make it possible for the disfranchised hundreds of thousands of persons of both colors to become qualified without having to pay a poll tax, to vote for President, Vice President, Senators, and Members of the House of Representatives, without interfering with State and local matters.

Mr. DOUGLAS. I wonder if my friend from Florida would be willing to conclude. The hour of 2 o'clock is approaching, and I know a point of order can be raised against me at 2 o'clock. So I wonder if the Senator from Florida would be willing to conclude. Then I should like to yield to the Senator from Minnesota.

Mr. HOLLAND. I shall conclude with a final sentence.

I hope our distinguished friends will be willing to put first things first in the field of civil rights; instead of applying the remedy they want to apply to others I hope they will seek to bring the franchise in national elections to the great disfranchised masses in the 5 States which still have the poll-tax requirement.

Mr. DOUGLAS. Mr. President, I now yield to the Senator from Minnesota.

Mr. HUMPHREY. Mr. President, I wish to assure my distinguished friend from Florida that if he can get his constitutional amendment to abolish the poll tax reported, he will have my vote.

I was interested in what the Senator from Florida had to say. He said that the junior Senator from Minnesota seemed to be in support of a constitutional amendment to eliminate the poll tax. I assure my friend from Florida that the junior Senator from Minnesota still supports the amendment, and will continue to do so. He also supports the elimination of the poll tax through the legislative process.

I want the poll tax eliminated—period. I will support any legitimate means or efforts to eliminate the poll tax.

When we talk about the right to vote, Congress too, has a right to vote and a duty to vote. One civil right which has been violated is the responsibility of the Congress to vote upon civil-rights legislation when bills have been introduced.

I point out to my friends from the Southern States that no one has greater admiration for their abilities, qualities, and general good character than has the junior Senator from Minnesota. I impute no ill motives to their actions. They have different points of view on some issues. The Senator from Florida believes in civil-rights programs. His views may be different from mine on some of them. I am not here to judge which view is the correct one. But I have a right to expect to cast a vote upon proposed civil-rights legislation. I want to cast a vote upon the bills which are in the Committee on the Judiciary. Those bills are compromises within themselves. They are reasonable and long overdue.

I remember when the junior Senator from Minnesota introduced civil-rights bills back in 1949 and 1950. I was

branded throughout the country as some sort of dangerous radical for having introduced them. Then somebody asked, Why does he not compromise? So I offered a bill entitled "Civil Rights Commission." The story of that bill was printed in every newspaper in the United States. The headline was "HUMPHREY Offers Olive Branch to South." Then I was accused by some of having sold out on civil rights because I was willing to agree to a civil-rights commission. Lo and behold, now a civil-rights commission is called dangerous—a commission to make a simple study and to seek the facts and to inquire into alleged abuses in the case of civil rights.

I submit that this is a reasonable proposal. I submit that it is a compromise within itself. Who in this body can say that the right to vote should be denied to anyone? Frankly, I wish to say to my friends who favor civil rights that we should have started on the right-to-vote bill as the very first civil-rights bill ever to be introduced in the Congress.

Mr. DOUGLAS. On the ground that if there is an effective right to vote, then the politicians will see to it that laws protecting that right, and in the proper interests of those who are given that opportunity, will then be passed.

Mr. HUMPHREY. Yes. When I say "the right to vote," I mean the right to vote without any impairment or without any coercion or without any intimidation; and that is what the Senator from Illinois is talking about.

No one should worry about the enactment of a law to guarantee the right to vote. It is an American as the Fourth of July. The very fact that we are talking about a bill to guarantee the right to vote is a rather sad commentary upon election practices in the United States.

All we are requesting is an opportunity to vote that bill either up or down. If a majority of the Members of the Senate do not believe in a right-to-vote bill with equity proceedings—as the junior Senator from New York [Mr. JAVITS], one of the most able attorneys in this body, has pointed out—and if a majority of the Members of this body do not stand with the Senator from Illinois [Mr. DOUGLAS], the Senator from New York [Mr. JAVITS], the Senator from New Jersey [Mr. CASE], myself, and other Members of the Senate, if the Senators who oppose us have sufficient votes, they will win. But I want the bill brought up, so that it will be possible for the Senate to fight out the controversy and so that we shall have an opportunity to make our case. I wish to have an opportunity to express cogently and, I hope, persuasively, and almost in a fair and reasonable manner, my point of view and support regarding a right-to-vote bill.

But in the present situation, we are merely engaging in forensics; no proposed civil-rights legislation is now before us.

My plea to the distinguished chairman of the Judiciary Committee is to report such a bill to the Senate, so that it may be on the calendar, and the Senate may have an opportunity to vote on it.

Let me say that I know the Judiciary Committee is hard working, and I am aware of the large number of bills the Judiciary Committee reports to the Senate. I am not one who feels that the Judiciary Committee does not do more than a full day's work. But, we need action on the civil-rights bills.

Mr. President, both political parties are pledged to support a civil-rights program; and the Senate has now debated the issue for more than 10 years. It appears to me that both political parties are sharing in the guilt of not performing on their political promises. Regardless of whether a Senator is a modern Republican or is an old-fashioned Republican or is a northern Democrat or is a southern Democrat or is a New Dealer or is an Old Dealer, he is pledged to support a political-party platform which was adopted in convention. I suggest that the 11 members of the Judiciary Committee who are not from the South, and who already have expressed their views on this proposed legislation, as it has been introduced, give us a majority of votes. Then we shall have the bills brought before the Senate. Then the debate can be had; and the Senator from Illinois [Mr. DOUGLAS] will take his position, and I shall stand alongside him.

The bills in the committee are enough of a compromise for me; they constitute all the compromise we need.

I thank the Senator from Illinois for yielding to me.

Furthermore, I wish to say to the Senator from Florida [Mr. HOLLAND] that I respect his integrity and his good faith in this field; and I hope he will pursue the objective of his program for elimination of the poll tax. He will have my help at this time in his effort for the adoption of a constitutional amendment on the poll tax, as he had my help a year ago, and as he had my help 3 years ago. There will be no wavering. But, Mr. President, when I go to the banquet table of civil rights, I do not want to have just a toothpick and a glass of cold water as a substitute for lunch. Instead, I want to have something a little more nourishing. [Laughter.]

Although I know that the civil-rights proposal of the Senator from Florida is more than a glass of cold water and a toothpick, let me say that it is at best meger hors d'ouvres; and I want to get to the main course—in other words, to the main bill and the other bills introduced both on behalf of the President of the United States, through his supporters in this body, and by Senators on this side of the aisle who have been in favor of civil-rights legislation ever since they came to the Congress.

Mr. HOLLAND. Mr. Presdent, will the Senator from Illinois yield to me?

Mr. DOUGLAS. Mr. President, I am prepared to yield the floor, since the hour of 2 o'clock has arrived. However, unless objection is raised, I should like to yield to the Senator from Florida. On the other hand, if objection is raised to a continuation of this debate beyond 2 o'clock, then, in accordance with the procedures of the Senate, which I guard so faithfully, I am perfectly willing to yield the floor.

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). The Senator from Illinois has the floor.

Mr. DOUGLAS. Then, Mr. President, I yield to the Senator from Florida.

Mr. HOLLAND. Mr. President, I thank the Senator from Illinois for yielding to me again.

I wish to thank my friend, the Senator from Minnesota [Mr. HUMPHREY]. I had not felt behind our constitutional amendment any really strong support of the ardent kind which he generally has given to measures which he has supported during the last 8 years. I hope we shall feel the effect of more ardent support from him from now on.

I may say, by way of information to my distinguished friends on this side of the aisle, and also to my friends on the other side of the aisle who are not modern Republicans, but are real Republicans of the regular variety, that I hope they will see fit to support me when I offer the poll-tax constitutional amendment as a substitute for the measure which has been discussed so long today on the floor of the Senate.

They will have a chance at least to show whether they still stand by that party declaration, announced in reference to a constitution—which was the same then as it is now, and which I think meant the same then that it does now—that constitutional declaration having been that the Republican Party felt that the only sound constitutional way to repeal the poll tax in the States was by constitutional amendment. I shall give them a chance to vote for the substitution of my amendment at the appropriate time, provided that the Senator from Mississippi and his 14 associates who constitute the able membership of the Judiciary Committee make such a mistake as to bring to the floor of the Senate the measure we have had under discussion.

Mr. CASE of New Jersey. Mr. President, will the Senator from Illinois yield to me?

Mr. DOUGLAS I yield.

Mr. CASE of New Jersey. I should like to say that so far as the civil-rights issue is concerned, I know of no distinction between Republicans. I know of no change in party position. The Republican position, my own position, the position of all my colleagues on this side of the aisle, so far as I am informed, as well as the position of many Members of the Senate on the other side of the aisle, has been in favor of civil rights since long before the present administration took office and before any prior administration since our party was founded took office. So let it not be understood that there is any Johnny-come-lately division between Republicans on this issue or any other issue.

Mr. EASTLAND. Mr. President, will the Senator from Illinois yield to me?

Mr. DOUGLAS. Mr. President, I had promised to yield next to the Senator from New York [Mr. JAVITS].

Mr. EASTLAND. I wish to make a comment, in view of what the Senator from New Jersey has said.

Mr. DOUGLAS. Very well; I am glad to yield to the Senator from Mississippi.

Mr. EASTLAND. Which party controlled the 80th Congress?

Mr. DOUGLAS. It was the Republican Party.

Mr. EASTLAND. Yes; it was the Republican Party.

Mr. DOUGLAS. Yes.

Mr. EASTLAND. In 1953 and 1954, which party controlled the Senate?

Mr. DOUGLAS. It was the Republican Party.

Mr. EASTLAND. How many civil-rights bills were reported to the Senate during those sessions?

Mr. DOUGLAS. I am not aware of any. But let me say that I am not trying to score points off the Republican Party. I think the leadership of the Republican Party in times past has merely given lipservice to the principle of civil rights and that a large number of the conservative Republicans have in practice joined to protect the filibustering abilities of the Senators from the South, and therefore have been active accomplices, so to speak, in killing civil-rights bills.

But I am not here to indict the Republican Party. I wish to say that within the Republican Party there are sincere members who want civil-rights bills passed as much as do sincere members within the Democratic Party; and I hope Senators will act in this matter as Americans, not as Republicans or as Democrats; and that we shall stop trying to call foot faults on each other. [Laughter.] The past is merely prolog. Let us move on speedily and fearlessly into the future.

Mr. EASTLAND. But I was objecting to the partisan statement made by the Senator from New Jersey.

Mr. KNOWLAND. Mr. President, let us have the regular order.

Mr. PASTORE. Mr. President, I regret to do so, but I shall have to insist on the regular order.

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). The regular order is called for; and it is the further transaction of morning business.

THE HOUSING ACT OF 1957

Mr. CAPEHART. Mr. President I send to the desk my amendment, identified as "5-25-57-G." It is not necessary to read the entire amendment. I might say the amendment has to do with the downpayment schedule on FHA mortgages. I ask that it be made the pending question.

The PRESIDING OFFICER. The Senate is still proceeding with the transaction of morning business.

WELCOME TO A GREAT EUROPEAN, DR. ADENAUER

Mr. WILEY. Mr. President, I am pleased to join with my colleagues in welcoming today at 2:30 one of the great statesmen of this century—Chancellor Konrad Adenauer, of the Federal Republic of Germany.

The fact that we have been fortunate enough to have the Chancellor as a guest of the United States on four previous occasions, heightens, rather than lessens, our interest and our pleasure in his presence.

We as a people have come to know him intimately, and we have found that in each of his visits he has expanded his services to the cause of a free and peaceful world.

This morning's news from Washington, from Bonn, and from Moscow, shows that the Soviet Union is intensifying its efforts to subvert the Federal Republic and lure it down a path to the same slavery which today is the unhappy lot of 18 million Germans of the East Zone.

We know that Soviet Russia will fail in this attempt, thanks to the intelligence and determination of the German people themselves, led by their great Chancellor.

We know, too, that the present disarmament negotiations, which are now underway, by the U. N. Disarmament Subcommittee in London, will not in any way prejudice the cause of the reunification of Germany—the great issue which is naturally in the forefront of the attention of the German people.

Avoidance of atomic war, reuniting with their brethren from the East, maintenance of freedom and prosperity—these are the goals of the people of the Federal Republic, and these are our goals, as well.

I am sure that the discussions which have been underway between Chancellor Adenauer, President Eisenhower, Secretary Dulles, and other officials will prove most fruitful.

I, for one, have urged that every effort be made for frankest discussion of issues which are of deep concern to the people of the Federal Republic. This includes an attempt to resolve, if at all possible, in a sound, proper, and satisfactory way, and in the public interest, the long-pending, highly controversial alien property issue, just as it includes an attempt to resolve other problems pending between us.

As one who has been privileged to know the Chancellor as a personal friend, I say that the American people warmly welcome him to our "house," just as we of the Congress warmly welcome him within the Chamber of our Capitol.

We wish for him continued health, long life, and the fulfillment of his deepest aspirations in the cause of a free, peaceful, prosperous, and united Europe, including a free, peaceful, prosperous, and united Germany.

REDUCTION OF THE BUDGET

Mr. THURMOND. Mr. President, during the past several months, I have been deeply concerned about the status of the proposed budget.

First of all, I believe that the budget is too high and should be reduced.

Secondly, I am concerned about whether we are making real reductions in spending when we cut the budget proposed for 1958.

Some of the questions which have arisen in my mind are summarized in an article published in the May 31, 1957, issue of U. S. News & World Report, one of the most distinguished and authoritative magazines published.

This article contains a table showing that in each of the past 10 years, the first appropriation approved by the Congress for a budget year has been increased later. The largest of these supplemental increases to the first appropriation approved by the Congress came in 1951, during the Korean war, and amounted to $7.6 billion. This brought the total spending for that year to $83.6 billion, instead of the $76 billion first approved. The smallest increase in spending over the first appropriation approved by the Congress during the past 10 years was in 1955. Congress first appropriated $56.2 billion, and then added $900 million later.

Mr. President, the matter of appropriations is very complicated, and it is especially complicated for those of us who are not members of the Appropriations Committee.

I believe the people of this country should be accurately informed as to what we have really done when we say we have cut the budget. If that means we have succeeded in reducing the budget for this year while, at the same time, approving future spending which must be provided for later, this should be made clear.

I am today writing a letter to the chairman of the Senate Appropriations Committee to request him to see if it is possible to have the status of appropriations already made by the House and Senate clarified at this point. Also, I am requesting whether it might be possible in the future to have the committee staff provide additional helpful information.

What I would like to know is whether the budget reductions made by the House and Senate in the appropriation bills considered by each House will have to be restored later in supplemental appropriation bills or in the appropriation bills of future years. I would like to know whether there are appropriations fixed by laws enacted in prior years which we have failed to provide for in the appropriation bills already approved by the Senate this year.

If the House or the Senate has failed to provide funds which will be necessary to meet expenditures under the provisions of law, then we should do so now, instead of in a supplementary bill later.

I hope it will be possible for the Appropriations Committee to provide such information on bills already approved, and also to include a brief summary with each bill reported in the future, to show whether all reductions made in the budget requests can be maintained or whether statutory or other requirements will necessitate supplemental appropriations.

Mr. President, the Senate has already passed this year, S. 1585, a bill introduced by the distinguished senior Senator from Arkansas [Mr. MCCLELLAN],

which would establish a Joint Committee on the Budget. If the House will pass this measure, which 71 Members of the Senate joined in cosponsoring, I believe that many of the difficulties which concern me about the budget can be eliminated.

The PRESIDING OFFICER. The regular order having been demanded, the Chair informs the Senator from South Carolina that his time has expired.

Mr. THURMOND. I ask unanimous consent that I may have an additional minute and a half.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the distinguished Senator from South Carolina be permitted to proceed for not to exceed 5 minutes, in order to complete his statement.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from South Carolina may proceed.

Mr. THURMOND. There is also pending in the Government Operations Committee, S. 434, a bill introduced by the distinguished junior Senator from Massachusetts [Mr. KENNEDY], and which I cosponsored with a number of other Senators. This bill would "provide for improved methods of stating budget estimates and estimates for deficiency and supplemental appropriations."

The enactment of this bill, which has been favorably reported by the Reorganization Subcommittee to the full Government Operations Committee, would require the presentation of an accurate report of Federal spending each year. The report would have to include carryover funds as well as current appropriations.

If it is possible for the Appropriations Committee to provide the Senate with the information I am requesting, and if S. 1585 and S. 434 are both enacted, or if either is enacted, I believe we shall have made a start toward vastly improved budget practices. I hope we shall do so.

Mr. President, I ask unanimous consent to have printed in the body of the RECORD the article from the U. S. News & World Report to which I referred.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE "JOKERS" IN THE BUDGET CUTS

The "battle of the budget" now going on in Washington may turn out in most respects to be a sham battle. A good many of the cuts now being voted in President Eisenhower's budget are likely to wind up as no more than paper cuts, with no effect whatever on actual spending.

The biggest "joker" in the budget dispute is that actions in Congress give the impression of sharp cuts in spending, where they actually are cuts in appropriations and are aimed largely at future spending. Also, it is questionable whether these cuts in appropriations will hold up in the years ahead.

The budget for the Defense Department points up the difference between genuine and questionable cuts in the President's proposals. The House Appropriations Committee apparently slashed nearly $2.6 billion from the President's request for military funds. But, as the President pointed out in his news conference last week, about half of that cut consists simply of rearranging the Department's books.

"PHANTOM" CUTS

A reduction of $596 million, it develops, was ordered in procurement for the Army and Marine Corps. But the administration never intended to obligate this sum in the year that begins July 1. So all that Congress did to this item was to defer authorized spending for a year.

A shift of $590 million was ordered from reserve funds of the armed services to the account used to pay military personnel. The account from which this sum is taken would doubtless be replenished in a supplemental appropriation, if needed.

A cut of $127 million was ordered in maintenance for the United States force in West Germany. The money presumably will be provided by the West German Government. But, if the Germans do not supply the funds, Congress will have to make it up in a future appropriation.

The remaining defense cuts are aimed at such military programs as research and development and purchases of aircraft and guided missiles. The President and Defense Secretary Charles E. Wilson argue that these reductions will cut directly into defense, but even here it is doubtful that the cuts will show up in reduced spending in the year ahead. A long time—usually more than a year—is required to let contracts, produce equipment, and pay for it.

Chances thus are strong that very few of the cuts being made in defense appropriations will lead to lower spending in the coming budget year.

CUT NOW, RESTORE LATER?

Congress has made other cuts that appear more significant on paper than in fact. For instance, a reduction of $191 million was voted by the House in veterans' benefits. But these benefits are fixed by law, so if the cut proves impractical, Congress will have to restore it. Another such cut is $79 million in grants to States for public assistance—a legal liability that Congress will have to make good if the money is called for.

Altogether, the House or its Appropriations Committee by last week had cut a little more than $4 billion from administration requests in 11 major appropriation bills. But, of this amount, about $1.7 billion fall into the class of cuts that probably will not affect actual spending. Representative WILBUR D. MILLS, Democrat, of Arkansas, an important member of the taxwriting Ways and Means Committee, is authority for the estimate that, despite all the furor about Government spending, House cuts so far will reduce actual spending in the year ahead by no more than $250 million.

"BACKDOOR" APPROPRIATIONS

On occasion, Congress provides for spending and contracting authority that is not even considered by its Appropriations Committees, but still shows up in Treasury outlays. One method is to approve spending out of "debt receipts"—a term that means that a Government agency can borrow from the Treasury. This is done, for example, by the Commodity Credit Corporation to support farm prices and by agencies that guarantee home loans and support the mortgage market. Other agencies are given "contracting authority," which means that they can sign contracts for projects that call for appropriations in the future.

Last year the administration requested authority to obligate $1.5 billion from debt receipts and contract authorizations. Before Congress got through, that amount was boosted to $4.3 billion. Government agencies also have spending authority that carries over from earlier authorizations. Next July 1, the administration will have about $70 billion available from this source in the form of money provided for long-term programs. Add this to requests for new obligational authority in the current budget and you come up with more than $143 billion.

Congress is inclined, sometimes, to cut in one place and restore the cut in another place. An example of this maneuver is a bill to permit the Department of Agriculture to dispose of $1 billion worth of farm surpluses in overseas markets. Payments will be made in foreign currencies, amounting to an estimated dollar value of $700 million. And about 60 percent of these receipts—or $420 million—will go for foreign aid. Thus, while Congress cuts foreign aid with one hand, it may be adding assistance with the other hand.

BUDGET ADDITIONS

Congress frequently displays, moreover, a tendency to adopt spending programs of its own, without recommendations from the President. One such is a new grazing program to assist drought-stricken ranchers. It will add $15 million to next year's spending. The House has approved a new housing program, to add $1.6 billion to obligational authority and probably increase spending in the next budget year by $100 million. Another bill proposes to increase veterans' benefits at a cost of an additional $70 million in next year's outlay.

In recent years, as the following chart shows, Congress never has managed to stay within the budget set by itself, and usually has exceeded the budget submitted by the President. Ever since 1948, before each budget year came to an end, Congress increased spending authority above the amount originally approved.

Also, in most years the Government wound up actually spending more than the President estimated when he first submitted his budget. In some years, such as those of the Korean war, spending skyrocketed above original estimates because of emergencies. In the 1954 fiscal year, a big cut was made in the President's original budget because the Korean war had ended and war spending stopped. The trend since 1955 has been upward.

The record shows further that, in each budget year, Congress approves supplemental appropriations above those originally made. In the present fiscal year, ending June 30, supplemental appropriations are expected to exceed $1 billion. In the year ended June 30, 1956, supplemental appropriations also approached $1 billion.

The recent flurry over a supplemental appropriation for the Post Office was unusual only in that it prompted Congress to flare up. Despite the uproar, Postmaster General Arthur E. Summerfield got nearly all of his added appropriation, however.

SPENDING: HEADED UP

Actually, the budget-cutting drive in Congress appears to leave that body's own experts unimpressed. The staffs of two committees have both reported to Congress that Government spending is headed up, not down.

The staff of the Joint Committee on Internal Revenue Taxation has just estimated that spending in the current fiscal year, ending next June 30, will be $69.5 billion instead of the $68.9 billion the President estimated only last January. That's an increase of $600 million in 5 months. And for the year ahead, ending June 30, 1958, the committee staff estimates spending at $73 billion instead of the $71.8 billion in the President's budget.

The staff of the Joint Committee on the Economic Report notes: "The long lead times between appropriations and expenditures suggest that reductions in appropriations now probably would not reduce expenditures significantly before fiscal 1959."

Congress shows signs of accepting these forecasts. Some Democratic leaders who have been advocating tax cuts have decided to wait another year.

Do budget cuts stand up?—Here is the record of past years (spending authority, or "new obligational authority")

[In billions of dollars]

Years ending June 30—	Asked in President's budget	Approved at first by Congress	Approved finally by Congress	Increase over 1st approval
1948	$30.8	$32.1	$38.1	$6.0
1949	31.4	36.5	40.2	3.7
1950	43.9	43.3	49.5	6.2
1951 [1]	39.9	76.0	83.6	7.6
1952 [1]	93.8	90.4	92.1	1.7
1953 [1]	83.6	78.2	80.2	2.0
1954	72.2	59.5	62.8	3.3
1955	56.3	56.2	57.1	.9
1956	58.6	61.2	63.2	2.0
1957	65.4	69.0	(?)	(?)
1958	73.3	(?)	(?)	(?)

[1] Korean-war years.

Thus, in all recent years, Congress has wound up by increasing the amounts originally approved for Government spending.

CANCER RESEARCH

Mr. NEUBERGER. Mr. President, on May 2, 1957, I introduced in the Senate an amendment to the Labor, Health, Education, and Welfare bill calling for the appropriation of $500 million to the National Cancer Institute, this sum to remain available until expended by the Institute. My amendment has been referred to the Senate Committee on Appropriations for consideration by the Appropriations Subcommittee on Labor, Health, Education, and Welfare headed by the Senator from Alabama [Mr. HILL], who is a leader in the field of medical legislation.

Since submitting this amendment, I have received communications from persons throughout the United States in support of my proposal. Many of the Nation's newspapers and periodicals have responded enthusiastically to my suggestion. On May 26, 1957, the Oregonian, published in Portland, Oreg., printed an editorial entitled "Cancer Can Be Licked" and written by associate editor Malcolm Bauer. I request unanimous consent that this cogent presentation be printed in the body of the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CANCER CAN BE LICKED

Great things have been happening in cancer research in the postwar decade. Before the war few reputable medical men held much hope for an early discovery of a preventive or cure for this multifarious disease. Now the possibility, even probability, of such achievement is not challenged. "The question is no longer if," says Dr. C. P. Rhoads, director of New York's Sloan-Kettering Institute. "It's when. The cancer problem has begun to crack under pressure of research."

In the last 10 years the cancer-cure rate has tripled—all because of the surprising triumphs of cancer research. In that period there has been more progress in cancer research than in all the preceding century. This is an exciting thing to scientists, a vital development for all the rest of us. Of the 500,000 cancer cases discovered annually, a little more than half are cured. If the statisticians can be believed, some 150,000 of those cured this year would have been doomed in 1947.

Those who are in the front rank of cancer research believe that accelerated research can save even more lives, perhaps even bring the breakthrough that could eventually eliminate cancer as the Nation's second greatest killer (the first is heart disease). What is needed for that breakthrough? Money, says Dr. Rhoads. "Excitement is one thing in cancer research we have plenty of, we * * * lack money."

Only in the past year or so has the Federal Government taken a leading role in cancer research. It has set up an "engineered program" to coordinate and expand research in public and private institutions, including, for example, the University of Oregon Medical School. Scientists are slashing away at the thickets on innumerable research frontiers. Some 15,000 chemicals have been studied as possible cures. But everywhere there is the practical limitation of money, for supplies, for equipment, for salaries, for training new researchers.

That is why Senator RICHARD L. NEUBERGER's bill to appropriate $500 million for a crash program under the direction of the National Cancer Institute looks good to us. The actual amount of the appropriation really does not matter. It would be a continuing one, usable all in 1 year or in 10 years, at whatever speed it could be consumed by meaningful research. The important thing is that here is an opportunity for the Nation to attack the cancer evil as it has always attacked its military enemies, to push on to victory, whatever the cost.

Of course, money won't do the job alone. But the rest of the tools are ready and waiting. There are research projects now in being with such immediate goals as the discovery of a reliable blood test to detect cancer, the chemical background that predisposes to cancer, a curative chemical or an immunizing vaccine for one or more of the varieties of cancer. Already many researchers are experiencing a high percentage of cures of animal cancer. If these men and women were to know that their cost problems were no more, that they could pursue any promising avenue and pursue it to its end, their work would be benefited immeasurably.

It has been demonstrated beyond question that such a crash program, a concentrated, all-out attack toward a specified research goal, can be successful. The atom was thus cracked. Penicillin was the result of a smaller scale program.

The $500 million figure may be too high or too low. After all, it is just about equal to what cancer costs the United States annually in the income lost by its victims alone. Its other costs are immense and, where lives are concerned, incalculable.

Congress should enlist the full force of the Government in this cause. Given the proper direction and control, cost should be no object.

Mr. NEUBERGER. I believe that Mr. Bauer presents a persuasive and compelling argument in favor of vastly increased appropriations for the fight against the sinister malady which threatens us all. Discovery of the causes and cure of cancer would mark an epic milestone in man's continuing struggle against disease. Success could mean health and happiness for thousands now doomed to die of cancer.

Scientists and technicians have devoted a lifetime of service in this laboratory search. They ask only that sufficient funds be made available that they may continue the research race. I believe that Congress would be remiss in its humanitarian duty if it failed to assist these dedicated men and women in halting the scourge of cancer.

Mr. Bauer points out:

In the last 10 years the cancer cure rate has tripled—all because of the surprising triumphs of cancer research. * * * Those who are in the front rank of cancer research believe that accelerated research can save even more lives, perhaps even bring the breakthrough that could eventually eliminate cancer as the Nation's second greatest killer.

Mr. President, on May 13, 1957, I testified before the Senate Appropriations Subcommittee on Labor and Health, Education, and Welfare, on behalf of my amendment, and I sincerely hope that the appropriation bill reported by the subcommittee will take cognizance of the necessity of implementing a long-range program of cancer research. Approximately 40 million people now alive in the United States will have some form of cancer during their lifetime, and 26 million of those now alive will die from cancer unless new preventive measures are found. I believe that Congress has an obligation to insure that adequate funds are available to permit an all-out attack aimed at the elimination of this dreaded killer.

Along with others, I look to the Senator from Alabama [Mr. HILL] for leadership in sponsoring legislation which will legalize holding over substantial medical-research funds from year to year, until totally and effectively expended.

BILATERAL AIR TRANSPORT AGREEMENTS

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement I have prepared on the subject of bilateral air transport agreements with foreign countries.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR CAPEHART

I have been much interested lately in the activities of the Department of State and the Civil Aeronautics Board in the negotiation of bilateral air-transport agreements with foreign countries. My distinguished colleagues, the senior Senators from Wisconsin and New Hampshire, addressed the Senate on this subject during the negotiations which were recently concluded with the Government of the Netherlands. What they said was constructive, and persuasive to me.

I was further moved in my thinking on this subject by the representations made to the President by the House Interstate and Foreign Commerce Committee, and by the distinguished chairman and ranking minority member of the Senate Interstate and Foreign Commerce Committee on the negotiations with the Netherlands and the whole program of air rights to foreign countries.

I have been impressed with the soundness and the sincerity of the views which my colleagues in the House and the Senate have put forth on the problems which are being created by the actions of the Department of State. I understand that the Civil Aeronautics Board does not agree with these actions, and that they vigorously opposed the grant of any additional routes to the Netherlands.

Despite this opposition on the part of the Civil Aeronautics Board, and despite the views of my colleagues in the Congress, the Department of State went ahead and granted valuable and unwarranted additional rights to the Dutch. I was greatly shocked to see press reports last week that the Department of State had decided to grant new air routes to Belgium. So far as I know, these reports have not been officially denied.

I understand that negotiations are now in progress between the Department of State and a delegation from Australia. The United States now flies from the west coast of the United States to Sydney. Australia flies from Sydney to Honolulu and San Francisco and beyond to Vancouver. It is reported that they seek the right to go beyond San Francisco across the United States to New York, and then proceed on to London and around the world.

If Australia were to be given such a route its airline, Qantas, would be able to carry passengers between San Francisco and New York who were going to proceed on to London, and to tap the great transatlantic market out of New York with as many flights as they could operate from Sydney. They would have one-carrier round-the-world service with the right to fly across the United States—a right denied to the United States carrier which flies around the world.

Qantas is owned by the Government of Australia. We would thus have a government-owned airline expanding its competition across the continental United States and beyond New York into the great European market. The privately owned United States airlines would be subjected to further competition by a foreign government-owned company.

I see no need to make such a route grant to the Government of Australia. The friendship between the United States and Australia need not be impaired by the refusal of the United States to make a grant of air transport rights which would seriously throw out of economic balance the reciprocal agreement which now exists between the two countries.

The United States simply must not, by unwarranted grants to foreign countries, weaken the strength of the United States international air transportation system. The policy adopted in the negotiations with Germany 2 years ago, and in the negotiations with the Dutch last March and April, will inevitably lead to this result.

I notice that the distinguished chairman of the Senate Interstate and Foreign Commerce Committee has recently appointed a subcommittee to consider the whole problem of foreign route requests. I commend this action. I hope that they will go into the matter thoroughly, and that they will find some way to stop this damaging program which the Department of State seems, at present, so intent upon pursuing.

I hope that the Department of State and the Civil Aeronautics Board will firmly refuse any further route grants to Australia. I hope that they will pay careful heed to the Report on International Air Agreements, issued a little more than a year ago by the Senate Interstate and Foreign Commerce Committee, and to the expressions of view which have been made since that time in opposition to the present direction of their policy.

THE HOUSING ACT OF 1957

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Chair lay before the Senate the unfinished business.

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes.

The PRESIDING OFFICER. The Chair rules that the question is on agreeing to the committee amendment. The committee amendment is a substitute for the House text, and under the precedents of the Senate is regarded as original text for the purpose of amendment. An amendment to the substitute is therefore in the first degree, and is subject to amendment in one further degree. An amendment to an amendment to the substitute has precedence over an amendment to the substitute, and the latter amendment has precedence over the question of agreeing to the substitute.

If the committee amendment, whether amended or not, is agreed to, no further amendment is in order unless reconsideration is had.

Mr. CAPEHART. Mr. President, I submit an amendment, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 19, in lines 10 and 11, it is proposed to insert the following section and renumber the succeeding sections of title I of the bill accordingly:

SEC. 102. (a) Section 203 of the National Housing Act, as amended, is hereby amended by changing paragraph (b) (2) to read as follows:

"(2) Involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount not to exceed $20,000 in the case of property upon which there is located a dwelling principally (whether or not it may be intended to be rented temporarily for school purposes) for a 1- or 2-family residence; or $27,500 in the case of a 3-family residence; or $35,000 in the case of a 4-family residence; and not to exceed an amount equal to the sum of (i) 96 percent (but, in any case where the dwelling is not approved for mortgage insurance prior to the beginning of construction, unless the construction of the dwelling was completed more than 1 year prior to the application for mortgage insurance, 90 percent) of $10,000 of the appraised value of the property, as of the date the mortgage is accepted for insurance, (ii) 90 percent of such value in excess of $10,000 but not in excess of $16,000, and (iii) 70 percent of such value in excess of $16,000."

(b) Said section 203 is further amended by adding the following paragraphs at the end of subsection (b):

"(8) In the case of a mortgagor who is not the occupant of the property, have a principal obligation not in excess of an amount equal to 85 percent of the amount computed under the provisions of paragraph (2) of this subsection.

"(9) Be executed by a mortgagor who shall have paid on account of the property at least 4 percent, or such larger amount as the Commissioner may determine, of the Commissioner's estimate of the cost of acquisition in cash or its equivalent: *Provided*, That with respect to a mortgage executed by a mortgagor who is 60 years of age or older as of the date the mortgage is endorsed for insurance or with respect to a mortgage meeting the requirements of subsection (i) of this section, the mortgagor's payment required by this subsection may be paid by a corporation or person other than the mortgagor under such terms and conditions as the Commissioner may prescribe."

On page 22, after line 24, add the following section and renumber the succeeding sections of title I of the bill accordingly:

SEC. 112. (a) Section 220 (d) of said act is hereby amended by striking all of paragraph (3) that appears before clause (B) and inserting in lieu thereof the following:

"(3) The mortgage shall—

"(A) (i) involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner may prescribe) in an amount not to exceed $20,000 in the case of property upon which there is located a dwelling designed principally for a 1- or 2-family residence; or $27,500 in the case of a 3-family residence; or $35,000 in the case of a 4-family residence; or in the case of a dwelling designed principally for residential use for more than 4 families (but not exceeding such additional number of family units as the Commissioner may prescribe) $35,000 plus not to exceed $7,000 for each additional family unit in excess of 4 located on such property; and not to exceed an amount equal to the sum of (1) 96 percent (but, in any cases where the dwelling is not approved for mortgage insurance prior to the beginning of construction, unless the construction of the dwelling was completed more than 1 year prior to the application for mortgage insurance, 90 percent) of $10,000 of the Commissioner's estimate of replacement cost of the property, as of the date the mortgage is accepted for insurance, (2) 90 percent of such replacement cost in excess of $10,000 but not in excess of $16,000, and (3) 70 percent of such replacement cost in excess of $16,000: *Provided*, That in the case of properties other than new construction, the foregoing limitations upon the amount of the mortgage shall be based upon appraised value rather than upon the Commissioner's estimate of the replacement cost;

"(ii) in the case of a mortgagor who is not the occupant of the property, have a principal obligation not in excess of an amount equal to 85 percent of the amount computed under the provisions of subsection (i); or."

(b) Said paragraph (3) of section 220 (d) is hereby further amended by striking the phrase "not to exceed" at the first four places it appears in clause (B) and inserting in lieu thereof at each such place the phrase "not exceed."

On page 28, between lines 7 and 8, insert the following section and renumber the succeeding sections of title I of the bill accordingly:

SEC. 113. Section 222 (b) of said act is hereby amended to read as follows:

"(b) To be eligible for insurance under this section a mortgage shall—

"1. Meet the requirements of section 203 (b) of this title except as such requirements are modified by this section;

"2. Involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount not to exceed $17,300;

"3. Have a principal obligation not in excess of 96 percent of the appraised value of the property; and

"4. Be executed by a mortgagor who at the time of application for insurance is certified as a 'serviceman' and who at the time of insurance is the owner of the property and either occupies the property or certifies that his failure to do so is the result

of his military assignment, or in the case of the United States Coast Guard, other assignment."

Mr. CAPEHART. Mr. President, this amendment deals with reducing the downpayments under those provided for in the bill reported by the committee.

Mr. JOHNSON of Texas. Mr. President, I should like to say that it is my information that at the appropriate time the distinuished chairman of the subcommittee, on behalf of himself, the majority leader, and other members of the subcommittee, will offer a substitute for the amendment proposed by the Senator from Indiana.

Mr. CAPEHART. Very well.

NOTICE OF CONSIDERATION OF CONFERENCE REPORT ON STATE, JUSTICE, AND JUDICIARY APPROPRIATION BILL

Mr. JOHNSON of Texas. Mr. President, at this point in the RECORD I wish to give notices to all Senators that in the event the conference report on the State, Justice, judiciary appropriation bill is agreed to by the House tomorrow, it is the expectation of the leadership to call up the conference report in the Senate.

So that all Senators may be informed, I should like to report the effect of the conference agreement.

The bill, as passed by the Senate, provided $563,085,293. That amount was reduced in conference by $194,000, and, therefore, the conference bill provides $562,891,293.

Mr. President, it is very unusual for a conference bill to provide less than either the bill as passed by the Senate or the bill as passed by the House.

While the Senate conferees did not get everything in conference they desired, we tried to meet our colleagues in the other body halfway, and I think we arrived at an agreement which was generally acceptable to all parties.

The Senate sought to restore $6 million to the Department of State for salaries and expenses and other items. Of the $6 million which the Senate sought to restore, we were able to retain $5 million, so we obtained five-sixths of what we sought.

On the question of the USIA, the Senate reduced the USIA appropriation by $16 million. In the committee, as Members of the Senate will remember, the distinguished minority whip offered an amendment which provided for an appropriation of $96 million. The Senator from Illinois [Mr. DIRKSEN] pressed that amendment in the committee, but the committee felt it would be going too far, and rejected it. Finally, after 5 hours in session, the Senate conferees agreed with the House conferees to add $6 million to the appropriation for the USIA, making the total appropriation for that agency $96 million.

Mr. THYE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Not at this point. The Senator from Texas wishes to complete his statement and then he will be glad to yield.

The net result was to give that agency $96.2 million.

The Senate reduced the FBI appropriations by $150,000. The House refused to go along, so the item was restored.

The Senate reduced the Immigration Service appropriations by $500,000. The House went along with $400,000 of that, but insisted that the Senate agree to the $400,000 reduction instead of the $500,000 reduction.

The Belgium Fair, which is under the special projects for the President, and for which the coordinator of budget presentation is Mr. Larson, was provided $3½ million by the Senate. The House provided nothing, so the Senate raised the House figure $3½ million. The House refused to go along with it, and the conferees agreed on $1½ million instead of $3½ million.

On the educational exchange program, the Senate figure was reduced by $3.2 million. It was about $6.4 million, and the House divided the figure, and agreed to $3.2 million.

The Senate lost $54,000 on the Fisheries Commission.

I believe that is a fair summary. To recapitulate what has been listed, the conference bill which will be before the Senate, in the event it is adopted by the House, will provide appropriations of $562,891,293.

I now yield to my friend, the Senator from Minnesota [Mr. THYE].

Mr. THYE. Mr. President, I wish to commend the distinguished majority leader for having been successful in raising the House figure for the United States Information Agency appropriation, because I believe that the House had reduced that too much, and I think the restoration of the moneys was not only advisable, but will further the program.

Mr. JOHNSON of Texas. I thank the Senator for what he intends to be a compliment.

The PRESIDING OFFICER. What is the pleasure of the Senate?

APPOINTMENT OF COMMITTEE TO ESCORT CHANCELLOR ADENAUER INTO THE SENATE CHAMBER

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Chair designate the following Senators to escort the distinguished Chancellor, Mr. Konrad Adenauer, to the Chamber, when a recess is declared: the Senator from Arizona [Mr. HAYDEN], the Senator from California [Mr. KNOWLAND], the Senator from Texas [Mr. JOHNSON], the Senator from Rhode Island [Mr. GREEN] and the Senator from Wisconsin [Mr. WILEY].

The PRESIDING OFFICER. The Chair designates the Senators named as the committee to escort the Chancellor of the Federal Republic of Germany into the Senate Chamber.

Mr. SMATHERS obtained the floor.

Mr. JOHNSON of Texas. Mr. President——

Mr. SMATHERS. Mr. President, I am happy to yield to the majority leader, with the understanding that at the conclusion of the recess I shall have the floor.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from Florida may yield to me for the purpose of suggesting the absence of a quorum, to be followed by a recess, and that when the Senate reconvenes the Senator from Florida will have the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VISIT TO THE SENATE BY HIS EXCELLENCY KONRAD ADENAUER, CHANCELLOR OF THE FEDERAL REPUBLIC OF GERMANY

Mr. JOHNSON of Texas. Mr. President, pursuant to the order heretofore entered, I ask that the Chair declare the Senate in recess.

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). In accordance with the order previously entered, the Chair declares the Senate in recess, subject to the call of the Chair.

Thereupon, at 2 o'clock and 35 minutes p. m., the Senate took a recess, subject to the call of the Chair, the recess being pursuant to the order previously entered.

The Senate being in recess,

His Excellency, Konrad Adenauer, Chancellor of the Federal Republic of Germany, escorted by the committee appointed by the Vice President, consisting of Mr. JOHNSON of Texas, Mr. KNOWLAND, Mr. GREEN, Mr. WILEY, and Mr. HAYDEN, entered the Senate Chamber, accompanied by His Excellency Heinrich von Brentano, Foreign Minister of the Federal Republic of Germany; His Excellency Heinz L. Krekeles, Ambassador to the United States of the Federal Republic of Germany; the Honorable Wiley T. Buchanan, Jr., Chief of Protocol, United States State Department; Herr Heinz Weber, the interpreter.

Chancellor Adenauer was escorted to a place on the rostrum in front of the Vice President, and the distinguished visitors accompanying him were escorted to places assigned them on the Senate floor on the left side of the Chamber. Other members of the Chancellor's party were seated in the Diplomatic Gallery of the Senate.

The VICE PRESIDENT. Members of the Senate and guests of the Senate, recently a committee of Senators honored five former Members of the Senate as being among the greatest who have served in this body. As will be recalled, they were Senator Webster, Senator Calhoun, Senator Clay, the elder Senator La Follette, and Senator Taft.

Those men represented different parties. They held differing views and those who lived in the same era often opposed each other. But there was one characteristic which was common to each of them. It was that each was a man of unquestionable and unconquerable courage.

The man we are privileged to hear today, and who is our guest, is one to whom that description also applies. He is a man who has shown magnificent courage in leading his own people and his Nation through a period of crisis to a position of greatness in Europe and in the world.

It is my great honor and pleasure to present to the Members of this body the man who leads the German people and the German Government, and who is a friend of freedom and of the people of the United States. I present His Excellency Konrad Adenauer, Chancellor of the Federal Republic of Germany.

[Applause, Senators rising.]

ADDRESS DELIVERED TO THE UNITED STATES SENATE BY HIS EXCELLENCY KONRAD ADENAUER, CHANCELLOR OF THE FEDERAL REPUBLIC OF GERMANY

Chancellor Adenauer addressed the Members of the Senate and their guests in German, as follows:

Herr Praesident, Mitglieder des Senats: Ich danke Ihnen herzlich fuer die Gelegenheit, vor Ihnen zu sprechen. Diese Gelegenheit ist eine Auszeichnung fuer mich und mein Land. Ich moechte sie nutzen, um Ihnen die grossen Linien unserer Politik mit einigen Saetzen zu erlaeutern. Ich hoffe damit zu jenem Verstaendnis beizutragen, das die Grundlage wahren Vertrauens ist. Zugleich wird sich, so hoffe ich, zeigen, wie tief die Verwandtschaft der Grundauffassungen ist, die die amerikanische und die deutsche Politik kennzeichnen.

Der erste Leitgedanke unserer Politik ist Freiheit. Wenn es auch Meinungsverschiedenheiten darueber gibt, auf welchen Wegen die Freiheit am besten gesichert and bewahrt werden kann, und wenn die von mir gefuehrte Regierung auch manche der von einigen politischen Parteien und Gruppen propagierten aussenpolitischen Wege fuer gefaehrlich haelt, so gibt es doch in dem aufrichtigen Willen zur Freiheit keine Meinungsverschiedenheit unter den Deutschen. Seit den Bundestagswahlen des Jahres 1949 ist es klar und erwiesen, wo die Bundesrepublik in der grossen weltweiten Auseinandersetzung zwischen Freiheit und Knechtschaft steht. Denn das ist der tiefere Sinn jener Entscheidung des deutschen Volkes gewesen. Als dann das deutsche Volk wieder staatliche Form gewann, als es wieder Organe bekam, um seinen Willen kundzutun, war die Welt in zwei grosse Lager zerfallen. Ja die Grenze, die die demokratische Welt von dem kommunistischen Machtbereich trennte, lief mitten durch unser Land und unser Volk. Sie trennte uralte Kulturgebiete von uns ab, Gebiete, aus denen Stroeme schoepferischen geistigen Lebens unsere abendlaendische Kultur befruchtet haben. Das deutsche Volk zoegerte nicht, seine Entscheidung ganz unzweideutig zu vollziehen. Schon seit den Wahlen von 1953 gibt es in unserem frei gewaehlten Parlament keinen einzigen Kommunisten. Zwei schmerzliche Erfahrungen haben dem deutschen Volk bei dieser Entscheidung geholfen: die Erfahrung mit der totalitaeren Gewaltherrschaft, die wir waehrend des nationalsozialistischen Regimes machten, und die taegliche Beruehrung mit dem, was Kommunismus in Wahrheit ist, in Gestalt der kommunistischen Gewaltherrschaft in der Sowjetzone Deutschlands. Aber nicht nur in dieser Abwehr hat der Freiheitswille des deutschen Volkes Ausdruck gefunden, sondern positiv floss hieraus sein Entschluss, sich mit den anderen freiheitlichen Voelkern aufs engste zu verbinden. Dafuer gibt es kein kraeftigeres Zeichen als die stets von der grossen Mehrheit des deutschen Volkes und seiner gewaehlten Vertretung unterstuetzte Politik der europaeischen Einigung, die die Bundesrepublik seit ihrem Bestehen betreibt. Sie hat sich an allen europaeischen Organisationen beteiligt: Europarat, OEEC und der Integration der Sechs. Diese integrierten Gemeinschaften, die Kohle- und Stahlgemeinschaft und die hoffentlich bald ins Leben tretenden Gemeinschaften des Gemeinsamen Marktes und von Euratom, sind besonders charakteristisch, weil hier die Bundesrepublik auf Teile ihrer staatlichen Souveraenitaet zugunsten hoeherer europaeischer Gemeinschaften verzichtet. Zum Ruhme der Weitblickenden unter unseren Verfassungsgebern koennen wir heute feststellen, dass unser Grundgesetz bereits eine Bestimmung vorgesehen hat, die Uebertragungen von Souveraenitaet durch einfaches Gesetz gestattet. Das war ein grosser Entschluss. Er bedeutete nicht weniger als eine Absage an den fuer die zersplitterte europaeische Staatenwelt nicht mehr zeitgemaessen Gedanken, dass der Nationalstaat die letzte und hoechste Groesse des politischen Lebens sei—eine Idee, die Europa in der Vergangenheit unsagbar viel Gut und Blut gekostet hat. Wir sind froh, dass der Gedanke einer groesseren europaeischen Heimat vor allem in unserer Jugend Wurzeln geschlagen hat. In den europaeischen Loesungen ist unsere Bindung an die freiheitliche Welt wahrhaft unloeslich geworden.

Unser zweites Ziel ist Friede. Die furchtbaren Erlebnisse des unseligen zweiten Weltkrieges sind am deutschen Volk nicht spurlos vorbeigegangen. Die Millionen von Toten, die Schrecken des totalen Krieges, in dem es kein unberuehrtes Hinterland mehr gibt, die grauenhaften Zerstoerungen unserer Staedte, der Ruin unserer Wirtschaft, der Zusammenbruch der staatlichen Organisation—all das ist im Bewusstsein des deutschen Volkes lebendig. Da aber der Friede nach einem beruehmten Wort Immanuel Kants kein Naturzustand unter den Voelkern ist, sondern das Ergebnis einer bewussten Anstrengung des Menschen, so hat unsere Politik alle ihr gegebenen Moeglichkeiten ergriffen, um den Frieden zu sichern. Nachdem der grossartige Anlauf, den die Menschheit durch die Schaffung der Vereinten Nationen genommen hatte, um Friede und Gerechtigkeit auf der Welt zu sichern, bisher noch nicht zum Ziel gefuehrt hat, weil die Sowjets den Sicherheitsmechanismus der Vereinten Nationen durch ungezaehlte Vetos lahmgelegt haben, musste man versuchen, diese Sicherung durch neben den Vereinten Nationen stehende und sie ergaenzende Organisationen zu erreichen. Die Charta der Vereinten Nationen hatte dafuer in weiser Voraussicht bereits den Weg gewiesen, indem sie das Recht zur individuellen und kollektiven Selbstverteidigung bestaetigte. Dieser Weg fuehrte zur Bildung der atlantischen Gemeinschaft. Sie ist ein Instrument des Friedens, weil sie dazu geschaffen ist, jeden Angreifer abzuschrecken. Sie tut das, indem sie die Verteidigungskraft des freien Westens so zusammenfasst und entwikkelt, dass jeder Angriff ein untragbares Risiko fuer den Angreifer darstellt. Diese Ueberlegung hat die Bundesrepublik veranlasst, der atlantischen Gemeinschaft beizutreten. Militaristische Neigungen liegen uns voellig fern—und erst recht aggressive Absichten! Weil wir in jeder militaerischen Bemuehung nur eine Verteidigungsanstrengung sehen, verfolgen wir auch die Gespraeche ueber eine allgemeine kontrollierte Abruestung mit einem lebhaften und positiven Interesse. Wenn diese Bemuehungen mit einer Beseitigung der Spannungsursachen in der Welt verbunden sind, so muessen sie schliesslich dazu fuehren, der Welt die Sicherheit zu schenken, nach der sie verlangt: Die Sicherheit des Friedens.

Der dritte Leitgedanke unserer Politik ist Einheit. Sie wissen, wie schwer und drueckend es auf uns lastet, dass viele Millionen Deutsche gegen alles Recht und alle Moral getrennt von uns unter kommunistischem Terror leben muessen. Um das richtig zu begreifen, muss man sich klarmachen, dass es sich um etwas ganz anderes handelt als um eine Grenzfrage, die zwischen Nachbarn zu verhandeln und zu loesen ist. Es handelt sich in erster Linie um ein menschliches Problem: um die willkuerliche Auseinanderreissung von Menschen eines Volkes: Eltern leben getrennt von ihren Kindern und koennen nicht oder nur unter groessten Muehen und Gefahren zu ihnen gelangen—Millionen von Menschen leben unter einem Regime von Rechtlosigkeit, Willkuer, und Sklaverei. Es handelt sich aber auch um die Vollendung des deutschen Staates selbst. Dieser ist so lange unfertig, als er sich auf das Gebiet der Bundesrepublik beschraenkt. Erinnern wir uns, wie es zur Gruendung der Bundesrepublik gekommen ist. Nach dem furchtbaren materiellen und seelischen Zusammenbruch, in den uns das nationalsozialistische Regime gefuehrt hat, uebernahmen die Siegermaechte die oberste Gewalt in Deutschland. Waehrend die drei westlichen Besatzungsmaechte, getreu der mit der Souveraenitaet in Deutschland uebernommenen Verantwortung und ihren Prinzipien, die zugleich die Prinzipien der Vereinten Nationen sind, an die Wiedererrichtung eines deutschen Staates auf demokratischer Grundlage herangingen, missbrauchte die Sowjetunion die ihr

zugefallene Treuhandstellung und unterwarf sich die Sowjetzone. Sie tat das, indem sie dort ein ihr hoeriges Regime von Kommunisten einsetzte, das nur einen verschwindend kleinen Prozentsatz der Bevoelkerung hinter sich hat, wie der Volksaufstand in der Sowjetzone vom 17. Juni 1953 beweist. So kam es, dass die Sowjetzone an jenem Vorgang nicht teilnahm, der schrittweise dazu fuehrte, dass Deutschland aus einem Objekt fremder Regierungsgewalt ein selbstverantwortliches, nach demokratischen Regeln sich selbst regierendes Subjekt des Voelkerlebens wurde. Wenn wir also die Wiedervereinigung mit 17 Millionen Deutschen fordern—Menschen, die so deutsch sind wie wir, so freiheitliebend wie wir, und die nicht minder berechtigt sind wie wir, ihr politisches Schicksal selbst zu bestimmen—so fordern wir damit von der vierten Siegermacht nur das, was die anderen Siegermaechte uns in loyaler Erfuellung der von ihnen beim Niederbruch des deutschen Staates uebernommenen Verantwortung laengst freiwillig gewaehrt haben. Im Grunde ist das also demokratisch, was wir fordern; denn das Wesen der Demokratie ist, einem Volk, das sich als Einheit empfindet, die staatliche Form zu geben, die es ihm erlaubt, ein verantwortliches Subjekt des Voelkerlebens zu sein.

Politik ist die Kunst, das auf ethischer Grundlage als richtig erkannte zu verwirklichen. Freiheit, Friede, Einheit—das sind die Ziele unserer Politik, einer Politik also, die die grossen Werte verwirklichen will, die den Fortschritt der Menschheit bestimmen.

The following is an English translation furnished by the press office of the German Embassy:

Mr. President, Members of the Senate, I am very grateful for the opportunity you have accorded me to speak before you. This opportunity is an honor for me and my country. I wish to use it to outline in a few words the general direction of our foreign policy.

I hope, in this way, to contribute to a clear understanding which is the basis of genuine trust. At the same time I hope to make clear how deeply related are the basic principles characterizing American policy and German policy.

The first principle, the guiding motive of our policy is freedom. There may be differences of opinion on the methods by which freedom may best be assured and preserved. Although the Government led by me may consider dangerous some of the foreign policy solutions advocated by other political parties and groups—there is no difference of opinion among Germans in the sincere desire for freedom. Since the Bundestag elections of 1949, it has been clearly demonstrated where the Federal Republic of Germany stands in the great worldwide conflict between freedom and slavery. This is the deeper meaning of the decision taken at the polls by the German people in 1949.

When the German people regained their statehood and once more were able to exercise their own free will, the world was split into two camps and the border separating the free world from the Communist orbit ran through the heart of our country dividing our people. It separated ancient German territory from us, land from which currents of creative spiritual life have enriched our western civilization. The German people did not hesitate to make an unequivocal decision. Since the elections of 1953 there has not been a single Communist in our freely elected parliament. Two grievous experiences influenced the choice of the German people: the experience with a totalitarian dictatorship imposed on us during the National Socialist regime and the daily contact with the reality of communism in the form of a Communist dictatorship in the Soviet Zone of Germany. But the German people have expressed their will for freedom not only by the rejection of totalitarianism but by the positive decision to form as close an alliance as possible with the other free peoples of the world. There is no more emphatic manifestation of this will than the policy of European integration consistently endorsed by the great majority of the German people and their elected representatives—a policy which the Federal Republic has pursued since its inception.

The Federal Republic has participated in all the European organizations set up in recent years: the Council of Europe, OEEC, and the Coal and Steel Community. These integrated communities, the Coal and Steel Community and the communities of the Common Market and of Euratom, which we hope will soon come to life, are particularly characteristic because in these organs the Federal Republic renounces part of its national sovereignty in the interest of larger European communities. It reflects great credit on the foresighted ones among the drafters of our Constitution that we can state today that our basic law already contained a provision permitting the transfer of sovereignty by simple majority vote in Parliament. That was a great decision. It meant no less than a repudiation of the idea, no longer valid in a disintegrating world of European polities, that the sovereign national state is the ultimate and highest entity of political organization—an idea which has cost Europe so much blood and treasure. We are glad that the idea of a larger European patriotism has formed roots, particularly among our young people. Through the medium of these European organizations our alliance with the free world has become truly unbreakable.

Our second goal is peace. The horrible experiences of the recent World War have left their marks on the German people. The millions of dead, the horrors of total war in which the hinterland is no longer left untouched, the terrible destruction of our cities, the ruin of our economy, the collapse of the administrative structure—all this is still alive in the minds of the German people. But since peace—according to the famous dictum of the German philosopher Immanuel Kant—is not a natural condition among the peoples but the result of a conscious effort of man, our policy has seized on all possibilities open to it to secure peace. With the creation of the United Nations mankind took a tremendous stride forward toward securing peace and justice in the world. This objective has not been attained as yet, because the Soviets have paralyzed the security mechanism of the United Nations by innumerable vetoes. As a result, an effort had to be made to bring about this security by the establishment of organizations parallel and supplementing the United Nations. The Charter of the United Nations, in wise foresight, has shown a path toward this end by confirming the right of individual and collective self-defense. This path logically led to the foundation of the Atlantic Community. The Atlantic Community is an instrument of peace because it is designed to deter any aggressor. It achieves this aim by coordinating and developing the armed strength of the free West in such a way that any aggression becomes too big a risk for the aggressor. This consideration has caused the Federal Republic to become a member of the Atlantic Community. Militaristic tendencies are far removed from our purpose and aggressive intentions even more so. Since we consider all our endeavors in the military sphere solely as defense efforts, we follow all the discussions on measures to bring about controlled disarmament with lively and positive interest. If these efforts are combined with elimination of the causes of tension in the world they must, in the end, bring to the world the blessing it so ardently desires: the safeguarding of peace.

The third basic principle of our policy is unity. You know of the heavy and oppressive burden weighing upon us because many millions of Germans are forced, against all justice and moral principles, to live separated from us and under Communist terror. In order to understand this fully, one must realize that what is at stake here is not merely a border problem which can be discussed and settled among neighbors. We are faced here primarily with a human problem—the arbitrary manner in which a people is torn apart—parents separated from their children, unable to see them except under extreme difficulty and danger. Millions of people are forced to live under a regime of lawlessness, arbitrary rule, and slavery.

The German Republic will be incomplete as long as it is confined to the territory of the Federal Republic. Let us recall the circumstances under which the Federal Republic was founded. After the moral and material collapse into which the National Socialist regime led us, the victorious nations assumed supreme power in Germany. The three western occupation powers, faithful to the responsibility which they shouldered at the same time, and to their principles which were also the principles of the United Nations, proceeded to rebuild a German state on a democratic basis. The Soviet Union, on the other hand, misused its trusteeship and subjugated the Soviet occupied zone to a subservient, satellite regime of Communists—a regime which had the backing of only an infinitesimal percentage of the population as was demonstrated during the

popular uprising of June 17, 1953. Thus it happened that the Soviet zone did not participate in the development which gradually transformed Germany from an object of foreign rule into a responsible subject in the community of nations governing itself in accordance with democratic principles.

Therefore, we demand reunion with 17 million fellow Germans—people who are as German as we are and as freedom loving as we are, and who are no less entitled than we are to determine their own political destiny; we demand from the fourth of the victorious powers only that which the other three in loyal fulfillment of the responsibility assumed by them when the German state collapsed, have long since conceded of their own free will. Thus, our demand is basically a democratic one, for the essence of democracy is to grant to a people regarding themselves as an entity that form of government which will permit them to live as a responsible member of the international community; and it is at the same time a requirement of any general policy aiming at the preservation of peace; for only the establishment of an all-German government would permit the conclusion of a peace treaty. This would endow Europe with that just and enduring political order which today—12 years after the war—is still denied to it.

Political action is the art of bringing to life those concepts which have been recognized as the ethical foundation of justice. Freedom, peace, unity—these are the aims of our policy, a policy designed to give effect to the great ideals that determine the progress of humanity.

[At the conclusion of his address Chancellor Adenauer was greeted by prolonged applause, Senators rising.]

The VICE PRESIDENT. Mr. Chancellor, the text of your address in English was available to Senators, although not to our guests in the gallery, so it will not be necessary to have it translated at this time. Certainly the response of Senators and the occupants of the galleries is indicative of their affection for you, and their esteem for your country.

Before the recess is concluded, the Chair is sure that Members of the Senate and their guests would like to greet two other distinguished visitors who are on the Senate floor:

His Excellency Heinrich von Brentano, the Foreign Minister of the Federal Republic of Germany; and

The Ambassador from the Federal Republic of Germany to the United States, his Excellency Heinz L. Krekeler.

[The distinguished visitors rose, and were greeted with applause, Senators rising.]

The VICE PRESIDENT. Then, as a special treat for all of us, there are in the Diplomatic gallery the daughter of the Chancellor, Mrs. Libeth Werhahn, and his son, Georg Adenauer. The Chair wonders if they will be good enough to stand.

[The distinguished visitors rose in their places in the gallery and were greeted with applause, Senators rising.]

The VICE PRESIDENT. To enable the Members of the Senate to meet the Chancellor, the majority leader, the minority leader, the chairman of the Committee on Foreign Relations, and the ranking minority member of that committee, will escort the Chancellor to the well of the Senate.

The Chancellor of the Federal Republic of Germany was thereupon escorted to the well of the Senate, where he was greeted by Members of the Senate.

Following the informal reception, the Chancellor and the distinguished visitors accompanying him were escorted from the Chamber.

At 3 o'clock and 5 minutes p. m., the Senate reassembled, when called to order by the Presiding Officer (Mr. YARBOROUGH in the chair).

THE HOUSING ACT OF 1957

The Senate resumed the consideration of the bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes.

The PRESIDING OFFICER. Is there objection to consideration en bloc of the amendments contained in Amendment G, submitted by the Senator from Indiana [Mr. CAPEHART], for himself and the Senator from California [Mr. KNOWLAND]?

Mr. CAPEHART. Mr. President, I wish to have these amendments considered en bloc; and I ask unanimous consent that they be considered en bloc.

Mr. SPARKMAN. Mr. President, reserving the right to object—although I do so merely for the purpose of requesting information—let me say that, as I understand, the amendments relate wholly to the downpayment plan. Is that correct?

Mr. CAPEHART. That is correct.

Mr. SPARKMAN. I have no objection to the request.

The PRESIDING OFFICER. Without objection, the amendments of the Senator from Indiana will be considered en bloc.

The Senator from Florida has the floor.

Mr. SPARKMAN. Mr. President——

Mr. SMATHERS. Mr. President, I yield to the Senator from Alabama [Mr. SPARKMAN], the chairman of the Subcommittee on Housing, of the Committee on Banking and Currency.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that the Senator from Florida may yield to me, so that I may submit an amendment to the amendment of the Senator from Indiana, without causing the Senator from Florida to lose the floor.

The PRESIDING OFFICER. Does the Senator from Florida yield for that purpose?

Mr. SMATHERS. Yes, provided that unanimous consent that I may do so without losing the floor is granted.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. SMATHERS. Then, Mr. President, I yield to the Senator from Alabama.

Mr. SPARKMAN. Mr. President, I offer the amendment which I submitted yesterday and asked to have lie on the table. I offer the amendment on behalf of myself, the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Pennsylvania [Mr. CLARK], the Senator from Florida [Mr. SMATHERS], the Senator from Texas, the distinguished majority leader [Mr. JOHNSON], the Senator from South Carolina [Mr. JOHNSTON], the Senator from Washington [Mr. JACKSON], and the Senator from Oklahoma [Mr. MONRONEY]. I may say that all these Senators had proposed to submit somewhat similar amendments; but after a conference, it was agreed that we would join in submitting this amendment.

I do not desire to have the amendment read at this time, Mr. President. It relates to exactly the same thing as does the amendment of the distinguished Senator from Indiana; in other words, it provides for 3 percent on the first $10,000; 10 percent on the next $6,000, and 30 percent on all payments over that amount. The amendment does not vary a great deal from the amendment of the Senator from Indiana; but there is a difference between the two, and I think the difference is very material.

So, Mr. President, I offer the amendment as a substitute for the amendment of the Senator from Indiana.

The PRESIDING OFFICER. The amendment to the amendment will be printed at this point in the RECORD.

The amendment submitted by Mr. SPARKMAN, on behalf of himself and other Senators, to Mr. CAPEHART's amendment, is as follows:

On page 18, between lines 23 and 24, insert the following:

"LOWER DOWNPAYMENTS FOR SALES HOUSING

"SEC. 101. (a) Section 203 (b) (2) of the National Housing Act is amended to read as follows:

"'(2) Involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount not to exceed $20,000 in the case of property upon which there is located a dwelling designed principally (whether or not it may be intended to be rented temporarily for school purposes) for a 1- or 2-family residence; or $27,500 in the case of a 3-family residence; or $35,000 in the case of a 4-family residence; and not to exceed an amount equal to the sum of (i) 97 percent (but, in any case where the dwelling is not approved for mortgage insurance prior to the beginning of construction, unless the construction of the dwelling was completed more than 1 year prior to the application for mortgage insurance, 90 percent) of $10,000 of the appraised value of the property, as of the date the mortgage is accepted for insurance, (ii) 90 percent of such value in excess of $10,000 but not in excess of $16,000, and (iii) 70 percent of such value in excess of $16,000.'.

"(b) Section 203 (b) of such act is further amended by adding the following paragraphs at the end thereof:

"'(8) In the case of a mortgagor who is not the occupant of the property, have a principal obligation not in excess of an amount equal to 85 percent of the amount computed under the provisions of paragraph (2) of this subsection.

"'(9) Be executed by a mortgagor who shall have paid on account of the property at least 2 percent, or such larger amount as the Commissioner may determine, of the Commissioner's estimate of the cost of acqui-

sition in cash or its equivalent: *Provided*, That with respect to a mortgage executed by a mortgagor who is 60 years of age or older as of the date the mortgage is endorsed for insurance or with respect to a mortgage meeting the requirements of subsection (i) of this section, the mortgagor's payment required by this subsection may be paid by a corporation or person other than the mortgagor under such terms and conditions as the Commission may prescribe.'

"(c) Section 203 (i) of such act is amended to read as follows:

"'(i) The Commissioner is authorized to insure under section 203 any mortgage meeting the requirements of subsection (b) of this section, except as modified by this subsection, which involves a principal obligation not in excess of $8,000 and not in excess of 97 percent of the appraised value of a property located in an area where the Commissioner finds it is not practicable to obtain conformity with many of the requirements essential to the insurance of mortgages on housing in built-up urban areas, upon which there is located a dwelling designed principally for a single-family residence, and which is approved for mortgage insurance prior to the beginning of construction: *Provided*, That the Commissioner finds that the property with respect to which the mortgage is executed is an acceptable risk, giving consideration to the need for providing adequate housing for families of low and moderate income particularly in suburban and outlying areas or small communities: *Provided further*, That under the foregoing provisions of this subsection the Commissioner is authorized to insure any mortgage issued with respect to the construction of a farm home on a plot of land five or more acres in size adjacent to a public highway, the total amount of insurance outstanding at any one time under this proviso not to exceed $100 million.'

"SEC. 102. (a) Section 220 (d) (3) of the National Housing Act is amended by striking out all thereof appearing before clause (B) and inserting in lieu thereof the following:

"'(3) The mortgage shall—

"'(A) (i) involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in any amount not to exceed $20,000 in the case of property upon which there is located a dwelling designed principally for a 1- or 2-family residence; or $27,500 in the case of a 3-family residence; or $35,000 in the case of a 4-family residence; or in the case of a dwelling designed principally for residential use for more than 4 families (but not exceeding such additional number of family units as the Commissioner may prescribe) $35,000 plus not to exceed $7,000 for each additional family unit in excess of 4 located on such property; and not to exceed an amount equal to the sum of (1) 97 percent (but, in any case where the dwelling is not approved for mortgage insurance prior to the beginning of construction, unless the construction of the dwelling was completed more than 1 year prior to the application for mortgage insurance, 90 percent) of $10,000 of the Commissioner's estimate of replacement cost of the property, as of the date the mortgage is accepted for insurance, (2) 90 percent of such replacement cost in excess of $10,000 but not in excess of $16,000, (3) 70 percent of such replacement cost in excess of $16,000: *Provided*, That in the case of properties other than new construction, the foregoing limitations upon the amount of the mortgage shall be based upon appraised value rather than upon the Commissioner's estimate of the replacement cost;

"' (ii) in the case of a mortgagor who is not the occupant of the property, have a principal obligation not in excess of an amount equal to 85 percent of the amount computed under the provisions of paragraph (i); or'.

"(b) Section 220 (d) (3) of such act is further amended by striking out the phrase 'not to exceed' at the first four places it appears in clause (B) and inserting in lieu thereof at each such place the phrase 'not exceed.'

"SEC. 103. Section 222 (b) of the National Housing Act is amended to read as follows:

"'(b) To be eligible for insurance under this section a mortgage shall—

"'1. Meet the requirements of section 203 (b) of this title except as such requirements are modified by this section;

"'2. Involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount not to exceed $17,100;

"'3. Have a principal obligation in an amount not in excess of 95 percent of the appraised value of the property or such higher amount as may be derived by applying the maximum ratio of loan to value prescribed in section 203 (b) (2) of this title; and

"'4. Be executed by a mortgagor who at the time of application for insurance is certified as a "serviceman" and who at the time of insurance is the owner of the property and either occupies the property or certifies that his failure to do so is the result of his military assignment, or in the case of the United States Coast Guard, other assignment.'

"SEC. 104. The Federal Housing Commissioner, in establishing maximum loan-to-value ratios for mortgages insured by him under the National Housing Act, as amended by sections 101, 102, and 103 of this act, shall determine that such ratios are in the public interest after taking into consideration (1) the effect of such ratios on the national economy and on conditions in the building industry, and (2) the availability or unavailability of residential mortgage credit assisted under the Servicemen's Readjustment Act of 1944, as amended."

OTHER PROVISIONS RELATING TO FHA INSURANCE PROGRAMS

On page 18, line 24, strike out "101" and insert in lieu thereof "105."

Mr. JACKSON subsequently said: Mr. President, I am pleased to join with the distinguished chairman of the Housing Subcommittee, the Senator from Alabama [Mr. SPARKMAN], and my other colleagues, in cosponsoring this move to liberalize the FHA program.

I am in receipt of literally dozens and dozens of telegrams that can only be described as frantic appeals from homebuilders in Washington State. Once the very backbone of our economy, these men are now on the brink of economic ruin, a condition almost entirely attributable to the hard money policies of this administration, and the consequent inability to borrow large sums of money at reasonable rates.

I submit that any attempt to liberalize the FHA program will constitute a valuable effort to stabilize and improve the entire economy. It is, of course, inescapably true that hard money will still exist. It is up to the administration to liberalize its fiscal policy if the homebuilding industry is to survive.

We are doing what we can to improve conditions in the building industry. Like the distinguished Senator from Alabama I am realistic enough to realize that the pending bill, no matter how liberal, is no cure-all. But the effort we can make here today to improve the opportunity for an investment in one's own home is an effort well justified by the course of our economy.

Mr. CAPEHART. Mr. President——

Mr. SMATHERS. Mr. President, I am happy to yield to the Senator from Indiana [Mr. CAPEHART].

Mr. CAPEHART. Mr. President, perhaps the Senator from Florida wishes to make a speech, anyway. However, let me say that in view of the downpayment called for in my amendment and that called for in the amendment of the able Senator from Alabama, I am prepared to accept his amendment and to have the Senate vote, unless the Senator from Florida wishes to make a speech.

Mr. SMATHERS. Mr. President, I appreciate the suggestion of the Senator from Indiana, but he knows that I have been waiting for the better part of 2 days to make a statement for the RECORD.

Mr. CAPEHART. I understand.

Mr. SMATHERS. Mr. President, I wish to congratulate the Senator from Indiana and the Senator from Alabama for an amendment which in my judgment is more desirable than the provisions which originally were supported by the Senate Banking and Currency Committee. I think the amendment will go a long way toward helping to ease what obviously is today a definite housing shortage.

CONTINUED HIGH DEMAND FOR HOUSING REQUIRES FHA DOWNPAYMENT REVISION

Mr. President, I know of no more important problem facing the Congress than the consideration of appropriate proposed legislation to relieve the very serious situation which has developed in the production of homes, particularly those for persons of modest incomes.

Over the past 10 years, all of us have become familiar with the splendid record of the American home building industry in producing millions of homes to meet the serious shortages which had developed as a result of the necessary curtailment of home building during the war.

We have become accustomed to a high volume of production of homes, and have unconsciously, I believe, come to feel

that such a high volume can continue to be produced, and that the problems facing production have all been solved.

I fear that we do not fully realize the very serious problems which face home building today. As a result mainly of the credit conditions of the past 18 months, home building is very sharply down from the peak year of 1955.

At this point in my remarks, I ask unanimous consent to have printed in the RECORD a table showing a comparison between the number of new homes started by the private home building industry during each of the past several years and the monthly rate of starts so far in 1957.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

I. HOME BUILDING IS LAGGING BEHIND OTHER SECTORS OF THE ECONOMY

That progress in home building has lagged far behind in comparison to other objective measures of the Nation's growth is shown by the table below. Home building is sharply down from the peak years of 1950 and 1955 and contrasts with the substantial growth shown in such measures as gross national product, income, industrial production, and population. As a matter of fact, as the table below indicates, home building starts per thousand population are in early 1957 at the lowest level in the past decade as well as below the ratio in 1924, 1925, and 1926.

Comparison of housing starts and economic growth

	Current level		Percent change from—		
	Date (1957)	Amount	1 year ago	2 years ago	1950
Private housing starts	April	[1] 940,000	−78.8	−31.6	−30.5
Gross national product, billions of dollars	1st quarter	[1] 427.1	+5.9	−13.2	+49.8
Personal income, do	do	[1] 336.5	+6.0	+14.0	+48.2
Disposable income per capita					
Current prices	do	[1] 1,736	+3.6	+9.5	+27.7
Constant (1956) prices	do	[1] 1,700	+.9	+5.5	+10.7
Population, million of persons	do	170	+1.8	+3.6	+12.2
Industrial production (1947–49=100; seasonally adjusted)	Apr. 1	145	+1.4	+6.6	+29.5
New plant and equipment spending, billions of dollars	2d quarter	[1] 38.0	10.2	+39.8	84.5

[1] Seasonally adjusted, annual rates.

Thus, we are faced with the paradox that while our Nation has grown much bigger, much richer, much more productive over the past 8 years, the present trend, if allowed to continue, would mean the lowest volume of new homes since 1950.

Mr. SMATHERS. Mr. President, the table shows that in the first 4 months of the year—the very time during which builders normally start the bulk of their year's production—home building was off 19 percent from last year, and around 31 percent from 1955.

Not only are housing starts for 1957 at the lowest level in the past decade, but, as shown on the table, the present rate of home production per thousand of population has actually dropped below the ratio of production in 1924, 1925, and 1926.

History teaches us that the American economy cannot long remain stable if home building is depressed. I have referred to the ratio of construction in 1926. Let it be remembered that 1926 was followed 3 years later by the great depression of 1929.

Home building is a primary factor in the social well-being of our people. It is equally important in our economy. We cannot afford to have it depressed.

But perhaps even more important than the question of mere volume of new home production is the suitability of those homes which are produced for families of modest income. Following the collapse of real estate and home building in the early 1930's, due to the unsound financing practices of the boom years of the 1920's, the Congress of the United States enacted one of the greatest and most significant pieces of legislation ever enacted by this Congress or by the legislature of any government. I refer to the National Housing Act, which established the Federal Housing Administration. The act was based upon the wise and far-seeing principle that the great masses of our people should be provided an opportunity to purchase their own homes and to carry them on credit terms which they can afford. It expounded the idea that the soundest kind of financing was that which allowed a family to acquire its home with a low downpayment, at low interest rates, and with a long-term mortgage repayable in modest monthly installments. Over the years, this formula has been enormously successful. As a result, millions of American families have become established in their own homes, and the economy and our society have been greatly strengthened.

This principle of home financing has not been the subject of partisan debate. Senators on both sides of the aisle have agreed over the years on the general principle that low downpayment, low monthly payment financing was necessary and desirable for the American people.

But now we should realize that the startling drop in home production which I have mentioned has occurred almost entirely in the financing of homes under the present plan of FHA financing, and the similar plan of the Veterans' Administration financing, instituted in 1944, and which has enabled millions of veterans to house their families.

Examination of available data clearly shows that the demand for modest-priced housing still continues high; there are still millions of families who want the opportunity to purchase their own homes. The American home building industry is conscious of this demand, and is anxious to produce homes for these families.

There are two factors which are preventing the meeting of this need. First, credit conditions—so-called tight money. We are all familiar with the discussion of tight money conditions. It is not my purpose at this time to argue the merit, or lack of merit, of that policy or to attempt to fix the blame or responsibility for it. The question to which I want to address myself is the terms under which that money will be made available to the purchaser.

Nor am I at this time discussing the merits of a 5-percent-interest rate against the 4½-percent rate on GI financing. I have believed, and I still believe, if we are to have a workable GI-housing program, it will require an increase in interest rate to 5 percent, so that it can be competitive. But there appears no prospect that this will be done. As a consequence, the economy has been steadily deprived of the main financing tool under which housing was being made available to persons of modest income.

There remains for this purpose only the Federal Housing Administration system of mortgage insurance, and the downpayment terms under that system—which were well adapted to the early years of its operation, but which are now out of date. In effect, therefore, there is no practical financing mechanism whatsoever to assist in placing homes within the reach of the so-called little fellow. For the first time in 23 years, since the enactment of the National Housing Act in 1934, we do not have an effective low downpayment, low-monthly-payment financing plan. As a result, we are rapidly drifting back to the dangerous real-estate financing practices of the late 1920's, the very practices which resulted in the collapse of the building and real-estate industry in 1929.

Interestingly enough, however, even during the 1920's, when practically all of the homes purchased were financed under conventional loans, a primary feature of the sale of the homes sold at that time was the low downpayment. This fact is also true in the sale of conventionally financed homes today; in both cases it has been obscured by the secondary financing methods used. For example, the former Division of Building and Housing, of the Department of Commerce, made studies of mortgage-financing methods in use during the 1920's.

One of the financing studies made by this division was an analysis of financing practice in a representative city—Cleveland, Ohio. A sample of 5,292 cases was used to secure information on the frequency of the use of second mortgages, with the following results:

1920–29:	*Percent*
First mortgages only	45
Two mortgages	55
Three mortgages	12

This table dramatically shows that in 67 percent of the homes bought during the 1920–29 period, the second-mortgage device was used and in 12 percent of all cases, a third mortgage was placed. Second and third mortgages were used, of course, only because the home-buying public did not have the ready available cash with which to make the initial downpayment.

It is absolutely vital, in my opinion, that the downpayment requirements for FHA mortgage insurance be revised to recognize the realities of today's economy. The family which aspires to the ownership of a modest home is not able today to accumulate much over $1,000 in cash. Yet experience has demonstrated that these persons are credit-worthy. For almost 25 years under FHA, and for approximately 13 years under VA financing, homes have been sold with low downpayments. The resultant foreclosures and delinquencies are insignificant. There were six-tenths of 1 percent delinquencies on a total of 4,764,000 GI loans, and three-tenths of 1 percent foreclosures on 3,395,000 FHA-insured homes. These figures amply demonstrate that VA and FHA home buyers are good mortgage risks.

It should be realized, moreover, that a lower first mortgage is not necessarily synonymous with a higher downpayment. Before the creation of the Federal Housing Administration, purchasers supplemented the low first mortgage then available with dangerous secondary financing. To refuse realistically to adjust FHA downpayments will inevitably result in more and more reliance on second and third mortgages.

Some advocates of tight money argue that any reduction in FHA downpayments is inflationary. I believe their arguments are not sound, because there has already been a drastic fall off in housing starts under the FHA–VA programs. Whatever reduction Congress approves, FHA requirements will still be mare demanding than have been the terms available under the GI program.

Production and financing under the FHA program, even with a reduced downpayment schedule, it appears will not equal the total starts which until recently have been accounted for by the combined FHA–VA programs. Thus the mortgage money supply, as aided by amendments in this year's Housing Act, should prove well able to sustain FHA-financed housing produced under a reduced FHA downpayment program.

Certainly in the home-building business there exists just the reverse of an inflationary situation and the problem is to keep production up to normal annual levels. A substantial reduction in FHA downpayment requirements is a necessity to achieve this.

Existing law which provides a downpayment schedule of 5 percent on the first $9,000 and 25 percent on all in excess of that amount is not practical in today's economy. If we are to provide for the needs of the home-buying public a realistic revision in the FHA downpayment schedule is vitally essential. Though the substitute proposal which provides for a downpayment of 3 percent on the first $10,000, 10 percent on the next $6,000, and 30 percent in excess of $16,000 is not as far as I would go in my proposal of 2 percent on the first $10,000, 8 percent on the next $5,000, and 25 percent on everything in excess of $15,000, it is a substantial improvement over that in existing law and as I stated earlier, I shall support it. I sincerely trust it will be adopted by an overwhelming vote.

Unless we want to leave unsatisfied the demand of the American people for housing, unless we want to see American home building revert to the chaos from which the Federal Housing Administration rescued it twenty-odd years ago; unless we want to run the grave risk that, with the deterioration of the home-building industry, the entire American economy may be seriously affected, I say to you Senators that we must incorporate into the pending legislation a lower downpayment schedule for the FHA.

For that reason, Mr. President, I am happy to support the amendment offered by the able Senator from Alabama.

Mr. MORTON. Mr. President, will the Senator yield?

Mr. SMATHERS. I am happy to yield to the Senator from Kentucky.

Mr. MORTON. I first wish to commend the Senator from Florida for his able analysis of the problem we face. I am glad he is going to support the amendment. I have followed his own proposal with great interest, as have the home builders in my State.

I have before me some figures which I think supplement the facts which the Senator from Florida has presented. They show a comparison which applies only in Jefferson County, Ky. I have not been able to get figures for the entire State. The population of Jefferson County constitutes one-sixth of the population of the State of Kentucky.

Last October, October of 1956, there were in Jefferson County 1,120 new houses completed, vacant and unsold. In March of this year there were only 575 new houses completed, vacant and unsold, and only 413 under construction. These figures cover all houses. I should like to point out that of the group of 575 new houses completed, vacant and unsold as of March of this year, only 167 were held at an asking price of less than $15,000.

I think the situation which the Senator from Florida describes applies throughout the country, and I believe that a lower downpayment will not be inflationary, but will be a help to get new starts underway.

Other factors are involved, as the Senator so ably pointed out, but I think we can address ourselves to this problem without danger of inflating the economy today. I again commend the Senator from Florida.

Mr. SMATHERS. I thank the able Senator from Kentucky.

I might add that several weeks ago, when I first proposed my amendment, the Senator from Kentucky was kind enough to come by and offer at that time to support it, for the reasons he has now very effectively pointed out, among others that he felt we should do something to spur onward what is now a defintely lagging business, the home building business. In my State this problem affects not only the home builders, but those who make tile, venetian blinds, cement blocks, and all the other articles which go into building.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. SMATHERS. I am happy to yield.

Mr. MONRONEY. I wish to associate myself with the remarks of the distinguished Senator from Florida, and I compliment him on the earlier amendment, which attracted so much attention.

Is it not a fact that in 1950 the average GI or FHA house which was bought, the median house, sold for a market price of $8,200?

Mr. SMATHERS. I am sure the Senator has the correct figures, and I know what he states must be the case.

Mr. MONRONEY. And the downpayment on that average house was $410, plus closing fees of about $300.

In 1955 the cost of the median house, because of the increase in the price of land, of labor, and of material, as well as the many other items involved, had increased to $11,700, and under the FHA downpayment rules, the downpayment had gone up to $1,125. It had almost tripled.

Mr. SMATHERS. The Senator is correct.

Mr. MONRONEY. Which meant that the market was cut down, for those who needed the housing the most, by at least two-thirds. I think that is the problem we face today.

The bill would do very little for the private-home building industry and for the GI's and others who must rely on the independent builders to construct housing. But the amendment which is being offered would open up a new market, so that the people could buy these houses, which today are the best values that can be obtained, to fit their family needs. Is that not a correct statement?

Mr. SMATHERS. I completely agree with the statement of the able Senator from Oklahoma. I thank him for what he has said and the contribution he has made.

I should like to point out one additional fact in that connection. The Senator mentions the median price for homes bought under the Veterans' Administration financing. Under the Veterans' Administration financing I think only 2-percent downpayment was asked.

Mr. MONRONEY. It used to be no percent.

Mr. SMATHERS. Originally and by law no downpayment was required.

Mr. MONRONEY. The closing costs only.

Mr. SMATHERS. Exactly. The 2-percent downpayment was the result of an administrative regulation and despite this low downpayment factor I should like to remind the Senator that foreclosures on homes purchased under the GI plan amounted to less than six-tenths of 1 percent, which means that the borrowers were good credit risks, even though they did not have a large sum of cash available for a downpayment.

Merely because people do not have a great deal of cash available at home or in the bank at the moment does not mean they are not good credit risks, and I

think that pretty well answers the argument that lowering downpayments would be inflationary.

Mr. MONRONEY. The amount of the downpayment on the median house in 1955 was $1,125, plus $450 closing cost, which put the house in a range that made it unavailable to young married couples. Unless we continue to produce about 1 million-plus houses a year we will fall behind, and there will be more new families formed by marriages than can find housing to take care of them. Therefore, they will be forced to reside in the very limited pool of rental housing.

Mr. SMATHERS. The Senator is correct.

Mr. MONRONEY. The distinguished Senator from Florida knows that there is not available in any of the cities or in any of the towns of the United States an adequate supply of rental housing. That is always one of the things we have to try to put special emphasis on in an endeavor to create more housing. If we deny to the new young family groups the opportunity to buy homes of their own, then they must crowd into the rental market, and inflation in that market will be rampant.

Mr. SMATHERS. The Senator is correct.

Mr. MONRONEY. The quotation we heard so often in our hearings was that the percentage of inflation occurring since the Korean war has been one of the largest.

Mr. SMATHERS. I read in this morning's paper—and I am sure the Senator from Oklahoma is aware of this fact—that the president of the National Association of Home Builders, Mr. George S. Goodyear, in a speech made yesterday here in Washington, D. C., stated that in his judgment there would be less than 880,000 homes built this year, which of course represents a downward estimate from that which first had been made, and represents a reduction of approximately 40 percent compared to the number of homes built in 1955.

Mr. MONRONEY. That is true. Unless the pending amendment, which proposes to lower the downpayments, shall be agreed to, we could easily lose a full year of construction.

Builders must prepare for construction. Houses are not taken off the shelf ready for occupanccy tomorrow. It takes the average builder about a year, once the Congress determines the policy as to what the Government housing program is going to be, to acquire the necessary land, get the architect to design the houses, provide the necessary utilities, and build the houses.

By the adoption of the pending amendment, which is so similar to the amendment of the distinguished Senator from Florida, we will open an avenue for the home building industry to achieve some degree of prosperity, and, we hope, afford purchasers of low-cost housing an opportunity to obtain homes of their own. I can see no justification of the charge of inflation which is so often raised against the proposal.

Mr. SMATHERS. I thank the able Senator from Oklahoma for his great contribution and help in solving this very serious problem.

Mr. President, I yield the floor.

Mr. SPARKMAN subsequently said: Mr. President, in connection with the discussion a few minutes ago, led by the distinguished Senator from Florida [Mr. SMATHERS], and particularly in connection with the exchange between him and the Senator from Oklahoma [Mr. MONRONEY] on the question of downpayments, I should like to have inserted at that point in the RECORD a table showing the downpayments under the amendment proposed by the Senator from Indiana [Mr. CAPEHART]; the downpayments under the substitute which I propose; and the situation under existing legislation.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Comparison table—FHA downpayments, one-family residence

FHA value	Present schedule	Sparkman	Capehart	H. R. 6659 (as passed by House)
$5,000	$250	$150	$200	$150
$6,000	300	180	240	180
$7,000	350	210	280	210
$8,000	400	240	320	240
$9,000	450	270	360	270
$10,000	700	300	400	300
$11,000	950	400	500	450
$12,000	1,200	500	600	600
$13,000	1,450	600	700	750
$14,000	1,700	700	800	900
$15,000	1,950	800	900	1,050
$16,000	2,200	900	1,000	1,200
$17,000	2,450	1,200	1,300	1,500
$18,000	2,700	1,500	1,600	1,800
$19,000	2,950	1,800	1,900	2,100
$20,000	3,200	2,100	2,200	2,400
$21,000	3,450	2,400	2,500	2,700
$22,000	3,700	2,700	2,800	3,000
$23,000	3,950	3,000	3,100	3,300
$24,000	4,200	4,000	4,000	4,000
$25,000	5,000	5,000	5,000	5,000

Formula for downpayment on FHA-insured section 203 sales housing, 1-family owner-occupied property:

1. Present schedule: 5 percent of first $9,000, plus 25 percent of excess. Maximum mortgage $20,000.
2. Sparkman: 3 percent of first $10,000, plus 10 percent of next $6,000, plus 30 percent of excess. Maximum mortgage $20,000.
3. Capehart: 4 percent of first $10,000, plus 10 percent of next $6,000, plus 30 percent of excess. Maximum mortgage $20,000.
4. H. R. 6659 (as passed by House): 3 percent of first $10,000, plus 15 percent of next $6,000, plus 30 percent of excess. Maximum mortgage $20,000.

OVERALL BUDGET BALANCE

Mr. ALLOTT. Mr. President, present indications are that Dwight D. Eisenhower will be the first President in almost a third of a century to achieve an overall budget balance.

If no cuts are made in the budget for fiscal 1958, his first five fiscal years will show a deficit of $2,131 million. It is obvious, however, that substantial reductions will be made. Mr. Eisenhower himself has expressed the wish that spending be trimmed. He has been joined in this desire by Secretary of the Treasury George M. Humphrey and other prominent administration leaders.

The Republicans in both the Senate and the House of Representatives have gone on record unanimously in favor of making cuts. They have been joined by many Democrats, including the distinguished senior Senator from Virginia, who has long been an apostle of economy in government, as well as some 11th-hour converts to a sound fiscal program.

If the 1958 budget is cut only 3 percent, President Eisenhower will show a surplus for his first 5 fiscal years. The last President to show an overall surplus was Calvin Coolidge.

During the first 101 years of the present two-party system as applied to the White House, Republican chief executives will have served for 61 years by the time fiscal 1958 has run its course. Democratic Presidents have served during the remainder of those 101 years—40 years in a fiscal wilderness.

Only one Democratic occupant of the White House had an overall surplus. That was Grover Cleveland for his first term. Every other Democratic President has had an overall deficit—James Buchanan, Cleveland in his second term, Woodrow Wilson, Franklin D. Roosevelt, and Harry S. Truman.

It will be maintained, and with good reason, that Democratic chief executives ran up huge deficits because of the three wars that were fought during their administrations. To be fair to the Democratic Presidents, let us subtract the deficits that were run up during these wars.

The overall Democratic deficit is $262,069 million. If we subtract the deficits for the fiscal years 1918, 1919, 1942, 1943, 1944, 1945, 1952, and 1953, the remainder will be the still tremendous sum of $41,537 million.

On the other hand, the overall Republican deficit will be $1,531 million at the end of fiscal 1958, if no cuts are made. When we take away the deficit which was attributable to the Civil War, the Republican Presidents have a surplus of $1,058 million.

Mr. President, I have had three tables prepared which should be of interest to serious students of government. The first shows the actual receipts and expenditures for the first 3 years of President Eisenhower's stewardship, as well as the estimated receipts and expenditures for the fiscal years 1957 and 1958, as anticipated in his proposed budget for those 2 years. That second table shows the receipts and expenditures by presidential terms from fiscal 1858 through fiscal 1958. The third table shows the surpluses and deficits by presidential terms for the same 101 years.

Mr. President, I ask unanimous consent to have these tables appear in the RECORD at this point as a part of my remarks.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Budgets for fiscal years 1954–58

Fiscal year	Receipts	Expenditures	Surpluses or deficits
1954	$64,655,396,989	$67,772,353,245	−$3,116,966,256
1955	60,389,743,995	64,569,972,817	−4,180,228,921
1956	68,165,329,382	66,539,776,178	1,625,553,403
1957	70,628,000,000	68,900,000,000	1,728,000,000
1958	73,620,000,000	71,807,000,000	1,813,000,000
Total	337,458,460,466	339,589,102,240	−2,130,641,774
		337,458,460,466	
		−2,130,641,774	

Receipts and expenditures by presidential terms

Fiscal	Republican		Democratic	
	Receipts	Expenditures	Receipts	Expenditures
1858–61, Buchanan			$197,716,370	$272,933,490
1862–65, Lincoln	$763,026,123	$3,352,380,410		
1866–69, Lincoln-Johnson	1,825,248,460	1,578,557,655

THE FRYINGPAN-ARKANSAS PROJECT

Mr. ALLOTT. Mr. President, the Fryingpan-Arkansas project is one of the most important projects affecting Colorado to be considered by the Congress in many years. It is desperately needed as a solution to the water problems of southeastern Colorado, and it is wholeheartedly supported by the vast majority of Coloradans. To be sure there are a few who do not favor the Fryingpan-Arkansas project, inside Colorado as well as from other States. Recently some of those who do not favor the project testified before the House Subcommittee on Irrigation and Reclamation. I ask unanimous consent to insert in the RECORD a column by Barnet Nover, Washington correspondent for the Denver Post. Mr. Nover does a real service to those interested in the progress and welfare of the West by putting the testimony of those opposing the Fryingpan in its proper perspective. There he points out that they represent only a relatively small group in the State and do not in any way reflect the official view of three State agencies which have the authority to lay down Colorado's water policy.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ROUNDUP ON THE POTOMAC

(By Barnet Nover)

TESTIMONY OF COLORADANS DAMAGES FRYINGPAN CAUSE

WASHINGTON.—Already facing a murderously tough uphill fight, the cause of the Fryingpan-Arkansas project was certainly not advanced by the testimony of some of the Colorado witnesses who appeared at the hearing held recently by the House Subcommittee on Irrigation and Reclamation.

To be sure, Coloradans are in a position to put the testimony of John B. Barnard, of Granby, James H. Smith, and Orest A. Gerbaz, of Aspen; Philip P. Smith, of Glenwood Springs, and Tell Ertl, of Grand Junction, in its proper perspective.

They know that while honorable, high-minded and well-meaning men, these critics and opponents of Fryingpan-Arkansas only represent a relatively small group in the State; that they do not reflect the official view of the three State agencies who, under the law, have the authority to lay down water policy; that during all the time Fryingpan-Arkansas has been before Congress, Governors Thornton, Johnson, and McNichols as well as Senators MILLIKIN, JOHNSON, ALLOTT, and CARROLL—all of them elected by the people of the State as a whole—have favored the project.

But if Coloradans are in a position to discount the testimony of those critics and opponents, others are not.

It is easy to imagine what use Congressional opponents of reclamation such as JOHN SAYLOR of Pennsylvania, or JOHN PILLION of New York, or the southern California contingent will make of this testimony and how they will hammer away at it to prove that on this issue Colorado is a house hopelessly divided against itself and that it would be wrong for Congress to take a stand in what, they are likely to insist, is an intrastate feud.

"Why enact a bill which the people of Colorado are by no means a unit in supporting?" we can almost hear them ask when and if the Fryingpan-Arkansas authorization measure gets to the floor of the House.

Barnard very generously declared that, despite "the grasping policy of eastern Colorado," the Colorado River water conservancy district of which he is the attorney "still adheres to its conditional approval of that project." But if the amendment he wants tacked on to the Chenoweth bill is adopted the project would be put on the shelf for a long, long sleep.

His amendment proposes that before a spade is turned on the Fryingpan-Arkansas project the State of Colorado agrees to limit diversions from the Colorado River basin in Colorado to 20 percent of the water apportioned to the State by the 1922 and 1948 compacts for a period of 25 years in the future.

This would include diversion now accomplished, those under construction, and those involved in the Fryingpan-Arkansas project, Barnard explained.

It would involve the conclusion of an interstate compact "between Colorado and one or more of the other six Colorado River

basin States, to be ratified by the legislatures of the signatory States."

Barnard went on to say that "a third compact limiting such diversions is imperative."

How long it would take to conclude such a compact he did not say, but the record of past efforts is not encouraging.

It was not until 1944 that the Santa Fe agreement went into force as a seven-State compact and then on the basis which did not eliminate the need for prolonged and still unfinished litigation between Arizona and California.

Four more years were to elapse before the upper basin States finally reached agreement regarding the division of the water to which they were collectively entitled under the 1922 compact.

At any rate, the best answer to Barnard's contention was that given by Governor McNichols.

"Intrastate matters," he told the subcommittee, "of course are not proper subjects for interstate compacts. No interstate problems exist requiring settlement between Colorado and any other State. Colorado already has compacts with all her lower State neighbors which allocate to her the consumptive use of specific quantities of water produced in Colorado. Where she uses such water is not their concern. Nor do they seek to make it their concern."

The governor also made the important point that any action by the legislature limiting transmountain diversions in Colorado would be illegal.

"A division of the waters of Colorado geographically by law can be made effective only by amending the Colorado constitution. Neither the Congress of the United States nor the General Assembly of Colorado has that power."

THE HOUSING ACT OF 1957

The Senate resumed the consideration of the bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes.

Mr. FULBRIGHT. Mr. President, it is my purpose to defend the amendments to H. R. 6659, as reported by the Committee on Banking and Currency. I am sure that there are many in this Chamber who believe that the committee has gone too far in assisting the production of housing—and perhaps as many more who believe that the committee has not gone far enough. I can say frankly that as to individual items I could agree with both points of view. In the main, however, I am in general agreement with the provisions of the bill as amended, and I hope that the Senate will support it.

Perhaps the most difficult questions faced by the committee were the many proposals made to reduce the statutory requirements for downpayments on FHA insured loan transactions. After complete and careful consideration of these proposals, the committee determined to leave the existing law unchanged I do not intend to discuss on a comparative basis the several proposals which were considered. Instead, I hope to convince my colleagues, as I am convinced, that reduced downpayments would not solve the problems facing the home-building industry and the prospective home owners in the Nation, but would very likely aggravate these problems.

First, I wish to point out the problems as they were presented to the committee. Second, I shall try to show the effect which lower downpayments would have. Third, I want to express my view as to the effective way to solve the problems and what the committee bill does in this regard.

The facts of the situation, as presented to the committee, are as follows: First, the seasonally adjusted rate of new nonfarm dwelling units started in the first quarter of 1957 was 933,000; second, this rate is 18.1 percent below the same period in 1956; third, the reduction is almost entirely in the Government supported mortgage loan field—VA starts being down 45.3 percent and FHA starts being down 39.4 percent; fourth, the trends in VA and FHA applications indicate that this condition is not likely to improve under existing circumstances; fifth, discounts demanded, or yields required to attract home mortgage financing, continue to be high.

The meaning of these facts are fourfold: First, lenders are finding other investments more attractive than home mortgages; second, homebuilders, mortgage originators, and real estate firms are experiencing a reduced volume of business; third, labor and materials formerly utilized in homebuilding are either idle or are being utilized elsewhere; and fourth, the families of the Nation have a reduced number of new homes available for purchase and for upgrading their standard of living.

I have no desire to minimize the seriousness of this situation, and it is unthinkable that such conditions should be allowed to persist indefinitely. I know that the majority of this body shares my concern, and the question before the Senate is what should be done about it.

The solution most ardently advocated is that FHA downpayments should be reduced. But this solution has been tossed into the air, and is expected to stand without any visible means of support. No one has yet explained to me how a reduction of downpayments would increase the production of housing. And increased production is the only real answer to the problems of homebuyers and homebuilders, and those other segments of commerce and industry which depend upon the level of new home construction for continued prosperity.

In my opinion, a reduction of FHA downpayments if applied at this time would have two effects. In the first place, by making more families eligible to bid for a reduced quantity of credit, lower downpayments would probably cause a further upward pressure on discounts. This would not benefit home buyers or home builders, for discounts are already too high.

Mr. GORE. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. GORE. Would it not follow, then, that the passage of the bill, without a provision in it prohibiting discounts, would, in fact, bring about higher discounts, and thus provide no benefit at all either to the housing industry or to the people who desire to purchase or build homes?

Mr. FULBRIGHT. The Senator raises a question which is rather involved. I shall be more than willing to discuss it when and if he submits an amendment on that subject.

At the moment I would say—and I will oversimplify it—that we considered the proposal of writing into the bill a prohibition against discounts. However, that would call for an enormous increase in appropriations for FNMA. So we were caught on the horns of a dilemma. There is no way of solving it by merely putting a prohibition in the act, because that does not make the necessary money available. It merely amounts to an empty gesture, I am afraid.

I should like to have an effective prohibition written into the law—and I emphasize the word "effective"—but it is not made effective merely by Congress saying that such a practice shall be prohibited.

It is necessary also to make provision for the money necessary to enforce such a provision. I do not wish to evade the issue. However, I have a short general statement to make on the bill, and I would appreciate it if the Senator would defer his discussion of discounts until a little later. If he would do so, I should appreciate it very much. I should like to leave it for a little later in the discussion.

Mr. GORE. I agree that a further provision is necessary, and the amendment I shall offer will direct FNMA to do what it was created to do, and to do what it profitably did for 16 years, to wit, provide a secondary market at par for home loans bearing the guaranty of the United States Government. I do not wish to draw the Senator out at this time. I respect his wishes to continue his speech. I hope, however, that he will join in the consideration of the matter when it is presented.

Mr. FULBRIGHT. I shall be happy to discuss it and to join in the consideration of it. It may be that the Senator has an approach to the problem of which I am unaware. As of the moment, with my limited knowledge of the subject, I cannot see how we could avoid appropriating an additional three or four billion dollars. Having gone through the experience in conference today where members of the conference quarreled over $150,000, I am not very optimistic about Congress authorizing any such large amount of money by way of funds to FNMA. I certainly shall enjoy hearing what the Senator has to say about it, though, a little later.

Mr. JOHNSON of Texas. Mr. President, I was not in the Chamber at the time the distinguished chairman of the subcommittee, the Senator from Alabama [Mr. SPARKMAN], offered his amendment as a substitute for the Capehart amendment. I am informed that the Senator from Indiana [Mr. CAPEHART] has agreed to accept the amendment offered by the Senator from Alabama, as a substitute. Is that correct?

Mr. SPARKMAN. The Senator is correct. I may say to the distinguished majority leader that I have added the majority leader's name as a consponsor of the amendment, since he told me that he had considered submitting a similar amendment. I have therefore added him as a cosponsor.

Mr. JOHNSON of Texas. I am delighted to be a cosponsor of the amendment, along with the distinguished chairman of the subcommittee, who has been a leader in the field of housing throughout the years. It is an excellent amendment, and I believe it will result in making it possible for this Nation to have more homeowners and to provide for the construction of more reasonably priced homes. I have looked into this matter thoroughly. I have consulted with experienced men like Mr. Elmo Burke, of San Antonio; Dick Hughes, of Pampa, Wilson Brown, of Dallas; and George Goodyear, president of the National Association of Home Builders. I appreciate the contribution which has been made in this field, not only by the Senator from Alabama, but also by the junior Senator from Florida and by the distinguished chairman of the committee, the Senator from Arkansas [Mr. FULBRIGHT], with whom I have been working on this matter. I congratulate all of them for bringing this amendment to the floor. It will do more to help people of moderate means buy their own homes than almost any other action we could take.

Mr. FULBRIGHT. Mr. President, in the second place, by bringing more prospective buyers into a new home market where volume is down, lower downpayments would probably cause an upward pressure upon the prices of new homes. While this might enhance the position of new house sellers, it certainly would not benefit the buyers of new homes. In fact, the only possible beneficiary of lower downpayments at this time would be the owner of an unsold inventory of new homes. But no one has advanced this motive, and to advance it would directly contradict the very forceful arguments that new home starts are far below prospective demand and are approaching a level to indicate real economic danger.

In short, therefore, I can see clearly the disadvantages of a general lowering of FHA downpayments. The one argument which has some appeal to me is that the downpayment schedule should be constructed to encourage the production of lower-cost housing available to greater numbers of families. For this reason, and because the Senate apparently is in a mood to change FHA downpayments, I have joined with the Senator from Alabama [Mr. SPARKMAN], the Senator from Pennsylvania [Mr. CLARK], and the Senator from Texas [Mr. JOHNSON], in a proposal which gives the greatest benefit to families purchasing homes valued at $10,000 and under.

If lower downpayments are not the answer, then what is? I am convinced that the volume of homebuilding can be increased only by an increased volume of home-mortgage credit. There are several reasons for the current reduction in the amount of savings flowing into home mortgages. As pointed out earlier, the volume of homes financed by conventional mortgages, where interests rates are free to rise, has remained fairly stable. The reduction has occurred in VA-guaranteed and FHA-insured mortgage loans, where interest rates are not free and where the lender's yield can vary only by the amount of the discount charged at the inception of the mortgage loan. Lenders have reduced their participation in the VA and FHA programs because it is more difficult to obtain the yields they seek, or because they have become concerned about the demand for new homes in some areas, or a combination of both.

If Congress desires to increase the amount of home-mortgage credit, it has at least two courses of action readily available. It can increase the maximum interest rate on loans guaranteed under the Servicemen's Readjustment Act of 1944, a proposal rejected in the House of Representatives, and which is not within the jurisdiction of the Senate Committee on Banking and Currency; or—and I call this to the attention of the Senator from Tennessee [Mr. GORE]—it can directly intervene in the allocation of the Nations savings through activities of the Federal National Mortgage Association, through direct Federal loan programs of various kinds, or through direct credit controls designed to favor certain segments of the economy.

Mr. GORE. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. GORE. That is exactly the course of action the Government pursued from 1938 to 1954, at, I may say, a profit to the Government measured monetary-wise, and at a very enormous profit to our society in the construction of homes and in home ownership.

I agree with the able Senator from Arkansas that he has presented the choice. I think we need to face up to the problem. I believe we should, and we must.

I do not regard the authorization and direction of FNMA to use the credit of the United States Government in home loans as being in the same category as an appropriation for an expenditure which is never recoverable. In this case, for 16 years the Government made a monetary profit from the operations of insuring and providing a secondary market for home loans guaranteed or insured by the United States Government. That is a part of what the amendment which I shall offer provides, and I appreciate the willingness of the Senator from Arkansas to give it consideration.

Mr. FULBRIGHT. As I said a moment ago, I merely called the Senator's attention to that passage in my remarks to indicate that I had not overlooked the point. I can say briefly that there is some difference between the conditions which exist now and those which existed during the period to which the Senator from Tennessee referred. I need not point out all of them, but certainly the pressures upon available credit are very great, and there are many signs of instability developing in our economy which were not present during most of the period of which the Senator spoke. That is a part of the answer which I anticipate at the moment will be made. But, as I said, I would prefer to leave that until a little later, because I wish to complete my statement now.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. FULBRIGHT. For what purpose does the Senator wish me to yield?

Mr. JAVITS. I simply wanted to give the Senator some facts from my own State bearing out the Senator's argument.

Mr. FULBRIGHT. I am the chairman of a committee which will meet in a few minutes. If the Senator will not take too long, I will yield. But I must finish my statement.

Mr. JAVITS. Will the Senator yield to me for 1 minute?

Mr. FULBRIGHT. I will yield for a minute.

Mr. JAVITS. I simply wish to bear out the Senator's argument from a report given me only yesterday morning from the Syracuse-Rochester area in New York, which indicates that the 2 percent administrative lowering of downpayments by the administration has not helped the situation at all, and that it is necessary to have the downpayment reduction relief about which the Senator has spoken. In addition, the market has practically dried up, except for 4 to 6 points discount and 20 percent downpayments, for any kind of FHA mortgage.

Mr. FULBRIGHT. I appreciate the remarks of the Senator from New York, but they are not quite in agreement with my point of view. I do not have that much faith in downpayments. The only argument which appeals to me is that there should be a little more equitable distribution of the burden with regard to lower income families. The amendment which has now been accepted by agreement between the chairman of the Subcommittee on Housing, the Senator from Alabama [Mr. SPARKMAN], and the senior Senator from Indiana [Mr. CAPEHART], has in it an element which I feel justifies going along with it. However, I do not think that simply lowering the downpayment will result in any panacea at all; in fact, it will create some difficulties, which I have mentioned.

Mr. LAUSCHE. Mr. President, will Senator yield?

Mr. FULBRIGHT. I yield.

Mr. LAUSCHE. The Senator mentioned some infirmities which are now appearing in the economy. Would he mind elaborating upon them?

Mr. FULBRIGHT. The most serious one in this field is a shortage of savings to go into home building. To follow the suggestion which has been made with regard to increasing direct governmental intervention by purchase would be nothing short of printing money. If we greatly expand credit through direct Government lending, it will have that effect. In other words, it would be a very serious injection of credit into an already highly dangerous situation.

Mr. LAUSCHE. I wish I could accept lightly the arguments which have been made to the effect that the adoption of the program proposed will not emphasize the inflationary dangers under which we are laboring. But I cannot help recognizing that running through the report everywhere is the argument that more credit must be provided to enable housebuilders and housebuyers to compete with the money which is going

into the building of public roads, shipbuilding, and various other types of construction.

It is simple to say that the public will be served by having to pay little or nothing in buying their houses, but that is not the truth. The probability is that instead of being helped, the public will be hurt.

I should like very much to go along with a program which would provide a 3 percent payment on the first $10,000, 10 percent on the next $6,000, and 30 percent on the balance, if I could be secure in the belief that the spiral of inflation would not be stimulated upward. But I simply cannot bring myself to the conclusion that has been advanced by those who say it makes no difference; that if we stimulate additional building, we will not exaggerate the inflationary spiral under which we are suffering.

I thank the Senator very much for yielding.

Mr. FULBRIGHT. I appreciate the Senator's remarks. I do not think there can be any doubt that the enactment of the bill will add to the competition for available credit. However, the overall objective, as I see the bill, is to achieve a certain balance. We have reduced the amount made available by the House. I have never thought that our guiding principle should be to cut assistance out completely. That, of course, would be deflationary. We could do that, but it would destroy another factor which is of great social value, namely, our great housing program. But I do not wish, on the other hand, to overstimulate the program, and add unduly to the inflationary pressures.

I believe that this measure is a moderate compromise. We have not "gone overboard" in this bill. We have not gone as far as the House of Representatives has gone. I may say that we have not gone as far as we usually go. Instead, we have shown restraint.

But I do not wish to have the program stopped. To do so would hurt many builders, and would deprive persons who need homes of houses in which to live; and there would be many other undesirable and unfortunate consequences. I believe we should recognize the danger of inflation, and we should moderate the program, but we should not destroy it.

Under the circumstances, the bill is a moderate one, Mr. President. We have not insisted on provisions for public housing—as the Senate has consistently done in the past. Instead, we have recognized that this is no time to do that, although practically ever since I have been a Member of the Senate, the Senate committee has regularly reported a bill to increase public housing.

Mr. President, no Member of the Senate is prepared to say that a certain exact number of dollars is the correct amount to provide, and that more than a certain amount would be too much. Certainly, we have to use a moderate approach. I believe the committee has done as good a job as can be done under the circumstances.

I recognize that this measure will to some extent increase the competition for available credit. But, on the other hand, the evidence shows that most of the home-building activities have tended to be concentrated on homes costing $15,000 or more.

This measure is in line with my desire not to add to inflation. I am not willing to have the measure which is enacted into law go as far as some have suggested that it go. As the Senator in charge of the bill well knows, this measure does not go as far as many have proposed. We have tried to reach a more moderate approach. This measure is the result of weighing the various considerations and reaching a reasonable compromise.

Mr. MONRONEY. Mr. President, will the Senator from Arkansas yield to me?

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). Does the Senator from Arkansas yield to the Senator from Oklahoma?

Mr. FULBRIGHT. I yield.

Mr. MONRONEY. The Senator from Arkansas is aware of the fact, is he not, that the GI housing program is down by 45 percent, and the FHA housing program is down by 34 percent?

Mr. FULBRIGHT. That is correct.

Mr. MONRONEY. Does the Senator from Arkansas believe that a lowering of the downpayment will throw those two depressed areas of housing into a runaway-inflation condition, so there will be more buyers and a condition which will be dangerous?

Mr. FULBRIGHT. No.

Mr. President, I am willing to go along with the present proposal, even though it will, to some extent, increase the competition for available savings. That is where the competition comes—not in the case of materials. Today, I believe there is a surplus of building materials; but there is a great shortage of savings.

I remember when the Senator from Tennessee was complaining very bitterly about what the great city of Memphis had to pay for a relatively small amount of money with which to build an electric plant. What did that reflect? It reflected the same condition; namely, a shortage of savings available for the purchase of such securities—and they were excellent securities, I may say. That situation presently exists. Today, all municipalities are paying for borrowed funds far more than they were paying several years ago; and that situation reflects a shortage of savings and a shortage of credit and a shortage of money with which to make investments.

As I was saying, of the methods available to increase housing credit, the bill reported by the Banking and Currency Committee utilizes the Federal National Mortgage Association and some direct loan programs; and we have pending before us other proposals in the direct loan field. This bill demonstrates that the committee is concerned about the shortage of home-mortgage credit, and this bill contains concrete provisions to help the situation.

Mr. GORE. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. I am willing to yield, although I would like to continue with my remarks. However, I do not wish to shut off debate if it is on this subject.

Mr. GORE. Very well, Mr. President, I shall wait.

Mr. FULBRIGHT. Mr. President, while the committee may not agree as to the degree of effectiveness which this bill would have, if enacted into law, there is general agreement that the bill would cause the construction of housing which would not otherwise be built.

This bill adds $550 million to the secondary market purchasing power of the Federal National Mortgage Association—$50 million in capital stock to be purchased by the Treasury, and $500 million in borrowing authority for the FNMA. These funds are available for the purchase of VA-guaranteed or FHA-insured mortgages in principal amounts of $15,000 or less. While this may appear to be a large amount, it is exactly what was requested by the administration. Furthermore, it is far less than the figure supported by the industry, and is $825 million less than the amount contained in H. R. 6659, as passed in the House of Representatives.

The bill adds $850 million to the purchasing power of the Federal National Mortgage Association under its special assistance programs. These funds are for the purchase of home mortgages at 99 percent of par in the following amounts and categories: First, $150 million to be allocated by the President, including mortgages to replace housing cleared out of slum areas; second, $250 million for cooperative housing mortgages; third, $200 million for military housing mortgages; and, fourth, $250 million for mortgages on homes for families leaving urban renewal areas, elderly persons, families from minority groups, families earning too much for admission to public housing and earning too little to buy or rent any other decent shelter, and families with five or more dependents.

These funds represent a considerable pruning of the total estimated by many informed persons to be an essential level of activity for the FNMA special assistance functions. For example, the House version of the bill contains an additional $100 million for military housing mortgages; convincing arguments were made for $100 million more for cooperative housing; some advocates argued that the Presidential allocation be increased by another $850 million; and the funds provided for families leaving urban renewal areas and other needy families is $250 million less than the initial amount proposed for a moderate-income housing program. In summary, the committee amendment represents a cutback of $1.3 billion in special assistance funds for which very strong arguments have been made.

The bill adds $200 million to funds available for the construction of student and faculty housing at colleges and universities. This is one of the most critical and most deserving subjects covered by the bill. The need is easily 10 times the amount allowed, and the $200 million can be considered but a token amount for loans to house American youth as they seek higher education. I am in-

formed that only $96 million is left uncommitted, and that already $65 million of that amount has been applied for.

Finally, the bill adds $250 million to funds available in each of the next 4 fiscal years to assist local communities in clearing slums and blighted areas. This amount is taken from the President's budget as it was presented at the beginning of the year. Subsequently, the administration bill requested only $175 million. When the seriousness of this reduction was made known, the administration reverted to its original position, and is now understood to be in favor of $250 million. The only change made by the committee bill is a projection of the program over the next 4 years. The purpose for this projection is to demonstrate to our hard-pressed urban areas that the Federal Government will not abandon its efforts to continue vigorous programs of slum clearance and urban renewal. This is a commitment into the future to encourage local initiative and effort, and is assurance that plans made this year will not die for lack of Federal support 3 or 4 years hence.

These provisions, I submit, measure the concern of the Banking and Currency Committee about the housing needs in the Nation. The bill would make available during the next year a total of $1.85 billion as a stimulus to home building. I must point out, however, that $1.7 billion, or 92 percent of this amount, does not represent Federal expenditures. This 92 percent is a Federal investment in mortgage loans of various kinds, which will yield a profit to the Government.

In supporting this bill I do not wish to be understood as disapproving low downpayment loans in principle. I believe that the VA and FHA programs have demonstrated that low downpayments do not necessarily adversely affect the soundness of a home loan. I believe it is largely a matter of timing, and that generally lower downpayments during a period when mortgage money is extremely short would aggravate inflated money prices and home prices, and would contribute to general inflationary tendencies now in the economy. In this connection, I shall quote in part from a letter dated May 3, 1957, addressed to me by Mr. William McChesney Martin, Jr., chairman of the Board of Governors of the Federal Reserve System. Mr. Martin writes:

> The Board sees no objection to increasing maximum insurable loan amounts in order to adjust to current conditions in the housing market characterized by higher prices and large loans generally. Liberalization of mortgage terms, however, seems inappropriate at this time and hardly a solution to current problems in the mortgage market.
>
> Recent declines in residential building and financing have reflected, in the main, the reduced availability of funds from lenders for federally underwritten mortgages, rather than reduced demands by consumers for houses and mortgage credit. Available evidence suggests that demands for home mortgage credit continue large and are in excess of actual mortgage transactions. Builders and borrowers have in fact, been prevented by ceiling rates on FHA and VA mortgages from competing effectively for funds with other borrowers able and willing to pay higher interest rates for credit.
>
> Further liberalization of FHA mortgage terms would undoubtedly increase demands for credit but would not directly attract additional funds to the mortgage market. Only by improving the competitive position of insured and guaranteed mortgages through greater flexibility in their interest rates might this result be achieved.

During periods when mortgage money is more plentiful, lower downpayments certainly would spread this money among more families and would insure the full utilization of funds available.

Likewise, I do not wish to be understood as believing that the bill will restore home building to the levels of 1955 or 1956, for it will not. As I stated earlier, current conditions in the homebuilding industry cannot be allowed to persist indefinitely. If the private supply of home-mortgage money does not increase, then the Congress must consider what further action would be appropriate. The committee was advised by the Housing and Home Administrator that he was "confident that the supply of mortgage funds will improve in the near future." I hope that he is correct. But if he is not, something will have to be done to provide home buyers with a larger share of savings available for long-term investment.

I view action on the question of mortgage money also as primarily a matter of timing. Although the time may be near at hand for more direct intervention in the allocation of investment capital, I do not consider that existing economic conditions warrant such drastic action at this time.

There are other features of the bill which I could discuss with the Senate, but I am sure that subsequent debate will call attention to those items of more than casual interest. The bill has been very ably handled by the Senator from Alabama [Mr. SPARKMAN], the chairman of our Housing Subcommittee. I am indebted to him, to the Senator from Indiana [Mr. CAPEHART], the ranking minority member, and to all members of the committee who have worked so diligently to bring to the floor of the Senate a housing bill of which we can all be proud.

Mr. President, I yield the floor.

Mr. GORE. Mr. President, I offer an amendment, which I send to the desk and ask to have stated.

Mr. KNOWLAND. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KNOWLAND. Has the pending amendment been acted on?

The PRESIDING OFFICER. The pending amendment by the Senator from Alabama has not been acted upon.

Mr. GORE. Mr. President, I withhold my amendment.

Mr. CAPEHART. Mr. President, I accept the amendment of the Senator from Alabama to my amendment. It is now a question of acting on my amendment as amended.

The PRESIDING OFFICER. The question is on agreeing to the Capehart-Knowland amendment, as modified by the amendment of the Senator from Alabama [Mr. SPARKMAN].

Mr. CLARK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CLARK. Are we now voting on the amendment of the Senator from Alabama to the amendment of the Senator from Indiana?

The PRESIDING OFFICER. The question is on agreeing to the Capehart-Knowland amendment, as modified by the Sparkman amendment.

Mr. CLARK. The Senator from Indiana has accepted the amendment of the Senator from Alabama?

The PRESIDING OFFICER. The question is on agreeing to the Capehart-Knowland amendment, as modified by the Sparkman amendment.

Mr. BUSH. Mr. President, may we have an explanation of the amendment as modified? In what respect has the Capehart-Knowland amendment been modified?

Mr. CAPEHART. Mr. President, I presume the able Senator from Connecticut desires me to state the amounts of the downpayments in the different categories.

Mr. BUSH. Or give us some hint as to what the modification does, so we can understand it.

Mr. CAPEHART. Under the present schedule—meaning the present law—the downpayment, plus the closing costs, which ordinarily run from $300 to $700, is $250 on a $5,000 house.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield to the Senator from Utah.

Mr. BENNETT. I wonder if the Senator will use a $10,000 house as an example.

Mr. CAPEHART. I thought I would use a number of them.

Mr. BENNETT. We have a chart that does not have the $5,000 figure on it.

Mr. CAPEHART. I shall give it for a $10,000 house. Under the present law—that is, the law under which we are operating at the moment—the downpayment on a $10,000 house is $700. Under the Capehart amendment the downpayment would be $400. The Senator from Alabama proposed to make the downpayment $300. I accepted his modification.

Under the bill as passed by the House, the amount is $300.

What we are really doing, in accepting the Sparkman schedule of downpayments, for all practical purposes, is to agree to the same schedule adopted by the House, which reduces the downpayments which are provided by the present law.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield.

Mr. BENNETT. Is that true for the entire schedule? Can we look down the column and see the same thing apply?

Mr. BUSH. Would the Senator care to give the figure for a $15,000 house?

Mr. CAPEHART. Under the present law, the downpayment for a $15,000

house is $1,950. Under the Sparkman amendment it would be $800. Under the Capehart amendment, it would be $900. Under the bill as passed by the House the downpayment would be $1,050.

Mr. BUSH. So the Sparkman proposal goes considerably below that of the House?

Mr. CAPEHART. The formula under the Sparkman schedule is as follows: 3 percent of the first $10,000, plus 10 percent of the next $6,000, plus 30 percent of the excess. The maximum mortgage is $20,000. The Capehart schedule is 4 percent of the first $10,000, plus 10 percent of the next $6,000, plus 30 percent of the excess. The maximum mortgage is $20,000.

The schedule under the bill as passed by the House is 3 percent of the first $10,000, plus 15 percent of the next $6,000, plus 30 percent of the excess. The maximum mortgage is $20,000.

It amounts to six of one and a half dozen of the other.

The Sparkman schedule on the $14,000, $15,000, $16,000, and $17,000 homes is a little more liberal than that adopted by the House.

As the author of the Capehart amendment, I accepted the Sparkman schedule, because it is about equal to that adopted by the House. It is 6 of 1 and a half dozen of the other.

The administration, of course, recommended a reduction in downpayments.

All the testimony we received from every source—I think there may have been 1 or 2 exceptions, although I do not remember any—indicated that there was a great need for reduced downpayments.

I wish to say for the record that to date the collection record of FHA payments, and particularly VA payments, under which houses have been sold with very low downpayments or no downpayments, has been excellent. There have been no losses. The record has been good.

While I am not too certain that the lowering of downpayments will result in an increase in the sale of houses, I am not certain that it will not have that result. As I said a moment ago, the difference in the schedules is so small, one way or the other, that it does not make any difference. I think one can take his choice, because the difference is so small, anyway.

When we talk about a $15,000 house we must remember that the closing cost which the buyer must pay will possibly run anywhere from $300 to $600, so the buyer has an additional investment of the closing cost, as well as the downpayment. Anyone who purchases a $15,000 house under the schedule of the Senator from Alabama [Mr. SPARKMAN] would possibly have anywhere from $1,200 to $1,500 invested in the house as a downpayment.

I recommend the acceptance of the schedule of the Senator from Alabama [Mr. SPARKMAN]; and, Mr. President, I ask unanimous consent that the chart which I hold in my hand be printed in the RECORD as a part of my remarks.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

Comparison table, FHA downpayments, 1-family residence

FHA value	Present schedule	Sparkman	Capehart and Knowland	H. R. 6659 (as passed by House)
$5,000	$250	$150	$200	$150
$6,000	300	180	240	180
$7,000	350	210	280	210
$8,000	400	240	320	240
$9,000	450	270	360	270
$10,000	700	300	400	300
$11,000	950	400	500	450
$12,000	1,200	500	600	600
$13,000	1,450	600	700	750
$14,000	1,700	700	800	900
$15,000	1,950	800	900	1,050
$16,000	2,200	900	1,000	1,200
$17,000	2,450	1,200	1,300	1,500
$18,000	2,700	1,500	1,600	1,800
$19,000	2,950	1,800	1,900	2,100
$20,000	3,200	2,100	2,200	2,400
$21,000	3,450	2,400	2,500	2,700
$22,000	3,700	2,700	2,800	3,000
$23,000	3,950	3,000	3,100	3,300
$24,000	4,200	4,000	4,000	4,000
$25,000	5,000	5,000	5,000	5,000

Formula for downpayment on FHA-insured section 203 sales housing, one-family owner-occupied property:

1. Present schedule: 5 percent of first $9,000, plus 25 percent of excess. Maximum mortgage $20,000.

2. Sparkman: 3 percent of first $10,000, plus 10 percent of next $6,000, plus 30 percent of excess. Maximum mortgage $20,000.

3. Capehart: 4 percent of first $10,000, plus 10 percent of next $6,000, plus 30 percent of excess. Maximum mortgage $20,000.

4. H. R. 6659 (as passed by House): 3 percent of first $10,000, plus 15 percent of next $6,000, plus 30 percent of excess. Maximum mortgage $20,000.

Mr. JOHNSTON of South Carolina. Mr. President, I think everyone would agree that the overwhelming majority of those who have not been able to purchase their own homes would be in the group most affected by the bill. I am sure I need not recite the many ways that the people and the Nation would benefit by home ownership.

Certainly those who have been unable to purchase homes are those who belong to the lower income brackets therefore, it is even more difficult for them to raise sufficient funds to make purchase of homes, even though we do provide low-interest rates and the mortgage money, if the down-payments are too high. I think it is most important that we support the amendment which provides a 3 percent down-payment on the first $10,000.

I agree whole-heartedly with the opinion expressed by my distinguished colleague, Senator JOHN SPARKMAN, that the Nation would be courting disaster if the volume of new housing units fell below the 1 million mark this year, but I further say that the most urgent need for the majority of new housing is for those in the average and low income brackets. I further point out that nine-tenths of the decline in housing last year was in these brackets.

I for one do not propose that we sit idly by and allow this need to grow larger and larger because of huge down-payments, spiraling interest rates, excessive discounting of Government mortgages, and the lack of long-term mortgage money, so that private capital can make more and more money at the expense of the people who need help the most.

I hope that every Senator will think of the low-income person and will vote to include in the bill this amendment providing for low downpayments.

The PRESIDING OFFICER. The question is on agreeing to the Capehart-Knowland amendment, as modified by the Sparkman amendment.

The amendment, as modified, was agreed to.

Mr. GORE. Mr. President, I offer the amendment which I have previously sent to the desk, and I ask to have it stated.

The PRESIDING OFFICER (Mr. THURMOND in the chair). The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 31, line 8, it is proposed to strike out "$100,000,000" and insert in lieu thereof "$350,000,000."

On page 31, line 11, strike out "$100,000,000" and insert in lieu thereof "$350,000,000."

On page 31, line 14, strike out "$2,100,000,000" and insert in lieu thereof "$4,350,000,000."

On page 31, beginning with line 15, strike out all through line 7 on page 32, and insert in lieu thereof the following:

SEC. 203. (a) Section 303 (b) of the National Housing Act is amended by striking out the second sentence thereof.

(b) Section 304 (a) of such act is amended by striking out all that follows the first sentence and inserting in lieu thereof the following: "Notwithstanding any other provision of this title, the price to be paid by the Association for mortgages purchased in this secondary market operations under this section shall be not less than the unpaid principal amount thereof at the time of purchase, with adjustments for interest and any comparable items, and no charges or fees for its services under this section shall be imposed by the Association."

SEC. 204. (a) Section 305 (b) of the National Housing Act is amended by striking out all that follows the first sentence and inserting in lieu thereof the following: "Notwithstanding any other provision of this section, the price to be paid by the Association for mortgages purchased in its operations under this section shall be not less than the unpaid principal amount thereof at the time of purchase, with adjustments for interest and any comparable items, and no charges or fees for its services under this section shall be imposed by the Association."

On page 32, line 8, strike out "(c)" and insert in lieu thereof "(b)."

On page 32, line 14, strike out "204" and insert in lieu thereof "205."

On page 32, line 20, strike out "205" and insert in lieu thereof "206."

On page 33, line 17, strike out "206" and insert in lieu thereof "207."

On page 34, line 1, strike out "207" and insert in lieu thereof "208."

On page 54, after line 20, insert a new section, as follows:

DISCOUNTS PROHIBITED

SEC. 605. No loan shall be insured or guaranteed under the National Housing Act, or title III of the Servicemen's Readjustment Act of 1944, after the date of enactment of this act, unless the mortgagee certifies to the Federal Housing Commissioner or the Administrator of Veterans' Affairs, as the

case may be, that it has not imposed upon the builder or seller, or the veteran or other purchaser of the housing involved any charges or fees in connection with the mortgage financing of such housing.

The PRESIDING OFFICER. Is there objection to the consideration of the amendments en bloc? The Chair hears none. The amendments will be considered en bloc.

Mr. MONRONEY. Mr. President, will the Senator from Tennessee yield for the purpose of permitting me to suggest the absence of a quorum?

Mr. GORE. I yield.

Mr. MONRONEY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Allott	Gore	Murray
Barrett	Green	Neuberger
Beall	Hayden	O'Mahoney
Bennett	Hickenlooper	Pastore
Bricker	Hill	Potter
Bridges	Holland	Purtell
Bush	Hruska	Revercomb
Butler	Humphrey	Robertson
Byrd	Ives	Russell
Capehart	Jackson	Saltonstall
Carlson	Javits	Schoeppel
Carroll	Johnson, Tex.	Scott
Case, N. J.	Johnston, S. C.	Smathers
Case, S. Dak.	Kefauver	Smith, Maine
Chavez	Kennedy	Smith, N. J.
Church	Kerr	Sparkman
Clark	Knowland	Stennis
Cotton	Kuchel	Symington
Curtis	Lausche	Talmadge
Dirksen	Long	Thurmond
Douglas	Malone	Thye
Dworshak	Martin, Iowa	Watkins
Eastland	Martin, Pa.	Wiley
Ellender	McClellan	Williams
Flanders	Monroney	Yarborough
Frear	Morse	Young
Fulbright	Morton	
Goldwater	Mundt	

The PRESIDING OFFICER. A quorum is present.

Mr. JOHNSON of Texas and Mr. KNOWLAND addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Texas.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

Mr. KNOWLAND. Mr. President, I make the point of order that no business has been transacted since the previous quorum call.

The PRESIDING OFFICER. The point of order is sustained.

Mr. KNOWLAND. Mr. President, I ask for the yeas and nays on the Gore amendment.

The yeas and nays were ordered.

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent to have printed at this point in the RECORD, a table published in the U. S. News & World Report of May 31, 1957, showing housing and industrial construction declines across the Nation.

The chart shows most vividly the problem with which we are confronted and where the building industry is going under the present administration's policy of higher interest rates as a solution of the tight money conditions.

It is safe to say that if this kind of construction falls off too much, it will have a terrible impact upon the Nation's business, to say the least, and will certainly cause irreparable damage to our housing program. Our population trends indicate no letup in the birth rate and no slowdown in new marriages or homes being founded.

We will certainly be doing our new citizens a terrible injustice if we fail to provide an adequate housing bill, one which will meet the growing needs of our citizens, especially those in the low-income brackets.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[From the U. S. News & World Report of May 31, 1957]

The spotty picture in building

	Changes from 1956 in plans for—	
	Building of all types (dollar value)	Home building (number of units)
Alabama	Up 6.0 percent	Down 6.1 percent.
Arizona	Up 14.9 percent	Up 11.3 percent.
Arkansas	Up 52.6 percent	Down 8.7 percent.
California	Down 6.4 percent	Down 14.7 percent.
Colorado	Down 4.5 percent	Down 14.5 percent.
Connecticut	Down 6.6 percent	Down 9.4 percent.

United States total	Down 5.7 percent	Down 18.9 percent.

Source: U. S. Department of Labor.

NOTE.—Based on building permits issued in 3 months ended Feb. 28, 1957, and corresponding period a year earlier.

Mr. GORE and Mr. MORSE addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Tennessee.

Mr. GORE. Mr. President, the amendment which I have offered proposes to do three things.

First, it directs the Federal National Mortgage Association to do what it was created to do and to do what it did successfully and profitably from 1938 to 1954; to wit, provide a secondary mortgage market for home loans guaranteed and insured by the United States Government.

Second, it would prohibit the discounting of a home loan guaranteed or insured by the United States Government.

Third, it would authorize and provide funds, through a public debt transaction, as has been customarily done with this agency, for the purpose of effectively carrying out the directions given to the agency by the amendment.

This is not a radical proposal. This is not proposing a venture into an untried field. This is not an innovation. This is a proposal with which the Federal Government has had vast experience.

One of the most beneficial, one of the most helpful programs of the Government for many years has been the program by which veterans and young married couples desiring to build or buy homes could do so.

As a Member of the House of Representatives, I had the privilege of serving upon the Committee on Banking and Currency. I recall the creation of the Home Owners Loan Corporation, popularly known as HOLC. That agency was created in the depression years of the 1930's to provide a harbor of refuge for persons who were threatened with the foreclosure of mortgages on their homes. Many persons made dire predictions of the severe loss which might result to the Government from the operation of

HOLC in providing a refuge for those who were faced with the foreclosure of mortgages on their homes. But when HOLC was finally liquidated, it showed, through all its operations, although it had saved hundreds of thousands of homes from mortgage foreclosure, not a loss, but a profit.

The Government of the United States had trusted the people; had placed faith in the love of home, and in the need and desire for ownership of a home, and the Government found that it was a good risk.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from Tennessee may yield to me for the purpose of suggesting the absence of a quorum, without his losing the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. JOHNSON of Texas. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Allott	Gore	Murray
Barrett	Green	Neuberger
Beall	Hayden	O'Mahoney
Bennett	Hickenlooper	Pastore
Bricker	Hill	Potter
Bridges	Holland	Purtell
Bush	Hruska	Revercomb
Butler	Humphrey	Robertson
Byrd	Ives	Russell
Capehart	Jackson	Saltonstall
Carlson	Javits	Schoeppel
Carroll	Johnson, Tex.	Scott
Case, N. J.	Johnston, S. C.	Smathers
Case, S. Dak.	Kefauver	Smith, Maine
Chavez	Kennedy	Smith, N. J.
Church	Kerr	Sparkman
Clark	Knowland	Stennis
Cotton	Kuchel	Symington
Curtis	Lausche	Talmadge
Dirksen	Long	Thurmond
Douglas	Malone	Thye
Dworshak	Martin, Iowa	Watkins
Eastland	Martin, Pa.	Wiley
Ellender	McClellan	Williams
Flanders	Monroney	Yarborough
Frear	Morse	Young
Fulbright	Morton	
Goldwater	Mundt	

The PRESIDING OFFICER. A quorum is present.

Mr. GORE. Mr. President, I am fully cognizant of the far-reaching impact of the amendment I have proposed. That makes me all the more in favor of it. According to my conception of the duty the Members of the Senate, the representatives of the people who serve in this body must recognize what is happening, what has happened, and what is in store for the great housing programs which have made homeowners of millions of the American people.

Mr. CAPEHART. Mr. President, will the Senator from Tennessee yield for a question?

Mr. GORE. I yield.

Mr. CAPEHART. Does the Senator from Tennessee realize that his amendment will increase the budget by nearly $3 billion? Does he realize that an economy wave is sweeping over the country? Does he realize that his party has practically been beating the President in its determination to reduce the budget? Yet the Senator from Tennessee submits an amendment which will increase the budget by approximately $3 billion.

Mr. GORE. Mr. President, I shall be delighted to respond to the able senior Senator from Indiana.

My amendment proposes the identical course which was followed with respect to these programs during the first 2 years of the Eisenhower administration, during the entire administration of former President Truman, and, from 1938, under the administration of the late President Franklin D. Roosevelt. My amendment does not propose an increase in appropriations; it does not propose an increase in the budget of the United States. The amendment does propose, instead, a public-debt transaction in the self-same manner as the one this agency operated successfully, and at a profit, for 16 years.

Mr. CAPEHART. Mr. President, will the Senator from Tennessee yield further to me?

Mr. GORE. First, Mr. President, I should like to answer the able Senator from Indiana; and then I shall yield further.

The amendment proposes a public-debt transaction to make it possible for the credit of the United States Government to be used to provide a secondary market, if need be, to make effective the guaranties of home loans provided for in the pending bill.

I should like to ask the Senator from Indiana a question: Does he think the United States Senate should pass a bill providing effective insurance, effective guaranties of home-loan mortgages? Or does he think the Senate should pass a farcical bill? Does he think the Senate should proceed to give to the people the impression that it is making it possible for the purchasers of homes to obtain loans at a given rate of interest, when he knows that the loans are being discounted across the land to the extent of 8 percent or 10 percent? Will the Senator from Indiana answer that question?

Mr. CAPEHART. Let me explain what the Senator's amendment does.

Mr. GORE. Will the Senator answer the question I propounded to him?

Mr. CAPEHART. I will explain it.

Mr. GORE. I do not yield for long explanations. I should like to have the Senator answer the question. He asked me a question and I answered it. Now I ask him one.

Mr. CAPEHART. Will the Senator repeat the question?

Mr. GORE. I feel some reasonable capability of explaining the amendment I offered. I do not feel the necessity of yielding for the able senior Senator from Indiana to explain my own amendment. I shall be glad to yield to him if he will answer the question I propounded to him.

Mr. CAPEHART. Very well. The FHA Act was an act whereby the Federal Government, under certain conditions and operating under a certain formula, would guarantee mortgages purchased by third parties. That act went into effect when the RFC was in existence. The Federal National Mortgage Association was organized as a separate corporation, whose purpose likewise was to buy mortgages, and the money was furnished by the old RFC.

In 1950, when the RFC was eliminated, the Federal National Mortgage Association was transferred to an independent agency. The purpose of it was to provide a secondary market for mortgages. However, it was never intended that the Federal Government should buy $3 billion worth of mortgages at par, thereby calling on the Treasury of the United States for $3 billion, and increasing the budget of the United States at the moment by $3 billion. That never was the intention, and it is not the intention today.

Furthermore, the amendment of the Senator from Tennessee goes further, and provides that all FHA and VA mortgages must be purchased at par in order to be insured by the FHA or the VA. The Senator knows that cannot be done.

Mr. GORE. I should like to refer to the Senator's own words of yesterday. The able senior Senator from Indiana himself said, on this floor yesterday, that the FNMA was created to provide a secondary market for United States guaranteed home loans, because, in certain areas of the United States, credit was not available for the purpose. I take it the Senator recalls his statement of yesterday.

Mr. CAPEHART. That is exactly correct.

Mr. GORE. Today we find the situation to be that the area in which United States Government insured or guaranteed loans are not available has greatly expanded—so greatly expanded that, under the program which the Senator is supporting, credit for insured and guaranteed home loans, supported by the United States Government, is not available in any community in the United States, so far as the record shows.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. Not just now. So I come back to the question which I propounded to the Senator: Does he think the United States Senate should give the people the impression that we are providing insurance on home loans, at 5 percent interest, when in fact he knows, and every other Member of the Senate knows, that there is no place in the United States in which such credit is available at par, and he knows, and every other Member of the Senate knows, that the very Government agency itself which was created for the purpose of providing a secondary market is buying these loans at a discount, and the record shows that it has used its power to push the discounts higher?

Mr. LONG and Mr. CAPEHART addressed the Chair.

The PRESIDING OFFICER. Does the Senator yield; and, if so, to whom?

Mr. GORE. I yield first to the Senator from Louisiana.

Mr. LONG. I am very happy the Senator from Tennessee has offered his amendment, because he knows I am in sympathy with what he is trying to accomplish. This is a part of a single issue, which is the outrageous interest rates that are being deliberately imposed on the people of this Nation, under a Republican administration. Efforts are being made to give the impression that Congress can do nothing about it. That being the case, I think we should make a record to show the American people who

is for high interest rates and who is against them.

The same thing is occurring with regard to our national debt. Oh, yes; we are supposed to have an independent agency. It has never been completely independent. It is either friendly to the views of the representatives of the interests of the American people or to the representatives of the interests of bankers and those who are on Wall Street.

We ought to have an opportunity to vote on what we think the rate of interest should be on Government bonds, regardless of what the Federal Reserve Board thinks the rate of interest should be, or what the Secretary of the Treasury thinks the rate of interest should be.

I should like to ask the distinguished Senator from Tennessee if he thinks 4½ percent is enough interest for a veteran to pay for a mortgage on his home.

Mr. GORE. I think it is ample.

Mr. LONG. The fact is that the Government has every opportunity to protect those interest rates. If the bankers do not want to take those mortgages, then FNMA can accept them. Some persons might want to call that getting deeper into debt, but it would run us no deeper into debt than would happen if the Federal Reserve Board, through its open market operations, were to purchase mortgage bonds at par when private bankers did not want to buy them.

So we come to the issue. Sooner or later we may as well get the issue sharpened down to the right legislative pattern, to see who is for high interest rates and who is against high interest rates, which have cost the Nation more than $20 billion in the past 5 years, since the present administration came into power. It is going to cost a lot more than that if the present policy is continued, because the whole thing is snowballing, as the Senator knows.

At the rate the Government is refinancing Government obligations, the cost of government will be increased more than $4 billion a year. I hope the Finance Committee will prepare and submit an appropriate proposal so that we can vote on that issue.

I shall support the amendment offered by the Senator from Tennessee. I should like to go on record as being against the outrageously high rates of interest on veterans' mortgages. Unless we take some action, conditions will become worse.

Even if we cannot have the Senator's amendment agreed to, I think we will have to find some way to slow down the increase in rates of interest. Even if the Senator fails to have his amendment agreed to, he will have achieved something.

Mr. CAPEHART. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I wish to reply to the statement made by the able Senator from Louisiana. First I wish to thank him. I agree with him that the interest rate is part of the overall problem; but, Mr. President, it is a very significant part. It affects the desire of millions of people in the United States to become home owners.

Let us think for a minute how this discount proposition operates. A veteran obtains—as he thinks—a loan to build or purchase a home. He executes a $10,000 mortgage to a lending institution. What does the lender pay for the $10,000 mortgage which the veteran signs, and which his wife signs, and which is secured by his home?

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. Not now. I hope the Senator will be as courteous to me as I was to him.

Mr. CAPEHART. The Senator is——

Mr. GORE. Mr. President, I cannot yield at the moment.

Mr. CAPEHART. The Senator is——

Mr. GORE. I cannot yield at the moment.

The PRESIDING OFFICER. The Senator from Tennessee has the floor.

Mr. GORE. He takes the note signed by himself and his wife, and secured by a mortgage on his home. But, Mr. President, it also bears the guaranty of the United States Government. What does he get? Does he get $10,000? No; he gets the equivalent of $9,000.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. But he has to pay back $10,000, and the interest on it, spread out over a 25-year period.

Is that the kind of effective housing bill the United States Senate wishes to pass?

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. I cannot yield just now. If the Senator will bide his time I will yield.

I agree with the junior Senator from Louisiana [Mr. LONG] that this is a part of an overall problem. It is so serious that it has reduced the veterans' housing program, comparing the first quarter of this year with the first quarter of last year, by 45 percent. It has reduced FHA starts by 34 percent during the same period.

Those engaged in the home-building industry tell me that that industry is going down and down every day. Why? Because there is no credit available.

We are talking about a note secured by a mortgage on an American home, a note insured or guaranteed by the Government of the United States. Is it not a sorry pass to which we have come?

And who must have this great benefit of the discount of from 8 to 10 percent on these home loans?

Mr. CAPEHART. Mr. President, will the Senator yield now?

Mr. GORE. Not just now, please, sir.

Who are the beneficiaries? Who are these poor little bankrupt institutions? First are the insurance companies of the United States, who are enjoying the largest profits in their history. They own $15.4 billion worth of FHA and VA mortgages. But they cannot take any more, Mr. President, even though the mortgages are guaranteed by the United States Government, unless they buy them at a discount.

Who are the next largest holders? The savings banks have $11.9 billion, and the commercial banks have $9.4 billion. If Senators will look at the record, they will see that the members of the Federal Reserve Bank System made a profit last year of more than $1 billion, yet they have no credit available for a loan guaranteed by the United States Government, even though standing with the guaranty of the Government is a mortgage on a home, signed by a husband and a wife.

What do we seek to do? Do we wish to pass an effective home-loan program, or do we wish to foist a farce on the American people?

Mr. CAPEHART. Mr. President, will the Senator yield to me now?

Mr. GORE. I do not yield at the moment I wish to respond to the question which the able Senator propounded, and the question raised by the distinguished Senator from Louisiana. Then I shall afford the Senator an opportunity to propound a question.

Let us consider the monetary situation. Three years ago the present administration, the Eisenhower administration, with the Honorable George W. Humphrey as Secretary of the Treasury, issued $4 billion worth of 3-year bonds, bearing an interest rate of 1⅝ percent. A few days ago those bonds matured. The Treasury of the United States did not wish to have to redeem them in cash, because the cash balance of the United States Treasury was low—and it is lower now. The Treasury offered as a substitute to the bondholders 4-year-and-9-month Treasury notes bearing an interest rate not of 1⅝ percent, but of 3⅝ percent; or, if they did not wish to lend their money to the Government for a period of 4¾ years at 3⅝ percent, they offered to borrow the money for 11 months at 3½ percent. But the holders of 28 percent of those bonds said, "No; we want the cash. We want the cash," which in layman's language means that the "big-money boys" served notice on the United States Government that they would demand still higher interest rates.

Somewhere, somehow, some time, the representatives of the people must call a halt to this disastrous spiral. What are its consequences? I have read to the Senate the figures showing how this policy has brought to a standstill the veterans' home loan program and the FHA program, which has operated so successfully for 20 years. Let me present some additional information.

The rate of bankruptcy is higher now than it has been since the early 1930's. Small businesses have been closing their doors, since January of this year, at approximately twice the rate they closed their doors in 1953.

Of course, the large corporations are making the greatest profits in their history, but I am talking to the Senators about the people they represent. The people we represent wish to become homeowners. The people we represent do not desire mortgage foreclosures and bankruptcy. But those things are being forced upon them by an unwise and fallacious monetary policy.

Yes. I thank my able friend, the Senator from Louisiana [Mr. LONG] for saying that this is but a part of one big problem. But this is the first and most important chance the Senate has had to take a stand on the problem. I assure the Senators that I will join with my

distinguished and able friend, the Senator from Louisiana, in making an issue of this fallacious monetary policy every time the question comes to the floor of the United States Senate.

Take a stand now. When the roll is called—and I am delighted that we shall have a yea and nay vote—let us choose our sides, those who are for the home owners, or those who are for the discount clippers on loans guaranteed by the United States Government.

I propose nothing radical, nothing untried. Let me repeat: for 16 years, from 1938 to 1954 FNMA provided a secondary market at par for home loans guaranteed by the United States Government, and the overall result was a profit to the United States Government; I mean, a profit measured in money. The profit resulting from home ownership was immensely greater. In only 2 of the 16 years did FNMA show a loss, and the losses were very small. The years in which losses were sustained did not occur in the present administration.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. In a moment I will.

The amendment which I propose seeks to do the same thing that was done under the Roosevelt administration and the Truman administration and the first 2 years of the Eisenhower administration—successfully in all. The amendment I propose would provide further that there be a prohibition against discounting loans guaranteed by the United States Government.

We have no power—and we should have no power—to force any private institutions or individuals to lend money. It is their money. We cannot force them to lend it. I would not be in favor of forcing any institution to lend money. But we can provide encouragement; and unless credit is available through private channels, we can provide, as we did for 16 years, a secondary market for home loan mortgages guaranteed by the Government, when there is not sufficient credit available from private local lending institutions .

I now yield to the senior Senator from Indiana.

Mr. CAPEHART. I thank the Senator for yielding to me.

Mr. President, does not the Senator know—I am sure he does not, or he would not have made the statement he made—that under the VA law, the builder of a house cannot pass on to the purchaser anything beyond the price which the VA sets as the selling price of the house? In other words, the discount the Senator is talking about is absorbed by the builder, and not by the purchaser of the house. Does not the Senator know that?

Mr. GORE. I know that there are certain provisions in some State laws about sales taxes——

Mr. CAPEHART. I am talking about Federal law.

Mr. GORE. There are certain provisions of the law with respect to this tax, this fee, or that charge; but I know who pays the bill eventually. It is the customer, the consumer. Either a builder is making an unconscionable or exorbitant profit on a transaction with a veteran, or he is passing on the discount. I am not in favor of either.

Mr. CAPEHART. Mr. President, will the Senator further yield?

Mr. GORE. I yield.

Mr. CAPEHART. The law which the Congress passed prohibits a builder from passing on a discount to the purchaser, and if he is caught charging beyond——

Mr. GORE. Let me respond to that statement.

Mr. CAPEHART. Let me finish my statement.

Mr. GORE. The Senator has already made it.

Mr. CAPEHART. If he sells the house for more than the amount of the VA appraisal, he is subject to prosecution, and can be sent to jail. So all discounts are absorbed by the sellers, not by the buyers. That is the law.

Mr. GORE. The Senator is now complaining that someone is illegally and wrongfully gyping a veteran or an FHA applicant for a home loan. That is happening all over the land. Loans are simply not available at the rates written into the bill pending before the Senate.

Mr. LONG. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG. Either 1 of 2 things must happen. Either the builder must build a home and sell it without a profit, which very few builders want to do——

Mr. GORE. Or at a loss.

Mr. LONG. Or he must find some way to take this 10 percent beating on his mortgage paper. That is obvious.

When someone suggests that the United States Government must lose money to buy these mortgages which the banker does not wish to take at a reasonable rate, I reply that the Government has money available. It has billions of dollars in the national service life insurance fund. It has billions of dollars in the social security fund. A simple act of Congress is all that is necessary to provide for the investment of such funds in mortgages, if the bankers do not see fit to take the mortgages at reasonable rates. So far as the debt transaction is concerned, such action would not put the Government in debt.

Mr. GORE. Does the Senator know of any safer place to invest Government trust funds than in loans secured by the homes of the people of the United States?

Mr. LONG. I do not.

Someone may say that he wants that money put into Government bonds. The fact of the matter is that, so far as bonds are concerned, we should already have started doing what we did for many years in the past, namely, protect the interest rate on Government bonds. Whenever the bankers of America decide that they will not take Government bonds at reasonable rates, the Federal Reserve Board, through its open-market policy, can purchase its own bonds until the bankers are willing to take such bonds at a reasonable interest rate. That was done over a period of many years. We are just beginning to see now the complete wisdom of that previous policy, because we can see what happens when we do not have such a policy.

Mr. GORE. Mr. President, the Senator from Louisiana has said that the United States Government should not place itself at the mercy of a few investment bankers. What the bill under consideration would do, unless it were amended, would be to place the housing program—both the veterans' housing program and the FHA program—at the mercy of a few institutions whose vaults are already loaded with loans guaranteed by the United States Government.

Yes; I agree with the Senator from Louisiana that we should free ourselves from the "mercy" of the big money interests of the country. That is why I have offered my amendment.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. HUMPHREY. In my judgment the speech of the Senator from Tennessee today is a historic turning point in the legislative deliberations of the Senate. The reason I say that is that this is the first time, on a definite issue rather than on a general discussion, that we have had an opportunity to vote on the fiscal and monetary policy of this administration.

Mr. GORE. Happily, we are to have a yea-and-nay vote.

Mr. HUMPHREY. That issue will separate the men from the boys. We are going to find out where Senators stand, and whether or not the Congress of the United States shall coin money and regulate the value thereof.

Mr. GORE. Where did the Senator read that?

Mr. HUMPHREY. That is taken from a document called the Constitution.

Mr. GORE. I seem to remember having read it.

Mr. HUMPHREY. Some people have forgotten it. It will be found in the article relating to the powers of Congress.

At one time the coin of the realm consisted of silver and gold. Subsequently, it included also checking accounts and credit. The power to regulate the value of money today relates to credit and to interest, in terms of modern 20th century monetary policy.

I say to the Senator from Tennessee that the people of America will be indebted to him for years to come, not only for what he has said today, but what he said on this floor, as my colleagues will remember, 4 years ago.

I remember when the Senator from Alabama [Mr. SPARKMAN], the Senator from Tennessee [Mr. GORE], and other Senators debated this issue on a previous occasion. I was privileged to join in that colloquy. I particularly recall the speeches of the two Senators whom I have mentioned, when they joined issue with the Eisenhower administration on debt refinancing.

I stated yesterday, as the distinguished Senator from Tennessee stated 4½ years ago, that the Eisenhower-George Humphrey Republican fiscal montary administration had opened up a Pandora's box of trouble for the American people on the day when they met in Washington with a handful of bankers and decided to raise interest rates on so-called long-term issues of Government securities. I charge that there are fewer long-term issues involved in financing the public debt today than there were 5 years ago.

Furthermore, the Government of the United States is being brought to its knees by "big money," as the Senator from Tennessee points out, when the Government of the United States can no longer sell its own bonds without pleading with the financial interests of the country to buy them.

Mr. GORE. At two whole points of interest higher than 3 years ago.

Mr. HUMPHREY. Furthermore, the record will reveal that for a period of months the Open Market Committee of the Federal Reserve Board, which is responsible for the marketing of Government securities, did not have a full membership, even though the law requires that it have a full membership.

Furthermore, the record will also reveal that there were vacancies on the Federal Reserve Board for many months, even though the law requires that there shall always be a full membership.

I say to the Senator from Tennessee that if nothing more comes from this struggle than a sharpening of the issue, it will have been time well spent. The issues involved is the most fundamental and basic issue in the American economy today. It is the issue that exists between this side of the aisle and the other side of the aisle. That is what it is, Mr. President. The fiscal policy is the fundamental issue in the American political economy today.

I say, furthermore, to the Senator from Tennessee that the leadership he is giving to this fight will earn him the eternal gratitude of children yet unborn, because we are talking about 25-year mortgages, about 30-year paper, and whether or not the Government of the United States is to have something to say about the welfare of the American people, or whether we are going to turn it over, as we did in the twenties and early thirties, to a handful of people.

This is it, Mr. President. I am on the Senator's side. The sooner we vote, the better. I shall stop speaking now. We will check the roll when it is called, and then we will look at the record in the days to come.

Mr. HOLLAND. Will the Senator yield?

Mr. GORE. I shall yield in a moment to the able Senator from Florida. First, I should like to reply briefly to the Senator from Minnesota. The able Senator from Minnesota has been very generous in his remarks, and I appreciate them. He made one remark to which I wish specifically to reply. He very generously said that people will be indebted to the junior Senator from Tennessee for bringing this issue before the Senate. I am more concerned, as I know the Senator from Minnesota is, with the indebtedness of the people to the financial institutions to which they will have to pay money on loans which were discounted, and also to pay interest on the full amount of the note, even though they did not receive full value.

Mr. HUMPHREY. I am sure the Senator will be interested to hear that the President said to a group of congressional GOP leaders today that the administration is preparing legislation to hold future loans by Federal agencies at the interest rates the Government itself pays.

I want all farmers to know that they are going to be "taken," because the administration is preparing legislation to increase REA loan rates. That is on the line now. The administration has denied for years that it was ever going to change the lending rate on REA loans. What does the administration do now? It says, "We have got to pay more for money, so we must raise the interest rate on these loans."

The administration has the cleverest game of any I have ever seen. They purposely raise their own interest rates on Government bonds in order to be able to foist upon the people higher interest rates on Government loans. What a game it is. It just goes round and round, and where it comes out, nobody knows.

Mr. GORE. Mr. President, they seek to make one wrong justify another.

Mr. HUMPHREY. The record will speak for itself. That is what the administration is going to do. The record is there. That is an Associated Press dispatch, which will be published in tomorrow morning's newspapers. I hope every farm family in America will take note of the fact that not only does the interest rate affect housing, not only does it affect small business, and not only does it affect normal farm credit, but it will now get to the REA, the agency which has earned a profit, and in connection with which the farmers are far ahead on their schedule of payments. But even that is not enough. They will have to pay more.

Mr. GORE. Mr. President, I agree with the Senator.

Mr. HOLLAND. Mr. President, will the Senator yield to me?

Mr. GORE. First I should like to respond to the Senator from Minnesota. I have already agreed to yield next to the distinguished junior Senator from Pennsylvania. Then I shall be glad to yield to the distinguished and able senior Senator from Florida.

I agree with the junior Senator from Minnesota that that is the effect it will have on our economy, and that it will affect every element of our economy. The interest rate on intermediate Government obligations has increased 120 percent.

Mr. HUMPHREY. One hundred and twenty-two percent.

Mr. GORE. One hundred and twenty-two percent. I thank the Senator for the correction. At the same time, small business has been closing its doors. The farmer's income has been going down. The cost of living is rising. It has a far-reaching effect. This is the time for Congress to call a halt to unwise policies of the administration. Here is provided tried and tested machinery, an agency which has been established since 1938, with experience in the field and, as I have said, with profitable experience in the field. Let us take this step. I now yield to the Senator from Pennsylvania.

Mr. CLARK. Mr. President, I, too, should like to commend the Senator from Tennessee on the brilliant address he is making in the Senate today. I concur completely in the views expressed by the Senator from Minnesota. This is the first test which has been afforded us to determine whether we will go along indefinitely with the administration's tight money policy.

I should like to call attention to the provision in the 1956 Democratic platform which reads as follows:

> We pledge our party to immediate revival of the basic housing program enacted by the Democratic Congress in 1949, to expansion of this program as our population and resources grow, and to additional legislation to provide housing for middle-income families and aged persons. * * *
>
> We reaffirm the goal expressed by a Democratic Congress in 1949 that every American family is entitled to a "decent home and a suitable living environment."

I point out that there is no similar plank in the Republican Party platform. The Republican Party has indicated time and time again, both on the floor of the Senate and elsewhere, that they have no real interest in the shelter problem of the United States, whether it relates to the average individual or to the more than 1,600,000 people who are getting married every year and have no houses in which to live.

I should like to ask the Senator whether he does not agree with me that so long as the administration continues its feeble housing program and continues to allow sleazy discounts in order to follow its tight-money policy, we cannot achieve the objectives which are set forth in our party platform.

Mr. GORE. Not only will we not get it, but the movement is in the other direction. Earlier today I gave the Senate the figures showing that Veterans' Administration loans were down 45 percent, that FHA loans were down 34 percent. Not only are we moving in the wrong direction, but we are being impelled in that direction by the very housing agency which was created for the purpose of providing a secondary market for Government-guaranteed loans. The hearings before the committee show that FNMA has been putting pressure on the movement of discounts, not down, but up. I say it is a subversion of the very purpose of the FHA. It is subversion of the veterans' home-loan program. Do we want, I ask Senators again, to pass an effective home-loan program or a farce and a subterfuge and to mislead the American people?

Mr. CLARK. Earlier in the debate a statement was made to the effect that the amendment offered by the Senator from Tennessee would increase the Federal budget by $3 billion.

I believe the Senator from Tennessee will agree with me that we have arrived at that state of financial literacy where we can distinguish between money that is paid out for no other purpose than for the paying of salaries or money that goes down the drain by being used for the conduct of the ordinary processes of Government, and, on the other hand, money that is paid back 100 cents on the dollar, with interest.

I should like to ask the Senator from Tennessee whether, during the 16-year period to which he has referred earlier,

in the course of the program he has been discussing, the Government of the United States of America lost 1 cent on this program.

Mr. GORE. It made money. The Government realizes a profit from these operations. In my own limited financial statement, when I show an asset offset by a liability, there is a net. When the Government of the United States invests in a loan secured by American home, the Government acquires an asset, as well as a contingent liability, and based on the Government's experience with HOLC, FHA, VA, and FNMA, the Government has realized a profit. No experience we have had would indicate that this would be a losing proposition. All our experience has been to the contrary.

Mr. President, now I am pleased and honored to yield to my able and distinguished friend, the very eminent senior Senator from Florida; and I apologize to him for being so late in yielding to him.

Mr. HOLLAND. Mr. President, I appreciate the courtesy of my friend from Tennessee. I am sorry I am not able to find myself in accord with the position which he has taken in his characteristic, colorful, and effective fashion. I wish to ask him three questions, if I may.

First, does the distinguished Senator think it is sound fiscal policy for our Government to buy all the private mortgage notes given on homes built under the FHA program, or to obligate itself to do so, 100 cents on the dollar, without taking any such step relative to the something more than $270 billion worth of bonds, the money for which the people have loaned the Government in good faith, and most of which are selling, as the Senator knows, at a discount?

Does the Senator think it is sound governmental policy to give preferred standing to the private mortgage notes given to the FHA by persons who build their homes under the FHA program, to guarantee those notes at 100 cents on the dollar, and to pay for them with Federal money at the rate of 100 cents on the dollar, without giving consideration to similar action in the case of the more than $270 billion in bonds outstanding?

Mr. GORE. I know the able and distinguished Senator, for whom I have such abiding respect, and whose disagreement with me in this regard I learn with disappointment and concern, will permit me to reply to some reasonable extent to the very profound question which he has asked. Then I shall yield for the second question.

I say in all sincerity and with the deepest of conviction that there can be no sounder governmental policy than to sponsor, promote, aid, and abet home ownership in the United States of America.

I know of no sounder fiscal policy than to bring about and to maintain stability in the obligations of the Government of the United States.

How can there be stability, how can there be security, unless stability and security are to be found in the obligations of the Government of our country?

Yes; I think it is sound as Government policy, as social policy, and as fiscal policy.

Let me elaborate on the fiscal aspect. We did not find it necessary for a Government agency to buy and to hold all the home-loan mortgages under previous experience. When there was a refuge, when there was a secondary market, which was attempting to hold the obligations of the United States Government at par, rather than attempting to push them down, we did not find it necessary to do that. I do not believe it would be found necessary to have FNMA own 100 percent of the loans should this amendment become law.

But there are wider implications than that, I say to my able and distinguished friend, and I hope he will reconsider his position in this light. Somewhere, somehow, sometime, let me repeat, the representatives of the people must break the stranglehold that big money has upon our Government. Somewhere, sometime, somehow, we must call a halt to the spiraling interest rate and to the increase in the cost of carrying the national debt. Let me recall to the Senator from Florida that in almost 3 years the interest rate on intermediate term bonds has risen from 1⅝ to 3⅝ percent, and the Government is not able to sell bonds now, even at that rate.

Yes; I think the adoption of this amendment would have a dramatic effect. It would cause the Secretary of the Treasury and perhaps the President of the United States to bethink themselves where present policies are leading the economy of the country, what they are doing to the homemakers, and what they are doing to the young man or woman who wants an opportunity to go into business.

I say in answer to the question, if I may summarize: Yes, I think it is sound Government social policy, I think it is sound Government fiscal policy, I think it is sound Government procedure to support and preserve the integrity of the credit of the United States Government. I think it is sound—socially, financially, and fiscally—to trust the desire, the need, and the love of homes by the people of the United States.

I now yield for the second question.

Mr. HOLLAND. Mr. President, I certainly appreciate the candor of the distinguished Senator from Tennessee. He has answered the question completely by stating, as I understand, that he thinks it is sound fiscal policy to guarantee, at 100 cents on the dollar, the notes of private citizens, protected by mortgages on homes built under the FHA program, and to supply the Federal Government with sufficient funds to redeem its promise whenever it becomes necessary to do so by buying the notes at 100 cents on the dollar.

Mr. GORE. The Senator from Florida realizes, of course, that the amendment would apply only to loans made after the amendment becomes law.

Mr. HOLLAND. I understand. I think the Senator has been very candid, and I appreciate his statement.

My second question is this: How does he think the millions of private citizens and the thousands of financial institutions who hold more than $270 billion worth of Government bonds will feel? Their loans were made in good faith. Many of them were made to enable the Government to meet defense needs. How will those investors feel when the investments of others in the particular field of housing are protected up to 100 cents on the dollar, without any effort at all being made to prevent discounts in their investments in bonds which represent sacred obligations of the United States Government?

Mr. GORE. Will the Senator from Florida let me ask him a clarifying question?

Mr. HOLLAND. Gladly.

Mr. GORE. Is the Senator referring to the outstanding home-loan mortgages or to the outstanding Government obligations in general?

Mr. HOLLAND. I am referring to the something more than $270 billion of outstanding Government bonds. Certainly those bonds were purchased by citizens generally most of whom were trying to come to the aid of their country.

I believe the bonded indebtedness went up from about $20 billion at the beginning of World War II to the total it finally reached largely because of the defense needs. The holders of those securities came to the assistance of their country largely so that we might have adequate defense.

How does the distinguished Senator from Tennessee think that great mass of investing citizens, who have shown their trust and faith in their Government, would feel about being given that kind of treatment—that is, no guaranty of their investment, no upholding of the price of their bonds, but being subjected, instead, to discounts on their bonds every day in all the markets of the whole country, while at the same time the Government gave preferential, complete, 100 percent guaranteed purchase treatment to the notes of every citizen who entered into an FHA building contract from this time forward?

Mr. GORE. The able senior Senator from Florida has one of the most incisive minds of any man it has been my privilege and pleasure to know. Just as his first question went to the meat of the issue, so has his second question.

The Senator will recall, of course, the time at which the first bond issue of this administration reached par—I refer to the $1 billion, 30-year issue, put out at an interest rate of 3¼ percent—after that issue had risen to 12 points above par, it declined and reached par. During this period, the holders of bonds of the United States Government suffered the loss of hundreds of millions of dollars in the market value of their bonds. If we could but restore stability of value to the obligations of the United States Government, the holders of many billions of dollars' worth of United States Government obligations would have restored to them the value rightfully theirs.

I recognize that the Senator from Florida has pointed to the discriminatory effect of providing this stability for one form of Government obligations and not providing it for the others. But such discrimination has already been practiced upon millions of persons who bought the bonds of their Government as a patriotic move during the course of the war.

Furthermore, it is my firm purpose to do everything possible to have the Congress provide stability for all types of obligations of the United States Government. However, in view of the subject matter of the pending bill and the parliamentary rules applying to the procedure of the Senate, it so happens that the pending amendment deals with the only matter of this sort with which the junior Senator from Tennessee can attempt to have the Senate deal at this time, during consideration of the pending bill, in an effort to provide stability for the Government's obligations. Therefore, my amendment deals with stability in the field of guaranteed and insured home-loan mortgages. I wish to deal with that matter now. It is a very important segment, as I know the able Senator from Florida will attest.

Few persons, if any, have contributed more to, or have shown greater interest in, homeownership than has the able senior Senator from Florida. I have had the pleasure of visiting in his State. I know something of the activities in his State and of the building trades there and the persons engaged there in the construction industry and in the real-estate industry, and I know that the economy of his State is involved in homeownership and in the home-construction industry. I know he will attest to the importance of this industry. It is important not only for social reasons, but also because it affects millions of persons who desire to purchase or to build homes. It is also important in terms of dollar amounts, because of the tremendous importance of homeownership and the home-construction industry to our economy.

I believe that the adoption of my amendment would lead to wiping out many of the inequitable discriminations which have been practiced, and would lead to the elimination of such practices in the future.

Mr. HOLLAND. Mr. President, again I appreciate the frankness of the reply the Senator from Tennessee has made.

The third question I should like to ask is as follows: Recognizing the fact that any FHA mortgage notes which are purchased are not obligations of the Government at all; instead, they are obligations of private citizens. The only thing the Government has behind them is a guaranty of their final payment. Therefore, they are not direct obligations of the Government.

Mr. GORE. I wish to agree with the Senator, technically. However, when the Government guarantees or insures, it certainly undertakes to make good upon that guaranty or insurance. But technically I agree with the Senator from Florida.

Mr. HOLLAND. Further recognizing that the Senator from Tennessee now proposes that the Government guarantee 100 percent of the purchase price of the mortgages it guarantees at any time they are offered; but the Senator from Tennessee does not propose any similar course in the case of the $270 billion plus of direct obligations of the United States Government. My reference to $270 billion plus refers to the already outstanding bonds of the Government of the United States. However, let us pass that point, and come to my next question.

The Senator from Tennessee well knows that the only way the Government could make good on a commitment to purchase approximately $3 billion worth of this paper, under the provisions of the amendment of the distinguished junior Senator from Tennessee, would be either by borrowing money—which would mean the issuance of more bonds—or by printing money. I know that the distinguished Senator from Tennessee would never give his consent to having the Government merely print money, in order to meet a situation of this kind.

How does the Senator from Tennessee believe it would be possible to float bonds in the amount of $3 billion or thereabouts, at an interest rate of something less than 5 percent, without any guaranty against discounts in the market, in order to obtain the $3 billion, or less—whatever was required—with which to redeem the notes of individuals under this program, up to the amount of $3 billion? How does the distinguished Senator from Tennessee feel that the Government could possibly engage successfully in an activity of that kind? Who would invest, under those conditions, in Government bonds?

Mr. GORE. Mr. President, to give the able Senator from Florida a very quick reply regarding how it could be done, let me call his attention to the fact that only a few days ago the Government sold approximately $3 billion of bonds at 3⅝ percent interest. I think that is a high interest rate, although it is considerably less than 5 percent. But I warn the able Senator from Florida that unless a halt is called to the spiraling of Government interest, the interest rate on the direct obligations of the United States Government may well reach 5 percent before many more sessions of the United States Senate have passed. I say that because in the past 3 years there has been a 2 point increase in the interest rate on intermediate bonds. Suppose that in the next 3 years there is an increase of another full 2 points? In that case the interest rate would be, not 5 percent, not 3⅝ percent, but 5⅝ percent.

It is this disastrous spiral of interest rates, propelled deliberately by the administration and the forces which control it, to which I wish to call a halt.

Mr. HOLLAND. Mr. President, I desire to thank the Senator from Tennessee. I have practically concluded, except for making the following short statement: With the greatest of respect for the distinguished junior Senator from Tennessee, whose motives I shall always respect, whose objectives I know are always highly patriotic, and whose character is certainly above reproach——

Mr. GORE. I thank the Senator from Florida.

Mr. HOLLAND. Yet I wish to say, with much respect for him, that it seems to me that there could be dreamed up no more inflationary plan than a proposal to have the Federal Government agree to purchase 5-percent notes on private housing at 100 cents on the dollar. It seems to me there would be a practical absence of attractive investment opportunities in any other field, so long as anyone who wished to build a home could be found. It seems to me there could not be designed any program which would bring about a greater inflationary tendency.

It is for that reason that I respectfully and regretfully find myself unable to agree with a conclusion which I know is soundly patriotic.

Mr. GORE. Mr. President, I am very grateful for the generous comments of the distinguished senior Senator from Florida. I have enjoyed listening to his profound interrogation, and in a way I have enjoyed responding to it.

The Senator from Florida says he knows of nothing more inflationary than the use of $3 billion of Government credit to promote home ownership. I can certainly point to one action of our Government which it seems to me is equally inflationary: The Secretary of the Treasury has testified that the United States Government has lost $3 billion in tax revenue as a result of issuing rapid amortization certificates.

Mr. President, I do not respond pointedly or unkindly to my able friend; but why is it that when we discuss the financing of homes at a decent rate of interest, with the loans guaranteed by the United States Government, we hear much talk of inflation, although we did not hear anything said about inflation when a rapid amortization certificate was given to the Idaho Power Co., to help it build the Hells Canyon project?

Mr. LONG. Mr. President, will the Senator from Tennessee yield to me?

Mr. GORE. I shall be glad to yield in a moment, Mr. President.

Furthermore, I would say that my amendment could be no more inflationary, if as inflationary, as the stupendous highway construction program, of which I am very proud, and which my able friend supported enthusiastically.

The spending of Government funds and the extension of Government credit provide a stimulus for the economy. There are areas which do not need a stimulus; there are areas which already are in an inflationary condition. Other areas are not experiencing an inflationary condition; in fact, other areas are experiencing depressed conditions. I refer specifically to the home construction industry.

There may be some inflationary elements in it, but I wonder why we hear the word "inflation" only when we start attacking the high interest rate structure, which is draining the wealth of the country and reconcentrating the wealth of the country. I think that is disastrous.

Mr. TALMADGE and Mr. LONG addressed the Chair.

Mr. GORE. I promised to yield to the distinguished junior Senator from Georgia, if the Senator from Louisiana will permit me.

Mr. TALMADGE. I thank the Senator very much for yielding to me. I want to compliment him for calling attention to an issue which I think is at the very forefront in the thoughts of

a majority of the people of this Nation at the present time. I should like to ask 1 or 2 questions, which may be elementary. I am new in the Senate. Some of these things I do not know much about.

I should like to ask, first, if it is the intention of the Senator that there be a guaranty of all FHA loans and VA loans at par.

Mr. GORE. Before I respond to the question, let me first say if I may, that the able junior Senator from Georgia has provided a fine example of devotion to duty. He has been constant in his attendance on the floor of the Senate. His questions are never elementary; they are incisive and precise. I have enjoyed serving with the able Senator, and I have come to have an exceedingly high respect for his ability and patriotism.

Mr. TALMADGE. I thank the Senator for his generous remarks.

Mr. GORE. I should like to say it is the purpose and intent of the amendment to direct FNMA to provide a secondary market for home-loan mortgages, insured, or guaranteed by the United States Government, at par. That is what that agency did for 16 years, let me repeat, and at a profit.

Mr. TALMADGE. As I understand the purpose of the amendment, if any citizen borrows money from an insurance company, if it is an FHA loan, it will be at 5 percent interest. Is that correct?

Mr. GORE. That is correct.

Mr. TALMADGE. There will be no discount on such a loan?

Mr. GORE. That is true.

Mr. TALMADGE. If the loan is made to a veteran, it will be at 4½ percent interest, and there will not be any discount on the loan. Is that right?

Mr. GORE. That is right.

Mr. TALMADGE. Assuming that insurance company A makes an FHA loan at 5 percent interest, and the insurance company desires to sell the particular piece of paper, does the FNMA then step in and buy it at par?

Mr. GORE. Yes; if no one else does. That is the purpose for which FNMA was created. That is what my amendment provides.

Mr. TALMADGE. Suppose the insurance companies say, "We can do better by not dealing with the Government. We refuse to make these 5 percent or 4½ percent loans." Then what happens?

Mr. GORE. Then the FNMA would be directed to purchase the loans at par.

Mr. TALMADGE. From the private individual?

Mr. GORE. From a local bank, or a building association, or any responsible agency that would process the loan.

Mr. TALMADGE. Would it have to be a lending agency?

Mr. GORE. I believe so.

Mr. TALMADGE. The guaranty would not be direct, but would be secondary. Is that correct?

Mr. GORE. The agency would operate as a secondary market.

Mr. TALMADGE. I thank the Senator.

Mr. GORE. I appreciate the very direct questions of the able Senator from Georgia.

Mr. LONG. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG. Since this inflationary argument was raised, I think it is well that we realize that the cost of interest is one of the elements of the cost of living. It is a strange thing, but it is said by some persons that they want high interest rates because they want to reduce the high cost of living. Interest rates are part of the cost of living.

If anyone does not believe that, let him look at the Federal budget. Look at the Federal Government's cost of doing business. It is the second largest item in the budget. It is bigger than the cost of foreign aid. It is the second largest item, second only to national defense. The first largest cost is national defense. No. 2 is interest. No. 3 is foreign aid. They are the biggest items in the budget.

It is similar with a family. One of the largest items in the cost of living for the average family is housing. What is the largest item in the cost of housing? For a great number of families it is not the cost of labor or lumber or other material; it is interest. For the average workingman, the cost of housing represents 25 percent of his cost of living. When a house is purchased over a long period of time, the cost of the interest charges sometimes exceed the purchase price in principal.

If interest enters so much into the cost of living, why is it being said that the cost of living will be reduced by making home buyers pay more for interest? How is the cost of doing business going to be reduced by raising the interest rates a businessman has to pay? That is a part of the cost of living and doing business. Everybody should be able to understand that.

Furthermore, if anybody is determined to discourage people from expanding their businesses, let me point out that high interest rates will prevent only the small-business man from expanding; it will not prevent the large-business man from doing it. As a matter of fact, some of the large-business men are planning expansions by using the money they are going to make as a result of high-interest rates.

If we really want to fight the rising cost of living and hold it down, interest rates should be controlled, among other things. That was done during the war, under price controls—not directly, but by using the Federal Reserve Board's rediscount powers, through its power over reserves, and through its open-market operations, to hold down interest charges. That is one reason why we managed, at least in some respects, to reduce the cost of Government in fighting the war.

Mr. GORE. There is nothing more inflationary than high interest rates.

Mr. LONG. I thank the Senator for yielding to me.

PROPOSED UNANIMOUS CONSENT AGREEMENT

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. GORE. I yield to the distinguished majority leader.

Mr. JOHNSON of Texas. If I may have the attention of the Senate, I should like to say that I have talked to the distinguished junior Senator from Tennessee and have asked him to be helpful to all Senators by agreeing to a consent request I am about to propose. In order to accommodate the Senate, he has agreed he will go along with the consent request.

If the consent request is agreed to, I am informed that the senior Senator from Ohio [Mr. BRICKER] will offer an amendment which will be satisfactory to the chairman of the Banking and Currency Committee [Mr. FULBRIGHT] and satisfactory to the chairman of the subcommittee [Mr. SPARKMAN]. It is hoped that the amendment can be agreed upon. Then the Senator from Tennessee [Mr. GORE] can reoffer the pending amendment. I assume the minority leader will go along with me in this matter. After that is done, the Senator from Tennessee can reoffer his amendment.

The Bricker amendment, beginning on page 1, line 5 and through line 7, will be offered at this time. As to the other amendments the request will be that they be considered en bloc, with that exception.

The consent request reads as follows:

I ask unanimous consent that the Senator from Tennessee [Mr. GORE] be permitted to withdraw his pending amendment; that the Senator from Ohio [Mr. BRICKER] be then recognized to propose certain amendments printed as letter T; and that permission be given for their consideration en bloc.

The PRESIDING OFFICER (Mr. TALMADGE in the chair). Is there objection to the unanimous-consent request?

Mr. WILLIAMS. Mr. President, reserving the right to object, I think the attention of the Senate should be called to what the pending amendment proposes. It would provide for a $4 billion spending authority, over and above that requested by the budget. Instead of the President having a $72.4 billion budget, if the pending amendment is adopted he would have a $76 billion budget.

The Senate, in the various appropriation bills upon which it has acted, has cut altogether about $450 million. The adoption of the Gore amendment would increase the budget by $4 billion or put back $10 for every dollar the Congress has thus far cut.

There has been a lot said on both sides of the aisle about economy, but this amendment is the most inflationary and most extravagant proposal yet advanced. The time has come to vote, and therefore I object.

Mr. GORE. Mr. President, I am only too happy to cooperate with the distinguished majority and minority leaders. Upon other occasions I have cooperated. I am happy to do so in this case.

If the distinguished senior Senator from Delaware does not persist in his objection, I shall certainly be happy to accommodate the wishes of the majority of the Senate, as expressed by the majority leader and minority leader.

Pending conferences, which I observe to be underway, I should like to reply to the statement of the able senior Senator from Delaware [Mr. WILLIAMS].

The amendment would not have the effect which the Senator has assigned to it. It would not increase the budget. In fact, even if that were true, it would not result in the figures and the amounts to which the Senator has referred.

I invite the attention of the Senate to the fact that the pending bill provides funds for the housing program to the extent of $2.1 billion in FNMA borrowing authority. It provides an amount in excess of that estimated in the budget. Even under the amendment which I understand the distinguished senior Senator from Ohio [Mr. BRICKER] intends to propose, there would be substantial increases in the borrowing authority of FNMA.

What I have proposed, let me repeat, is nothing new and nothing untried. No new seas will be sailed. We will build upon the sound experience of 18 years in the housing program.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. HUMPHREY. Is it not true that what the Senator is proposing is that, rather than to have the Government expend money, the Government would underwrite investments which the history of the program proves have shown a profit.

Mr. GORE. And for every home mortgage purchased the Government will obtain an asset.

Mr. HUMPHREY. The best in the world.

Mr. GORE. An asset, a note signed by a man and his wife, secured by a mortgage on an American home. Where could the Senator find better security?

Mr. HUMPHREY. Mr. President, will the Senator yield further?

Mr. GORE. I yield.

Mr. HUMPHREY. I should like to have the Senator know that his remarks today are not without some previous reference and previous support. I have in my hand an address delivered by Mr. James K. Vardaman, Jr., a member of the Board of Governors of the Federal Reserve System, before the Eighth District Group of the Georgia Bankers Association, October 19, 1955. The address is entitled "Human Trust Certificates."

I have had that address in my office for more than a year—almost a year and a half—because I was deeply impressed by the philosophy of the address and the economics involved.

What the Senator from Tennessee has just stated about the value of the collateral or the mortgage, in the light of those who sign the paper, is underscored by one of the senior members of the Federal Reserve System who, as he says, has been a banker all his life and who, as he says further, has been a conservative banker all his life.

If the Senator will permit, I should like to read from this address, as follows:

> In other words, continued high level employment is largely contingent upon the full use of a sound and steadily expanding system of consumer financing; and the liquidity of consumer credit is heavily contingent upon a sustained high level of employment. Thus, this form of credit, probably more than any other, becomes a social as well as a financial problem.
>
> Housing credit is also a social as well as a financial problem. In recent years home construction has virtually attained a mass production and distribution phase. Today over four-fifths of all homes, both new and existing, are purchased on amortized mortgage credit. Most of you bankers felt as I did about the too liberal terms of the housing program—no downpayments and too-long maturities. However, after thinking the matter through, I am—reluctantly and to my own surprise—not nearly as unreconciled as I once was, and mainly because of its social aspects.
>
> Of course, the combination of downpayment and maturity terms in housing credit can be too liberal and risky for a prudent lender position, just as consumer installment credit can be unsound. But the record shows that even under liberal mortgage terms, defaults have not been excessively large. Our test of the amortized mortgage is only two decades long, but it has proven economically sound, on the whole, to make homes generally available to deserving people on terms much more liberal than were known in the first 140 years of this Republic. The mere fact that people may be able to make only a small downpayment is not of critical importance if the transaction is written on a basis that enables some building up of equity within a time that is reasonable in the light of the occupation, age, and earning circumstances of the borrower, and the serviceability of the housing property.
>
> The compensating social gains of liberal mortgage terms have been enormous. By moving a man into his own home, even though his downpayment has been small, the big gain has been in converting that man and his family from renters, itinerants, or boardinghouse lodgers into a stable unit of population and of the labor force. It has given him an opportunity to become a responsible citizen, a part of his community. He has acquired the pride of ownership and all of it appeals to his better senses. Every monthly payment on his home has tied him to his community and to the stable values of life. In place of the monthly rental payment which he regarded as a penalty, he is now making a monthly deposit to his good living account, an increasing portion of which goes into the property as a form of savings. In other words, he is progressively made into a man of estate, a substantial permanent resident taxpayer.
>
> But the best social and economic effect derived from this permanent residence and homeownership is the influence which it has on the individual's children. Even if the man personally fails to appreciate the potential goodness of his position, it is hardly likely to be missed by the children. Allowed to live in the same community for a series of years, to attend the same schools, to form social contacts and friendships with children of other homeowner citizens, they certainly have a greater social and moral potential than have the children of itinerants.

I am amazed to hear people talking about expanding the budget, as if it were an expenditure for lollipops or for machineguns. This will be an expenditure for families, communities, and economic growth. It will be an investment in the social institutions of the country and is the best collateral which can be found.

I submit that if the life insurance companies find housing mortgages to be good investments and good risks, the Government as a secondary purchaser is in surely as good a position.

Mr. LONG. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG. I should like to invite the attention of the distinguished senior Senator from Delaware [Mr. WILLIAMS] to what I am going to say about economy, Mr. President.

I hope to submit an appropriate resolution sometime during this Congress—and if I do not submit it I am sure that someone else will—in order to give the Senate an opportunity to vote for that which I believe is the greatest potential item where saving can be made in the budget, and that is an item to reduce the interest charges on our national debt. The Senator knows as well as I do that this issue has been raised in the Finance Committee. I was perhaps the first to raise the issue in the Committee on Finance, this year, and that committee is studying the matter.

I heard the Under Secretary of the Treasury testify that at the rate this administration is going, when they get through refinancing the outstanding bond issues, our national debt will cost us $4 billion a year in interest charges more than the cost under rates prevailing in 1952.

I am not speaking about $3 billion just once, but $4 billion every year for additional charges for interest on the national debt. The Senator heard that testimony, just as I did, I am sure.

If we will follow the proposal of the Senator from Tennessee today, and vote for lower interest rates on the veterans' houses, that means the Senate is also going to be of a mood, by majority vote, to vote for those measures necessary to lower the interest charges on our national debt.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. LONG. We will not have to buy these mortgages when we do that. When we bring the interest rates on short-term Government obligations down to about 1½ percent, instead of more than 3 percent, which they are at the present time paying for 3- to 5-year paper.

Then we will have some real economy in Government. I hope the senior Senator from Delaware will support that proposal. I have not seen the senior Senator from Delaware support that type of economy so far, but there is a tremendous saving we can effect. We will not need to have the Federal Government purchase these mortgages, if we bring the general level of interest rates as a whole down, so that the mortgages would be very good investments even for mortgage bankers or building and loan institutions or private insurance companies to buy.

So long as we follow the policy we are following at the present time, where we have an administration deliberately cooperating in the advance of our interest charges, it is necessary to offer amendments such as the Senator from Tennessee is offering today. If we are ever to make progress we have to begin to make a record, to see who is in favor of these high interest charges and who is against them, and to see who is trying to keep

them down and who is trying to keep them up.

The President of the United States appeared on television and said he knows nothing about these high interest charges, that he does not know anything about them. The Secretary of the Treasury and the Under Secretary of the Treasury say they do not know about them, and have no idea what the Federal Reserve Board is doing. We hear, on the one hand, the administration say, "We raised the interest charges, and stopped the increase in the cost of living." But the cost of living goes up 4 percent, and the same witness comes back and tells us, "We do not know anything about why interest rates went up." I think it is time we begin to make a record.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. LONG. I think it is time to begin to make a record as to who wishes to raise the interest rates and who wishes them to come down. This is as good a point as any to start.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. Let me respond very briefly to the statement of the able Senator from Delaware, and then I shall yield. I have the pleasure of serving on the Senate Finance Committee with the Senator from Delaware. If he has before him a copy of the bill, House bill 6659, which is before us, I ask him to turn to page 31. Has the Senator a copy of the bill before him?

Mr. WILLIAMS. Yes; I have it.

Mr. GORE. I ask the Senator to look at page 31, line 14. He will see the figures "$2,100,000,000." That is the borrowing authority in the pending bill.

The Senator from Delaware stated that the amendment which I offered would increase the budget by $4 billion. I point out that neither the figure in the pending bill nor the addition provided by my amendment would increase the budget. The pending bill would increase the borrowing capacity of the various housing agencies up to $2,100,000,000. The amendment which I have offered would increase that limit from $2,100,000,000 to $4,350,000,000.

I point out to the Senator that both the pending bill and the amendment which I offered would increase the borrowing authority and public debt operations of the United States Government for the purpose of promoting an effective housing program.

The difference is that in my opinion, my amendment would provide an effective housing program. It would make available at 4½ percent interest in the case of veterans' loans and 5 percent interest in the case of FHA loans, government-supported, government-insured and guaranteed loans for veterans and homemakers.

The pending bill would not make such a program effective. No such program is effective today. I wish to clear the RECORD in that connection.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. GORE. I should like to conclude my remarks, but I yield to the Senator from Delaware.

Mr. WILLIAMS. The Senator tried to make the argument that his amendment would not increase the budget. That is ridiculous. In the President's budget he recommended that Congress pass a housing bill providing for $1,025,000,000. The bill reported by the committee increased the budget request by $1.8 billion. The Senator's amendment would increase it even further by another $2.2 billion. This means that the bill, as proposed to be amended, would increase the borrowing authority, the spending authority, of the United States Government by $4 billion over the amount requested by the President of the United States, or 4 times as much money as anyone connected with the agency says it needs. The budget would be increased from $72.4 billion to $76 billion. In other words, we would be putting back ten times as much as we have this far cut from the President's budget.

This is the most preposterous proposal that has ever come from the other side of the aisle. I am amazed that the Senator from Tennessee says that so long as we can borrow money and pledge the credit of the United States Government to repay it, we are not increasing the debt. That philosophy would bankrupt any nation.

Mr. GORE. Mr. President, the distinguished Senator from Delaware is partially correct, but only partially correct. The recommendation of the President of the United States would provide an increase in the borrowing capacity of the housing agencies. As the Senator from Delaware has pointed out, the pending bill provides a borrowing capacity larger than that recommended by the President.

The amendment which I propose would increase it still further, for specific purposes and with specific directions.

I would not wish the Senator to infer that I do not believe that loans purchased by the Government, or any agency thereof, should not be included in the fiscal records of the United States Government. However, I say to the Senator that it is a fiscal fallacy to consider in the category of a nonrecoverable expenditure the acquisition of an asset with a value equal to or greater than that of the disbursement.

I am glad that we are to have a yea-and-nay vote on this amendment. We shall determine who wishes to provide effective home-loan insurance, and who does not wish to do so.

Mr. President, I yield the floor.

Mr. BUSH. Mr. President, I agree with the Senator from Delaware. The proposal before us is one of the most amazing, if not preposterous, propositions that has come before the Senate during the time I have been a Member of this body.

If the pending amendment is adopted, it will certainly increase the budget, as proposed by the President of the United States, by something more than $3 billion. I will not haggle over the figure, or dispute as to whether the figure would be $3 billion or $4 billion. My good friend from Delaware may be correct in his figure. However, I know from what I see before me in the pending amendment that the increase would be at least $3 billion, which is much more than enough.

The distinguished Senator from Tennessee says that all he is seeking to do by his amendment is to direct FNMA to do what it was created to do. I was not a Member of the Senate at the time it was created, but I recall that when FNMA was created, it was supposed to provide what is called a secondary market for guaranteed mortgages, not a primary market. The agency was not to become a permanent investor in mortgages. It was to provide a secondary market, so that, if necessary to permit business to be done, it would take in mortgages temporarily and sell them when the market was right. That was the original purpose of FNMA.

From that status, it has developed into a tremendous investor in mortgages. At the present time I believe its holdings of mortgages are $2.5 billion. The Senator from Tennessee would provide, by his amendment, means for increasing that authority by another $3 billion. He says this is not a radical proposal. I submit that it is the most radical proposal that has been made since I first became a Member of the Senate.

The Senator from Tennessee says that all this is being done at a profit to the taxpayers. Of course, a gigantic institution such as the United States Government can make a profit, if it wishes to go into various enterprises. There is no doubt about that. However, I submit that the question of whether FNMA is a profitable operation for the taxpayers of the United States has not yet been decided, and we must wait a good many years before we find out whether, over the years, it has been a profitable operation. Everything has worked in its favor so far. Even today we are operating on the basis of increasing employment in an expanding economy, and mortgages have been good, no matter whether they have been guaranteed by the Government of the United States or not.

I ask whether this is the voice of economy that we have been listening to from across the aisle for the past 2 weeks. It seems to me that this is exactly what some of us said would happen. Instead of trying to cut the budget the proponents of this proposal are trying, at one fell swoop, to wipe out every economy that has been effected to date, and put the budget in the red. If this bill goes through, that is where we shall be.

We will have a process of deficit financing, instead of a budget surplus, and the possibility of a tax cut will be completely out the window. Therefore I think the amendment should be rejected on that ground as well.

The question of interest rates has been raised, and Senators across the aisle have assailed the Federal Reserve Board and the administration on the basis of the present fiscal policy. They are challenging us to meet the issue. I say to my colleagues on both sides of the aisle that I for one will accept the challenge. I shall defend what I believe has been a sound money policy and an honest money policy, and I shall defend the administration of the Federal Reserve

Board, which I believe has been to the advantage to the people of the United States at all levels of life.

I remind my good friends on the other side of the aisle that all the members of the Federal Reserve Board today were appointed by previous administrations, and that not one of them was appointed by the present administration.

I remind them also that the Federal Reserve System was created under a Democratic administration, under the great President Woodrow Wilson, and under the able Secretary of the Treasury, Carter Glass. Instead of cursing it and running it into the ground, they should be proud of it and defending it. It has been a great institution, and it has worked greatly to the benefit of the people of the United States.

So I say that I wish they would submit this issue to the Senate on the basis of a clear-cut vote as to what kind of fiscal policy and what kind of money policy is best for the people of the United States.

I hope that the investigation which is being conducted by the Committee on Finance, under the able chairmanship of the distinguished senior Senator from Virginia [Mr. BYRD] will in some way bring this question forcibly to the attention of the Senate and of the people.

I believe that the investigation will prove that in this inflationary period the Federal Reserve Board has been right in putting some restraints on credit; and that the administration of President Eisenhower is not responsible for what is called a hard-money or a tight-money policy, but that the policy has been one of fighting inflation and keeping the savings of the people of the United States on a sound and honest basis.

It is time that the savers of the Nation had some recognition in this scheme of things. The savers are the people who have been the backbone of our economy. There has been a great deal of talk about the so-called high interest rates. They have not been high at all, if they are measured in terms of history. Instead, they have been relatively low. There must be some satisfaction in the fact that those who have saved their money and have put it into bonds and into mortgages and into savings banks and into pensions and into insurance policies are at last getting some recognition in the form of a fair return on their money.

So I again say, Mr. President, so far as I am concerned—and I think I speak for many Senators on this side of the aisle—that I accept the challenge on the question of the fiscal policy of the country.

Mr. BRICKER. Mr. President, will the Senator yield?

Mr. BUSH. I yield to the Senator from Ohio.

Mr. BRICKER. Is it not true that during the past 4 months savings have been increasing, since the interest rates have gone up?

Mr. BUSH. The Senator is correct.

Mr. BRICKER. They have not caught up with the capital needs of the country, to balance our economy——

Mr. BUSH. The Senator is correct.

Mr. BRICKER. And until they do, there is always the danger of inflation. Is that not correct?

Mr. BUSH. The Senator is correct. It is also true that we are going ahead at almost breakneck speed in the present economy.

Mr. BRICKER. Does the Senator agree with me that we ought to encourage savings as a part of our free economy, rather than discourage them?

Mr. BUSH. Not only do I agree with the Senator, but I say we cannot encourage savings if we have a constant credit inflation which deteriorates the value of the currency.

Mr. BRICKER. Mr. President, will the Senator yield further?

Mr. BUSH. I yield.

Mr. BRICKER. Not only will the amount asked for in the pending amendment be inflationary in itself, but likewise, if we enter upon deficit financing, we will compound the inflationary pressures by about 5 to 1 of the amount of the deficit.

Mr. BUSH. The Senator is absolutely correct. That is one of the more dangerous facets of the amendment before the Senate now.

SEVERAL SENATORS. Vote! Vote!

Mr. CLARK. Mr. President, when we consider the pending amendment of the junior Senator from Tennessee, it is well for us to get back to some first principles.

No one will deny that it is the task of the Government of the United States to keep this country strong enough to discourage attack from potential foreign aggressors, while at the same time it implements a policy at home which will preserve from destruction our democratic way of life.

In the Senate, Mr. President, we may differ as to the appropriate means by which we shall achieve these aims, but, as to the ends themselves, I hazard the guess that every Member of the Senate will be in accord.

Therefore, we go to another principle, on which I believe we can all agree. That is that where private competitive enterprise can accomplish an objective without Government interference, we should give private enterprise every encouragement, seeking only to restrain the development of monopoly.

However, where private enterprise cannot do the job which must be done to preserve our free American way of life, the Government must step in, as it always has.

First we look to local government, next we look to the governments of the several States, and only as a final resort do we inject the Federal Government into the picture.

It may be asked, What has all this to do with the amendment by the distinguished junior Senator from Tennessee [Mr. GORE]? It has just this to do with it:

Back in 1949, under the leadership of two great Democratic Senators, the Senator from Louisiana [Mr. ELLENDER] and the late Senator Wagner of New York, and the eminent Republican Senator, Robert A. Taft, a national housing policy for the United States was determined by the Senate concurred in by the House, and signed into law by the President.

It is wise for us to review the provisions of that housing policy when we consider the amendment offered by the distinguished Senator from Tennessee. The Housing Act of 1949 stated it was the responsibility of the Federal Government to use its appropriate resources to assist in the achievement of a goal of "housing production and related community development sufficient to remedy the serious housing shortage, the elimination of substandard and other inadequate housing through the clearance of slums and blighted areas, and the realization as soon as feasible of the goal of a decent home and a suitable living environment for every American family, thus contributing to the development and redevelopment of communities and to the advancement of the growth, wealth and security of the Nation."

That housing policy is not working today. Why is it not working? It is not working today for a number of reasons, the chief among which is the tight money policy of the administration.

I listened with interest a little while ago to the able and distinguished Senator from Connecticut [Mr. BUSH]. I share his concern with respect to the need for keeping interest rates high in those sectors of our economy where inflationary pressures exist. But I suggest we are using a meat-ax approach to the whole problem of a sound American economy when we deny that it is possible and feasible to impose selective credit controls and therefore make available for vital segments of our economy the credit which is needed to put them back on their feet as the amendment of the Senator from Tennessee proposes to do. The Governor of the Federal Reserve Board, Mr. William McChesney Martin, testified under questioning by me before the Committee on Banking and Currency almost 2 months ago that selective credit controls are possible and feasible.

Mr. LONG. Mr. President, will the Senator yield?

Mr. CLARK. I yield.

Mr. LONG. Senators who favor very high interest rates as an anti-inflationary measure in a housing bill can only have as their purpose the reduction of the number of homes that can be constructed.

Once again we have had the testimony of the administration spokesmen before the Committee of Finance that assuredly not too many homes are being constructed in the Nation, but that there ought to be more. That is why the bill is now before the Senate.

Mr. CLARK. I would not care to impute motives to our friends across the aisle. I do not know what their motives are. But I say that the inevitable result of their action will be to decrease the number of houses which the American people so desperately and so urgently need.

Let me turn for a moment to the question of inflation and ask my friends on the other side of the aisle why it is that they are so much concerned about inflation in the housing field, but show no corresponding concern about inflation in practically any other aspect of our economy.

Let me ask the modern Republicans, if there be any, who support the President of the United States in his present

fiscal policies. Why, if they are so worried about inflation, did they resume the lease-purchase program only a short time ago, after it had been temporarily suspended? They could have maintained that restriction to curb inflation, but those who had the power to do so did not think it necessary.

Why, if they are so worried about inflation, did not their President and the Governor of the Federal Reserve Board propose to Congress standby controls on consumer credit—a law making possible the reestablishment of regulation W?

If our friends across the aisle want to curb inflation, why do they not consider curtailing the purchasing of consumer goods, which is now going on at a rate which is threatening bankruptcy to many American families?

Why, if this administration is so concerned about inflation, has not the Federal Reserve Board used some of its most potent powers to check inflation through its open market operations and its power to restore member bank reserve requirements?

The Senator from Illinois [Mr. DOUGLAS] aptly raised the question last February as to why the Federal Reserve Board had neglected these measures.

If our Republican friends are scared of inflation, why do they not do something about it through these means, instead of saying, "We are not going to make it possible for the American boy and girl who will be married in June of this year to buy a home, because we are going to raise the interest rates so high that they cannot afford it"?

I have listened with interest to the argument made by the Senator from Delaware [Mr. WILLIAMS] as to the effect on the budget of the amendment of the Senator from Tennessee. The United States Government has about the most backward method of keeping books of any governmental unit. It was my privilege for 4 years to serve as mayor of one of America's great cities. If the method used by the city of Philadelphia in keeping its books and in preparing its budget were like that of the Government of the United States, Philadelphia would have gone broke long ago. I do not know of any well governed city in the United States which does not have a capital budget, containing moneys to be invested in permanent improvements, and which does not determine within its capital budget how much it can safely borrow.

I do not know of a city in the United States which does not segregate in its capital budget the self-supporting debt from the general debt which is not self-supporting but must be paid out of the taxpayers' dollars.

In Congress we do not do that. I will agree that the United States Senate has done the best it could to make it possible to revise the budgetary system of our country. If the Senate had a little more cooperation from the other side of the Capitol, maybe it would be possible to do so. Let us not give up hope. Perhaps that day will come sometime. Meanwhile, let us look at the budget with realism. Let us not simply indulge in semantics. Let us not use color words about how we will increase the budget by $3 billion or $4 billion if we agree to the amendment of the respected Senator from Tennessee. Every cent of the money will be paid back. This will be a capital investment, not a current expenditure. It will not put the Government of the United States out of business. And this effort to help build decent homes for the millions of American families will not have an inflationary effect—because it does not come at a time of severe inflationary pressures.

Senators may ask, How do I know that? Because, were it otherwise, the wise financiers in control of the Federal Reserve Board, the responsible persons in the Eisenhower administration in charge of fiscal policies, would have put some controls on inflation in other aspects of the economy.

How about the highway program which Congress passed a couple of years ago? Has anybody suggested that should be cut back? Is not that about as inflationary a program as could be had in the United States?

How about what the Senator from Connecticut [Mr. BUSH] spoke of a few minutes ago? He said if this amendment were agreed to, it would not be possible to have a tax cut. I ask my friends on the other side of the aisle, do they know of a conservative economist who does not think a tax cut is the most inflationary action which could possibly be taken?

Let the amendment be rejected on the merits. Let the amendment be rejected on the question whether we want to repudiate the housing policy of 1949. Let the amendment be defeated on the issue of whether we want to build homes for the American people. But do not let the amendment be defeated because of semantics about inflation, about balancing the budget, and about a lot of things which are brought up now to defeat a measure of social justice, but with respect to which Senators on the other side of the aisle are strangely silent when other matters are involved.

I hope the amendment will be agreed to. Whether it is agreed to or not—and I am realist enough to know it may not be agreed to—I hope every Senator before he casts his vote will make up his own mind that the issue is not inflation, is not budget balancing; the issue is whether the people of the United States, acting through their Congress, are able to deal with a national emergency which affects the strength of our urban and suburban democracy. That is the issue which is raised by the amendment offered by the Senator from Tennessee. I sincerely hope the Senate will adopt the amendment.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. CLARK. I yield.

Mr. HUMPHREY. Is not the Senator saying that what is needed is to place a kind of governmental emphasis upon the use of our resources for a certain particular purpose—in this instance, housing?

Mr. CLARK. That is exactly what I am saying.

Mr. HUMPHREY. A certain amount of capital is available.

Mr. CLARK. That is correct.

Mr. HUMPHREY. At present a large proportion of that capital is going into what is called capital-goods expansion.

Mr. CLARK. A great deal more of it, if I may say so, is going into consumer goods which are not of high priority, and which account for a large part of the very heavy debt among American families.

Mr. HUMPHREY. The Senator is saying that we need to stake out what we call the national priority. In his mind, and in my mind, I am happy to agree, housing occupies a very high position on the agenda of the very important works to be accomplished in the United States.

Mr. CLARK. I agree with the Senator from Minnesota. Perhaps he will recall that that type of selective credit control was in effect during World War II. When there were not enough pieces of pie to go around, the Government decided who should get the pie. That was done successfully in World War II.

I am not one who agrees with the senior Senator from Indiana [Mr. CAPEHART] that if we start to pass this kind of legislation, the next thing we will get will be price controls; the next thing we will get will be another aspect of a regimented economy; and that before we get through, our free enterprise system will be lost.

I say that the Senate and the individuals in charge of this program have enough imagination, enough intelligence, and enough knowhow to be able to impose selective-credit controls on the phases of our economy where inflation may be running riot not where it does not exist.

Let me call to the Senator's attention a couple of facts which I feel certain he will recall. Since the period 1947-49, there has been a 19-percent increase in the cost of living. I am certain the Senator from Minnesota realizes that 31 percent of that total rise came in shelter, including rent.

Since the Eisenhower administration took over at the end of 1952, there has been a 5-percent increase in the cost of living. During that time the cost of shelter rose 13 percent. During the last 4 years, 45 percent of the total rise in the cost of living has been due to the rise in the cost of shelter including rent. In the meantime, the price of food has decreased 1 percent; and the farmers whom the Senator from Minnesota represents with such distinction in the Senate of the United States have seen their total income decrease 23 percent. The cost of apparel has risen only 1 percent, and the cost of transportation has risen 7 percent.

Why, then, I ask, has the price of food decreased? The Senator from Minnesota knows it is because there is plenty of food. Why is the cost of clothing stabilized? I do not have to inform the Senator from Minnesota that it is because there is plenty of clothing. Why has the cost of houses risen? It is because insufficient houses are available to those who can afford them.

So, Mr. President, instead of having an inflationary effect, I say the bill will have a deflationary effect.

The increase in the cost of housing has been greater than the increases

which have occurred in the case of all the other items entering into the cost of living, with one exception, namely, medical care. The cost of medical care has risen more, but the expenditures for medical care constitute a smaller percentage of the average family's budget.

Mr. HUMPHREY. Mr. President, will the Senator from Pennsylvania yield to me?

The PRESIDING OFFICER (Mr. HOLLAND in the chair.) Does the Senator from Pennsylvania yield to the Senator from Minnesota?

Mr. CLARK. I am happy to yield to my friend, the Senator from Minnesota.

Mr. HUMPHREY. Is it not true that the economic theory relating to tight credit, hard money, and high interest rates is that by applying, for example, high interest rates, the use or the borrowing of money supposedly is discouraged. Is not that supposedly the theory?

Mr. CLARK. That is my understanding, although I am not an economist.

Mr. HUMPHREY. But one of the Members of the Senate is a great economist; I refer to the distinguished senior Senator from Illinois [Mr. DOUGLAS].

Mr. CLARK. Yes; I agree.

Mr. HUMPHREY. Is it not true that as interest rates have risen, large corporations have been investing more money or have been scheduling the investment of more money in capital improvements—for instance, in plant expansions—than ever before?

Mr. CLARK. I agree. With the exception of the highway program, the present inflationary pressures exist almost exclusively in the private sector of our economy. It is because our friends across the aisle have so overwhelming an interest in the private sector of our economy that we hear so few protests from them about the continuation of inflation in those areas—whereas when we on this side of the aisle attempt to remedy a situation in which there are no inflationary pressures, in a field which the Government has had to participate because private enterprise could not by itself do the necessary job, we hear for the first time the charge of inflation.

Mr. HUMPHREY. Mr. President, at this point will the Senator from Pennsylvania yield again to me?

Mr. CLARK. I am happy to yield.

Mr. HUMPHREY. I am interested in what the Senator from Pennsylvania has said. I lay no claim to having expert knowledge regarding this matter.

Mr. CLARK. However, we are fortunate in having our coach here, to help us.

Mr. HUMPHREY. Yes; I am happy that he stands by; we refer to the senior Senator from Illinois [Mr. DOUGLAS]. We hope he will correct those of us who are students, whenever we get out of line.

Mr. CLARK. I hope he will.

Mr. HUMPHREY. The classical theory is that prices are governed by the law of supply and demand; that when the supply is low and the demand is high, prices rise; that when the supply is high and the demand is relatively low, or lower than the supply, prices fall. That is the pure theory of the law of supply and demand, is it not?

Mr. CLARK. As I understand it, it works perfectly only when there is chaos; but that is the primary law.

Mr. HUMPHREY. Interestingly enough, that law applies somewhat to agriculture. When there is an abundance of agricultural commodities, or a large supply, even though the demand may be heavy, if the demand is less than the supply, the prices decline.

Mr. CLARK. Despite the earnest efforts to the contrary by the Senator from Minnesota, I agree that that is correct.

Mr. HUMPHREY. I regret to state that the Senator from Pennsylvania is correct.

However, steel prices actually rose during the recession of 1953 and 1954, when the steel plants were operating from 10 to 15 percent below their normal operating capacity.

Mr. CLARK. My understanding is that they are what are called manipulated prices.

Mr. HUMPHREY. I am about to discuss an even more manipulated price. According to my information, iron and steel prices have risen more than 20 percent since the beginning of 1955. In fact, the records of the Department of Labor for the period from January 1955 through October 1, 1957, indicate—with the baseline being 100 in January 1955—that iron and steel wholesale prices have risen more than 20 percent; the prices of petroleum and petroleum products have risen approximately 11½ to 18 percent; and the prices of electrical machinery and equipment have risen approximately 17 percent. I wish to point out that there is no shortage of petroleum and petroleum products. In fact, during the past winter and fall, there were the largest inventories of petroleum products the United States has ever had. In the second place, there is no shortage of electrical machinery and equipment. In the third place, there is little or no shortage of iron and steel, except in certain selected critical items; but in the main there is no shortage.

Furthermore, the price of automobiles has risen—even though anyone with two eyes, even if his vision is only 1 degree above a state of blindness—can see in any city of the United States unsold automobiles in greater numbers than the number of pedestrians. In almost any city one can see block after block of unsold automobiles.

Mr. CLARK. Many of them are standing on the streets because they cannot move through the traffic congestion.

Mr. HUMPHREY. And many of the ones that are on the streets have financing paper attached to them. But there are literally hundreds of thousands of unsold automobiles. Yet the price of automobiles has risen.

How does the administration expect to control inflation by means of higher interest rates, when in the case of item after item the situation is such that the demand is less than the supply, and therefore the price should decline? The administration imposes high interest rates, but the prices still rise.

The truth is that such prices are manipulated prices, and the administration's so-called anti-inflation program of high interest rates does not affect that situation at all.

It is much like feeding aspirin tables to a person who has a parasite in his system. Under those circumstances, that treatment simply will not produce results. One who wishes to get rid of a parasite in his system must use an antibiotic. But the administration says that by raising interest rates, inflation will be curbed.

Mr. President, I am reminded of the fact that years ago it was said by many persons that Ward's liniment would cure practically everything from lumbago to migraine headaches and mending the holes in socks, all the way up to paying the rent. But that remedy simply would not do all that, even though many person seemed to think it would.

I wish to ask what inflation high interest rates have curbed?

Mr. CLARK. I wonder whether the Senator from Minnesota can state why it is inflationary to finance a piece of paper on a house, but not inflationary to finance a piece of paper on an automobile.

Mr. HUMPHREY. I cannot answer that question, except to say it simply depends on the point of view. The point of view among some Members of this body, apparently, and the point of view of the administration is that one must watch out for inflation when a young married couple is going to purchase a house, but there is no need to worry about inflation if another $5 million plant is going to be built.

Mr. CLARK. Or perhaps if many more automobiles are going to be purchased, because the administration seems to take the position that what is good for General Motors is good for the United States.

Mr. HUMPHREY. Frankly, Mr. President, I am not so much concerned about inflation as I am about having the consumers of the United States have sufficient incomes to be able to purchase the goods which our economy can produce.

Mr. President, I desire to conclude by saying that when 13 percent of the population of the United States, namely, the farm population, are separated from the consumers of the United States who have sufficient incomes, and when the 13 percent are put on a second-class economic citizenship standard, there are bound to be some consumer problems, and even some broad economic problems, because the largest market in the world for American goods is among the American people. Yet in the United States we have witnessed a situation in which a large number of the people of the United States are not permitted to enjoy the benefits of its society, on the one hand; and, on the other hand, the only price increase which the present administration has had a real interest in promoting is the price of money.

If the administration would be half as much interested in supporting the price of corn or the price of dairy products or even the price of cotton and the price

of rice as it is in supporting the interest rates, I think I would be a little more charitable in my attitude toward the administration. But the administration gave early notice of a great interest in the prices of bonds and notes, and now the administration is opposed to any efforts to lend assistance to any other part of the economy.

Mr. CLARK. I thank my distinguished friend from Minnesota for the great contribution he has made to the debate.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

Mr. SPARKMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Allott	Fulbright	Morton
Barrett	Goldwater	Mundt
Beall	Gore	Murray
Bennett	Hayden	Neuberger
Bricker	Hickenlooper	Pastore
Bridges	Hill	Potter
Bush	Holland	Purtell
Butler	Hruska	Revercomb
Byrd	Humphrey	Robertson
Capehart	Ives	Russell
Carlson	Jackson	Saltonstall
Carroll	Javits	Schoeppel
Case, N. J.	Johnson, Tex.	Scott
Case, S. Dak.	Johnston, S. C.	Smathers
Church	Kefauver	Smith, Maine
Clark	Kerr	Smith, N. J.
Cooper	Knowland	Sparkman
Cotton	Kuchel	Stennis
Curtis	Lausche	Symington
Dirksen	Long	Talmadge
Douglas	Malone	Thurmond
Dworshak	Martin, Iowa	Thye
Eastland	Martin, Pa.	Watkins
Ellender	McClellan	Williams
Flanders	Monroney	Yarborough
Frear	Morse	Young

The PRESIDING OFFICER. A quorum is present. The question is on agreeing en bloc to the amendments offered by the Senator from Tennessee [Mr. GORE]. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. JOHNSON of Texas. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Nevada [Mr. BIBLE], the Senator from New Mexico [Mr. CHAVEZ], the Senator from North Carolina [Mr. ERVIN], the Senator from Rhode Island [Mr. GREEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MANSFIELD], the Senator from Michigan [Mr. MCNAMARA], the Senator from West Virginia [Mr. NEELY], and the Senator from Wyoming [Mr. O'MAHONEY] are absent on official business.

On this vote, the Senator from Nevada [Mr. BIBLE] is paired with the Senator from West Virginia [Mr. NEELY]. If present and voting, the Senator from Nevada would vote "nay" and the Senator from West Virginia would vote "yea."

The Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from Montana [Mr. MANSFIELD]. If present and voting, the Senator from Massachusetts would vote "nay" and the Senator from Montana would vote "yea."

The Senator from Wyoming [Mr. O'MAHONEY] is paired with the Senator from Michigan [Mr. MCNAMARA]. If present and voting, the Senator from Wyoming would vote "nay" and the Senator from Michigan would vote "yea."

Mr. DIRKSEN. I announce that the Senator from Vermont [Mr. AIKEN] is absent on official business.

The Senator from Indiana [Mr. JENNER], the Senator from North Dakota [Mr. LANGER], and the Senator from Maine [Mr. PAYNE] are absent because of illness.

The Senator from Wisconsin [Mr. WILEY] is detained on official business.

If present and voting, the Senator from Maine [Mr. PAYNE] would vote "nay."

The result was announced—yeas 17, nays 61, as follows:

YEAS—17

Carroll	Johnston, S. C.	Neuberger
Church	Kefauver	Pastore
Clark	Long	Scott
Gore	Monroney	Talmadge
Humphrey	Morse	Yarborough
Jackson	Murray	

NAYS—61

Allott	Flanders	Mundt
Barrett	Frear	Potter
Beall	Fulbright	Purtell
Bennett	Goldwater	Revercomb
Bricker	Hayden	Robertson
Bridges	Hickenlooper	Russell
Bush	Hill	Saltonstall
Butler	Holland	Schoeppel
Byrd	Hruska	Smathers
Capehart	Ives	Smith, Maine
Carlson	Javits	Smith, N. J.
Case, N. J.	Johnson, Tex.	Sparkman
Case, S. Dak.	Kerr	Stennis
Cooper	Knowland	Symington
Cotton	Kuchel	Thurmond
Curtis	Lausche	Thye
Dirksen	Malone	Watkins
Douglas	Martin, Iowa	Williams
Dworshak	Martin, Pa.	Young
Eastland	McClellan	
Ellender	Morton	

NOT VOTING—17

Aiken	Hennings	McNamara
Anderson	Jenner	Neely
Bible	Kennedy	O'Mahoney
Chavez	Langer	Payne
Ervin	Magnuson	Wiley
Green	Mansfield	

So, Mr. GORE's amendments were rejected.

Mr. BRIDGES. Mr. President, I move to reconsider the vote by which the amendments to the committee amendment were rejected.

Mr. KNOWLAND. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California to lay on the table the motion of the Senator from New Hampshire.

The motion to lay on the table was agreed to.

Mr. BRICKER. Mr. President, I send to the desk an amendment to the pending bill, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 28, line 6, it is proposed to strike out "$250,000,000" and insert in lieu thereof "$75,000,000."

On page 31, line 14, strike out "$2,100,000,000" and insert in lieu thereof "$1,700,000,000."

On page 32, line 25, strike out "$350,000,000" and insert in lieu thereof "$200,000,000."

On page 33, line 5, strike out "$35,000,000" and insert in lieu thereof "$20,000,000."

On page 33, line 8, strike out "175,000,000" and insert in lieu thereof "$100,000,000."

On page 33, line 13, strike "$17,500,000" and insert in lieu thereof "$10,000,000."

On page 34, line 23, strike out "1957, 1958, 1959, and 1960" and insert in lieu thereof "1957 and 1958."

On page 42, strike out lines 1 through 7.

On page 45, beginning with line 4, strike out all through line 11 on page 46 and renumber the succeeding section in title IV of the bill accordingly.

On page 51, line 5, strike out "$950,000,000" and insert in lieu thereof "$925,000,000."

On page 54, lines 11 and 12, strike out "$300,000 during either of the fiscal years ending June 30, 1958, and June 30, 1959" and insert in lieu thereof "$200,000 during the fiscal years ending June 30, 1958, and June 30, 1959."

Mr. BRICKER. By way of very brief explanation——

The PRESIDING OFFICER. Does the Senator wish these amendments considered separately, or en bloc?

Mr. BRICKER. I ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. I should like to know whether or not, if the amendments are considered en bloc, any opportunity to amend separate provisions in the group of amendments would subsequently be foreclosed.

The PRESIDING OFFICER. As the Chair understands, the question of the Senator is whether, if these amendments are considered en bloc, there will be subsequent opportunity to make further amendment of the separate provisions in the group of amendments. Is that the Senator's question?

Mr. HUMPHREY. That is correct.

The PRESIDING OFFICER. The Parliamentarian advises the Chair that separate amendments to the several portions of the amendments considered en bloc may be offered before a vote, but not after a vote is taken on the amendments en bloc.

Mr. HUMPHREY. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. As I understand, one of these amendments refers to the urban renewal section of the bill.

The PRESIDING OFFICER. The Chair will ask the Clerk to advise the Senator. It will require a moment or two to determine the answer to that question.

Mr. BRICKER. Mr. President, I may suggest, if the Chair will permit, that it

does apply to urban renewal, and cuts off the last 2 years of the authorization.

The PRESIDING OFFICER. Does the Senator from Minnesota wish further to reserve objection?

Mr. HUMPHREY. I shall not object.

Mr. MORSE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MORSE. I am not sure that I understand the ruling of the Chair.

Suppose these amendments are agreed to en bloc, and then a motion is made to reconsider, and a motion is made to lay that motion on the table, which is the customary procedure. Am I to understand the ruling of the Chair to be that if we wish to amend the sections of the bill to which the amendments refer, we must do so before the first vote is taken?

The PRESIDING OFFICER. As the Chair understands the advice of the Parliamentarian, it is that any amendment to any of the suggested amendments would have to be proposed before the suggested amendment was adopted, and might not be considered thereafter.

Mr. MORSE. I should know the answer to this question, but I do not. The Chair refers to any amendment to the suggested amendments. The Senator from Minnesota raised the question as to whether or not, after one of these amendments was adopted and made a part of the section, that section could thereafter be amended—not the amendment, but the section itself. I should like to know whether, after we write one of these amendments into the bill, a Senator may subsequently offer an amendment to the section which has been amended.

The PRESIDING OFFICER. The Presiding Officer is advised that a Senator may offer, and there may be considered, amendments to sections which are amended by the suggested amendments, but not with respect to the specific portions of the sections which have been amended by the suggested amendments.

Mr. KNOWLAND. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KNOWLAND. The situation would be no different, would it, if the amendments were adopted seriatim? Once a section was amended, the same situation would apply.

The PRESIDING OFFICER. There would be no difference whatsoever. An amendment, once adopted, may not be vacated except by reconsideration.

Mr. MORSE. Mr. President, the time factor is sometimes rather important in the consideration of legislation on the floor of the Senate.

The PRESIDING OFFICER. Any Senator has the right to have the amendments considered separately if he so desires.

Mr. MORSE. That cannot be done once consent is given for the consideration of the amendments en bloc.

The PRESIDING OFFICER. The Senator is correct.

Mr. MORSE. Reserving the right to object—and I am about to object, I think—I am receiving a little advice from my right. [Laughter.]

Mr. KERR. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Oklahoma at this moment for the purpose of propounding a parliamentary inquiry?

Mr. MORSE. It would save time if I did so. I yield.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized. He will state his parliamentary inquiry.

Mr. KERR. Would the situation be any different with reference to any of the amendments being considered en bloc when it came to the question of any such amendment being amended, whether the suggested amendments were voted on and agreed to separately or voted upon and agreed to en bloc?

The PRESIDING OFFICER. There would be no difference.

Mr. MORSE. Mr. President, on advice of counsel I shall not object.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio that the amendments which he has offered be considered en bloc? The Chair hears none, and it is so ordered.

Mr. BRICKER. Mr. President, by way of brief explanation—I wish to delay the Senate no longer than necessary—these amendments, en bloc, would cut from the authorization $1,255,900,000. These cuts, I believe, are the very minimum that we should achieve in this bill. I should like to see much greater reductions, but I have agreed with the chairman of the subcommittee in regard to housing in connection with these amendments as they are submitted.

The program in regard to college housing has been increased $25 million over what the administration asked for. Twenty-five million dollars has been pegged, so to speak, for the purpose of a special college housing program. That would leave $175 million, representing a saving of $25 million.

The administration requested an increase of $350 million in the authority of FNMA to borrow from the Treasury for the purpose of secondary market operations. The bill would increase that amount to $750 million. The amendment would restore the original request of the administration for $350 million or a cut of $400 million.

With regard to FNMA special assistance functions, the administration did not request any additional authorizations for FNMA special assistance for the section 213 cooperative program or the new section 221 program. The bill contains $250 million for each of these programs, or a total of $500 million. My amendments would strike out $150 million of the section 213 program and $175 million of the section 221 program.

With respect to urban renewal, the administration requested $250 million for capital grants under the urban renewal program during the fiscal year 1958.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. BRICKER. I yield.

Mr. CLARK. Would the Senator mind giving us the amounts which would remain in the bill if his amendments should be adopted, both with respect to FNMA and the section 221 program?

Mr. BRICKER. I read those figures a moment ago. $150 million of the section 213 program is eliminated, and $175 million of the section 221 program.

Mr. CLARK. How much is left?

Mr. BRICKER. $100 million for section 213, and $75 million for section 221.

Mr. HUMPHREY. May we have these sections identified?

Mr. BRICKER. Section 213 is cooperative housing.

Mr. HUMPHREY. What is section 221?

Mr. BRICKER. Section 221 is urban renewal.

Mr. CLARK. No; it is moderate income housing.

Mr. SPARKMAN. If the Senator from Ohio will yield, I suggest that there may be some misunderstanding caused by the reference to section 221. It is used in connection with urban renewal, in the sense that it is for the purpose of housing people who have been displaced by reason of governmental action.

Mr. BRICKER. The bill provides $250 million for fiscal 1958, but also $250 million a year for fiscal 1959, 1960, and 1961. My amendment would strike out the authorization for fiscal 1960 and 1961, and thus cut the total for urban renewal by $500 million.

DISASTER HOUSING, URBAN PLANNING FELLOWSHIP, AND FARM RESEARCH

Contrary to the administration's position, the pending bill contains new authorizations of $5 million for disaster housing, $500,000 for urban planning fellowships, and $300,000 a year, for 2 years, for farm housing research.

The amendment would delete the $5 million for disaster housing, and the $500,000 for fellowships, and cut the farm research program by $400,000, or to $200,000, instead of $600,000, which was authorized in the committee bill.

If there are no further questions, that concludes my explanation of the amendment.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. BRICKER. I yield.

Mr. SPARKMAN. I should like to say that we are in agreement, as the Senator from Ohio has stated. That includes the agreement of the chairman of the full committee, the Senator from Arkansas [Mr. FULBRIGHT], the ranking member on the minority side, and the Senator from Indiana [Mr. CAPEHART]. We had the able assistance of our distinguished majority leader. We have gone over these matters very carefully, and we have worked them out and have agreed on this. I hope the amendment as proposed by the Senator from Ohio will be agreed to.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. BRICKER. I yield.

Mr. BYRD. Does the Senator from Ohio have the figure as to what the total cost of the bill will be if his amendments are adopted?

Mr. BRICKER. The total cost in new obligational authority will be $1.6 billion.

Mr. BYRD. What was the budget request?

Mr. BRICKER. The budget request was $1,150,000,000.

Mr. BYRD. Then the Senator would increase the budget request.

Mr. BRICKER. We are increasing it, but we are approaching it——

Mr. BYRD. The Senator would increase it by $500 million. Is that correct?

Mr. BRICKER. By $450 million.

Mr. BYRD. We have saved, up to date, by economies in the Senate, $445 million. If we were to adopt the Senator's amendments, we would wipe out that saving.

Mr. BRICKER. It is not all an expenditure. There is also authorization and guaranties and insurance, and the like.

Mr. BYRD. It would wipe out the economies that have been effected by the Senate so far.

Mr. BRICKER. That would be true if they were all expenditures, which is not the case.

Mr. BYRD. But it wipes out those savings.

Mr. BRICKER. Some of these amounts are in the nature of loans.

Mr. BYRD. But if we adopt the Senator's amendments, we would wipe out all the economies the Senate has effected.

Mr. BRICKER. I cannot agree with that statement, unless we consider authorizations and guaranties as expenditures. I do not believe we can consider them in that light.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. BRICKER. I yield.

Mr. FULBRIGHT. With regard to the last question, I should like to say that only $500 million of the total could be considered as expenditures. The remainder represents investments.

Mr. BRICKER. It is in the nature of guaranties and lending authority.

Mr. FULBRIGHT. Similar to RFC authority which according to the reports of the Treasury have shown a net profit. I am in agreement with the amendments offered by the Senator from Ohio, and I hope the Senate will accept them.

Mr. KNOWLAND. Mr. President, I ask for the yeas and nays on the amendments offered by the Senator from Ohio.

The yeas and nays were ordered.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. BRICKER. I yield.

Mr. CAPEHART. By using the same categories and the same figures, and the same way of figuring that the able Senator from Virginia [Mr. BYRD] used in asking his questions of the Senator from Ohio, the amendment would reduce the Senate committee's bill by $400 million. The House bill—not as reported by the House committee, but as passed by the House—which we will have to contend with in the conference, increases the budget requests by $1,200,000,000. In other words, after this reduction proposed in the Senator's amendment, bringing it down within less than $400 million of the budget requests, we still must go to conference on a House-passed bill which increases the budget by $1,200,000,000. We can get a little idea from that as to what we will be up against in conference with the House. The total in the House bill is $2,475,000,000.

The bill as it came from the Senate committee authorized appropriations of $2,100,000,000. We are reducing it by about $850 million. We get some idea of what we will be up against in conference when we take $850 million from the authorization.

There is only one item of direct expenditure, and that is the $250 million for urban redevelopment. That is a direct expenditure. It is a grant. Everything else in the bill is authorization for FNMA to purchase mortgages. FNMA sells the mortgages or issues debentures. At the present time FNMA holds a little more than $2 billion worth of mortgages. On the other hand, at the moment FNMA owes the Treasury only $25 million, because as fast as they acquire the mortgages they sell them or they sell the debentures.

It is true that under the bill FNMA is authorized to purchase the mortgages, but under the law FNMA immediately offers them for sale to private interests. When FNMA accumulates up to $100 million worth of mortgages, it offers for sale $100 million of debentures, with the mortgages as collateral.

In all fairness to the Senate and in all fairness to Congress, it is not quite fair to say that this is an expenditure.

The direct expenditure is $250 million plus $200,000.

Mr. BYRD. Is it not true that college housing will cost $50 million in cash, and that the Treasury will have to put up $400 million for FNMA? Likewise, the Treasury will have to put up $250 million under section 221.

Mr. CAPEHART. The Senator from Virginia is 100 percent correct. The bill gives the agency the right to borrow from the Treasury to purchase mortgages. But the minute they offer the mortgages for resale, or the minute they sell the debentures, the proceeds from the sales of mortgages and debentures immediately go into the Treasury.

Mr. BYRD. Is not the Senator mistaken about that? The money goes into the fund.

Mr. CAPEHART. No; it is recovered by the Treasury. As I said a moment ago, FNMA has purchased some $2 billion of mortgages and owes the Treasury only $25 million. The able Senator from Virginia is correct.

Mr. BYRD. Money to the extent of $950 million is drawn out of the Treasury.

Mr. CAPEHART. It is, as mortgages are purchased, but as the mortgages are resold; the proceeds from the mortgages go back to the Treasury. As I said a moment ago, they are holding now an accumulated sum of $2 billion of mortgages. Either the mortgages themselves are sold, or units of $100 million debentures are sold to repay the Treasury. So at the moment the FNMA owes the Treasury only $25 million.

If they are unable to sell mortgages to private enterprise, or are unable to sell debentures backed up by the mortgages, it is a fact that the Treasury would be called upon to put up $900 million, and they could carry them indefinitely.

Mr. BRICKER. The Senator is entirely correct in his figures and assumptions. In the urban renewal program, $250 million is exactly what the administration asked for. The only change is that we authorize the program for 2 years, rather than for 1 year and the 4 years which the committee bill carries.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. BRICKER. I yield.

Mr. SPARKMAN. I wish to say a word because, although the figures which have been given are correct, there is one thing that I should like to mention. The President in his budget message recommended an urban renewal program to cost $250 million a year for 2 years. That is exactly what we have agreed to here. So while it is true that when representatives of the Government appeared before the committee they did not ask for that amount although that was the President's recommendation in his budget message.

That would have some effect upon the figures which have been used by the Senator.

Mr. President, I have some figures which relate to the several different programs which have been discussed during the day. I think it would be interesting information for Senators to read. Therefore, I ask unanimous consent that the table be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

HOUSING FUNDS—PRESENT BALANCE AND PROPOSED LEGISLATION

Federal National Mortgage Association

1. Secondary mortgage market operations as of May 1, 1957:	
Authority to borrow	$1,690,557,000
Capital available for purchasing mortgages (common stock and surplus)	169,056,000
Purchasing authority	1,859,613,000
Used to purchase mortgages	1,079,666,000
Money set aside for commitments and deferred purchases	221,025,000
Total	1,300,691,000
Available to make commitment or buy new mortgages	558,922,000
Proposed additional purchasing authority	550,000,000

Purchases averaged about $30 million per week for first quarter, 1957 but have slowed down sharply since first of year. For last 6 weeks they have averaged only $20 million per week. At this rate, available money would last about 7 months (until December 1, 1957).

2. Special assistance funds:	
(a) Presidential allocation:	
Original allocation	[1] $200,000,000
Balance, May 16, 1957	159,000,000
Proposed additional money	150,000,000

[1] An additional $100,000,000 is available subject to Presidential allocation for the 20-percent participation fund. This is to be released under the new legislation.

Rate of spending last 3 months is $5,000,000 per month. The fund has only spent $41 million since the original allocation of $200 million.

(b) Statutory allocation:

(1) Section 213, Cooperative housing:

Total original allocation	$100,000,000
Balance May 16, 1957	9,000,000
Proposed additional money	250,000,000

Rate of spending last 3 months is $10,000,000 per month. ($40 million of the $50 million under Public Law 85-10 was spent in 6 weeks).

(2) Title VIII—Military housing:

Total allocation	$200,000,000
Balance May 16, 1957	119,000
Proposed additional money	200,000,000

Rate of spending last 3 months is $50,000,000 per month. The fund has been practically exhausted since March.

Urban renewal grant fund

Grant program (as of May 1, 1957):	
Total authorization	$1,000,000,000
Subject to Presidential allocation [1]	100,000,000
Available for grants	900,000,000
Reserved or spent:	
In preliminary planning	[2] 413,800,000
In final planning	188,312,000
In execution	264,266,000
Project completed	262,000
Total	866,640,000
Balance available for reservation	33,360,000

[1] This money, subject to Presidential allocation, may be used upon advice of the Council of Economic Advisers that conditions in the economy and building industry are favorable and such use would be in the public interest.

[2] These reservations are made only after the preliminary plans are thoroughly reviewed. It is highly unlikely that any significant part of this will be recovered because of project terminations.

Proposed additional fund, $250 million for each of next 4 years.

During 1956 the rate of depletion of the fund amounted to $270 million.

College housing loans

As of May 1, 1957:	
Authorization	$750,000,000
Loans approved	422,730,000
Funds reserved	197,812,000
Total	620,542,000
Balance	129,458,000
Reserved or approved from May 1 to May 24, 1957	33,458,000
Balance May 24, 1957	96,000,000
Impounded by Budget Bureau	83,000,000
Available for remainder of fiscal year	13,000,000
Pending applications	65,000,000

In 1956, loans were reserved at a rate of $24 million per month. April 1957 was unusual with $45 million approved. Pending legislation adds $200 million loan authority to this program.

OTHER PROGRAMS WITH NO NEW FUNDS BEING REQUESTED THIS YEAR—FEDERAL HOUSING ADMINISTRATION PROGRAM

Contingent liability under this program is about $20 billion. This is the unpaid balance of loans outstanding on which FHA has insurance. A reserve of about $500 million is available to take care of possible future defaults.

The FHA operation has been a profitable one up to the present time. These profits have been enough to pay off initial borrowings from the Treasury and to pay their annual operating expenses and still leave a sizeable profit (over $20 million) remaining to be transferred to FHA insurance funds.

This entire operation has not cost the Federal Government any money.

Public housing program

Total of units under management as of Mar. 1, 1957 (all programs)	428,000
Annual contributions paid by Federal Government in 1956	$81,000,000
Annual contribution per unit	$238

Status of program under Public Law 171—Housing Act of 1949 (as of Mar. 1, 1957)

Total units planned under Public Law 171	810,000
Under management	196,000
Under construction	11,000
Under annual contributions contract, not under construction	92,000
Authorized by Housing Act of 1956	70,000
Total	369,000
Remaining yet to be authorized	441,000

Mr. BRICKER. Mr. President, I yield the floor.

Mr. SPARKMAN. Mr. President, I should like to have the floor for a few minutes in my own right. I believe an excellent job has been done in working out these amendments. It is true that neither side, if we may think of them as sides, got what it would like most to have had. But after all, when there are different viewpoints, if there is to be a meeting of the minds, there must be a spirit of give and take, that is exactly what we have done.

It should be remembered that this program, in the long run, will cost the Federal Government nothing, except for two items which were mentioned, 1 of which is $250 million a year for urban renewal. That is an outright gift to the cities of the Nation, to enable them to clean up the slums. By the way, that money will not be spent for probably 3 or 4 years; it will take that length of time to do the necessary planning in order to get ready for the spending.

The only other items of expenditure is $200,000 to be used by land-grant colleges for the purpose of doing some research work on farm housing. One can write to a land-grant college today and get any kind of plan for housing livestock or building barns, or anything else, except plans for housing for farm families. There has been nothing in the Federal program at any time to provide designs for farm housing adapted to a particular territory, a particular place, or the customs of a particular place. In the bill, a small authorization of $200,000 is made for the purpose of accomplishing this program over a period of 2 years. I do not believe the money could be spent in a wiser way.

Those are the only two expenditures. As to every other part of the program, I predict that the Goverment will lose nothing, but actually will make a profit. I believe this is a good measure. I think the amendment proposed by the Senator from Ohio, as it has been modified, is a good amendment. I hope it will be agreed to.

Mr. CARROLL. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CARROLL. I am interested in the remarks of the Senator from Indiana that the Senate figures are lower by $800 million than the amount as passed by the House. What does the Senator from Alabama have to say about that?

Mr. SPARKMAN. I do not have the exact figures before me, but that amount is approximately correct. Again, it is hard to follow the figures, because, as best I have the information as of now, the House figure is a total of $2,475,000,000, while the Senate figure is $1,195,000,000.

Mr. CARROLL. In what items were the cuts made?

Mr. SPARKMAN. The largest single item is in the allowance to FNMA secondary market operations. In the bill as it is now, the new purchasing power allowed to FNMA is $550 million.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CLARK. I congratulate the Senator from Alabama upon the fine arrangement he has made to get some kind of housing bill at this session of Congress. I shall vote "yea" on the compromise, because, in my judgment, it is the best that those of us who believe in continuing the housing program can get. I shall do so reluctantly, but because I think that if we do not support the amendment, we will not get any housing bill at all.

Mr. SPARKMAN. I appreciate the remarks on the part of the Senator from Pennsylvania. Of course, I agree with him.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. I wish to compliment the Senator from Alabama [Mr. SPARKMAN], the Senator from Arkansas [Mr. FULBRIGHT], the majority leader, the Senator from Texas [Mr. JOHNSON], the Senator from Ohio [Mr. BRICKER], the Senator from Connecticut [Mr. BUSH], and other Senators for their cooperation in working out a compromise on the bill, which I think is an excellent one. I hope that in the conference with the House, it will be possible to work out a practical bill.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. HUMPHREY. I should like to have a little more explanation from the Senator about the urban renewal section, because that means so much to our cities. I have the greatest respect for the Senator from Alabama and for his work, particularly in the field of housing, in which he has been carrying the burden and responsibility for many years with distinction and great credit both to himself and Congress.

I am not certain how I shall vote on the amendment before we have finished

discussing it, because I feel that the committee bill as reported was at best a modest bill, and the amendment makes it, I may say, immodest.

Does the urban renewal amendment proposed by the Senator from Ohio limit for the next 2 years the funds which would be available under the committee bill for the next 2 years?

Mr. SPARKMAN. Not at all.

Mr. HUMPHREY. So there will be the same amount of money, will there not?

Mr. SPARKMAN. Yes; exactly the same amount of money. The 4 years will simply be curtailed to 2 years.

Mr. President, all Members of the Senate recognize the realities of the legislative process. At the time when this matter was before the full committee, it was well known that the House of Representatives had voted that the limit be 1 year. It was easy for the committee to vote that 4 years be set as the limit, in order to allow bargaining room. I believe it is the attitude of the Senate as a whole that the length of time set in the President's budget message—namely, 2 years, with a minimum of $250 million a year—represents the program for which we should work, and that in this case we are seeking to write into the bill, as it is passed by the Senate, provision for what we believe should be the program.

Mr. DOUGLAS. Mr. President, will the Senator from Alabama yield to me?

The PRESIDING OFFICER (Mr. HOLLAND in the chair). Does the Senator from Alabama yield to the Senator from Illinois?

Mr. SPARKMAN. I yield.

Mr. DOUGLAS. Do I correctly understand that the Senator from Alabama is saying that he regards the amendment as a firm mandate to the conferees on the part of the Senate to stand like a rock for $250 million a year for urban renewal for 2 years, and to oppose any concession or any compromise?

Mr. SPARKMAN. So far as I am concerned, I feel that by all means 2 years should be the minimum program provided. It is in accord with the President's original requests as contained in his budget message.

Mr. HUMPHREY. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. HUMPHREY. I heard the Senator speak of the cost involved, in terms of expenditures. The expenditure under the bill will be in the field of urban renewal; is that correct?

Mr. SPARKMAN. Yes; that represents an expenditure. It is not recoverable, although most other moneys in the bill will be repaid.

Mr. HUMPHREY. I wish to say, in behalf of the cities of the United States, that they do not receive payments in lieu of taxes from the Federal Government, on account of the many Federal properties in the cities. When we relate this so-called expenditure to what would be the obligations of the Federal Government if it paid taxes to the communities in the way that other property owners do, I think we find that the amount would not be quite that large. This is an area of interest to me. As one who handled in the Senate the bill for the making of payments in lieu of taxes, I wish to state that I believe this item cannot properly be considered as a gift to the cities.

Mr. SPARKMAN. Of course, it represents a share of the losses sustained when the slums are converted into usable land.

Mr. FULBRIGHT. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. FULBRIGHT. First, I should like to say that for many years the Senator from Alabama has been the chairman of the Housing Subcommittee of the Banking and Currency Committee, and he is the expert on housing, among all the members of the Banking and Currency Committee.

I believe he has done an excellent job in keeping the bill in balance. All of us know that at present we are generally confronted with rather precarious times, in the case of the inflationary pressures, and we must take that situation into account.

Thus far in the debate, considerable emphasis has been placed on what has been given up, in connection with the housing program and the bill. I wish to call the attention of my colleagues to some of the provisions retained in the bill—provisions which are very important.

First, of course, is the provision for urban renewal. It has already been mentioned; and the bill calls for a 2-year program, with $250 million each year which I think makes very good sense.

Of course, if anything radically wrong develops, and if there is a desire to make a change next year, even after the commitment now proposed is made, it will always be possible for a succeeding Congress to make such a change. But I do not expect that that will be necessary.

The provision for college housing is exceedingly important. As all Members of the Senate know, every State is affected by this item. For instance, even the big, rich State of California has, I believe, approximately $14 million of projects now pending under the college housing item. There is in the bill an item of $175 million for college housing loans, of which $25 million is earmarked for student nurses' homes, and interns. But that leaves $150 million for regular college housing. That item is extremely important to every State, and such a provision will be of great help.

Then there is the item of $100 million for cooperative housing, and the item of $75 million for housing for families of moderate incomes; and there is the item of $200 million for military housing—which is absolutely essential. That is the amount the Senator from Indiana, I believe, very properly agreed to, for inclusion in the bill. Originally he proposed $250 million.

Then there is the item of $550 million for secondary market operations of the FNMA.

I believe the Senator from Alabama has done an excellent job, and I am very much pleased to join him in his position regarding the amendment. I hope the Senate will pass the bill with the inclusion of these items.

Mr. SPARKMAN. Mr. President, I appreciate very much the remarks of the Senator from Arkansas.

Mr. JAVITS. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. JAVITS. Mr. President, I, too, like the Senator from Minnesota, believe that the bill is thoroughly in balance, as between the forces of inflation and the social needs involved.

I must say that I believe that if this amendment is studied, it will be seen that it would cause the Senate to send the program down the river.

Mr. President, in my own time I shall make my own argument regarding the matter; but at this time I wish to make a brief statement and to ask a question.

I am deeply disquieted about the willingness to give up so easily the amount proposed for the purchase of mortgages, particularly in view of the conditions existing in the country.

I believe that the Senator from Tennessee and the other Senators who voted with him came rather close to making out a good case for the large increase they proposed. I could not join them in that effort, because I thought the committee had looked into the matter quite carefully, and I thought their amendment would have caused the program to go too far, too fast. However, it seems to me that now we would be going too far, too fast.

Does the Senator from Alabama feel in good conscience that the $350 million increase is all that is needed in order to make a contribution to the correction of the very disastrous situation involved in the present mortgage market, especially as it affects GI's and other proper borrowers; or does the Senator from Alabama believe that, upon consideration of the entire matter, the present proposal is the only way out, and is a compromise which must be made?

Mr. SPARKMAN. Personally, I do not believe the $350 million is sufficient. It might be enough to enable the program to get by.

But the trouble is that when the FNMA reaches the point where the amount of money available to it is low, the psychology of the situation will be to begin something like a run on a bank. As a matter of fact, the administration requested $500 million. I felt that $500 million was rather close to the correct amount.

I may say that one thing which induced those of us on the committee to favor a reduction to $500 million was, first, the fact that this was the administration's request; and, second, the fact that the House of Representatives had already voted for $1,250,000,000; and if it were found that more was needed, there would be ample room in which to negotiate. The same holds true in respect to the problem facing us today.

I have no way of knowing the position the other conferees would take. Of course, the Senate has acted on the $350 million item. Those of us who will be conferees on the part of the Senate will seek the best information and advice we can obtain; and in conference, certainly the two extremes will be represented. Undoubtedly the conferees on the part of the House will hold out for the full amount voted by the House of Representatives, and the conferees on the part of the Senate will hold out for the full amount voted by the Senate. What the final outcome will be, we cannot know at this time.

Mr. JAVITS. Let me say to the very distinguished and very able Senator from Alabama that in the case of the urban renewal item—one which affects New York very considerably—I feel the Senator from Alabama has done as well as we can expect, under all the circumstances. But I believe it involves a backing up on the FNMA, in the case of those who are the owners of homes and those who have a right to aspire to the ownership of homes; and I believe the Senate is not striking a fair balance between the social needs and the requests which have been submitted.

Therefore, Mr. President, under the circumstances, I feel that I shall have to vote against the amendment.

Mr. MORSE obtained the floor.

Mr. BYRD. Mr. President, will the Senator from Oregon yield to me?

Mr. MORSE. I yield.

Mr. BYRD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD my objections to the proposed legislation as it now stands.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BYRD

The President, in his January budget document, requested new appropriations and other expenditure authorizations, including authority to spend out of debt receipts, totaling $73.3 billion.

Within this $73.3 billion, the President's request for housing programs in this bill (H. R. 6659) totaled $1,025,500,000.

This bill would authorize new spending authority for housing programs totaling $2,851,000,000.

Expenditures authorized in this bill exceed the President's budget requests by $1,825,500,000.

In its action on four appropriation bills to date, the Senate has reduced the President's budget requests by $445,768,719.

This bill not only wipes out all of the Senate's savings, but for every dollar cut out of appropriation bills, this bill authorizes expenditure of $4.09.

To date the House of Representatives has reduced 10 appropriation bills by a total of $1,416,050,952. Increases in this bill exceed all of the House appropriation cuts by more than $409 million.

The President requested authorization for direct appropriations for these housing programs of $500,000. This bill doubles the figure. It would authorize $1 million.

The President requested contract authorization of $250 million for fiscal year 1958. This bill authorizes $1 billion over 4 years.

The President requested $775 million in authority to spend from public debt receipts. This bill more than doubles the figure. It would spend $1,850,000,000.

For those who may be unclear as to what "authority to spend from debt receipts" means, the budget document defines it as "authorization to make expenditures from borrowed money."

It might be described as an appropriation of funds to be borrowed by the Treasury, in contrast to an appropriation of funds in the general fund by virtue of ordinary receipts.

When these housing agencies are authorized to spend from debt receipts, it simply means that on their demand, the Treasury must go out and sell bonds and provide the money.

Authorization to spend out of public debt receipts is the most vicious of all appopriation devices. It not only bypasses appropriation control, it piles up Federal debt.

It is a one-shot deal. When this authorization bill is passed, there will never be another look at it by Congress. The Appropriations Committees will never hear of it. There is little that the President and the Budget Bureau can do to control its expenditure. There is nothing the Treasury can do to hold down the increase in the debt it authorizes.

It is time for Congress to assert itself against back-door raids on the Treasury in the form of authorizations to spend from public debt receipts.

When you analyze the spending aspects of this bill, as contrasted with the insuring provisions, you find that:

The President requested $500,000 in appropriation authorization for extension of the voluntary home mortgage program to "facilitate the flow of mortgage funds into remote areas and for minority housing," and the bill extends the program accordingly.

The committee asks for another $500,000 in direct appropriation authorization for urban renewal fellowships and scholarships. The President did not recommend it. If there ever was a nonessential Federal expenditure, that would be one.

That is all of the proposals for direct appropriation authorization.

The President requested 1-year contract authority of $250 million for slum-clearance urban renewal grants. The bill authorizes $1 billion over 4 years.

The remainder is in authority to spend from public-debt receipts.

All of the proposals for Federal National Mortgage Association are in authority to spend from public-debt receipts. This is the agency established to make the Federal housing programs look good. It picks up all the bad paper, so the programs can show "no loss."

Federal National Mortgage Association is two-headed. All of the fine talk about "mutualization" and getting it into private ownership is gone. Now it has a "secondary mortgage operation," and "special assistance functions." The secondary mortgage operation handles the ordinary housing paper, and the special assistance division handles the mortgages no one will take, despite the fact that they are Government supported.

The President requested $350 million in authority to spend from public debt receipts to cover secondary mortgage operations for FNMA. The committee bill would raise the figure to $750 million.

The committee bill authorizes expenditure of $50 million from public debt receipts for investment by Treasury in FNMA capital stock for secondary mortgage operations. This was not included in the President's 1958 budget requests.

Under special-assistance functions, under FNMA, the President requested authority to spend $200 million from the public-debt recepits through the President's special fund. The committee bill reduces this to $150 million.

Under special-assistance functions, FNMA, the President asked authority to spend $50 million from public-debt receipts for cooperative housing, but the committee bill raised the figure to $250 million.

Under special-assistance functions, FNMA, the committee bill authorizes expenditure of $200 million from public-debt receipts for military housing. The President requested nothing.

Unders special-assistance functions, FNMA, the committee bill authorizes expenditure of $250 million from public-debt receipts for urban renewal, etc. (sec. 221, FHA). The President requested nothing.

In summary, for Federal National Mortgage Association, the President requested $600 million in expenditures from public-debt receipts, and the committee bill provides $1,650,000,000, an increased of $1,050,000,000.

These totals are figures involved in the calculation of budget authorization figures for fiscal year 1958, beginning July 1.

They are in addition to $400 million—$50 million for Treasury investment in FNMA capital stock and $350 million in authority for FNMA to spend from debt receipts—passed this year for the Federal National Mortgage Association. This $400 million, while largely available for use in the coming fiscal year, was enacted in the nature of a deficiency of funds for fiscal year 1957, ending June 30, and are charged to appropriations in the current year.

But there is still more authority in the pending bill to spend out of public-debt receipts for Federal housing programs.

The President requested $175 million in expenditures from public-debt receipts for college housing, and the committee bill raises the figure to $200 million.

The President requested contract authority to spend $250 million for capital grants under the slum-clearance and urban-renewal programs, and the committee bill carries the same amount. This would be for fiscal year 1958, but this is not all under this heading.

The committee bill authorizes an additional $750 million for slum-clearance and urban-renewal grants during the period of 1959–61. The President did not request this at this time.

New spending authority in housing bill (H. R. 6659) compared with President's January budget requests

	President's request	Bill (H. R. 6659)	Increase or decrease
Direct appropriations (requires appropriation action by Congress):			
Office of Administrator: Extension of Voluntary Home Mortgage Credit Program (Budget Doc., pp., 321 and 281)	$500,000	$500,000	
Urban renewal: Fellowships and scholarships		500,000	$500,000
Subtotal	500,000	1,000,000	500,000

New spending authority in housing bill (H. R. 6659) compared with President's January budget requests—Continued

	President's request	Bill (H. R. 6659)	Increase or decrease
Contract authority (requires appropriations in future years to liquidate contract authority):			
Urban renewal:			
Capital grants (Budget Document, pp. 322 and 281) for fiscal year 1958	$250,000,000	$250,000,000	
Capital grants for fiscal years 1959–61		750,000,000	$750,000,000
Subtotal	250,000,000	1,000,000,000	750,000,000
Authority to spend from public debt receipts (requires no further action by Congress):			
Federal National Mortgage Association:			
Secondary mortgage operations:			
Investment by Treasury in capital stock, fiscal year 1958 (Budget Document, pp. 321 and 281)		50,000,000	50,000,000
Authority to borrow from Treasury to cover operations, fiscal year 1958 (Budget Document, pp. 321 and 281)	350,000,000	750,000,000	400,000,000
Special assistance functions:			
President's special assistance funds	200,000,000	150,000,000	−50,000,000
Cooperative housing (Budget Document, pp. 321 and 281)	50,000,000	250,000,000	200,000,000
Military housing		200,000,000	200,000,000
Sec. 221, urban renewal, etc.		250,000,000	250,000,000
Subtotal, FNMA	600,000,000	1,650,000,000	1,050,000,000
College housing loans (Budget Document, pp. 287 and 321)	175,000,000	200,000,000	25,000,000
Subtotal	775,000,000	1,850,000,000	1,075,000,000
Grand total	1,025,500,000	2,851,000,000	1,825,500,000

In connection with slum clearance and urban renewal programs, the bill proposes that the Federal Government now absorb three-fourths of the loss in these projects. Previously the Federal Government has absorbed only two-thirds of the loss.

In connection with the college housing programs, the House bill would require that the Treasury take no loss in interest on the loans. The Senate bill eliminates that provision.

To this point, we have been dealing only with programs in this bill which directly contribute to authorizations to spend, expenditures, and the statutory debt.

It should not be overlooked that these programs are only a part of the whole Federal housing picture. There are other billions in contingent liabilities involved in numerous programs under which the Federal Government insures mortgages not only on private housing for individuals trying to buy them, but also commercial housing in the form of multi-unit projects, constructed and operated by huge corporations in the business for profit.

During 23 years between 1933 and June 30, 1956, the Federal Government has used public credit and funds to subsidize domestic housing to a gross total of more than $74 billion.

This public credit and money has been in the form of guaranteed, insured, and direct loans, direct appropriations, appropriations for payments in lieu of taxes, appropriations for purchase of capital stock, etc.

This credit has been made available by direct drafts on the Treasury outside of budgetary control and appropriation procedure, as well as through direct appropriations, and just every other conceivable financing device.

There is already a high degree of loss in money that has gone out through direct appropriations. The loss in insured, guaranteed and direct loans is impossible to estimate. Most of the loans are for long terms ranging up to 40 years.

As usual, this bill liberalizes the insured programs, loosens up on the administration of the programs, and requires less responsibility on the part of those who use and exploit them.

It is remarkable that additional insuring authority is not requested. But there are still unused balances. Federal Housing Administration, on March 31, 1957, had $5.7 billion in unused insuring authority.

Position with respect to FHA insuring authority

[In thousands of dollars]

From budget document, fiscal year 1958, page 311:

	1956 actual	1957 estimate	1958 estimate
Insuring authority:			
Home repair and improvement	$1,750,000	$1,750,000	$1,750,000
Mortgage insurance:			
General	25,517,597	25,783,994	25,783,994
Armed services housing	1,363,500	2,300,000	2,300,000
Total	28,631,097	29,833,994	29,833,994
Charges against authority:			
Home repair and improvement	1,034,825	965,652	1,198,144
Mortgage insurance:			
General	22,808,702	23,656,061	25,453,992
Armed services housing	186,250	921,168	2,070,957
Total	24,029,777	25,542,881	28,723,093
Unused authority:			
Home repair and improvement	715,175	784,348	551,856
Mortgage insurance:			
General	2,708,896	2,127,932	330,002
Armed services housing	1,177,249	1,378,832	229,043
Total	4,601,320	4,291,112	1,110,901

From FHA summary of operations (as of Mar. 31, 1957):

	Total authority	Unused balance
Home repair and improvement	$1,750,000	$715,897
Mortgage insurance:		
General	25,783,994	3,296,271
Armed services housing	2,300,000	1,696,782
Total	29,833,994	5,708,860

With this kind of money and free-wheeling credit, it is no wonder that Federal housing programs attract the scandalous exploitation which characterizes them. The pending bill will make the situation worse.

Summary of public credit and money (gross) which have been made available under Federal housing programs, 1933 to June 30, 1956

[In thousands of dollars]

Program	Authority to make loans, grants, purchase mortgages and insure loans		Authority to expend from public debt receipts			Appropriations		Administrative expenses [1]	Reserves from earnings	Payments to U. S. Treasury (interest, dividends, and capital)
	Total current authority	Cumulated gross total authority used	Total current authority	Gross amount borrowed	Owed to Treasury	Total	Unexpended balance			
Housing and Home Finance Agency:										
Authority to make loans, grants and purchase mortgages:										
Office of the Administrator:

Grand total	37,744,266	[12] 74,173,616	9,455,998	14,003,220	2,738,040	3,777,241	95,681	1,025,059	705,327	541,345

[1] Includes expenditures from appropriated and agency funds.
[2] Lending authority limited by corporate resources, including authority to expend from public debt receipts (col. 3). Generally, authority is equal to expend from public debt receipts.
[3] Cumulative since transfer to HHFA; records while under RFC not available.
[4] Represents allocations or reallocations to PHA and predecessors on basis of best information available.
[5] Authority to expend from public debt receipts has expired.
[6] Figures excluded; Federal home-loan banks now privately owned.
[7] No monetary limitation; loans to prevent default of insured institutions.
[8] Unlimited, except by maximum to which individual loans may be guaranteed.
[9] Amount authorized by Congress for fiscal year 1956. Authority is granted annually.
[10] Not available.
[11] Annual limitation.
[12] Cumulative gross total of loans and grants, mortgages purchased, and loans insured. Excludes repayments.
[13] Interest.
[14] Dividends.
[15] Capital.

I am in receipt of a letter from the Deputy Attorney General of the United States, Mr. William P. Rogers, which says that between October 1956 and April 16, 1957, "approximately 195 persons and firms have been indicted or charged by information with violation of Federal criminal statutes as a result of their operations under the National Housing Act, as amended." He said further that during the same period about 85 persons and firms have been convicted and sentenced after trial or entry of pleas.

With respect to civil cases, Mr. Rogers said the Department of Justice has instituted 15 "windfall" recovery actions, 5 more will be filed in the immediate future, and 14 additional cases are being reviewed for possible litigation.

Not only is litigation arising from previous Federal housing program scandals to be found in courts across the country, but six audit reports by the United States General Accounting Office this year indicate that the elements which breed Federal housing scandals still persist.

These six new audits, in the fiscal year 1957 series, deal with activities in slum clearance and urban renewal offices in New York and Chicago; public housing offices in Fort Worth, Jacksonville and Omaha, and an FHA appraisal office in Richland, Wash.

The pattern follows that which was developed in the fiscal year 1956 series—more weaknesses, deficiencies and loose administration.

For these programs, the Senate today is asked to wipe out all budget reductions it has made to date, and for every dollar previously cut, to put $4.09 in [illegible]'s place.

STATEMENT BY SENATOR HARRY F. BYRD, DEMOCRAT, OF VIRGINIA, CHAIRMAN, JOINT COMMITTEE ON REDUCTION OF FEDERAL EXPENDITURES, IN RE FEDERAL HOUSING PROGRAM LITIGATION, AND AUDITS BY UNITED STATES GENERAL ACCOUNTING OFFICE

Litigation arising from previous Federal housing program scandals continues to be found on the dockets of courts across the country, and six more audit reports by the United States General Accounting Office indicate that the elements which breed Federal housing scandals still persist.

The pending housing bill will make the situation worse.

I am in receipt of a letter from the Deputy Attorney General of the United States, Mr. William P. Rogers, which says that between October 1956 and April 16, 1957 "approximately 195 persons and firms have been indicted or charged by information with violation of the Federal criminal statutes as a result of their operations under the National Housing Act as amended;" "during this time about 85 persons and firms have been convicted and sentenced after trial or entry of pleas;" and "there are a number of these indictments and informations still pending, awaiting arraignment, trial, or sentencing."

Deputy Attorney General Rogers added that "the Civil Division (of the Department of Justice) thus far has instituted 15 "Windfall" recovery actions, 5 more will be filed in the immediate future, and 14 additional cases referred to the Department of Justice by FHA are being reviewed for possible litigation."

This is another of a series of reports forwarded by the Attorney General to the Joint Committee on Reduction of Nonessential Federal Expenditures since its investigations into tax aspects of Federal housing program exploitation set off disclosures of housing scandals in 1953.

These reports show that indictments, informations, and convictions in cases ranging all the way from multi-million-dollar apartment house deals to small home repair fraud, have run into the hundreds.

(A copy of the Deputy Attorney General's letter is attached.)

Six reports by Joseph Campbell, Comptroller General of the United States in the 1957 fiscal year series of audits by the General Accounting Office into Federal housing activities show characteristic deficiency and weakness in their administration continues.

These reports cover audits in slum clearance-urban renewal offices in New York and Chicago, Public Housing Offices in Fort Worth, Jacksonville and Omaha, and an FHA appraisal office in Richland, Wash.

(Abstracts of these audit reports are attached.)

Audits of Federal housing programs are limited largely to the administrative actions in Federal offices. Expenditures for such programs as slum clearance-urban redevelopment are under jurisdiction of local government agencies, although the Federal Government finances two-thirds of the loss. Under the pending bill the Federal Government would take three-fourths of the loss.

Audits last year, in the fiscal year 1956 series, were reported after they were conducted in three FHA insuring offices—New York, Kansas City, and Cleveland. A fourth report was made on audits in 22 slum clearance-urban renewal projects in 15 cities: Summerville, Mass.; Providence, R. I.; Jersey, N. J.; Perth Amboy, N. J.; Chester, Pa.; Norfolk, Va.; Knoxville, Tenn.; Nashville, Tenn.; Birmingham, Ala.; Little Rock, Ark.; Kansas City, St. Louis, St. Paul, Minn.; Detroit, and Cleveland.

All of the 10 reports to date show the same pattern of deficiency and weakness which led me last year to refer the Comptroller General's audits directly to the President.

Federal housing legislation invariably has been loose. The pending bill is no exception. This leads to loose administration. The combination is an open invitation to scandal. In the name of Federal housing, we have developed an augean stable.

Exploitation of these programs is inevitable. They provide public risk for private profit. Taxpayers are the victims. Taxpayers who buy and rent the properties are double victims of Federal housing program exploitation.

LETTER FROM WILLIAM P. ROGERS, DEPUTY ATTORNEY GENERAL OF THE UNITED STATES, TO SEN. HARRY F. BYRD, CHAIRMAN, JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES, DATED APRIL 16, 1957

"In accordance with your request, we wrote you on September 11, 1956 concerning judicial decisions and actions relating to the Federal housing programs and agreed to keep you informed of further important housing cases. Since that time, several cases have been concluded which may be of interest to you.

"In October 1956 Max and Irving Shayne were charged with conspiracy to violate the FHA fraud statute in connection with their activities as home improvement salesmen. On October 8, 1956, after conviction, they were sentenced to 5 years imprisonment. In addition, Max Shayne also received concurrent sentences of 2 years on each of 6 counts alleging violation of section 1010 of title 18, United States Code. All sentences are being served concurrently.

"The Shaynes were among the most active salesmen in the home improvement field on the west coast. The loans forming the basis of the criminal charges against the Shaynes totaled nearly $100,000. They utilized the now well-known confidence ruses of cash

rebates and consolidation of debts, and were responsible, as well, for false invoices.

"Another case, concluded in November of 1956, was that involving Harold J. Volz of Sioux Falls, S. Dak. Volz, a prominent real estate operator in South Dakota, was charged in a 10-count indictment with making false statements in connection with securing insurance on Federal Housing Administration loans. The false statements involved forgery in the application for mortgage insurance and false credit information on some 19 different properties, with a contemplated insured value of over $167,000. Volz entered a plea of guilty to the 10-count indictment and was sentenced to imprisonment of 2 years on each count, the sentences to run concurrently.

"Another case in which a conviction was recently obtained involved a Public Housing Administration project. Pursuant to the United States Housing Act of 1937, as amended, the PHA entered into a contract with the Galveston Housing Authority, Galveston, Tex., whereby the PHA agreed to furnish assistance in the form of loans for the construction of low-rent housing. L. Walter Henslee, manager of the Galveston Housing Authory, was charged in a seven count indictment with unlawfully and knowingly receiving compensation, being rentals collected with intent to defraud the Public Housing Administration and with making and causing to be made false operating statements to the PHA. Henslee was convicted on five counts of the indictment and has appealed his conviction.

"Since October 1956 approximately 195 persons and firms have been indicted or charged by information with violation of the Federal criminal statutes as a result of their operations under the National Housing Act as amended. During this time about 85 persons and firms have been convicted and sentenced after trial or entry of pleas. There are a number of these indictments and informations still pending, awaiting arraignment, trial, or sentencing.

"In regard to the 'windfall' recovery program, the Court of Appeals for the Fourth Circuit in January 1957 ruled that the standard corporate charter for section 608 corporations prohibited payment of dividends out of excess mortgage proceeds. (See *Shirley-Duke Apartments, etc.* v. *Norman P. Mason, et al.*, reported at 240 F. 2d 428.) The appellant has filed a petition for a writ of certiorari.

"The Civil Division thus far has instituted 15 'windfall' recovery actions, 5 more will be filed in the immediate future, and 14 additional cases referred to the Department of Justice by FHA are being reviewed for possible litigation. (An appendix is attached giving more detailed information concerning the status of 'windfall' cases being handled by the Civil Division.) One case has been settled.

APPENDIX

"Windfall" recovery litigation—Civil division

Project	Method of distribution of excess mortgage proceeds	Appropriate amount allegedly distributed	Present status
Ash Corp. et al. (Virginia)	Dividends	$245,000	Complaint filed. Defendants' motion to dismiss set for hearing, August 1957.
Beverly Manor Apartments (Ohio)	do	760,000	Take over action won by Government. Complaint to recover mortgage proceeds, sent to Commissioner of FHA for verification.
Bon Haven Apartments (Virginia).	do	950,000	Pleadings complete. Defendants' motion to dismiss denied. Depositions concluded. Case set for trial, October 1957.
Congress Heights (District of Columbia).	Construction "profit."	1,450,000	Pleadings complete. Depositions taken. Case now on trial calendar.
Farragut Gardens (New York)	Dividends	3,160,000	Suit to take over project tried; no decision yet. Settlement proposal being studied.
Shirley-Duke Apartments: Investors diversified services (Virginia).	Excess financing fee, etc.	1,000,000	Pleadings completed. Depositions concluded. Case awaiting trial.
Linwood Park (New Jersey)	Stock redemption loans.	2,250,000	Do.
Shirley-Duke (Virginia)	Dividends	2,000,000	Government's right to take over corporations because of improper dividend payments sustained by Court of Appeals, 4th Circuit, 240 F. 2d 428. Shirley-Duke seeking review in Supreme Court. Action to recover excess mortgage proceeds at issue. Conference scheduled with Court to set trial date (2 companion cases at issue in District of Columbia and district of Maryland).
Teaneck Gardens (New Jersey).	Stock redemption loans.	25,000	Complaint filed. Case at issue. Awaiting trial.

In addition the following cases are in preliminary stages of litigation:

Project	Method of distribution of excess mortgage proceeds	Approximate amount allegedly distributed
A. B. K. Apartments, Inc., et al. (New York)	Dividends	$675,000
Braddock Gardens, Inc. (New York)	do	255,000
Holliswood Gardens, Inc. (New York)	do	185,000
Kew Terrace (New York)	do	555,000
Kingsway Development, Inc. (New York)	do	230,000
Park Manor Terrace (Arizona)	Stock redemption	90,000
Tri-City Village, Inc., et al. (Indiana)	Land profit, etc.	1,380,000

"For your additional information the Department is prosecuting a number of actions designed to bring to an end improper use of 608 projects for transient rentals. One such case, *Darlington, Inc.* v. *Norman P. Mason* (D. C., S. C.), was decided adversely to the Government, in a district court, but this decision was reversed by the Supreme Court on jurisdictional grounds, and remanded for hearing by a three-judge court. The case of *Norman P. Mason* v. *Essex House* (D. C., Ala.), was tried last fall but the court has not rendered judgment. Another such case, *Mason* v. *Savannah Apartments* (D. C., Ga.), is scheduled for trial April 23, 1957.

"The Government has also instituted an action to enjoin transient rentals by the Woodner located at 3636 16th Street NW., Washington, D. C. This case should be scheduled for trial within the next 2 weeks."

ABSTRACTS OF REPORTS OF AUDITS BY THE UNITED STATES GENERAL ACCOUNTING OFFICE IN SLUM CLEARANCE-URBAN RENEWAL OFFICES IN NEW YORK AND CHICAGO, PUBLIC HOUSING OFFICES IN FORT WORTH, JACKSONVILLE, AND OMAHA, AND THE FHA APPRAISAL OFFICE IN RICHLAND, WASH. (FISCAL YEAR 1957)

(It should be noted that, although reference may be made to some specific projects as examples, these audits are limited largely to administrative practices and procedures of the Federal agency offices involved. It should be noted further that these audits by the GAO are continuing in Federal housing offices all over the country, and those completed to date represent only part of the whole situation.)

Slum clearance-urban renewal

New York regional office, Office of Administrator, Housing and Home Finance Agency

In a letter to Administrator Albert M. Cole, Housing and Home Finance Agency, March 7, 1957, Joseph M. Campbell, Comptroller General of the United States said:

"Our review of the New York Regional Office was directed to the administration of urban renewal operations in New York City, and disclosed certain weaknesses and deficiencies in the land acquisition, land disposition, and relocation phases."

(Comptroller General Campbell's letter noted that the "audit work in the regional office was completed in January 1956," and that "Comments by the regional office and replies to our requests for information remained outstanding through July 1956.")

The Comptroller General, among "other findings," specified "examples" of "weaknesses and deficiencies" as follows:

1. "Interest costs were unnecessarily increased," and New York streets, New York-Bellevue, Washington Square, and Morningside projects were cited as cases in point.

2. "Local public agency requirements regarding employment of appraisers were not complied with."

3. "Land purchases, $331,000 in excess of previously approved prices, were retroactively approved by the Urban Rewal Administration," and the Morningside project was cited as the case in point.

4. "Option negotiation fees of $46,225 were paid where the budgeted fee was $10,000," and the Morningside project was cited as the case in point.

5. "Estimated costs of legal services were substantially overstated in project budgets," and the Morningside project was cited as a case in point.

6. "Allowances to project sponsors for the cost of relocating site families are about twice the actual cost," and the New York University-Bellevue project was cited as a case in point.

7. "Relocation practices need strengthening," and the Morningside, Fort Greene, Pratt Institute, Washington Square, Harlem, and West Park (Manhattantown) projects were cited as cases in point.

8. "Vacated structures were rerented to offsite tenants," and the New York University-Bellevue project was cited as a case in point.

9. "The Urban Renewal Administration failed to require another re-use appraisal although material changes were made in the bases on which the original re-use appraisal was made," and the New York University-Bellevue project was cited as a case in point.

10. "A structurally sound apartment building acquired at a cost of $340,415 was demolished," and the New York University-Bellevue project was cited as a case in point.

11. "Inadequate method used in determining condition of existing structures," and

the New York University-Bellevue project was cited as a case in point.

12. "Need for improved budgetary control over contingencies," and the New York University-Bellevue project was cited as a case in point.

Chicago Regional Office, Office of Administrator, Housing and Home Finance Agency

In a letter to Administrator Albert M. Cole, Housing and Home Finance Agency, March 14, 1957, Joseph Campbell, Comptroller General of the United States said:

"Our review of the Chicago Regional Office was directed to the administration of urban renewal operations in Chicago and disclosed certain weaknesses and deficiencies in land acquisition and relocation phases."

(Comptroller General Campbell's letter to Administrator Cole noted that the audit was for fiscal year ending June 30, 1955, and that "in most cases, our findings were presented to the Chicago regional administrator for his comments during the audit; and in addition, on December 28, 1956, a draft of our proposed report was submitted to you and to the acting urban renewal commissioner, Mr. Richard L. Steiner, for review and comment;" and that "we have considered the comments contained in Mr. Steiner's reply of February 7, 1957.")

As examples of his findings, the Comptroller General specified "weaknesses and deficiencies" as follows:

1. "A determination of project eligibility was not based on current data," and the Chicago West Central Industrial District, and the Duluth, Minn., St. Croix redevelopment projects were cited as cases in point.

2. "The local public body failed to establish a positive slum-prevention program and to report code violations," and the Michael Reese Hospital and the area 6A projects in Chicago were cited as cases in point.

3. "The local public agency's relocation efforts were inadequate," and the Michael Reese Hospital project was cited as a case in point.

4. "The local public agency and the Urban Renewal Administration failed to set maximum appraisal fees and the Urban Renewal Administration's reviews of appraisal costs were inadequate," and the Michael Reese Hospital and the Hyde Park A projects were cited as cases in point.

5. "Failure to conform urban renewal project files with filing procedures"; the Comptroller General said the 1956 audit of the Chicago regional office is still in progress, and the audit shows that some deficiencies in the office's urban renewal files still exist.

Public Housing Administration

Fort Worth, Tex., Regional Office, Public Housing Administration, Housing and Home Finance Agency

In a letter to Commission Charles E. Slusser, Public Housing Administration, March 12, 1957, Joseph Campbell, Comptroller General of the United States, said the GAO report on the Fort Worth regional office (PHA) was based on a "selective review of development, management, and disposition operations" for fiscal year 1955; that "deficiencies noted" had been discussed with the regional director during the review; that a draft of the proposed report had been submitted to the PHA Commissioner and the HHFA Administrator on November 15, 1956; and that the reply from PHA Commissioner Slusser of December 19, 1956, was considered in the final report.

Comptroller General Campbell said further that while "generally" the Fort Worth regional office "was conducting its operations in accordance with applicable legislation and PHA's prescribed policies and procedures," * * * "deficiencies noted" included:

1. "Instances where excessive professional fees were paid," and Denver, Colo., Housing Authority project Colo. 1–12 and a Galveston, Tex., Housing Authority contract were cited as cases in point.

2. "Failure of PHA to assure itself that appraisers' qualifications have been reviewed," and Galveston Housing Authority project 17–6, and Denver, Colo., Housing Authority project 1–12 were cited as cases in point.

3. "Noncompliance by local housing authorities with PHA requirements for awarding equipment and construction contracts," and the Galveston Housing Authority project 9–11 and the Knox City, Tex., Housing Authority project 124–1 were cited as cases in point.

Housing Authority of Jacksonville, Fla., Public Housing Administration, Housing and Home Finance Agency

In a letter to Commissioner Charles E. Slusser, Public Housing Administration, May 16, 1957, Joseph Campbell, Comptroller General of the United States said the GAO report on the Housing Authority of Jacksonville, Florida, was based on "review of selected phases of the low-rent housing operations;" that "deficiencies" had been discussed with the executive director at Jacksonville; that a draft of the proposed report had been submitted to the PHA Commissioner and the HHFA Administrator on March 1, 1957; and that the reply from Commissioner Slusser of April 2, 1957 had been considered in the final report.

Comptroller General Campbell said further that while "generally the Housing Authority of Jacksonville was conducting the low-rent housing program in accordance with the agreements with the Public Housing Administration," * * * "deficiencies noted" included:

1. "An annual deficit of $12,000 which results from rental of low-rent units to relief tenants at less than operating costs," and Jacksonville projects 1–1A and 1–1 were cited as cases in point.

2. "Loss of income to the authority because of failure to invest excess funds," and Jacksonville projects 1–3, 1–4, and 1–6 were cited as cases in point.

3. "Deficiencies in the authority's procurement practices."

4. "Mileage payments in excess of authorized rate per mile," and payments by the authority ranging from 10½ cents to 73 cents a mile were reported.

The report also raised questions as to collision insurance overage on old motor vehicles, and costly telephone equipment.

Housing Authority of the City of Omaha, Public Housing Administration, Housing and Home Finance Agency

In a letter to Commissioner Charles E. Slusser, Public Housing Administration, November 14, 1956, Joseph Campbell, Comptroller General of the United States said the GAO report on the Housing Authority of the City of Omaha was based on audit of "selected phases of the low-rent housing operations;" that "deficiencies disclosed by the audit" were discussed with the Executive Director of the Omaha Authority; that a draft of the proposed report was submitted to the PHA Commissioner and the HHFA Administrator on September 12, 1956; and that the reply from Commissioner Slusser of October 12, 1956, had been considered in the final report.

Comptroller General Campbell said further that while "generally the Housing Authority of the City of Omaha was conducting the low-rent housing program in accordance with PHA agreements," * * * "deficiencies disclosed by our audit" included:

1. "Budget items not supported by detailed cost records," and lack of control records, such as maintenance work orders, was cited as a matter in point.

2. "Failure to invest excess moneys," and availability of "112,000 for investment in 1955 was cited as a matter in point.

3. "Legal expenses incurred in excess of prescribed limitation," and a 4-year contract with an attorney at $4,200 a year, when the limit was $2,528, was cited as a case in point.

4. "Retirement and social security tax payments for inelegible employee," and the case of the attorney under contract was cited and a situation in point.

5. "Deficiencies in procurement practices," and a high percentage of the number of contracts and purchases examined were cited as cases in point.

6. "Weaknesses in physical inventory procedure," and lack of an independent check of accuracy of the initial physical inventory count was cited as a situation in point.

7. "Failure to document within-classification salary increases," and changes in employees' salaries for grade increases within the same compensation schedule are made by the bookkeeper upon oral or written direction of the executive director were cited as a practice in point.

8. "Failure to audit Commissioners' travel vouchers," and lack of evidence that travel vouchers by Commissioners who attended meetings of the National Association of Housing and Redevelopment Officials in Toledo and Cleveland was cited as a situation in point.

9. "Duplication in maintenance of leave records," and two sets of leave records, one by a bookkeeper and the other by the secretary of the executive director, were cited as a matter in point.

Federal Housing Administration

Richland, Wash., Appraisal Office, Federal Housing Administration, Housing and Home Finance Agency

The community of Richland, Wash., was constructed by the Federal Government for the Hanford Atomic Works employees. In 1947 administration and control of Richland were transferred from the Manhattan Engineering District to Atomic Energy Commission. The Atomic Energy Community Act of 1955 provided for sale of Government-owned properties in Richland to private purchasers.

To establish the basis for sale prices the 1955 act directed that "The appraisals shall be made by the Federal Housing Commissioner or his designee," and * * * the appraised value shall be the current fair market value of the Government's interest in the property."

FHA engaged six contract appraisers in 1955 and 1956 for this purpose, and the value was determined to be about $8.5 million.

The commercial land in Richland is Government owned and is leased to individuals and business concerns. In some cases the Government also owns and leases commercial buildings. In other cases commercial buildings are owned privately. The Government-owned land and buildings are being sold subject to existing leases. The leases were a factor in determining appraised values.

The fact that lease provisions were not standardized has raised many problems in determining consistent values.

FHA appraisers developed certain background data, including commercial land values, for use by the contract appraisers who individually collected additional data. Each contract appraiser prepared a report which contained his conclusions of value for the properties he appraised.

In a letter to Commissioner Normal P. Mason, Federal Housing Administration, May 20, 1957, Joseph Campbell, Comptroller General of the United States said the GAO review of the Richland, Wash., Appraisal Office, FHA, regarding appraisal of commercial properties in Richland "disclosed inconsistencies in several parts of the appraisal and several errors of fact."

(Comptroller General Campbell's letter noted that the principal findings of the report were discussed generally with various FHA officials during the examination and at its conclusion; that a draft of the proposed report was submitted to the FHA Commis-

sioner and the HHFA Administrator on March 8, 1957; and that Commissioner Mason's reply of April 8, 1957 had been considered in the final report.)

The Comptroller General, among the "inconsistencies and errors" found, specified "examples" as follows:

1. "Market data developed by FHA appraisers indicate a capitalization rate of 6¾ percent; a 7 percent rate was used."

2. "One contract appraiser used gross rents rather than net rents to determine lease-contract values in the uptown shopping center."

3. "The methods used by the several appraisers in determining rentals for use in valuing lease contracts and properties were not uniform."

4. "The cost conversion factors used in determining the Government's reversionary interest in leasehold improvements might warrant adjustment."

5. Numerous errors were made in 2 of 3 neighborhood commercial property appraisals reviewed.

FISCAL YEAR 1956 REPORTS

These six reports on audits of Federal housing offices and programs by the United States General Accounting Office, follow four previous reports made in fiscal year 1956.

Those last year were on audits conducted in the FHA insuring offices in New York, Kansas City, and Cleveland, and a fourth report dealing with deficiencies found in 22 slum clearance-urban renewal projects in 15 cities: Kansas City; St. Paul; Somerville, Mass.; St. Louis; Detroit; Chester, Pa.; Norfolk, Va.; Perth Amboy, N. J.; Cleveland; Birmingham, Ala.; Knoxville, Tenn.; Jersey City, N. J.; Little Rock, Ark.; Providence, R. I.; and Nashville, Tenn.

The General Accounting Office is continuing these audits on Federal housing agencies, offices, activities, and programs. More reports are to be forthcoming shortly.

Mr. MORSE. Mr. President, this will be an exceedingly short speech. I shall speak at greater length this evening on another phase of the bill, and on another problem, but I want to explain why I shall vote against the so-called compromise amendment.

I share the views just expressed by the Senator from New York [Mr. JAVITS]. Yesterday I made a speech on the housing bill in which I explained my great disappointment in the bill. I desire to say that all this amendment does, in my opinion, is make a bad bill worse, because I think it further weakens the first line of defense of American security and the American system, namely, private home ownership.

In my opinion, we do not serve the best interests of the American people by accepting a compromise such as this. I think it would be better to have no bill at all and take the issue to the American people than to accept what I consider to be a very weak bill, and what the chairman of the subcommittee himself has called a holding bill, because his speech of yesterday was full, really, of his own expressions of disappointment in his own bill.

I think, Mr. President, certainly those of us who feel that private home ownership ought to be strengthened by an adequate housing bill cannot accept such a compromise as this, which makes the bill even less acceptable than it was when it came to the floor of the Senate.

For the reasons I expressed yesterday on the floor of the Senate, and with this explanation, I want to say I shall vote against this compromise.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc proposed by the Senator from Ohio [Mr. BRICKER]. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. JOHNSON of Texas. I announce that the Senator from Nevada [Mr. BIBLE], the Senator from North Carolina [Mr. ERVIN], the Senator from Rhode Island [Mr. GREEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Ohio [Mr. LAUSCHE], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MANSFIELD], the Senator from Michigan [Mr. MCNAMARA], the Senator from West Virginia [Mr. NEELY], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Virginia [Mr. ROBERTSON] are absent on official business.

On this vote, the Senator from Nevada [Mr. BIBLE] is paired with the Senator from West Virginia [Mr. NEELY]. If present and voting, the Senator from Nevada would vote "yea" and the Senator from West Viriginia would vote "nay."

The Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from Michigan [Mr. MCNAMARA]. If present and voting, the Senator from Massachusetts would vote "yea" and the Senator from Michigan would vote "nay."

I further announce, if present and voting, the Senator from Montana [Mr. MANSFIELD], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Virginia [Mr. ROBERTSON] would each vote "yea."

Mr. DIRKSEN. I announce that the Senator from Vermont [Mr. AIKEN] is absent on official business.

The Senator from Indiana [Mr. JENNER], the Senator from North Dakota [Mr. LANGER], and the Senator [Mr. PAYNE] are absent because of illness.

The Senator from Wisconsin [Mr. WILEY] is detained on official business.

If present and voting, the Senator from Maine [Mr. PAYNE] would vote "yea."

The result was announced—yeas 67, nays 11, as follows:

YEAS—67

Allott	Eastland	Mundt
Anderson	Ellender	Potter
Barrett	Flanders	Purtell
Beall	Frear	Revercomb
Bennett	Fulbright	Russell
Bricker	Goldwater	Saltonstall
Bridges	Hayden	Schoeppel
Bush	Hickenlooper	Scott
Butler	Hill	Smathers
Byrd	Holland	Smith, Maine
Capehart	Hruska	Smith, N. J.
Carlson	Johnson, Tex.	Sparkman
Case, N. J.	Johnston, S. C.	Stennis
Case, S. Dak.	Kefauver	Symington
Chavez	Kerr	Talmadge
Church	Knowland	Thurmond
Clark	Kuchel	Thye
Cooper	Malone	Watkins
Cotton	Martin, Iowa	Williams
Curtis	Martin, Pa.	Yarborough
Dirksen	McClellan	Young
Douglas	Monroney	
Dworshak	Morton	

NAYS—11

Carroll	Jackson	Murray
Gore	Javits	Neuberger
Humphrey	Long	Pastore
Ives	Morse	

NOT VOTING—17

Aiken	Kennedy	Neely
Bible	Langer	O'Mahoney
Ervin	Lausche	Payne
Green	Magnuson	Robertson
Hennings	Mansfield	Wiley
Jenner	McNamara	

So the amendments of Mr. BRICKER were agreed to en bloc.

Mr. BRIDGES. Mr. President, I move to reconsider the vote by which the Bricker amendments to the committee amendment were agreed to.

Mr. KNOWLAND. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California to lay on the table the motion of the Senator from New Hampshire to reconsider.

The motion to lay on the table was agreed to.

Mr. HUMPHREY. Mr. President, I send to the desk an amendment, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 54, after line 20, it is proposed to insert a new section as follows:

DISCOUNT CONTROL

SEC. 605. With respect to housing built or sold with assistance provided under the National Housing Act, or title III of the Servicemen's Readjustment Act of 1944, the Federal Housing Commissioner and the Administrator of Veterans' Affairs, respectively, are specifically authorized and directed to issue such regulations, applicable uniformly to all classes of mortgagees, as they determine desirable for the purpose of limiting the charges and fees imposed upon the builder or seller, or the veteran or other purchaser, in connection with the financing of the construction or sale of such housing, whether or not such charges were or are imposed in connection with the financing assisted by the Federal Government, and no loan shall be insured or guaranteed under such acts unless the mortgagee certifies that it has not imposed upon the builder or seller, or the veteran or other purchaser, any charges or fees in connection with the financing of the construction or sale of such housing in excess of the charges or fees permitted under such regulations for such purposes as are applicable to the housing involved.

Mr. HUMPHREY. Mr. President, I should like to have order and the attention of my colleagues.

The PRESIDING OFFICER (Mr. FREAR in the chair). The Senate will be in order.

Mr. HUMPHREY. Mr. President, I recognize the hour is very late, and undoubtedly we are going to vote on the bill tonight and complete action on it.

This amendment is proposed at a time when we have already disposed of the question of additional funds for FNMA. This amendment is not involved in the amount of money which is available for the secondary mortgage market. It is to be considered entirely on its own merits and not related at all to the borrowing authority of the Federal Housing Administration.

The amendment I propose is substantially what the subcommittee had agreed to, and it is substantially, Mr. President, what was once before in the housing law, I believe in the Housing Act of 1951. All the amendment proposes is to take into account the fact that discounting practices are prevalent. It directs the Administrator of Veterans' Affairs and the Federal Housing Commissioner to lay down such rules and regulations as they deem necessary and feasible to control the practice of discounting.

I wish to be very candid. The amendment does not say "prohibit." It does permit the Administrators to prohibit, but it leaves it within the discretion of the Administrator of Veterans' Affairs and the Federal Housing Commissioner to prescribe the rules and regulations which may be feasible and workable.

The argument has been made in the Senate, with some persuasive force, obviously, that if we expressly prohibit by law we may dry up the mortgage market or the availability of credit. Therefore, Mr. President, the purpose of the amendment, its objective, is to direct the Federal Housing Commissioner and the Administrator of Veterans' Affairs to issue regulations, as they determine desirable, applicable uniformly to all classes of mortgages, for the purpose of limiting the charges and fees imposed upon the builder, the seller, the veteran or other purchaser in connection with the financing of, the construction of, or the sale of such housing.

I feel this amendment is needed, Mr. President. There is not a Senator who is happy about the discounting practices. There are Senators who feel that discounting to some degree must take place if money is to be made available or credit is to be made available. There are those of us who disagree with that point of view. Be that as it may, that matter has been settled, in a sense, by the Gore amendment, and settled again by the Bricker amendment.

The purpose of the amendment I propose is to take cognizance of a practice which I believe has gotten out of hand, and to direct the responsible authorities who are in command of all the information as to the mortgage market and the housing need to apply the rules and regulations which will limit the fees and charges to be imposed upon a builder, seller, veteran or other purchaser of shelter or housing.

Mr. SPARKMAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Alabama?

Mr. HUMPHREY. I yield to the Senator from Alabama.

Mr. SPARKMAN. Mr. President, I should particularly like to have the attention of the Senator from Indiana [Mr. CAPEHART] while I mention this point.

As the Senator knows, in the bill which the subcommittee agreed to, probably the identical language was included. The full committee omitted the language, as I explained the other day, because of the fact that such a provision was already in the House bill and the matter would be in conference.

For my part, I am in thorough sympathy with an effort to curb the discounting practice, in a practicable manner. So far as I am concerned, I should be very glad personally if we could agree to take this amendment to conference. It does not bind us.

As a matter of fact, I am rather of the opinion that the Federal Housing Commissioner has the power to do now just what this amendment would give him the power to do. But the amendment might serve as a prod to him.

If the Senator from Indiana would be receptive to the idea, I should be very glad to suggest that we take the amendment to conference.

Mr. CAPEHART. Mr. President, the House bill contains some language similar to that of the amendment. The general impression of everyone I have talked to—administrators of the Housing Act, builders, mortgage dealers, and others—is that this proposal is not practical and will not work. It sounds good. I wish to remain openminded on the subject, but I should like to say that I believe the Members of the Senate, and especially those who will be conferees, ought to leave this matter open and study it, and get more information from those who are better qualified to give it, possibly, because of their familiarity with the administration of this program. If in the meantime it can be proved that the language of the House provision or the language of the amendment is workable, we can easily accept the amendment, or the similar provision of the House bill, because the subject will be in conference, in view of the fact that the House has such a provision in its version of the bill.

Regardless of what Senators may think the sale of a mortgage is like the sale of anything else. Prices move up and down. If they do not, there is a controlled situation.

I do not quite understand what kind of regulations the Administrator could write which would help the situation, because unless we permit the sale of the mortgages on a basis which allows the price to go up and down, they will not be sold. When we begin imposing such restrictions as this on those who buy the mortgages, we shall not be able to sell them.

The greatest problem today is the sale of mortgages, and not the sale of houses. It is not even the downpayment. It is the sale of the mortgage. If we are going to put mortgages in a strait jacket, without flexibility, we may defeat the objective we have in mind.

I wish the able Senator from Minnesota would withdraw his amendment. I am in sympathy with the idea, but I do not believe we ought to adopt his amendment, because if we do we shall have to come out of conference with some sort of discount control, and I am not sure that that would be in the best interest of the people generally, or of those affected by the housing industry. If the able Senator will leave it up to the Senate conferees, inasmuch as the House has certain language in its version of the bill dealing with the subject, we shall see whether or not it is practicable to draft some provision which will serve the desired purpose. If we accept the pending amendment, we shall have to come out of conference with some kind of discount control.

Mr. HUMPHREY. That is correct.

Mr. CAPEHART. We might be in a very bad situation. I know what the able Senator from Minnesota is thinking about. I congratulate him for thinking about it, and for offering the amendment. However, I believe it would be in the best interest of all concerned if he were to withdraw the amendment.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. JOHNSON of Texas. I wish to ask two questions. First, as I understand the amendment, it would vest discretionary authority in the Federal Housing Administrator and the Administrator of Veterans' Affairs as to the regulations which would be issued.

Mr. HUMPHREY. It would authorize and direct them to issue regulations. The regulations would be entirely within their discretion, and they could be altered as the Administrators might deem necessary.

Mr. JOHNSON of Texas. I assume the Senator has sufficient confidence in the Federal Housing Administrator and the Administrator of Veterans' Affairs to trust them with a matter of this kind.

Mr. HUMPHREY. I do.

Mr. JOHNSON of Texas. I should like to ask a second question. Is the language of this amendment identical with or similar to the language of the House provision? I ask that question of the chairman of the subcommittee.

Mr. SPARKMAN. No. It is far different from the language in the House version of the bill. I think this language is preferable, in the absence of our ability to evolve some plan which is foolproof, because this language would impose upon the Administrators the task of trying to draft satisfactory regulations. It would not, of itself, establish a control.

Mr. HUMPHREY. It would not.

Mr. SPARKMAN. My understanding is that the language of the House would, in effect, establish a control.

Mr. HUMPHREY. Furthermore, the language of the House would not apply to GI housing.

Mr. SPARKMAN. That is correct.

Mr. HUMPHREY. One of the areas of housing construction which is taking a very bad beating in connection with discounts is GI housing.

Mr. President, I urge my colleagues to give this amendment thoughtful consideration. It would place the Senate on record with the housing authorities—both the Administrator of Veterans' Affairs and the Administrator of the Federal Housing Administration.

It would serve notice on those officials that we look with considerable concern on the practice of discounting, and that we order and direct the Administrators to prepare regulations which will limit such charges in accordance with their best judgment, so as to keep available mortgage money for the borrowers, and at the same time protect the legitimate rights of those attempting to buy houses.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. BUSH. How would the pending amendment affect the present situation? As I understand, the present legislation leaves the agencies with discretion to buy mortgages at whatever seems to them to be the proper market price. Is that correct?

Mr. HUMPHREY. The present law leaves it within the discretion of the Administrator to act or not to act, with respect to regulations. My amendment would direct the Administrator to prepare such regulations and rules as he might find to be necessary to do the job of limiting charges. It would not necessarily prohibit discounting, but it would establish the bounds within which discounting could take place. That would be one of the rules.

Mr. BUSH. At the present time there are no regulations or restrictions on the agency respecting what may be done in the way of a discount in the sale of a mortgage.

Mr. HUMPHREY. That is my understanding.

Mr. BUSH. It seems to be the hope of the Senator that, if the amendments were adopted, the Administrator would establish limits upon the discounts which might be paid.

Mr. HUMPHREY. That is correct.

Mr. BUSH. On that basis, I certainly oppose it.

Mr. JOHNSON of Texas. Mr. President, if there is a prospect of this amendment being acted on without extended discussion I hope it may be adopted and taken to conference. It offers some hope. If it were taken to conference, I do not think we would be bound to adopt the language of the amendment. As I read the amendment, the Federal Housing Administrator and the Administrator of Veterans' Affairs must specifically determine when such regulations are desirable for the purpose of limiting charges.

Mr. HUMPHREY. That is correct.

Mr. JOHNSON of Texas. If they do not determine that such regulations are desirable, they will not be issued. I have sufficient confidence in their judgment to vest that authority in them. I hope the amendment can be taken to conference, and that we may have a standing vote at this time, if that is agreeable. I do not wish to keep the Senate in session too long, because I have agreements with Senators who desire to address the Senate on other subjects.

Mr. HUMPHREY. I understand.

Mr. JOHNSON of Texas. A number of Senators have engagements for which they are already very late. So if it is agreeable to the Senator from Minnesota and the Senator from Indiana, I hope we may have a vote.

Mr. CAPEHART. Mr. President, I have before me the House language on the subject. It mentions a mortgage credit study.

Mr. HUMPHREY. That is correct.

Mr. CAPEHART. If the Senator from Minnesota will modify his amendment so as to direct the administrators to study the problem, I shall have no objection to a study. I would not object to a study by either the House or the Senate. However, the Senator's amendment does not require any study.

Mr. HUMPHREY. Mr. President, I say most respectfully to the Senator that the study, if any study is to be made, will be made by the Administrator, in the sense that he will prescribe such rules and regulations as he finds specifically desirable and necessary.

I believe—and I say this with all kindness and friendship—that we have discussed the question of discounting to the point where I think it is almost like a broken record. My point is that we should place the Senate on record, so that when the Senate conferees go to conference, they will come back with a provision for the control of discounts.

Mr. CAPEHART. The able Senator wishes to place the Senate in such a position that when the Senate conferees come back from conference, they must come back with a provision on the subject. I am willing to go to conference on the subject, because the House has covered it in its language. However, I am not sure that it is possible to come back from conference with anything which is workable, unless Congress wishes specifically, by law, to say that these mortgages cannot be discounted, or that they may be discounted only 1 point or 2 points. I am not so sure that it would be a good thing to leave the decision up to the Administrator.

Mr. JOHNSON of Texas. Mr. President, may we have a vote on the amendment of the Senator from Minnesota?

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Minnesota [Mr. HUMPHREY].

Mr. HUMPHREY. Mr. President, I ask for a division on my amendment.

On a division, the amendment was agreed to.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate reconsider the vote by which the Humphrey amendment was agreed to.

Mr. HUMPHREY. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER (Mr. FREAR in the chair). The question is on agreeing to the motion of the Senator from Minnesota.

The motion to lay on the table was agreed to.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I should like to make an announcement. I had previously agreed with the senior Senator from Oregon [Mr. MORSE] that when the Senate had concluded action on the Bricker amendment he would have an opportunity to address the Senate. I appreciate his indulging the Senator from Minnesota [Mr. HUMPHREY]. I did not realize that the Senator from Minnesota would obtain the floor. When he did, of course, I could not prevent him from doing so.

However, I wish to announce to the Senate that under the order previously entered, when the Senate concludes its business today, it will stand in adjournment until 10:30 tomorrow morning.

When the conference report on the State, Justice, Judiciary, and related agencies' appropriation bill is available after the House has acted on it, the Senate will take up that conference report, because it is a matter of the highest privilege.

We do not expect to have any more rollcalls tonight.

The Senator from Oregon desires to address himself to subjects not connected with the pending bill.

We shall proceed to the further consideration of the pending bill tomorrow, until the conference report on the appropriation bill reaches us. When that report reaches us, we will suspend consideration of the pending bill until the Senate has acted on the conference report.

It is hoped that we will conclude action on both the conference report and the pending bill before tomorrow evening. If not, we will have a late session tomorrow evening.

I make that announcement for the information of all Senators. I express my gratitude to the senior Senator from Oregon for his complete cooperation.

Mr. MORSE. I should like to say to the majority leader that I fully understand what happened with regard to the Humphrey amendment. I understood I was to get the floor after we had disposed of the Bricker amendments.

I am advised that the Senator from Maryland [Mr. BEALL] has an amendment which he believes to be noncontroversial. I should like to suggest that I be allowed to yield to the Senator from Maryland so that he may at least send the amendment to the desk. I have some doubts as to whether it is noncontroversial.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from Oregon may yield to the Senator from Maryland for the purpose of having the Senator from Maryland send his amendment to the desk and to have it read and considered briefly. If it can be accepted, we can act on it at this time, with the understanding, of course, that the Senator from Oregon does not lose his right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

Mr. BEALL. Mr. President, I call up my amendment which is designated "5-27-57-H."

The PRESIDING OFFICER. The Secretary will state the amendment.

The LEGISLATIVE CLERK. On page 31, after line 5, it is proposed to insert the following new section:

SEC. 201. Section 302 (b) of the National Housing Act, as amended, is hereby further amended by striking out the following: "(3) The Association may not purchase any mortgage, except a mortgage insured under section 803 or a mortgage covering property located in Alaska, Guam, or Hawaii, if the original principal obligation thereon exceeds, or exceeded, $15,000 for each family residence or dwelling unit covered by the mortgage," and substituting in lieu thereof "(3) The Association may not purchase any mortgage, except a mortgage insured under section 803 or a mortgage covering property located in Alaska, Guam, or Hawaii, if the original principal obligation thereon exceeds

or exceeded, $15,000 for each family residence or dwelling unit covered by the mortgage, unless the said insured mortgage covers property in an area declared by the Federal Housing Commissioner to be a high-cost area."

Renumber presently numbered sections 201 through 207 of title II as sections 202 through 208.

Mr. BEALL. Mr. President, the purpose of the amendment is to permit the Federal National Mortgage Association to purchase mortgages where the value of each family unit exceeds $15,000—but only where FHA has declared the mortgaged property to be located in a high-cost area.

I am well aware that the purpose behind FNMA and other Federal housing agencies is to assist in the construction of homes for persons of relatively low incomes. With this purpose I am in thorough accord and it is not my intention that the authority of FNMA should be extended beyond what is reasonable in this field. Study of my amendment will reveal that it in no way seeks an unreasonable extension of authority in FNMA to purchase mortgages.

FHA already has the authority to declare high cost areas, in which case it may insure mortgages in an amount greater than $15,000—up to a limit of $20,000. FNMA, however, does not have a commensurate authority. It is therefore, possible, and not unusual, for authority to be granted by FHA for mortgage insurance to be permitted over and above the authority of FNMA to purchase.

There have been several instances where such circumstances have forestalled construction of much-needed housing. My amendment would cure this defect in our housing law and permit the housing agencies to conduct their lending business in the proper fashion, in those localities recognized as high-cost areas.

The high-cost-area principle—the recognition that housing in some areas costs more to build, has been condoned by the Congress in granting to FHA the authority to raise its insurance commitments. Such permission, however, Mr. President, serves no real purpose unless FNMA possesses equal authority to make purchases of mortgages accordingly.

In a high cost area, such as Washington, D. C., has recently been declared to be, it is obvious that housing will cost more than in some other areas—housing that is identical in character, and which will serve to the benefit of the same segment of our population. The Congress, having recognized this situation in its delegation of authority to FHA must permit the housing program to function properly. This can be done through permitting FNMA the authority to purchase mortgages to the same extent that FHA is authorized to insure them.

As the housing program is set up under presently existing law, the Federal National Mortgage Association can purchase only those mortgages which have been insured by FHA or the Veterans' Administration. Since this is true, my amendment will not permit FNMA to purchase mortgages indiscriminately. On the contrary its mortgage purchases will continue to be required to be FHA insured; and they can exceed $15,000 only upon recognition by the FHA of the locale as a high-cost area.

My amendment, therefore, Mr. President, is designed to accomplish one purpose—and one purpose only—to permit an increase of the value per unit of those housing projects the mortgages on which FNMA purchases; and such increases remain within the jurisdiction of FHA to determine to be within a high-cost area.

Everyone agrees that there are many persons living in high cost areas for whom the advantages of FNMA were created. These people should not be penalized simply because they live in a high cost area. And, Mr. President, it is through my amendment that the differential between high- and low-cost areas may be taken care of in order that FNMA may operate to the advantage of all persons for whom it was originally intended.

I move the adoption of the amendment.

Mr. SPARKMAN. Mr. President, I should like to say that this amendment was presented to the committee at the last minute, without sufficient time for us to make a considered decision on it. I have told the Senator from Maryland—and I believe the Senator from Indiana [Mr. CAPEHART] agrees—that I would be willing to take the amendment to conference, with the understanding that in the meantime we will get such information about the matter as it is possible to get, and in that way the amendment will be open for discussion in conference, and we will be able to reach a final decision on it there.

The PRESIDING OFFICER (Mr. DOUGLAS in the chair). The question is on agreeing to the amendment offered by the Senator from Maryland [Mr. BEALL].

The amendment was agreed to.

SETTING RECORD STRAIGHT ON HOUSING BILL

Mr. MORSE. Mr. President, as I address myself to various items in the next few minutes, I ask the attention of the Senator from Indiana [Mr. CAPEHART]. Last night after I had made my speech on the housing bill, it became necessary for me to leave the floor in order to keep an important engagement down town.

At that time the Senator from Indiana discussed my speech. I say, with a sense of humor, that the Senator from Indiana did not discuss my speech in a complimentary manner. I am accustomed, of course, to the Senator from Indiana paying his disrespects to me on the floor of the Senate. Continuing with the same sense of good humor, I would say that if I ever found the Senator from Indiana in agreement with me, I would know that I was surely on the wrong side of the issue.

Therefore I am not at all concerned about his uncomplimentary statements. However, I certainly want the RECORD to be straightened out, because in my judgment the Senator from Indiana made a most inaccurate statement in regard to the position of the Senator from Oregon.

So I turn to page 7712 of the CONGRESSIONAL RECORD for yesterday and will cover very quickly certain points which the Senator from Indiana made. He said:

First, Mr. President, let me say that the Senator from Oregon said that the young couples will pay a 10-percent discount. Let the record show that although there may be a 10-percent discount in some cases, they will be the exception, rather than the rule. Furthermore, the FHA and the Veterans' Administration set the prices of the houses; and the 10-percent discount—if there is one—or the 6-percent or 7-percent discount will be charged to the builders, not to the young couples. The builders, not the young couples, will pay the discount.

Mr. President, I had spoken out yesterday against the hijacking of the young couples of America by the discount system. I spoke in complimentary terms of the Senator from Tennessee [Mr. GORE] because of the announcement he made that he would offer an amendment aimed at the discount racket—and a racket is what I think it is. I told the Senator from Tennessee that I would be delighted to be one of the cosponsors of his amendment. The debate today convinced me how right I was. Although the Gore amendment was rejected, I am perfectly willing to let the American people be the judges of the position which those of us who supported the amendment took. I am satisfied that when we took the position we did take on the Gore amendment, we were seeking to protect the welfare of young couples and of other potential and prospective home purchasers.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. MORSE. In a moment.

I am satisfied it is not the first payment of the discount; it is the last payment of the discount. For the Senator from Indiana to say that the home-builders are going to pay the discount does not change the fact that when the young people come to buy a home, the discount will be figured in the purchase price of the home. That cost will find its way into the figures which the builder gives to the young people.

Now I yield to the Senator from Indiana.

Mr. CAPEHART. I am certain the Senator from Oregon knows that the Veterans' Administration appraises all houses and sets the selling price, and that under the law they cannot include, in setting the selling price, anything which has to do with financing, selling, or advertising the property. The same is true of the FHA. The discounts which have been talked about so much today are all absorbed by the builder who sells the house. They are not absorbed, and it is illegal for them to be absorbed, under an FHA-guaranteed mortgage, by the purchaser. That is according to the law passed by Congress. There may be some violations of the law, but anyone who violates the law is subject to prosecution.

Mr. MORSE. I do not think there is any violation of the letter of the law. What I am satisfied the Senator from Indiana is not taking into account is that the assessors, those who assess the property in the first place, are taking the

discount into account. I am satisfied that in practice the assessors, when they assess the value of the property, whether they are assessors for the Veterans' Administration or the FHA, take into account what is happening. In my judgment, the price is being fixed too high. I do not think the builder, in the last analysis, is paying the bill. That is what many persons feel.

Mr. CAPEHART. Then those who appraise the property are violating the law.

Mr. MORSE. No; they are not violating the law. They take into account their judgment of the value. Who can say when the Veterans' Administration or the FHA is aware of the fact that the discounts will have to be paid, and that they are not taken into account in determining the original price?

Mr. CAPEHART. I do not believe the representatives of the Veterans' Administration or the FHA who make the appraisals ought to be accused of taking anything of that sort into consideration, because if they do they know they are violating the law.

Mr. MORSE. No; they are not violating the law; they are making an appraisal. They are taking into account what is actually happening in the money market. They are making their appraisal on the basis of what is happening in the money market.

In my judgment, the result is that the builder, in the last analysis, is able to get out without a loss; and the price which is fixed in the first instance takes into account what is happening in America's money market.

Mr. CAPEHART. Does the Senator have any proof of that?

Mr. MORSE. I simply have a great many complaints from constituents of mine and from other persons in various places in the country to the effect that they think the appraised values, in many instances, are too high.

I think one reason why they are too high is that we have got into a situation that in order to sell the houses, apparently, it is necessary to have a discount arrangement. So the appraisal is placed high, and the young people, in the last analysis, or the other purchasers, have to pay the bill.

I now quote the second point in the speech of the Senator from Indiana that I wish to answer:

> The Senator from Oregon was tilting with windmills when he discussed the provisions in regard to college housing. So far as I know—and I believe I am correct—the bill contains all the provisions desired by anyone in respect to college housing. We included in the bill the amount desired for that purpose. We did not provide for an increase in the interest rates. I know of nothing requested by anyone in respect to college housing that we did not provide for in the bill.

Mr. President, one reading that statement would get the impression that I said we increased the interest rates on college housing. I did not mention it.

Second, I certainly disagree completely with the Senator from Indiana if he thinks the bill includes what the college people want, because, to my knowledge, that does not happen to be the case.

There are college presidents and administrators who think the amount ought to be larger; and if we did not have the view of a single college president, we ought to take judicial notice of the fact that the amount ought to be larger. We ought to take judicial notice of the fact that on campus after campus there is a great housing shortage. I think the amount should have been substantially larger.

The Senator from Indiana, in my opinion, does not come anywhere near answering the Senator from Oregon when I made the argument, as I did yesterday, that we should meet the threat of Russia surpassing the United States in the field of training brains in the next 50 years. We should be spending the money necessary to make certain that we provide a better education for American boys and girls, in order to get ahead of Russia in brainpower.

I hold in my hand a letter from a college president who urges me to do all I can to obtain an increase in funds for college housing. I have had other college presidents from my State confer with me in recent months and urge me to do everything I can to get the maximum possible amount for college housing.

I say to my friends in Indiana that I think the bill is wholly inadequate, so far as the money provided for college housing is concerned. In my opinion we spend defense dollars well if we provide funds for that purpose. I would go so far as to say, in many instances, that we should provide funds in the form of subsidies to the public and private colleges of the Nation, in order to build the living accommodations which are needed for our college students.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. CAPEHART. I honestly believe that the members of the subcommittee and the members of the full committee will agree with me when I say that we did not have any suggestions or complaints in respect to college housing, and that, in substance, we gave everybody what was wanted.

I think what the Senator's correspondents were talking about in the letters was that the budget for college housing as recommended by the administration was $150 million, and that we in the committee raised the amount to $200 million. I think some persons did come before the committee and suggest that the amount be made $200 million, or $50 million more than the President's budget recommendation of $150 million.

I speak with the utmost sincerity when I say that I believe every member of the committee who listened to the testimony would state that we did not shortchange anybody or in any way reduce the item, or fail to give to those who testified in respect to college housing in substance what they wanted.

Mr. MORSE. I understand that is the Senator's point of view. But I want him to know that when I made my speech yesterday afternoon, I was making it based upon the consideration of representations which had been made to me for more money. I think they are sound recommendations. I think the bill is inadequate in granting only $200 million for college housing. I think the amount should be considerably greater.

Next, the Senator from Indiana said:

> Mr. President, in line with the tilting with windmills which the Senator from Oregon is always doing and his lack of knowledge is his statement that the committee voted to reduce by $750 million the FNMA commitment, the fact is that we voted to increase it—not reduce it—by $750 million.

First, let me make the point that I did not say the committee had reduced the amount by $750 million. I read telegrams and letters from persons who said so. The Senator from Indiana apparently did not draw any distinction between what the telegrams said and what the Senator from Oregon said.

But now let us examine the record, to ascertain what actually happened. I am advised by counsel of the committee that this is exactly what did happen: The Subcommittee of the Senate Banking and Currency Committee reported an item of $1,250,000,000 in new borrowing authority. The full committee reported the amount of $500 million in new authority—or a reduction of $750 million from the recommendation of the subcommittee—which I imagine is exactly what these constituents of mine had in mind. When in their telegrams they protested against the reduction by the full committee of $750 million, they were protesting against the full committee's reduction of the amount recommended by the subcommittee. Therefore, even the telegrams I placed in the RECORD are correct, insofar as they refer to a reduction from the amount voted by the subcommittee.

Let me also say good naturedly that the Senator from Indiana was wrong in saying that the absolute increase was $750 million, because it was only $500 million.

Again, in a very friendly spirit, I say the Senator from Indiana should be more careful about charging a colleague on the floor of the Senate with making a misstatement of fact, when in the first place the Senator from Indiana was attributing to the Senator from Oregon a statement which the Senator from Oregon did not make at all. Instead, the statement was taken out of a series of telegrams.

In the second place, the fact is that the telegrams were quite correct when they pointed out that the full committee did reduce by $750 million the amount recommended by the subcommittee of the Senator's committee, which subcommittee recommended $1,250,000,000.

In the third place, the Senator from Indiana was completely wrong in his own facts, when he tried to lead the Senate to believe that the committee had recommended $750 million more, when the record shows that it recommended only $500 million more.

Mr. HUMPHREY. Mr. President, will the Senator from Oregon yield to me?

The PRESIDING OFFICER (Mr. DOUGLAS in the chair). Does the Senator from Oregon yield to the Senator from Minnesota?

Mr. MORSE. I yield.

Mr. HUMPHREY. I appreciate the courtesy of the Senator from Oregon in

yielding to me, because I wish to make a brief statement about a distinguished colleague of mine, a Senator by the name of WAYNE MORSE, of Oregon.

Mr. President, the Washington News of today, May 28, carries a story, under the byline of Walter Wingo, about a meeting last night of the Washington, D. C., Young Republicans Club. The story is interesting because of what it omits. The Washington Young Republicans voted on resolutions relating to censure of Senators. I shall not comment on that, because I do not believe it is particularly important.

However, I have it on excellent authority that at the meeting of the Young Republicans Club, a motion recommending the censure of the Senator from Oregon [Mr. MORSE] was made. However, more important than that, the motion was defeated.

I remember that last week, when some of our friends on the other side of the aisle attacked the Senator from Oregon for his comments about the President's power policies and the generosity toward the Idaho Power Co., that was regarded as front-page news and as grist for the editorial mills.

However, Mr. President, is it not strange, and even mysterious, that when the Young Republicans Club of Washington, D. C., defeated a resolution recommending censure of the Senator from Oregon for the same occurrence, a heavenly silence seemed to prevail? I do not know where the newspaper reporter was at that particular moment, but I gather that he was there. Or did he report a meeting which he did not attend? I am sure he did not. Or did his editor decide that the newspaper had run out of space?

Mr. President, the Senator from Oregon needs no defense. Those of us who on occasion have tangled with him in debate, know that. But when Young Republicans reject a motion to censure my friend, the Senator from Oregon, I submit that that, too, is news.

I wish to thank the Senator from Oregon for permitting me to make this statement, not with his prior knowledge; but it is simply about a matter which I thought should be stated in the Senate, because I read with considerable interest and, may I say, considerable concern, the newspaper articles relative to the very vitriolic attack made in the Senate on the Senator from Oregon. I regret that I was not present to participate in the argument made by Senators on this side of the aisle.

However, when I read the newspaper article which I now hold in my hand—an article under the byline of Walter Wingo, in regard to a motion by the Young Republicans in proposing the censure of one of my colleagues—I thought I should bring it to the attention of the Senate.

I thank the Senator from Oregon for his cooperation. He did not know that I was about to make this statement; but I hope he enjoyed it.

Mr. MORSE. I did enjoy it, and I appreciate very much what the Senator from Minnesota has said.

Mr. President, let me say, in regard to what obviously was an organized attack by the party of the opposition, that it tickled my sense of humor. I am sure the Senator from Minnesota will be interested in knowing that a very prominent Republican friend of mine in Oregon called me the next day and asked, "Wayne, how much did you pay those Republicans to attack you?" Then he went on to state what will be the reaction of the people of my State when they come to know the facts. Of course, the first flurry was, and it probably was a part of the design, to the effect that I had made the charges that I was accused of making. However, what I actually said was recorded on tape; and I shall invite some of my good personal friends on the other side of the aisle—of course they are political enemies, as their speeches on the floor of the Senate show, but still they are good personal friends of mine—to have coffee with me some afternoon, and then I shall play for them the tape of my Detroit speech; and then they will be able to hear with their own ears how wrong they were in placing their reliance upon the press, because the press report of that speech was quite contrary to what the tape itself shows.

Mr. CAPEHART. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. CAPEHART. Then is the Senator from Oregon saying he was misquoted by the press, and that what he said was not correctly reported?

Mr. MORSE. Let the Senator from Indiana read the RECORD. I stated on last Wednesday afternoon what I said in the Detroit speech, and I had previously said it on the floor of the Senate on April 29. Of course it was not complimentary to the President. But the quotation given by the Senator from New Hampshire [Mr. BRIDGES], the chairman of the Senate Republican policy committee, was a misstatement of fact; and I said so last Wednesday. But apparently those on the other side of the aisle were so intent on finishing the hatchet job which they came to the Senate to do, that they did not pay attention to what I actually said.

Mr. CAPEHART. Mr. President, at this point will the Senator from Oregon yield further to me?

Mr. MORSE. Certainly, Mr. President; I am always glad to yield.

Mr. CAPEHART. Let me say that I did not read the Senator's speech, and I did not hear it. I read the newspapers, and I heard the Senator from Oregon speak here. But there is no question in my mind—and I want the Senator from Oregon to understand it, and I am looking him straight in the eye—that his intention was to compare the President with Mr. Beck.

Mr. MORSE. Mr. President, let me repeat for the edification of the Senator from Indiana exactly what I mean, and I repeat what I have said many times: In my code of political ethics, there is no difference in principle of morality or immorality between a Dave Beck who puts his hands into the pockets of the teamsters union and takes out interest money, in effect, which belongs to them, and an Eisenhower administration, acting through the President, which puts its hands into the pockets of the taxpayers and takes out, not thousands of dollars, but millions of dollars of interest money belonging to the taxpayers, and gives it to the Idaho Power Co.

That is the statement I have made consistently. I am glad to repeat it tonight in the presence of the Senator from Indiana. Again I say I repeated it the other day.

Mr. CAPEHART. Mr. President, let me say this about the Senator from Oregon: My personal opinion is that in making a statement such as the one he just made, he was intellectually immoral in making the statement, for the simple reason that he knew what he was doing; he knew the interpretation which would be put upon his statement; he knew that the press and the people would put on it the interpretation that he was comparing the President of the United States with Dave Beck. Therefore, I accuse the Senator from Oregon of being intellectually dishonest and immoral in making such statements.

Mr. MORSE. Mr. President, I hope the Senator from Indiana will keep on accusing me, because every time he does, he pays me a great compliment, for I cannot imagine anything I would care less about than the views of the Senator from Indiana on anything, and I am not at all disturbed about the views of the Senator from Indiana about me.

But before I get through with my speech tonight, I shall carry to the Senators on the Republican side another chapter of the Eisenhower administration's political immorality.

Mr. CAPEHART. Mr. President, will the Senator from Oregon yield at this point?

Mr. MORSE. I yield.

Mr. CAPEHART. Let me say to the Senator from Oregon: My personal opinion is that a man who will permit himself to be elected by a Republican organization, as he did in the State of Oregon, and then will change his political affiliation, is intellectually immoral and dishonest.

Mr. MORSE. Well, I will state——

The PRESIDING OFFICER. The Chair will rule that that statement of the Senator from Indiana is a reflection upon the character of another Senator.

Mr. CAPEHART. Mr. President, the Chair has no right to rule on anything unless he is asked to rule by some Member of the Senate. I know the rules——

Mr. HUMPHREY. Mr. President——

Mr. MORSE. I want to say, Mr. President, I am very happy to join in an exchange of insults with the Senator from Indiana.

Having said that, I now proceed with my speech.

Mr. HUMPHREY. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the Senator from Minnesota.

Mr. HUMPHREY. I really appeal to our colleague from Indiana to proceed in order. These comments are not becoming to the United States Senate, and I hope the Senator from Indiana will permit the Senator from Oregon to proceed.

Mr. CAPEHART. I do not think it is becoming of a Senator to cast aspersions on the President of the United States as

the Senator from Oregon did, and I shall defend and protect the President of the United States. Had he been a Democrat I would have been as much incensed as I am when the aspersion is against a Republican. If the able Senator from Oregon can get any satisfaction from the remarks he made about the President of the United States, let him do so. When he made them, he knew what he was doing. He knew what the reaction would be. He knew the statement would be taken as a comparison of the President of the United States with Dave Beck. I shall continue to resent such irresponsible statements.

Mr. MORSE. I enjoy the comments of the Senator from Indiana. They show many things about him. One, they shows he knows very little about American history, because I shall now read into the RECORD a very interesting little card issued by the American Lumber Corp. I assume, from the content of the card, the one responsible for the card also does not believe in political idolatry, and that it is not safe for freedom in America if we start setting up sacred bulls in American politics.

I now read from the card:

LET NO TONGUE BE STILLED

In 1798, Congressman Matthew Lyon of Vermont was imprisoned for 4 months and fined $100. He was the first victim of the Alien and Sedition Act of that year. His crime was criticizing the President of the United States, John Adams. He had attacked the President deliberately in defiance of these laws which he felt made freedom of speech and press a mockery. During the 3 years the act was in force, 10 persons were convicted. The law split the Nation, but finally the forces of Thomas Jefferson were victorious. Jefferson was elected President, and the Alien and Sedition Laws were wiped off the books. Congressman Lyon had offered himself up as a sacrifice for the principle of democracy which holds that every man has the right to speak his mind.

Let me say, that so long as I serve this body, whenever I think any President of the United States, Republican or Democratic, deserves to be criticized and his conduct should be chaarcterized by definitive and descriptive terms the American people can understand, the senior Senator from Oregon is going to criticize him.

Any time the Senator from Indiana or any other colleague wants to place me on trial before the Senate on the assumption that under the rules of the Senate I can be subjected to censure, I dare them to file a censure resolution. I dared the Senator last Wednesday to file it, and I defy him again. Let the Senate of the United States be the court that will try the Senator from Oregon on the issue whether or not a Senator can stand on the floor of the Senate and criticize a President of the United States.

Let me say to the Senator from Indiana I, too, regret that he and I got into this exchange of personal remarks, but I uttered no insult against the Senator from Indiana until he first made his charge of immorality against the Senator from Oregon. Then, so far as I was concerned, no holds were barred.

If the Senator from Indiana wants to let the record stand, we will let it stand. If the Senator from Indiana wants to enter into a gentleman's agreement with me to erase from the RECORD this exchange of personal insults, I offer that to him. It is for him to decide, because he was the one to violate the rules of the Senate.

Mr. CAPEHART. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Indiana?

Mr. MORSE. I yield to the Senator from Indiana.

Mr. CAPEHART. I want to say the amortization law under which the Idaho Power Co. was given the certificate, was passed in 1950, by a Democrat President and a Democrat Congress.

I voted for it.

I am not against it.

I am in favor of it.

There have been 21,000 certificates issued under it.

There have been more than 900 certificates issued to utilities, such as the Idaho Power Co. certificate in Hells Canyon, under the law enacted in 1950—a law passed by the Congress of the United States.

I voted for it, and I am quite sure the Senator from Oregon did. At least, he was here when the bill passed. Under those circumstances, how can the Senator charge the President of the United States, when one of his independent offices, the Office of Defense Mobilization, was designated by the President to handle these certificates, with sticking his hands into the taxpayers' pockets?

How can he charge the President personally with doing it?

The Senator knows what I have just said about the history of the law is the truth. How can the Senator compare the President of the United States with Dave Beck, when there is no comparison between the two, and the Senator knows it?

Mr. MORSE. If the Senator will pause long enough for me to answer his question, I will answer it.

Mr. CAPEHART. Yes.

Mr. MORSE. The answer is: Because I believe he is guilty of perversion and prostitution of the intent of the law. That is why I charge the President with political immorality. It was never intended to use the money for the purpose of building dams, at the expense of the taxpayers, in large part; the purpose of the law was the encouragement of the development of defense plants and not the construction of private-utility dams.

Mr. CAPEHART. The President of the United States did not approve it. It was approved by the Office of Defense Mobilization.

Mr. MORSE. I am amused by the argument which tries to shield and protect Dwight D. Eisenhower by saying some underling did it. The responsibility for the action of that underling rests on Dwight D. Eisenhower. When he found out, he should have gone to work on it. He should not have said, "Well, it is under the letter of the law." The Senator has heard me say a great many immoral acts can be committed under the letter of the law.

The fact that something is under color of law does not make it moral. I wish to say it is a shocking thing that we have a President of the United States who would permit the ODM to proceed on the course it has followed with respect to fast tax writeoffs.

Mr. CAPEHART. Let me say this——

Mr. MORSE. I am going to discuss that at some length.

Mr. CAPEHART. I think it is a shocking thing when a Senator of the United States will stoop so low as to compare the President of the United States with a man who has been indicted and a man who has a history and a record like that of Mr. Beck.

I wish to say to the Senator from Oregon that the rules of the Senate will not permit me to say what I think about it.

And let me say also to the Senator, I am perfectly willing to have the Senator from Oregon live with his own conscience.

Mr. MORSE. I merely wish to say——

Mr. CAPEHART. I am perfectly willing to have the Senator live with his own conscience. If he can get any satisfaction out of stooping so low and being so intellectually immoral and dishonest, he is perfectly welcome to it.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. MORSE. I wish to say I happen to be one who can live with his conscience.

Mr. HUMPHREY. Mr. President, I must ask the Senator from Indiana [Mr. CAPEHART] to proceed in order and not impugn the motives of a fellow Senator. The Senator knows the rules as well as I do. I do not wish to become involved in this controversy, but we have a responsibility to preserve the rules of the Senate. I respectfully request, Mr. President, that this be done.

The PRESIDING OFFICER. The Chair will state that the rules of the Senate prohibit derogatory comments about fellow Senators or States of the Union. By previous precedents, comments about the President of the United States are not prohibited by the rules of the Senate.

Mr. MORSE. I wish to say now, Mr. President——

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. MORSE. I do not wish to yield until I have completed my charge.

I repeat my charge that one Dwight D. Eisenhower, President of the United States, in my judgment, is guilty of an act of political immorality in permitting the ODM, while he is President of the United States, to so pervert and prostitute the so-called fast tax writeoff laws, that the Idaho Power Co. gets what, in effect, amounts to a gift of millions of dollars of the taxpayers' money, while at the same time the Treasury of the United States has to borrow money to carry the national debt, on which the taxpayers have to pay interest. Thus the taxpayers lose twice. They lose the amounts in interest which, in effect, under the operation of this scheme are given to the Idaho Power Co.; and they lose in the second place, the interest they have to pay for that amount of money

which otherwise would not have to be borrowed.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. CAPEHART. The responsibility lies with the Congress of the United States, which passed the law in 1950, and with those who voted for it, and not the President of the United States.

Mr. MORSE. The Senator is dead wrong about that. The responsibility rests upon the President of the United States for the administration of the law, and the law does not have to be administered as the President has permitted it to be administered. That is the point I am making.

Mr. President, I think the objective of the law—the real objective of the law—was a good one. It is the prostitution of the objective to which I object.

Mr. CAPEHART. Mr. President, I wish to say this——

The PRESIDING OFFICER. Does the Senator from Oregon yield?

Mr. MORSE. I think I have been exceedingly lenient with the Senator from Indiana in permitting him to get his viewpoint into the RECORD. I am going to yield once more, with notice to him that this is the last time I shall yield, so he had better get it out of his system now.

Mr. CAPEHART. I do not know how anybody could have been more frank than I have been. I do not know how anybody could have talked any straighter than I have talked. I think my language is understandable.

Mr. MORSE. I do not know that I stood in silence.

Mr. CAPEHART. My language is understandable. I think the Senator knows exactly how I feel about the statement he made. I am perfectly willing that the Senator be permitted to live with his own conscience.

Mr. MORSE. I do not know anything I care less about than the Senator's view.

Mr. CAPEHART. If he can get any satisfaction out of the remarks he made about the President of the United States, I am perfectly willing, so far as I am concerned, that he do so. I happen to know what the people think about it.

Mr. MORSE. I wish to say, on that point, Mr. President, that I am perfectly willing to let the people be the judge, because what the Senator from Indiana apparently is not aware of is that increasing millions are beginning to discover that, after all, the great idol has clay feet.

Mr. President, I now turn to another comment which was made by the Senator from Indiana on my speech on the housing bill, and I desire to quote what he said:

> My best judgment is that the Senator from Oregon did the housing industry and the private industry a disservice by his remarks. I think those who sent him telegrams would agree that the philosophy he expounded—namely, to have the Federal Government finance the houses at par—and other remarks he made constituted a disservice to the private industry of America. So far, the building industry has been handled by private industry and private enterprise. My best judgment is that the last thing in the world the home builders of America want and the last thing in the world the sawmills of Oregon and the businessmen of Oregon want is to have the Federal Government take over all financing and the handling of all the home building in America.

Mr. President, I am used to the argument that if one tries to provide for a financial arrangement which will make it possible for people in the lower income brackets to own their own homes one must be accused of creeping or galloping socialism. But I wish to say, Mr. President, that when I make my fights for public housing, and when I make my fights, as I did this afternoon, for handling the discount problem, I am fighting for private enterprise, and not socialism.

Do not forget that in essence the procedures for which I am fighting are procedures of financing. The homes are built by private industry. The local carpenters, the plasterers, the bricklayers, our neighbors in our home communities, build the homes. The charge of creeping socialism, Mr. President, is sort of a diversionary tactic to get the American people to think that, after all, it is the Government which builds the houses. It is the local industry which builds the houses, but the Government in some instances is putting up the financial guaranty, or establishing the financial procedure, so that it will be possible for people who otherwise would never own a home to own their homes.

I wish to say to my friend from Indiana that I campaigned on this issue for months in Oregon last year. It was one of the major planks of my campaign plaform. I am perfectly willing to abide by the mandate of the majority of the voters of my State on November 6, 1956, because I am satisfied—and I spoke from 5 to 10 times a day for 3 months—that the overwhelming majority of the people of my State agreed with my position on housing, and agreed that by supporting my position on housing I was not in any way supporting socialism in the so-called building industry.

In fact, Mr. President, let me tell the Senate that a large number of sawmill operators, including some of the large ones, urged that during this session of Congress I should make a fight for the amendment which is now pending before the Senate of the United States, an amendment which would provide for 200,000 public housing units, because they think that it is very important as a great stimulus to private enterprise, to the private enterprise construction industry.

So, Mr. President, I am not going to be frightened by the "hobgoblin" argument of socialism in connection with the housing bill. I wish to make that comment in reply to the remarks the Senator from Indiana put into the RECORD last night.

Mr. President, I now turn to another subject.

The PRESIDING OFFICER. The Senator from Oregon has the floor.

DOWNPAYMENTS ON FHA HOUSING

Mr. MORSE. I ask you now, Mr. President, on another phase of this matter, that there be printed, at this point in the RECORD, a series of telegrams and letters which I have received from lumber people in my State, and mill operators in my State, urging that I support the position which I took on the downpayment issue as it relates to housing, which was considered earlier today.

Senators will see, if they read these communications, and the communications that I put in the RECORD yesterday, that certainly in this housing debate I have been supporting the point of view at least of the constituents from whom I have heard. I wish to assure the Senate that it has been the point of view, in my judgment, of an overwhelming majority of the voters of my State.

There being no objection, the telegrams and letter were ordered to be printed in the RECORD, as follows:

ROSEBURG, OREG., *May 27, 1957.*

Hon. WAYNE L. MORSE,
United States Senate,
Washington, D. C.:

A vote for reduction in downpayments on FHA housing is a real must.

Respectfully,
WILBUR LUMBER CO., WILBUR, OREG.
J. C. BAXTER, *Secretary.*

BROWNSVILLE, OREG., *May 27, 1957.*

Hon. Senator WAYNE L. MORSE,
United States Senate,
Washington, D. C.:

Action of Senate Banking Committee on housing program very disappointing to us. We feel that liberal program is needed to meet needs for housing and provide stability to those industries involved in housing. We urge that you support amendments which we understand will be made by Senators SPARKMAN and SMATHERS, when bill comes to Senate floor.

TIMBER PRODUCTS COMPANY OF OREGON.

MEDFORD, OREG., *May 27, 1957.*

Hon. WAYNE MORSE,
Senate Office Building,
Washington, D. C.:

Realizing the paramount importance of the Smathers bill (S. 1898) to the whole national economy, we are sure you are using your vote and influence in its furtherance. We shall deeply appreciate your efforts in behalf of this bill, as lumber and construction industries cannot survive FRB restraints without alleviating legislation.

VOLLSTEDT KERR LUMBER CO.
O. D. MARTIN.

WALLA WALLA, WASH., *May 28, 1957.*

Senator MORSE,
Senate Office Building,
Washington, D. C.:

When the Senate considers legislation on the omnibus housing bill authorizing reduction downpayments on new homes bought under FHA, we request that you vote for a reduction in downpayments on FHA housing, the promotion of a better home-building program and a corresponding better lumber market will be beneficial to us and the Nation.

Respectfully yours,
TUMALUM LUMBER YARDS.
C. C. CRAWFORD, President.

EUGENE, OREG., *May 24, 1957.*

Hon. WAYNE L. MORSE,
United States Senate,
Washington, D. C.:

Urgent that you support liberalized FHA program as provided in Senator SPARKMAN'S subcommittee bill and Senator SMATHERS' FHA bill S. 1898.

EUGENE WILLAMETTE LUMBER CO.

COPY OF WIRE SENT TO SENATORS FULBRIGHT AND LYNDON JOHNSON

MAY 22, 1957.

Oregon's primary industry is lumber and its products. States per capita income has declined from $202 above national average in 1947 to $10 below national average during 1956. A liberal housing program with lower FHA downpayments such as proposed by Senator SPARKMAN'S Subcommittee on Banking and Currency would assist our economy materially. Would appreciate your support.

C. GIRARD DAVIDSON,
Democratic National Committeeman of Oregon.

SALEM PRINTING AND BLUEPRINT, INC.,
Salem, Oreg., May 22, 1957.

The Honorable WAYNE MORSE,
United States Senate,
Washington, D. C.

DEAR SIR: The buying and building of new homes in Oregon, and in the Salem area especially, is in such a critical situation we earnestly urge you to support a reduction in the required FHA downpayments.

Yours very truly,
CLARENCE C. FIELD, *President.*

HELLS CANYON: REVELATIONS OF SUPPRESSION AND FRAUD

Mr. MORSE. I now turn to another matter, under the subject, Mr. President, of revelations of suppression and fraud in connection with this whole matter of the fast tax writeoffs.

Yesterday startling revelations were made before the Kefauver subcommittee about the handling of the Hells Canyon case. Unfortunately, the AP story appearing in today's press does not present the whole story. Two elements of the shocking story were not presented to the public.

SUPPRESSION OF SEATON LETTER

The AP story, as it appears in today's Washington Post and Times Herald, merely relates that ODM Director Gordon Gray ignored Secretary of Interior Seaton's letter recommending denial of quick tax writeoff certificates for Idaho Power Co.'s two small dams at Hells Canyon.

But the story fails to mention the fact that in recent testimony before Senator BYRD'S and the Kefauver subcommittee, Gray has claimed again and again that he had no alternative to issuing the tax giveaway certificates once Interior recommended them.

Senator KEFAUVER'S probing examination of why Seaton's March 11 letter to ODM was suppressed goes unmentioned in the AP story.

Why is there no report that Senator KEFAUVER told Gray: "The fact is, Dr. Gray, you had no intention of producing this letter until you found out this subcommittee had a copy from Interior."

Again Gray asserted "executive privilege" in refusing to say with whom in the White House he discussed the Seaton letter.

As I said the other day in my remarks on this subject on the floor of the Senate, I think that probably, under the separation-of-powers doctrine, Mr. Gray probably had the right, if he so desired, to exercise the so-called privilege. But it is a matter for comment, or should be a matter for comment, just as, when a witness before a Senate committee or a court hides behind the fifth amendment, it is a matter for comment. I would not take away from him the right, but the fact that he hides behind the fifth amendment certainly should be a matter for comment. I believe that Mr. Gray's hiding behind the so-called privilege procedure is a matter for comment.

It is obvious that a Cabinet officer's letter was known to White House staff members. Gray admitted last week—when confronted with some pencilled notes bearing their names—that he had discussed the general subject with Sherman Adams and Howard Pyle, Administrative Assistants to the President. Who made the decision that a Cabinet officer's opposition to the tax giveaway to Idaho Power Co. should be withheld from the press and Senator Byrd's Finance Committee?

Gray conceded that the Seaton letter presented the arguments of congressional opponents of the Idaho Power Co. tax gift. Clearly this was very embarrassing. The White House staff and Gray decided to put the lid of secrecy on it. Meanwhile, Gray told Senator BYRD and the Antitrust Subcommittee that he was only following Interior's recommendation.

Seaton made three points:

First. The FPC license decision claimed that the Idaho Power Co. licenses were desirable because the small dams would be built without cost to the taxpayer. It would be improper, Seaton argued—as I and others have for months—to give give quick tax writeoffs handouts to Idaho Power. Such action would be inconsistent with the FPC rationale of no cost to the taxpayers.

I digress to pay my high commendation and compliments to the Secretary of the Interior. I am very glad that the Secretary of the Interior wrote that advice to this administration. I think it is regrettable that, with that advice in the files, the administration did not follow it; and that, with that advice in the files, when Mr. Gray was before the committee of the Senator from Virginia [Mr. BYRD], he did not advise that committee that the administration had such advice. In my judgment that is a concealment in violation of an obligation which he owed to the committee of the Senator from Virginia to make known all relevant facts.

Second. Idaho Power needed no incentive to build the dams, and the basis of the quick tax-amortization law was to provide financial incentives to build projects that were not useful in a peacetime economy. Gray admitted that that was the congressional purpose for the law, but alibied that that was not how it had been administered in other cases.

Third. Idaho Power Co.'s small projects would not provide power-capacity excess to its normal needs. The Secretary of the Interior Seaton pointed out that "excess capacity" was a "critical factor" in the ODM program. Yet Gray claimed Seaton was giving only his opinion and not discussing the power-expansion criteria.

One of Gray's top assistants claimed yesterday that he did not know of the Seaton letter until yesterday. Either he was covering up, or Gray or others kept a pertinent fact from the staff working on the case. It would seem that this claim was to buttress an excuse for the fact that the Seaton letter was not in the Hells Canyon file made available to the Kefauver subcommittee investigators.

This story goes beyond Gray's rejection of Seaton's recommendation. The Seaton letter—written almost 2 months ago—was suppressed, just as facts were suppressed in the Dixon-Yates case.

It will be recalled that in the Dixon-Yates case we finally had to drag it out of the administration that Mr. Wenzell was one of the key people working on the Dixon-Yates contract.

MISREPRESENTATION BY IDAHO POWER CO.

AP does not report the strange difference between Idaho Power's public announcements and a letter to Interior and ODM concerning completion of Oxbow Dam.

Under the criteria for tax writeoffs, it is necessary that a project be built and operating by December 31, 1958. This is a crucial factor.

On March 7, 1957—a few weeks before ODM's decision—R. P. Parry, the attorney for Idaho Power who handled its case before the FPC and the courts, testified before the Senate Interior Committee that Oxbow was scheduled for initial operation in 1961.

I wish to stress that point. The testimony of the spokesman for the Idaho Power Co. was that Oxbow would be ready for operation in 1961. These dates become very important.

The 1956 advance report of the Bonneville Power Administration also states that Oxbow is scheduled for initial operation in 1961.

Gray's principal assistant on criteria said yesterday that he knew of Parry's testimony, but did not tell Gray. He testified that he did not know of the Bonneville report.

Why was the Parry March 1957 testimony ignored on the important fact of the completion date—more than 2 years after the ODM deadline?

Because, Gray testified, ODM had a letter from a vice president of Idaho Power, dated April 10, stating that the company intended to have Oxbow built by December 1958. Gray said he had no reason to doubt this, despite Parry's March testimony, which his staff man claims not to have told him about.

Gray and his staff also claimed not to know about a May 16, 1957, speech by T. E. Roach, president of the Idaho Power Co., reported in the press, in which he said that Oxbow would start producing power in 1961. We are back to the 1961 date again.

When asked whether he had power to cancel the Idaho Power Co. certificates, Gray said he did—for fraud or misrepresentation.

In my opinion the facts clearly show both fraud and misrepresentation practiced upon the ODM by the Idaho Power Co. in its endeavor to obtain these certificates, in which effort it was finally successful. But Mr. Gray added that he had no reason to believe that the April

10 letter claiming a completion and operating date of December 1958 was a misrepresentation, despite the company attorney's March 7 testimony and the press report of Roach's May 16 speech.

That is a part of the story of suppression and denial of pertinent facts to the public and Congress by ODM, and probably the White House, as well.

That is a part of the story of the Idaho Power Co.'s playing fast and loose with the facts to get the quick tax write-off handout certificates of $65 million. Mr. President, I say most solemnly that that is a shocking story of—I repeat—political immorality on the part of the administration. We are building up to another Dixon-Yates. The President should start cleaning house, because the case leads right to his door. If he is not responsible for Adams, Pyle, and Gray, who is?

Of course the answer is that the President is the boss, and the President must assume responsibility for the conduct of his agents.

I think it is rather interesting that we should have this letter from the Secretary of the Interior under date of March 11, 1957, but it took a Kefauver committee to bring it to light through an investigation. We had Mr. Gray before the Byrd committee, and if Senators will read the transcript of that committee hearng, they will have no doubt about the fact that Mr. Gray failed to advise the Senator from Virginia [Mr. BYRD] of the letter of March 11th. I happen to think it was his clear duty to do so.

I ask unanimous consent that the letter of the Secretary of the Interior, Mr. Seaton, to Dr. Arthur S. Flemming, the Director of the Office of Defense Mobilization, dated March 11, 1957, be printed in the RECORD, at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES
DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D. C., March 11, 1957.

Dr. ARTHUR S. FLEMMING,
Director, Office of Defense Mobilization, Executive Office of the President, Washington, D. C.

DEAR DR. FLEMMING: As you have requested I have reviewed the record available to me with respect to the applications of the Idaho Power Co. for rapid tax amortization of the Oxbow and Brownlee hydroelectric developments.

In the Federal Power Commission's opinion No. 283 which accompanied the decision to issues licenses to the Idaho Power Co. there is included the following:

"However, under existing law, these public purposes will be realized without expense to the United States to the extent that the projects are constructed by a non-Federal entity.

"Development by applicant of the Hells Canyon reach of the Snake River would provide 1 million acre-feet of flood-control storage and the required streamflow regulation in aid of navigation on the lower river at no cost to the United States. * * *"

Since the foregoing excerpts from the Federal Power Commission's opinion indicate the great weight assigned to the benefits to be achieved without cost to the Federal Government, it is my view that it would be most inequitable for the Federal Government now to assume any portion of the cost of these licensed projects. The granting of tax amortization certificates cause the Federal Government to pay interest on borrowed money to make up for the fact the Federal Government receives less taxes than it otherwise would during the tax amortization period. Of course, starting with the sixth year the Government receives increased tax revenue because of the fact that smaller amortization deductions are then available to the holder of a tax amortization certificate. The net cost to the Government in the case of tax amortization certificates is the difference between the interest it pays on money borrowed as a result of reduced tax receipts during the 5-year amortization period and the interest it saves on the larger tax payments received by the Government beginning with the sixth year of the amortization period. This net cost to the Government in the case of the Idaho Power Co. application is inconsistent with the basis on which the FPC granted the license to the company, as I view the record.

Testimony before the Commission appears to establish clearly the company made its case before the FPC on the basis that it would not need accelerated tax amortization in order to justify granting the license to the Company. Testimony on this point was adduced from the President of the Company, Mr. Roach, as follows:

"Q. Have you in part also explained then why you haven't made provision in your projection of Exhibit 28 for any accelerated amortization items relating to Oxbow and Brownlee?

"A. I think I have explained it in its entirety as far as I know. Our filing of the application I felt was an obligation and inherent in our fulfillment of our responsibility as officers of the company, because the Internal Revenue Act, section 124 (a), specifically provides for it, and had we not at least made the effort, even though we had faint hope of any success, we would have been derelict in our responsibility to our customers.

"Q. But I take it that the absence of accelerated amortization items in your projection of Exhibit 28 is due to the faintness of hope with respect to your pending application before the ODM; is that correct?

"A. Absolutely. I testified on direct that we hadn't included it, but if it were available to us we certainly would take steps to put ourselves in the position to take advantage of it, so that if and when the time came that seemed expedient and advantageous to do so, we would have taken the necessary steps and qualified to take advantage of it." (FPC hearings, pp. 8733-34).

In my view the record before the Commission is clear that the company has never established any basis of need for the financial assistance provided by accelerated tax amortization. Furthermore I am convinced by the record that the hearings before the Federal Power Commission establish that these hydroelectric projects were not planned for the purpose of creating excess capacity in the company's system, which has been a critical factor in the granting of tax amortization certificates.

Accordingly, I recommend that you deny issuance of the accelerated tax amortization certificates requested by the Idaho Power Company.

Sincerely yours,

FRED A. SEATON,
Secretary of the Interior.

ARTICLES BY WALL STREET JOURNAL AND ASSOCIATED PRESS IN RECORD FOR COMPARISON

Mr. MORSE. Mr. President, it is very interesting that we have before us for comparison the article which was printed to today's Wall Street Journal on the Kefauver hearings of yesterday. I ask unanimous consent that the article in the Wall Street Journal be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GRAY SAYS HE GRANTED IDAHO POWER TAX AID DESPITE SEATON PROTEST—KEFAUVER DISCLOSES LETTERS FROM INTERIOR SECRETARY SAYING FIRM DIDN'T NEED FAST WRITEOFF

WASHINGTON.—Defense Mobilizer Gordon Gray admitted he granted Idaho Power Co. fast amortization for tax purposes on two electric power projects despite a strong recommendation against such awards by Interior Secretary Seaton only a month earlier.

Mr. Seaton, in a letter to Mr. Gray's predecessor, Arthur Flemming, claimed Idaho Power did not show it was in financial need of the special tax treatment and said the grants would cost Uncle Sam money.

The letter was released by Chairman Kefauver (Democrat, Tennessee) of a Senate Judiciary subcommittee that's looking into the circumstances surrounding the fast writeoff grants to the Idaho utility. The Seaton message was dated March 11, a month before ODM told Idaho Power it could depreciate for tax purposes $65 million of the $103 million cost of 2 dams on the Snake River in 5 years instead of the usual 20- or 25-year span.

Mr. Gray claimed neither of Mr. Seaton's arguments against the grants questioned the defense essentiality of the projects, the basic criterion for granting tax incentives under a program initiated during the Korean war to spur expansion of defense-needed facilities.

Explaining why ODM granted the tax aid, Mr. Gray cited a 1955 letter from the Interior Department, when Douglas McKay was Secretary, saying the projects were necessary to defense. He did not mention the Seaton letter.

Senator KEFAUVER charged Mr. Gray kept the Seaton letter from this committee and decided to present it to the group only after it had obtained another copy from the Interior Department anyway. Mr. Gray denied this.

He claimed he had doubted at first the Seaton letter was part of the official record on the case since it didn't deal directly with the criteria for fast writeoffs. Thus "competent advisers," he testified, "raised the possibility that the letter should be withheld because of executive privilege."

Mr. Gray said he was advised just yesterday morning the letter was not executively privileged after all, so he decided to hand it over to the subcommittee.

Administration officials claim the right under executive privilege to decline to tell congressional investigators about executive department exchanges preliminary to official actions.

Mr. KEFAUVER said he had first received his copy of the Seaton letter from the Interior Department just before the start of yesterday afternoon's hearing.

In his letter, Mr. Seaton claimed it would be most inequitable for the Federal Government now to assume any portion of the cost of these licensed projects. The granting of tax-amortization certificates causes the Federal Government to pay interest on borrowed money to make up for the fact the Federal Government receives less taxes than it otherwise would during the tax-amortization period.

The Interior chief also asserted that the Idaho firm "has never established any basis of need for the financial assistance provided by accelerated tax amortization."

Earlier, the subcommittee introduced testimony indicating that Idaho Power Co. officials had told Congress and other groups earlier this year that one of the two dams

for which it received writeoff certificates would not be completed until 1961. The fast amortization reportedly was granted only on the basis both projects would be completed by December 1958, the target date of ODM's electric power expansion program.

Mr. Gray said he knew nothing of the 1961 date. An Idaho Power Co. attorney, it was indicated, told the Senate Interior Committee in March that 1 of the 2 dams would not be finished before August 1961. And a newspaper story reported T. E. Roach, president of Idaho Power, as confirming this date in a speech before the New York Society of Security Analysts in May.

The ODM chief told the subcommittee he acted on the basis of an April letter from Idaho Power that said both dams would be completed by December 1958. He said that if one of the projects was not finished by then, the fast writeoff certificate would become invalid.

Another ODM official, Jacob Wyokoff, head of the tax amortization division, said he was aware of the testimony before the Senate Interior Committee pointing to a 1961 completion date for one of the Idaho Power dams. But he testified he did not bring this to Mr. Gray's attention because he wanted to get word from the company itself. The utility, he said, subsequently wrote a letter saying both dams would be built by the end of next year.

Mr. MORSE. Mr. President, immediately following that insertion I ask unanimous consent that there be printed in the RECORD the article appearing in today's Washington Post, as an Associated Press dispatch.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GRAY IGNORED SEATON ON WRITEOFFS—ODM CHIEF EXPLAINS TAX CONCESSIONS ON HELLS CANYON DAMS

Director Gordon Gray of the Office of Defense Mobilization, said yesterday he ignored the opposition of Secretary of the Interior Fred A. Seaton in granting a rapid tax writeoff to the Idaho Power Co.

Gray said Seaton did not deal with the firm's compliance with regulations for obtaining the writeoff certificates, but with whether it needed them to build two dams in the Hells Canyon area between Oregon and Idaho.

SAYS REQUIREMENTS MET

Testifying before a Senate Judiciary Subcommittee, Gray said Idaho Power had met all requirements and when an applicant did this he could see no reason why it should be turned down.

Gray said the question of financial need was not one for administrative decision.

The subcommittee headed by Senator ESTES KEFAUVER, Democrat of Tennessee, is looking into the granting of the certificates permitting Idaho Power Co. to write off part of the project's cost against income taxes in 5 years, instead of the normal 20 or more. The certificates covered 65 percent of the estimated cost of more than $67 million for the Brownlee Dam and 60 percent for Oxbow Dam, estimated to cost $36 million.

SET OFF DISPUTE

ODM's action last month set off the new dispute over whether the Hells Canyon area of the Snake River should be developed as a private or Federal power project. Private power advocates won a major victory last year when the Federal Power Commission licensed Idaho Power to build three dams. However, a bill providing for a Federal Hells Canyon Dam was approved last week by the Senate Interior Committee, despite administration opposition.

Yesterday, the Supreme Court refused for a second time to review the FPC's licensing of Idaho Power. The National Hells Canyon Association had appealed, contending that ODM's tax ruling supported its contention that the projects would be a substantial cost to United States taxpayers.

ODM's ruling has been severely criticized by Members of Congress. Senator WAYNE MORSE, Democrat of Oregon, said in a TV interview Sunday night that the administration has a giveaway policy and one of its chief beneficiaries was the Idaho Power Co.

MORSE said the tax-amoritization law was created to stimulate production of needed materials only during wartime.

Seaton's views on the tax writeoff were set forth in a March 11 letter to Arthur S. Fleming, at that time ODM Director. The letter was offered to the subcommittee by KEFAUVER, who said he had obtained it from Interior Department files.

SAYS NEED NOT ESTABLISHED

Seaton wrote that at FPC hearings on the Hells Canyon dams, the Idaho Power Co. submitted its case on the basis that "it would not need the accelerated amortization" and the dams would be built without cost to the Federal Government.

"The record before the Commission is clear," he said, "that the company has never established any basis of need for the financial assistance provided by accelerated tax amortization."

When Kefauver remarked that Gray appeared to consider the letter from Seaton "irrelevant," Gray replied:

"I don't consider it irrelevant. I consider it an expression of his opinion."

An Interior Department spokesman said the arguments which Seaton had advanced were fundamentally beyond the established criteria on which ODM based its issuance of certificates.

He said the Secretary had no legal authority in the matter beyond making a recommendation "bearing on the discretion which the Director of ODM has."

Mr. MORSE. Mr. President, I should like to recommend to students in schools of journalism these two articles as a very interesting laboratory project, in comparing articles written by various wire services and editors and writers. In my opinion, the Wall Street Journal is to be complimented for the very objective and comparatively full and accurate account it wrote the Kefauver hearings yesterday, dealing with the Seaton letter, in contrast to what I think is clearly an inadequate account written by the Associated Press.

In closing my speech on this subject, I again say to the Senator from Indiana that, although he and I have engaged in a very unpleasant personal exchange, after all, each one of us owes a responsibility to the Senate. Although we can waive the rules so far as we are personally concerned, and engage in the kind of colloquy that occurred, nevertheless, I think it appropriate and proper for the two of us to enter into a gentleman's understanding here and now that we shall withdraw the statements that we made about one another, because the Senator from Indiana and I know that we are not going to change our views outside the Senate about each other.

So far as the Senate proceedings are concerned, we ought to enter into an agreement to withdraw our remarks. I make that offer to the Senator, and I might even ask him to come downstairs and have a cup of coffee with me, if he will.

Mr. CAPEHART. Will the Senator from Oregon withdraw his statements about the President of the United States?

Mr. MORSE. Not only will I not withdraw my statements about the President of the United States, but I intend to continue to make them not only on the floor of the Senate but across the country.

Mr. CAPEHART. Then I shall refuse to withdraw the statement I made, because if the Senator from Oregon feels he has a right to say what he did about the President of the United States, I do not think that anything I have said about the Senator from Oregon should be stricken from the RECORD.

Mr. MORSE. I am very proud that I am writing a chapter on the right of a Senator of the United States to criticize the head of our state. Woe betide the day in America if the time ever comes when the President of the United States is beyond criticism.

The PRESIDING OFFICER. The Chair will read the opinion of the Vice President of the United States, delivered on May 8, 1950, when a virtually identical question arose. The Chair now quotes from the ruling of former Vice President Barkley:

Rule XIX has no application to anything said about the President of the United States or anyone else except Senators. That may also be a peculiar ruling, but rule XIX has no application otherwise. No Senator can rise and object to anything anyone says about the President, the Vice President, or anyone else except a Senator, with the exception that derogatory remarks cannot be made on the floor of the Senate about the other branch of Congress.

With reference to rule XIX, regardless of the Chair's opinion of that rule, the Chair hopes it will not be offensive to suggest that he agrees entirely with the Senator from Illinois—

That was the Chair's former colleague, Senator Lucas—

and the Senator from Georgia. But the rule is there, and for a hundred years it has been interpreted as the Chair in this instance has interpreted it. It is always possible and feasible for the Committee on Rules and Administration to recommend a change in any rule that exists.

The present Presiding Officer was aware of this ruling of the Vice President. It was for that reason that he called the Senator from Indiana to order after the Senator from Indiana had made personal remarks about the Senator from Oregon, which will appear in the RECORD.

UNIONS AND INFLATION

Mr. MORSE. Mr. President, we have recently been advised that April 1957 marks the eighth straight month that the consumers price index has set a record. The price index, compiled by the Bureau of Labor Statistics of the Department of Labor, for April stood at 119.3 in comparison to 100 for average prices in 1947–49.

This is a clear symptom of an inflationary situation which should give

us pause. It should be regarded with the seriousness that it deserves. Yet, in our analysis of the situation we ought not jump prematurely to our conclusions. It is in regard to this caution, that I wish to direct the attention of my colleagues.

An example of the loose thinking that ought to be abjured may be found in pronouncements of those who will say that recent wage increases to organized labor are the fuel of this inflation. An excellent refutation, based on sound economic fact, of this position is to be found in an article entitled "Unions, Inflation, and Non-Goods" written by Mr. Ernest M. DeCicco, of the Economics Department of Loyola University, Chicago, Ill. The article appeared in the New Leader in the May 27 issue.

Mr. DeCicco, in my judgment, points out most effectively that there is no 1 to 1 correlation involved in this process.

I shall ask unanimous consent that the article in question be inserted in the body of the RECORD. First, I should like to read one or two paragraphs from the article:

Recent rises in the cost-of-living index again focus attention on wage gains by union labor. Are union-negotiated pay increases a major cause of inflation—or just another response to it? Is the union leader who gets higher pay for his members a Robin Hood or a Jesse James?

The Jesse James theory rests on the idea that unions set off the so-called wage-cost-price spiral. The theory presumes a tight relationship between four major connecting links:

1. The wage rate affects the labor cost per unit of the product.
2. Unit labor cost is an important part of the total cost of production.
3. Total production cost not only affects but determines the price charged to the consumer.
4. The price affects the number of units that can be sold—and, thus, the amount of labor needed to produce them.

I now ask unanimous consent that the entire article be printed in the RECORD as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNIONS, INFLATION, AND NONGOODS

(By Ernest M. DeCicco)

Recent rises in the cost-of-living index again focus attention on wage gains by union labor. Are union-negotiated pay increases a major cause of inflation—or just another response to it? Is the union leader who gets higher pay for his members a Robin Hood or a Jesse James?

The Jesse James theory rests on the idea that unions set off the so-called wage-cost-price spiral. The theory presumes a tight relationship between four major connecting links:

1. The wage rate affects the labor cost per unit of the product.
2. Unit labor cost is an important part of the total cost of production.
3. Total production cost not only affects but determines the price charged to the consumer.
4. The price affects the number of units that can be sold—and, thus, the amount of labor needed to produce them.

According to this theory, an impulse at an end of the chain, such as a wage increase, will be reliably transmitted through each link; the eventual result is inflation. The villain of the piece is the big union which has monopolistic power to raise wages; since big unions are associated with big corporations, their wage gains are followed by price increases and higher living costs for the consumer. Under this doctrine, the best wages are not the highest wages, but the wages that lead to full employment. Carried to its logical extreme, this means that the lower the wage the greater the number employed—because academic theorists have proved that the lower the price of anything, the more of it will be bought, and that is also true of labor.

What are the facts? In the United States, unlike Europe, wage bargaining is fractionalized. Hundreds upon hundreds of union contracts are signed each year by a wide group of autonomous unions in a large number of distinct geographical areas, different industries, and varied time settings. While the coercive force of comparison may tend to make the final contracts in such industries as steel and oil quite similar, no given union leader is really free to consider the impact of his wage bargaining on aggregate national consumer spending. Industrywide bargaining and nationwide bargaining are both rather limited, and when newspaper editorialists assert that a wage raise in the tire industry will raise tire prices and the tire workers will be no better off than before, they forget that he doesn't only buy tires.

For a union leader to consider the effects on employment in his own industry of any wage bargain he might conclude, those effects would have to be predictable and definite. In other words, there would have to be a tight chain between wage rates and labor cost, labor cost and total cost, total cost and price, price and sales and hence the volume of employment. The facts are that these links are quite loose at every stage.

To begin with, a 15-percent wage raise does not necessarily mean a 15-percent raise in the unit labor cost, as is sometimes assumed. There may be a fairly close connection between wage rates and unit labor costs in industries where a great deal of hand labor is used (such as hand-carved wooden pipes) or where piece-rates are paid (such as textiles). But, generally, labor cost per unit depends as much on productivity per man-hour as on hourly-wage scales. And productivity, in turn, depends in the long run on such factors as technology, plant organization and human efficiency, and in the short run on fluctuations in the utilization of capacity by the plant. A Chinese coolie may be paid an extremely low wage, yet the unit labor cost may be relatively quite high; that is because he has so little machinery, land and other resources to use that his output is low.

A few figures from two vital industries will show how casual is the presumed link between wage rates and labor cost per unit:

Year	Percent change—			
	Iron and steel		Rayon	
	Average hourly earnings	Unit labor cost	Average hourly earnings	Unit labor cost
1929-30	3	9	5	−9
1930-31	−10	−6	14	−29
1931-32	−3	−8	−14	−17
1932-33	−3	−10	7	−20
1933-34	19	20	22	18
1934-35	2	−4	3	6
1935-36	−1	−4	1	−6
1936-37	21	19	15	6
1937-38	2	0	5	−6
1938-39	0	−15	2	−10
1939-40	0	3	5	−8

Not once between 1929 and 1940 did average hourly earnings and unit labor cost in iron and steel move together by the same magnitude. In the last 2 years shown, when wage rates remained unchanged, labor cost went down by 15 percent in the first year and up by 3 percent in the second year. In rayon, the association was even less consistent; for 8 of the years, hourly earnings and labor cost moved in opposite directions. (In 1939–40, average hourly earnings went up by 5 percent while unit labor cost went down by 8 percent.) Cumulatively speaking, from 1929 to 1940, average hourly earnings in the iron and steel industry rose by 30 percent while labor cost per unit of steel produced fell by 2 percent. In rayon, hourly earnings climbed by 48 percent from 1929 to 1940 and labor cost fell by 61 percent. (The productivity gains in synthetic fibers were obviously of tremendous magnitude.) Approximately the same kind of information is available for other industries. Many factors besides wages affect productivity and hence labor cost.

In manufacturing, furthermore, labor cost is usually a small percentage of total cost. Unit labor cost as a percentage of value of product (a close approximation to total cost) varies from about 5 percent in tobacco manufacturing to 16 percent in automobiles and 20 percent in iron and steel. According to the Federal Trade Commission, labor cost was less than 15 percent of the sales dollar in 27 industries, between 15 and 20 percent in 25 industries, and more than 25 percent in 21 industries. In other words, if labor cost is 20 percent of the sales dollar and an article is priced at $5, total labor cost for the unit is $1. A record-breaking wage increase of 25 percent would raise total cost by 25 cents and the product would be repriced at about $5.25. According to the Jesse James theory, the union leader is supposed to predict how much less of the product will be sold at the higher price and consequently how many workers will be fired.

In fact, though businessmen are fond of relating the pricing process to total cost and the necessity for meeting competition, the American economy today is characterized by little price competition. Competition has shifted to the battlefronts of advertising, product promotion, customer services and a host of other activities unrelated to price. Many products bear a customary price (a nickel for a coke), and such prices change only infrequently. In the newspaper industry, for example, production cost has practically nothing to do with price. Most of the revenue is derived from advertisers, not newsstand sales, and both prices and ad rates and based on circulation and type of readership rather than production costs.

Yet even where cost and price are more directly related, the so-called responsibility of the union leader toward the price pattern is unclear. Should Walter Reuther accept a 10-percent wage cut at Ford if the company said the total cost of producing a car would decline by about 1.6 percent (labor cost is 16 percent)? The theory is that the wage cut would lead to a price reduction—less than $50 on a $3,000 automobile—and hence an increase in new-car sales and maintenance of full employment at the plant. Actually, no major auto company has tried to compete by lowering prices in a generation. Back in the thirties the manager of the Plymouth division told a congressional hearing that one year Plymouth prices were raised; when Ford did not follow the lead, Plymouth lost sales to Ford. The next year, Plymouth managers cut prices; this time Ford followed suit, and only the consumer benefited. The policy of live and let live without price competition was tacitly consummated, and for many years competition has been restricted to Madison Avenue channels.

Does all this mean that inexorable upward pressure on wages by unions must bring inflation? Not at all, according to the figures on some highly unionized industries:

Industry	Percent change, 1929–40 in—	
	Average hourly earnings	Unit labor cost
Agricultural implements	24	−23
Cement	23	−11
Chemicals	41	6
Cotton goods	27	−18
Glass	42	−23
Iron and steel	30	−2
Leather	22	−20
Motor vehicles	33	11
Newspapers	8	−20
Petroleum refining	50	−25
Rayon	48	−61
Tires and tubes	38	−32
Cigarettes	28	−2
Woolen and worsted	22	−11

From 1929 to 1940, average hourly earnings rose in all these industries, while unit labor cost fell in 12 of the 14 groups. In the two industries in which labor cost did go up (chemicals and motors), the gains were nominal in comparison to the wage gains.

In these important and highly unionized industries, man-hour productivity gains have been sufficient to overcome any wage advantages gained by the union. In fact, it is easy to suspect that certain firms use wage raises as an excuse to exploit consumer markets. Between 1945 and 1948, a period of rapid inflation, profits before taxes for 20 major steel companies advanced from $270 million to $884 million, a gain of 226 percent. For 9 of these companies publishing ingot production data, profits rose from $3.61 per ingot ton to $10.44, a gain of 190 percent. Wage increases over the same period barely kept pace with the cost-of-living index—a gain of less than 35 percent. Last year, the steel industry granted a wage package of about 10 percent. Since labor cost is approximately 20 percent of total cost in an efficient mill, the increase in total cost should not have exceeded 2 percent. The price of steel could have been raised from $100 to $102 a ton as an offset. The steel industry, however, proceeded to announce a price increase of $8.50 a ton.

Despite increased profits as well as higher money wages, prices of retail manufactured goods are, on the average, no higher today than they were in 1952, according to the Bureau of Labor Statistics. While such prices did rise somewhat in 1956, as a whole they fell from 1952 to 1955. In the few cases where retail prices have risen since President Eisenhower took office, the rise mainly reflects increased Federal, State, and local taxes. (This is true of gasoline, cigarettes, and alcoholic beverages.) Over the 4-year period, prices rose very slightly on such items as automobiles, toilet articles, and newspapers; there was virtually no rise at all in the whole range of clothing and apparel. On the other hand, prices declined for used cars, television and radio sets, all types of appliances, toys and sporting goods. From 1951 to 1955 the price of steel rose by 14 percent; but the prices of household appliances utilizing large quantities of steel (such as washing machines) actually declined by an average of 13 percent.

If the prices of retail manufactured goods remained relatively stable (and these are the goods produced by union labor), how does one account for the inflation? For the general cost-of-living index is up—18.7 percent higher than the 1947–49 average. Food is hardly a factor: The BLS index for food was 112.6 in February 1952 and only 113.6 in February 1957. One must seek the causes of inflation elsewhere.

The London Economist has observed that the United States manufactures more than any other nation, but is not a manufacturing country. Only one-fourth of the total labor force works in factory manufacturing. Since only 1 out of 10 workers is to be found in agriculture, the Nation is not primarily agricultural either, even though it exports large amounts of farm products. Building construction occupies only 5 percent of the workers, even though the United States builds more than any other nation.

The majority of the American labor force today is engaged in services or in distribution or transportation trades. And, as the Nation grows wealthier, increased consumption more and more takes the form of increased services—so-called nongoods.

A fundamental cause of the present inflation is the fact that, throughout these service and distribution trades, gains in man-hour productivity are relatively minimal. We have seen that wage rates in unionized manufacturing industries have increased substantially over the years, but man-hour productivity rose even faster—with the result that labor cost declined. In the service trades, on the other hand, productivity gains are next to impossible. (There has been no technological improvement in the barbershop, for example, since the invention of the clippers.) Meanwhile, in the service workers' attempts to match the income of unionized factory workers, the price of the service rises.

Indeed, the BLS figures show that most of the inflation results from price rises in the category of "services and shelter," which accounts for more than a third of the consumer dollar. This category covers a wide variety of items: Rents and prices for homes, TV and radio repair, auto insurance, mortgage interest, auto repair, medical and dental care, train and bus fares, gas and electricity, telephone, subway fares, etc. Virtually the whole list has experienced steady price inflation since 1950. From 1952 to February 1957, rent rose by about 15 percent along with an equivalent rise for doctors' fees. Personal care went up about 10 percent. Home-owner costs, utilities and housing, taken together, climbed around 9 percent. Mortgage interest zoomed up by 30 percent; radio-TV repairs by 25 percent; rail, bus, and rapid-transit fares and movie admissions rose 20 percent.

Increased expenditures on Government services also bring few productivity gains. It is hard to raise the productivity of a teacher, fireman, or policeman, and their numbers rise with our growing population. In addition, the BLS index does not include the prices paid for hotel rooms, vacation trips, or a college education. Increased leisure in recent years has added to the importance of these items, and everyone knows how these prices have gone up. Little productivity improvement appears likely in these areas.

Aggregate figures will illustrate the major change in the labor force that has been taking place in the last decade. In manufacturing, output has increased by almost 50 percent since 1947, but the number of workers went up by only 3 percent. Tremendous productivity gains made this possible. (This is the area that is heavily unionized.) The service trades have expanded dramatically over the same period. The number of bank tellers, stockbrokers, insurance salesmen, and others employed in finance rose by 38 percent; retail shop clerks and others employed in trade rose by 21 percent; Federal, State, and local government employees were up 31 percent, domestic servants 40 percent; auto mechanics, laundry workers, barbers, and a multitude of others in various services increased by 26 percent. Only such self-employed categories as lawyers, doctors, and shopkeepers, plus workers in public transportation, failed to expand their ranks.

To sum up, the early years of the Eisenhower Administration were characterized by relative price stability because, although the prices of service items were rising rapidly, the prices of food and of durable manufactured goods were both declining. Governmental attempts to raise farm income achieved some measure of success by 1956, and the price of foods rose. Durable commodities also rose slightly in price in 1956, though the gain appears to be mainly due to higher new-car quotations. Nevertheless, when all three of these components—food, durable manufactured goods, and services—move in the same direction at about the same time, the cost of living quickly reflects it, to the general consternation.

All of which presents a far more complicated picture of the inflation than that painted by adherents of the Jesse James theory. Wage raises gained by unions do not always lead to inflation, and union workers often have a hard enough time just keeping up with the rising price level. Every inflation has its own historical pattern. With regard to this one, it may be more accurate to say that the unions are acting as thermometers, recording the heat, not as the fuel sustaining it.

Mr. MORSE. Mr. President, I close by asking the personal attention of the Senator from Indiana. I want the Senator from Indiana to have notice that I intend to strike from the RECORD the personal reference which I made to him in the debate, because I may say that although we had a rather hot debate, I do not intend to leave in the RECORD my personal reflections upon the Senator from Indiana, and I give him notice of that fact.

Mr. CAPEHART. Mr. President, since the Senator from Oregon is so anxious to strike from the RECORD the colloquy here tonight, I do not know that I have any particular objection to his doing so. The suggestion has come from him, not from me.

I wish the Senator from Oregon would apologize to the President of the United States for what I think was unjustly said by him about the President.

I have no objection to the request of the Senator from Oregon, and I will instruct the Official Reporters to strike from the RECORD any personal references I made to the Senator from Oregon, if the Senator is anxious that that be done.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield.

Mr. MORSE. The Senator will recall that in the course of the debate I made one reference to the Senator from Indiana which I think was uncalled for. It is that statement I will strike from the RECORD. The rest of the colloquy will stand. I regret that on the floor of the Senate I expressed that personal view.

Mr. CAPEHART. What specific thing did I say to the Senator from Oregon——

Mr. MORSE. I shall not even repeat on the floor of the Senate what I said, but I shall be glad to repeat it to the Senator in the cloakroom. It was simply one characterization I made of the Senator from Indiana, and I intend to strike it from the RECORD. The rest of my part of the colloquy will stand.

With regard to the request for an apology to the President of the United States, I will, of course, make no apology

to the President of the United States, because what I have said about his course of action in regard to the matter of fast tax writeoffs and what I said last Wednesday in regard to what I consider to be his other acts of political immorality must be made clear to the people of the country, and I intend to make it clear.

Mr. CAPEHART. I said I was willing to strike from the RECORD what I said about the Senator from Oregon. But I am not particularly proud, as a Member of the Senate, that remarks can be made about the President of the United States on the floor of the Senate which one cannot make about other Senators. I think that is an unfair rule. I think it is unjust. I think it is unwarranted. I think it is a rule which ought to be changed.

There is no question in my mind that the Senator from Oregon knew exactly what he was saying and doing, and that he knew what the consequence would be.

Mr. MORSE. Mr. President, will the Senator yield for a brief statement?

Mr. CAPEHART. I yield.

Mr. MORSE. I think the Senator from Indiana is completely overlooking the historical significance of the separation of powers. I think the Senator from Indiana is overlooking the fact that this country was born out of a great fear of executive power. I think the Senator is overlooking the fact that when the Senate of the United States was created, it was with one intention, namely, that it should be a great parliamentary body in which untrammeled free speech would prevail; and that when a Senator believed a President or anyone else in the executive branch of the Government was deserving of severe criticism, such Senator should be free to walk upon the floor of the Senate and make the criticism and then let his constituents be the judge of his course of action. That is the history of this great guarantee of freedom in this country, and I do not propose to have it changed.

Mr. CAPEHART. I can well understand criticizing the President if he is a poor administrator. I can well understand one saying that the President is careless. I can well understand a person saying that the President is not capable, able, or sufficiently intelligent to be the President of the United States.

But when the press has been filled, as it has been for many weeks, with accounts of the conduct of a man by the name of Beck; when the man was under indictment for income tax evasion, when he has taken the fifth amendment, I do not know how many times; when a committee of the Senate has brought out all these things about him—I am not saying whether they were true or whether they were not true; I only know what was brought out—and then a Senator uses the name of the President of the United States in the same sentence and in the same breath with that of Beck, and compares the two men, that, in my opinion, is going beyond what I call simple, common, downright decency.

I can well understand that a man has the right to criticize the President. But this was a situation in which the newspapers had carried complete stories of what was transpiring, a situation in which possibly no person in America had failed to read about the taking of the fifth amendment by Beck and the fact that he was under indictment. The impression had been left throughout the Nation—it could not help being left—that the President of the United States was being compared in the same breath with that kind of man.

Since the Senator from Oregon says he did not say what the press reported him saying, I honestly feel that he should apologize to the President of the United States and explain to the people of America that he did not in any way intend to compare the conduct of the President with the conduct of Beck.

The PRESIDING OFFICER. If the Senator from Indiana and the Senator from Oregon choose to withdraw the personal remarks which they made about each other, the Chair will direct the RECORD to read approximately as follows:

During the course of the debate, the Senator from Indiana [Mr. CAPEHART] and the Senator from Oregon [Mr. MORSE] made certain personal remarks about each other which were later withdrawn.

It was during the course of those remarks that the Presiding Officer called the Senator from Indiana to order for a violation of rule XIX.

The Chair will then direct that his quotation from the ruling of Vice President Barkley, setting the precedent for this ruling, be set forth in the RECORD.

Mr. CAPEHART. I object to the Chair taking upon himself stating for the RECORD that the Chair called the Senator from Indiana to order. If the Chair is going to place blame on me in that respect, then I shall insist that the RECORD remain just as it is, because I do not think it is fair to do otherwise.

Will the Chair also state for the RECORD that the Senator from Oregon asked or made the suggestion that the remarks be eliminated from the RECORD?

Mr. MORSE. I should be delighted to have the RECORD so show.

Mr. HUMPHREY. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator from Oregon has not taken his seat. Has he yielded the floor?

Mr. MORSE. Yes, I have yielded the floor. The Senator from Indiana has the floor.

Mr. HUMPHREY. Mr. President, the point of order I wish to raise is simply to the effect that the Presiding Officer, as a Senator, always preserves his rights as a Senator to make comments, even though he is in the chair as the Presiding Officer.

There was a matter of some delicacy confronting us this evening as to how to proceed. I think the ruling ought to be made clear.

I again suggest that since the Presiding Officer has read the ruling made by Vice President Barkley in 1950, we abide by that ruling now. I have been in a rather delicate position myself as the acting majority leader, in light of the fact that most of our colleagues are away, and I have not wanted to exercise what are obviously the privileges and the rights to apply rule XIX, because I am of the opinion that the suggestion which has been made recently is much more desirable; namely, that two able Senators are able to expunge from the RECORD the comments which they feel should be expunged, that they have agreed upon that, and that we then proceed in order with the business of the Senate.

The PRESIDING OFFICER. The Chair desired to point out that the reason for calling the Senator from Indiana to order should not be left hanging in the air without apparent justification, that the RECORD should show that the ruling was made in accordance with rule XIX, and that the precedent established by Vice President Barkley should be printed in the RECORD following the statement of the ruling of the Chair.

Mr. CAPEHART. What was said by the Senator from Indiana to which the Senator from Oregon or the Chair took exception?

Mr. MORSE. So far as I am concerned, there is nothing which the Senator from Indiana said that he is not perfectly welcome to leave in the RECORD.

So far as I am concerned, I made an insulting statement about the Senator from Indiana which I do not wish to leave in the RECORD, because I regret the statement.

If the Senator from Indiana wishes to leave in the RECORD any statement he made about the Senator from Oregon, that is his privilege. I only ask the courtesy of the Senator from Indiana to permit me to delete from the RECORD the statement I made about the Senator from Indiana, which I regret.

Mr. CAPEHART. Mr. President, I wish the Senator from Oregon would be as big and as noble in respect to the statement he made about the President of the United States.

Mr. MORSE. I was going to ask the Senator from Indiana to yield in that connection, because I wish to say what I think his trouble is in regard to the statement I made. He simply does not agree with my judgment. I happen to think it is as immoral for a President of the United States to be a party to an ODM decision which takes millions of dollars of interest money out of the pockets of the taxpayers and gives it to the Idaho Power Co., as I think it is for Dave Beck to take thousands of dollars out of the pockets of the teamsters. The Senator from Indiana and I never will agree on that.

Mr. CAPEHART. But where was the Senator from Oregon when the Pacific Light & Power Co. of Portland was given a $26,170,000 tax-free certificate?

Mr. MORSE. I was vigorously criticizing it.

Mr. CAPEHART. And where was the Senator from Oregon a little later, in the case of another tax-free certificate amounting to $19,620; and where was the Senator from Oregon when I believe approximately 3 or 4 dozen power companies in Oregon were given exactly what the Idaho Power Co. was given in the Hells Canyon case? Was the Senator from Oregon as much concerned then as he is now about the Hells Canyon matter; or is his present position taken be-

cause the Hells Canyon matter is in the public print and because he lost the Hells Canyon decision on the floor of the Senate, and then lost the court decision?

Why was not the Senator from Oregon just as much concerned about all those other quick tax writeoffs, which began in 1950, and amount to, it seems to me—I do not have time to figure the total at this time, but it seems to me that in the case of the State of Oregon the total comes to perhaps as much as $200 million or $300 million?

Mr. MORSE. I was vigorously criticizing them, both over the radio in my State and on the floor of the United States Senate, for which I was roundly criticized by the reactionary press of my State. I am sure that tomorrow I will collect those speeches for the information of the Senator from Indiana, and will put them into the RECORD.

Mr. CAPEHART. Did the Senator from Oregon refer to President Truman at that time in an unkindly way, when his Office of Defense Mobilization was doing that?

Mr. MORSE. I think in one of my speeches I said it was an unconscionable giveaway.

Mr. CAPEHART. But when President Truman was doing that, the Senator from Oregon did not compare him with any such person as the one he mentioned recently, did he?

Mr. MORSE. The Senator from Indiana had better examine the dates when those were given.

Mr. CAPEHART. I do not know the exact dates.

Mr. MORSE. The Senator from Indiane will find that they were given during this administration.

Mr. CAPEHART. I cannot tell.

Mr. MORSE. I am telling the Senator from Indiana that that is so.

Mr. CAPEHART. Did the Senator from Oregon become excited about them?

Mr. MORSE. When the Senator from Indiana examines the speeches I made, as he will be able to do when I put them into the RECORD tomorrow, he will find that they are not complimentary.

Mr. CAPEHART. At least one privilege a Senator has is in not reading speeches he does not want to read.

Mr. MORSE. I do not think the Senator from Indiana should be seeking to leave the impression that I did not criticize them, if he does not read my speeches.

Mr. CAPEHART. My question is: Did the Senator from Oregon say as unkind things about the President in office at that time as he said about the present President of the United States, in connection with the other matter?

Mr. MORSE. I vigorously protested the post-Korean policy. I am sorry the President did not learn, but continued to engage in that practice.

Mr. CAPEHART. Will the Senator from Oregon agree with me that the Congress passed the act of 1950?

Mr. MORSE. Surely, the Congress passed the Act, but Congress did not intend to have it perverted in such a manner.

Mr. CAPEHART. That is a matter of personal opinion.

Mr. MORSE. I have been expressing my personal opinion.

Mr. CAPEHART. But the criteria in connection with the certificate given to the Idaho Power Co. were the same as the criteria used in arriving at the decision to award the other certificates.

Mr. MORSE. I never thought Secretary Seaton would agree with me so quickly; but he seems to share my point of view that it was a bad action, in the case of the Idaho Power Co. and not in conformity with the criteria as his letter, which already appears in the RECORD will show.

Mr. CAPEHART. There, again, if the Senator from Oregon will read the letter of the Secretary, and will analyze it, he will find that that situation is somewhat the same as the one about which he was complaining, when he said he was misquoted.

Furthermore, he said this particular job will not be completed until 1961. Does the Senator from Oregon not know that the certificate will become void if the job is not completed by 1958, and that then the company will lose the certificate?

Mr. MORSE. But in the meantime, the company will have collected all the advantages of the fast tax writeoff.

Mr. CAPEHART. I wish to say to the able Senator from Oregon that the writeoff is 20 percent a year for 5 years.

Mr. MORSE. Yes, and the company will get that much for every year it is allowed to get by with it.

Mr. CAPEHART. But the certificate of necessity will not begin until the project is finished.

Mr. MORSE. That is just where the Senator from Indiana is completely wrong.

Mr. CAPEHART. I am not wrong.

Mr. MORSE. It begins immediately after it is granted. The company will write it off, on its next year's tax report. What does the Senator from Indiana suppose the company wants it for? The company wants it in order to get it to help it build the project. That is why the company wants these millions of dollars of hand-outs—namely, to help it build the dams, at the cost of the taxpayers.

Mr. CAPEHART. Mr. President, the Senator from Oregon was never more mistaken in all his life, because the certificate cannot begin until the project is finished and until the total cost is known. I challenge the Senator from Oregon to prove that that statement is not true.

Mr. MORSE. Mr. President, I believe in doing my book work, and I will do it; and I will raise the question tomorrow.

Mr. CAPEHART. Mr. President, I have been engaged in business. I am sure I am right about tne matter; I will be amazed if I am wrong. It is impossible to obtain a certificate for a writeoff before the job is completed and before the cost of the materials used is known.

REPORT OF ADVISORY BOARD OF THE POST OFFICE DEPARTMENT

Mr. DIRKSEN. Mr. President, I ask unanimous consent to have printed in the RECORD a report of the Advisory Board of the Post Office Department dated May 27, 1957.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

ADVISORY BOARD,
POST OFFICE DEPARTMENT,
Washington, D. C., May 27, 1957.

THE PRESIDENT,
The White House.

DEAR MR. PRESIDENT: The undersigned public members of the Advisory Board for the Post Office Department, appointed by you, are gravely concerned that during a time of widespread prosperity and full employment this Nation may be faced with a drastic curtailment of its accustomed mail service starting July 1.

The crisis is a budgetary one. It has no relation to the problem of postal rates which has been under discussion for some time.

The use of the mails is today the highest it has ever been. But none of the costs of operating the Post Office Department can be paid for out of revenues received from the service rendered. All revenues go to the Treasury Department. The Post Office is completely dependent for funds to cover its costs of operation on the money appropriated each year by the Congress. The increased number of man-hours required to handle this increase in mail, the increased costs for transportation, even the cost of printing the stamps, must all be paid for out of congressional appropriations.

We write you, Mr. President, because we believe that in the emotional atmosphere now surrounding budgetary action by the Congress, it may be necessary for you to call upon the American people to express themselves if they wish to save the mail service as they know it.

The Post Office budget supports a constant daily service touching the life of every person in the United States.

If the Post Office does not get the money it now requires, it is faced—by the Comptroller General's interpretation of the Anti-Deficiency Act—with the necessity of curtailing services on July 1 in order to live during the next 12 months within the limits of the funds appropriated by the Congress. There is no other choice.

This Board has reviewed the operating costs of the Post Office and finds that approximately 94 percent of its expenditure is related to mail volume, 78 percent being for wages and 16 percent for transportation. Two percent more goes for rents, utilities, and communication.

By increased efficiency, the Department is now using about the same number of employees as in 1952 despite the large increase in the volume of mail since then. It is paying $50 million less comparatively for transporting mail now that it paid 4 years ago.

At this time costs can only be further reduced by such drastic actions as: (1) Reducing the number of days per week in which mail delivery and other postal service is given; (2) closing thousands of post offices; (3) arbitrarily reducing the volume, and possibly types, of mail handled.

The Post Office budget for the 1958 fiscal year, which begins July 1, 1957, asked for an appropriation of $3,250,000,000. This included for the first time an additional $167 million required to cover mandatory expenses voted by the Congress for postal-employee benefits.

The Congress has cut this budget to the point where the Post Office will have less money next year than it has for this year—and yet it must deliver approximately 2½ billion more pieces of mail.

Prior to this action the Postmaster General had advised the Congress that the Post Office would handle 61.1 billion pieces of

mail in the fiscal year beginning July 1, 1957, the greatest volume in its history. He pointed out that this increase in mail volume was due to the happy facts of great prosperity, high level of employment, and business activity, and a recordbreaking number of new homes, principally in suburban areas.

This phenomenal growth in mail—far beyond that estimated when the budget was originally prepared a year ago—is the main reason the Post Office needs approximately $140 million more than the 1958 reduced appropriation recently voted by the Congress.

We believe the American people will not be satisfied with a part-time postal service.

We yield to no one in our desire for economy and efficiency in government, but we believe care must be taken, lest, under the guise of economy, irreparable harm be done to our country's needs. The fact is that a reduction in the funds available for the operation of the Post Office must be accompanied by a reduction in service. We do not believe the American people want their mail service curtailed.

Possibly other Government departments can sometimes attain reductions in costs by curtailing, postponing, or eliminating certain programs. But the customers of the Post Office—the American people—determine the size of its activity. It charges fixed fees for specific services. Traditionally it has been expected to carry and deliver our people's mail no matter how much the volume increased.

Not only does the Post Office Department need this extra money now to render accustomed mail service, but the Congress should not ignore the long-range program of the Postmaster General to modernize postal equipment, buildings, and methods so mail service can be improved and unit costs reduced.

In conclusion, Mr. President, the undersigned public members of your Advisory Board for the Post Office Department believe we must call this crisis to the attention of the American people. The Post Office must have the funds it requires and must have them before July 1, 1957, if it is to avoid drastic and unavoidable curtailments in the mail service which would seriously affect the public welfare.

Respectfully yours,

JOHN S. COLEMAN.
JAMES H. S. ELLIS.
ROWLAND JONES, JR.
JACK R. HOWARD.
RICHARD J. GRAY.
CHARLES M. WHITE.

ADVISORY BOARD FOR THE POST OFFICE DEPARTMENT

The Advisory Board for the Post Office Department was established on August 20, 1949, by Reorganization Plan No. 3 of 1949, title 5, United States Code.

The Postmaster General is its Chairman and the Deputy Postmaster General the Vice Chairman. The Board has seven members representative of the public who are appointed by the President by and with the advice and consent of the Senate.

Present public members of the Board, with dates of their appointments, are:

Richard E. Berlin, president, Hearst Corp., New York, N. Y., appointed July 8, 1953.

John S. Coleman, president, Burroughs Corp., Detroit, Mich., appointed July 8, 1953.

James H. S. Ellis, president, Kudner Agency, Inc., New York, N. Y., appointed December 15, 1953.

Richard J. Gray, president, Building and Construction Trades Department, AFL–CIO, Washington, D. C., appointed July 8, 1953.

Jack R. Howard, president, Scripps-Howard Newspapers, New York, N. Y., appointed December 7, 1955.

Rowland Jones, Jr., president, American Retail Federation, Washington, D. C., appointed July 8, 1953.

Charles M. White, chairman of the board, Republic Steel Corp., Cleveland, Ohio, appointed July 8, 1953.

MAY 27, 1957.

ADDITIONAL EXECUTIVE REPORT OF A COMMITTEE

As in executive session,

The following additional favorable report of nominations was submitted:

By Mr. HILL, from the Committee on Labor and Public Welfare:

George E. Mitchell, and sundry other candidates, for personnel action in the Regular Corps of the Public Health Service.

HOUSING ACT OF 1957—AMENDMENTS

Mr. MORSE. Mr. President, on behalf of myself, my colleague, the junior Senator from Oregon [Mr. NEUBERGER], the Senator from Pennsylvania [Mr. CLARK], and the Senator from Montana [Mr. MURRAY], I submit amendments, intended to be proposed by us, jointly, to the bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes, and ask that they be printed and lie on the desk until the beginning of the session tomorrow as the pending amendment. I ask unanimous consent that the amendments be printed in the RECORD.

The PRESIDING OFFICER (Mr. DOUGLAS in the chair). The amendments will be received, printed, and lie on the table, and, without objection, will be printed in the RECORD.

The amendments, submitted by Mr. MORSE (for himself and other Senators), are as follows:

On page 42, between lines 9 and 10, insert the following:

"SEC. 401. (a) Section 10 (1) of the United States Housing Act of 1937 is amended to read as follows:

" '(1) Notwithstanding any other provision of law, the Authority may enter into new contracts for loans and annual contributions for not more than 35,000 additional dwelling units during fiscal year 1957 and for not more than 200,000 additional dwelling units during each of the fiscal years 1958 and 1959: *Provided*, That any balances of this authorization not utilized in any such year shall be available in succeeding years: *And provided further*, That no new contracts for loans and annual contributions for additional dwelling units in excess of the number authorized in this sentence shall be entered into unless authorized by the Congress.' "

On page 42, line 10, strike out "Sec. 401. (a)" and insert in lieu thereof "(b)."

On page 42, line 24, strike out "(b)" and insert in lieu thereof "(c)."

On page 43, line 22, strike out "(c) (1)" and insert in lieu thereof "(d)."

On page 44, strike out lines 3 through 11.

On page 44, line 12, strike out "(d)" and insert in lieu thereof "(e)."

On page 44, line 16, strike out "(e)" and insert in lieu thereof "(f)."

Mr. LONG submitted amendments, intended to be proposed by him, to House bill 6659, supra, which were ordered to lie on the table and to be printed.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, May 28, 1957, he presented to the President of the United States the following enrolled bills:

S. 93. An act for the relief of Dominic Steinhauser (Hiroshi Tsuruda);

S. 687. An act for the relief of Stylianos Lecomples;

S. 696. An act for the relief of Alecos Markos Karavasilis and his wife, Steliani Karavasilis; and

S. 797. An act for the relief of John Leary.

ADJOURNMENT UNTIL 10:30 TOMORROW

Mr. HUMPHREY. Mr. President, if there is no further business to come before the Senate at this time, I move that the Senate do now adjourn.

The motion was agreed to; and (at 10 o'clock and 6 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously entered, until tomorrow, Wednesday, May 29, 1957, at 10:30 o'clock a. m.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 28 (legislative day of May 27), 1957:

DEPARTMENT OF JUSTICE

J. Lee Rankin, of Nebraska, to be Solicitor General of the United States.

ASSISTANT COMMISSIONER OF PATENTS

Maurice Augustus Crews, of Pennsylvania, to be an Assistant Commissioner of Patents.

UNITED STATES MARSHALS

William B. Somers, of North Carolina, to be United States marshal for the middle district of North Carolina for a term of 4 years.

Albert W. Saegert, of Texas, to be United States marshal for the western district of Texas for a term of 4 years.

POSTMASTERS

ALABAMA

James A. Boatwright, Abbeville.
Prince W. Cofield, Bexar.

ARKANSAS

Curtis F. Mason, Alma.
Herschel A. Webb, Beebe.
Henry L. Clark, Black Rock.
Mack Hopper, Glenwood.
Ralph A. Morrison, Nettleton.

CALIFORNIA

Boyden J. Hammond, Vista.

FLORIDA

Fred Wagner, Tice.

GEORGIA

Emory H. Camp, Monroe.

KENTUCKY

Grant Phillips, Jr., Pikeville.

LOUISIANA

John W. Lewis, Jr., Alexandria.
Alex M. McCabe, Jones.

MICHIGAN

Roland W. Reese, Birmingham.
Theodore H. Lyons, Eaton Rapids.
Charles H. Hinman, Hastings.
Bert O. Hobolth, Keego Harbor.
Cole L. Neumann, Rochester.
Albert A. Hebda, Wyandotte.

MISSOURI

William E. Wise, Aurora.
Theodore R. Regenhardt, Cape Girardeau.
Alfred W. McKenzie, Parma.
Leroy J. Peden, Weston.

MONTANA

Loyd E. Shay, Laural.

NEW YORK

Leslie Duncan Olmsted, Pleasantville.

OREGON

LaVelle E. Partlow, Irrigon.

PUERTO RICO

Pablo Pedraza, Barranquitas.
Eduardo Melendez Santiago, Salinas.

TENNESSEE

Mary N. Montgomery, Seymour.
Ross C. Hopkins, Sneedville.

HOUSE OF REPRESENTATIVES

TUESDAY, MAY 28, 1957

The House met at 12 o'clock noon.

Rabbi Mordecai L. Brill, Temple Beth Israel, Philadelphia, Pa., offered the following prayer:

Eternal God, Thou who hast been with all the generations of man—be with us as we strive to bring closer to fruition the divine blueprint which Thou hast given us in sacred Scripture.

Humbly we would ask Thy guidance as we approach each day the ever-growing complexities of the modern world. We are humbled and chastened by the heavy burdens of leadership which devolve on our shoulders. We know that the welfare and well-being of millions lie within the scope of our work, and to Thee we turn for guidance.

Thou hast given us a goodly portion, a precious heritage. "Our lines have fallen in pleasant places." Our beloved land is one of beauty and bounty, of freedom and plenty. With grateful hearts we ask Thy help in keeping it ever thus.

Guide our deliberations at all times so that no pettiness of spirit or selfish interest mar our endeavors. Grant us wisdom and understanding together with constant awareness of the problems of men and nations. May our work lead to the ending of war and hunger throughout the world, to the end of strife and misunderstanding both within and without our borders. Keep us constantly aware that we are our brother's keeper. May the day come speedily when men will know bread and freedom, security and happiness as their daily portion.

Above all, we would ask Thy help in replacing complacency with concern, indifference with dedication to the cause of freemen everywhere.

As we approach Memorial Day, may its meaning impress itself upon our hearts and minds so that we make our country, through its elected representatives, a mighty force for justice and righteousness in the assembly of nations bringing closer the words of the Hebrew prophet, "Nation will no longer lift up sword against nation, neither will they learn war any more."

And help us to live in accordance with the words of Thy inspired seer: "It hath been told thee, O man, what is good and what the Lord doth require of thee: To do justice, to love mercy, and to walk humbly with thy God." Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. McBride, one of its clerks, announced that the Senate agrees to the amendments of the House to bills of the Senate of the following titles:

S. 93. An act for the relief of Dominic Paul Steinhauser (Hiroshi Tsuruda);

S. 687. An act for the relief of Stylianos Lecomples;

S. 696. An act for the relief of Alecos Markos Karavasilis and his wife, Steliani Karavasilis; and

S. 797. An act for the relief of John Leary.

MEMBERS OF COMMITTEE TO ESCORT THE CHANCELLOR OF THE FEDERAL REPUBLIC OF GERMANY INTO THE HOUSE CHAMBER

The SPEAKER. The Chair appoints as members of the Committee to Escort the Chancellor of the Federal Republic of Germany into the Chamber the gentleman from Massachusetts, Mr. MCCORMACK, the gentleman from Massachusetts, Mr. MARTIN, the gentleman from Illinois, Mr. GORDON, and the gentleman from Illinois, Mr. CHIPERFIELD.

RECESS

The SPEAKER. The House will stand in recess.

Accordingly (at 12 o'clock and 4 minutes p. m.), the House stood in recess.

VISIT OF HIS EXCELLENCY KONRAD ADENAUER, CHANCELLOR OF THE FEDERAL REPUBLIC OF GERMANY

The Doorkeeper (at 12 o'clock and 30 minutes p. m.) announced His Excellency, Konrad Adenauer, Chancellor of the Federal Republic of Germany.

The Chancellor of the Federal Republic of Germany, escorted by the committee of Representatives, entered the Hall of the House of Representatives, and stood at the Clerk's desk. [Applause, the Members rising.]

The SPEAKER. Members of the House of Representatives, it is our high privilege today to welcome into this Chamber one of the great leaders of the world, the leader of a great, a proud, and a free people; and I might say people who are determined to remain free. [Applause.]

I have the great honor of presenting to you His Excellency, the Chancellor of the Federal Republic of Germany, Konrad Adenauer. [Applause, the Members rising.]

Chancellor ADENAUER. Mr. Speaker, Members of the House of Representatives, I am deeply conscious of the honor of speaking before you, the elected representatives of the strongest and freest Nation on earth; and with all my heart I thank you for this distinction. I know that I do not stand here for myself alone, but for all my countrymen. What I am going to say, therefore, is meant as a message from them to the great American people.

The Federal Republic of Germany is young—not quite 8 years old. It is still incomplete and will remain incomplete as long as reunion with the 17 million Germans living in the Soviet-occupied zone has not been effected. We have been sovereign for 3 years; only since then have we been the masters of our political decisions.

When totalitarian national socialism collapsed, after having inflicted unspeakable suffering on the world and the German people, it left chaos behind. There were millions of dead and crippled, 10 million people who were expelled from their ancestral homes in the German East, burned cities, industries and lines of transportation destroyed, the economy ruined, an administration functioning on an emergency basis only, desperate human beings and, above all, a younger generation dangerously exposed to pernicious nihilism.

The German people went to work, supported in their first steps by the western occupation powers who gradually became our allies and friends. They reconstructed their homes, factories, stores, highways, and railroads. The German people worked hard and with self-discipline. They received invaluable help from outside sources, both public and private, and especially from the American people. The great work of the Marshall plan, undertaken 10 years ago, will never be forgotten by Europeans. It is my heartfelt desire at this hour to express our gratitude for all of this.

Consciously and deliberately, rejecting all totalitarian thoughts and aims, we began to erect our Federal Republic in that part of Germany in which freedom and human rights could be reestablished; we created this Republic on the unshakable foundation of democracy—with the inspired words of Abraham Lincoln in mind—"Government of the people, by the people, for the people." Freedom, respect for the inalienable rights of the individual and the principle of the rule of law—this is the credo of our constitution. [Applause.] In this respect, we could revert to the best traditions of our people. Our economy was organized on the principle of competitive free enterprise and social justice. We call this economic system the social market economy, and it combines free enterprise with social responsibility. The economic consequences of war destruction we endeavored to distribute equitably on many shoulders, in our thoroughgoing equalization-of-burdens law.

The greatest problems, however, were posed for us by the world around us; that is, the international situation. The world, of which our new Federal Republic had to become a part, was divided into two camps. This situation confronted our people with the most important decision it has ever had to make. Without hesitation we decided—and this is the meaning of the first parliamentary elections in 1949—for freedom against slavery, for the dignity of the individual against the collective mind, for rule by law against arbitrary dictatorship. [Applause.]

Since 1953, there has not been a single Communist in our freely elected Parliament. [Applause.]

In repeated decisions of their own choice, the people of the Federal Republic by a large majority have confirmed

that our nation constitutes an inseparable part of the free world. The basic expression of this attitude is our allegiance to the unity of Europe. Therefore, we became a member of the Strasbourg Council of Europe and the OEEC. We participated in the creation of the European Coal and Steel Community, in the attempt to create a European Defense Community and a European Political Community, and we hope that the Common Market and Euratom will soon be ratified by the parliaments of all six countries concerned. We have participated in all these works knowing that they mean an indissoluble bond to the world of freedom.

As early as 1948, when our constitution was drafted by the Constituent Assembly—the Parliamentary Council under my presidency—we made a provision whereby parts of our sovereignty could be transferred by a simple law to a European community. This was a renunciation of the concept that national sovereignty is still a principle suitable to the establishment of a political order in Europe. This principle has cost Europe dearly in the many wars of the past.

With the free world we share the dangers which threaten it, dangers to peace. As a country whose very arteries are now cut—by the Iron Curtain—we are vividly aware of these dangers. Therefore, we need safeguards. We find these safeguards within the powerful North Atlantic alliance whose main support is the moral, political, economic and military strength of the United States. NATO, in accordance with the principles of the United Nations, is an instrument for the preservation of freedom. The Western World created it after the Soviets almost completely paralyzed the security mechanism of the United Nations which had been devised with so much care and idealism. In our strenuous efforts to make our contribution to the military strength of the alliance, we, too, have nothing else in mind but the defense of our liberty. On my word before God, nobody in Germany plays with the idea of using force or war, and this includes the use of force in the question of German reunification which we desire so ardently. [Applause.] Still fresh in our memory is the horror of the nights of bombing during the Second World War, and the terrible devastation of our country.

That is why in our sincere love for peace we follow with such acute attention and sympathy the efforts of your Government by an overall controlled disarmament to diminish the danger of war. These efforts, coupled with elimination of the causes of tension in the world—characterized, most of all, in defiance of reason, justice, and morality, by the division of my country and its courageous capital, Berlin—must in the end give to mankind the security for which it longs and to which it is entitled in order to live according to its true destiny, to the highest principles of humanity. Without real effort, however, and without the sincere cooperation of the free peoples, we know that this objective will never be attained.

These are only the most essential facts and motives that may help you to understand us—that is, what we are and how we act. Let me attempt to sum up with a statement that gives me much pleasure:

The understanding and agreement—I daresay the cordial friendship—that exists today between the American and the German people is not the product of an accidental coincidence of transient interests. It rests on the common ground of profound convictions. It rests on the only power that moves free human beings to unite their destinies lastingly—it rests on confidence. The German people trust in you. Preserve your trust in them. This I ask of you. [Applause, the Members rising.]

AFTER RECESS

The recess having expired at 1 o'clock and 30 minutes p. m., the House was called to order by the Speaker.

Mr. TRIMBLE. Mr. Speaker, I ask unanimous consent that the proceedings had during the recess be printed in the RECORD.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

DEPARTMENTS OF STATE, JUSTICE, THE JUDICIARY AND RELATED AGENCIES APPROPRIATIONS, 1958—CONFERENCE REPORT

Mr. ROONEY. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill (H. R. 6871) making appropriations for the Departments of State and Justice, the judiciary, and related agencies for the fiscal year ending June 30, 1958, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

CALL OF THE HOUSE

Mr. MASON. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently no quorum is present.

Mr. MAHON. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 89]

Adair	Eberharter	Kearney
Andresen, August H.	Forrester	Kee
Barrett	Garmatz	Kelley, Pa.
Baumhart	Granahan	Kilburn
Beamer	Grant	LeCompte
Blatnik	Green, Pa.	McConnell
Blitch	Gubser	McGovern
Bowler	Gwinn	McMillan
Buckley	Hays, Ark.	Mailliard
Byrd	Hays, Ohio	Miller, Md.
Byrne, Pa.	Healey	Montoya
Celler	Hemphill	Morris
Chelf	Hillings	Murray
Chudoff	Hoeven	Natcher
Cole	Holtzman	Perkins
Dawson, Ill.	James	Powell
Dellay	Jenkins	Preston
	Jennings	Rains
Sieminski	Van Pelt	Wolverton
Siler	Vinson	Zelenko
Spence	Vursell	
Teller	Watts	

The SPEAKER. On this rollcall 368 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1958

Mr. MAHON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 7665) making appropriations for the Department of Defense for the fiscal year ending June 30, 1958, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 7665, with Mr. KEOGH in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday the Clerk had read down to and including line 9 on page 3 of the bill. If there are no amendments at this point, the Clerk will read.

The Clerk read as follows:

EMERGENCY FUND

For transfer by the Secretary of Defense, with the approval of the Bureau of the Budget, to any appropriation for military functions under the Department of Defense available for research and development, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation to which transferred, $85,000,000 and in addition not to exceed $50,000,000 to be used upon determination by the Secretary of Defense that such funds can be wisely, profitably, and practically used in the interest of national defense and to be derived by transfer from such appropriations available to the Department of Defense for obligation during the current fiscal year as the Secretary of Defense may designate.

Mr. SCRIVNER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time in order that I may answer some questions that have been asked me, questions which may be in the minds of other Members but particularly newer Members of the House, and that is the steps of procedure followed in order to arrive at the amount to be allowed the Department of Defense.

Now, it should be recognized that at the very outset the beginning of these requests starts clear down on a local level perhaps 18 months or more before they come to us. Then each one of the Departments, the Army, the Navy, and the Air Force, prepare and present their requests to the Secretary of Defense. He reviews them, and then, finally, when the Office of the Secretary of Defense arrives at the figure there, it is forwarded to the Bureau of the Budget. Then the Bureau of the Budget, having reviewed these figures, finally incorporates them in what comes to us as the President's budget message for these sums now before you.

Immediately after the President's budget is received this request for funds is sent to the Subcommittee on Defense Appropriations, a 13-man subcommittee of the full Committee on Appropriations of 50. As you have been told, we started our hearings in January, and we just concluded them 10 days ago. Our hearings are contained in a stack of 5 volumes, including 7,000 pages, and as much more testimony was taken secretly or off the record. Before our subcommittee there came the top military and civilian officials of the Department of Defense. We, in turn, have now accepted our responsibility. We have concluded our hearings. We have written our report and recommendations. We have made our report to the full committee of 50 members. They, in turn, have acted and this bill is now before the House of Representatives.

When we conclude, I hope tomorrow, the bill as we pass it will be sent to the other body, the Senate. But there the procedure is different. They do not have the full and complete hearings that we have, and have held for 4½ months. The military witnesses go to the Senate under a process which they call reclama. According to Webster that merely means a complaint. In other words, they take the bill as we have passed it, and go before the Senate Committee on Appropriations and complain about the cuts or reductions that the House of Representatives has made. They say nothing whatsoever about any other section of the bill nor is there any statement concerning sums that may be a little "plus." They say nothing about that. They merely go before the Senate Committee on Appropriations and make a reclama on the very items that we have reduced. If the defense has a good case, they can prove their complaint.

Then, of course, the Senate committee reports, and the bill goes to the floor of the Senate. There they take up the bill pretty much as we do here. Then, when the Senate passes its bill, if their figures are different, if there is any difference between the House figures and the Senate figures, there is a conference. The conferees discuss the differences and finally work things out by compromise and get a result between the figures of the House and those of the Senate. That is reported back to each body as a conference report for the approval or rejection by the House of Representatives.

It should be clearly understood that this is not the last Department of Defense appropriation bill that this House of Representatives is going to pass. We meet again in January, and if by chance we have reduced more than we should have, the military can come in and tell us what effect it has had. They will then have had 6 months of experience under this appropriation bill, and if we have cut too deeply they can come in and point out facts and figures and tell us exactly what has happened and what is necessary in order that we do not jeopardize our national defense.

Mr. REES of Kansas. Mr. Chairman, will the gentleman yield?

Mr. SCRIVNER. I yield to the gentleman from Kansas.

Mr. REES of Kansas. About how much money is there on hand unexpended in the Department of Defense?

Mr. SCRIVNER. About $67,000 million—$67 billion.

Mr. REES of Kansas. And part of that has already been allocated, has it not?

Mr. SCRIVNER. Most of it has been obligated. At the end of this fiscal year, the year now ending, there will be about $10 billion unobligated; that is, for which there is no binding contract.

Mr. REES of Kansas. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Kansas [Mr. SCRIVNER] has expired.

Mr. SCRIVNER. Mr. Chairman, I ask unanimous consent to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. SCRIVNER. I yield to the gentleman from Florida.

Mr. HALEY. Could the gentleman break down the unexpended funds among the three branches of the armed services?

Mr. SCRIVNER. I do not have those figures before me, but the unexpended balance is not the important item. It is the unobligated balance; that is, where there has been no contract brought to a finality, that is really important. These unexpended and unobligated balances will be discussed later during the debate. But I want to point out that the reason I have made this statement on the floor is so that each Member here will know exactly the procedure and know this is not the last word, by any means.

In the last 5 years we have provided a little less than $200 billion for our national defense and in the next 10 years you are apt to be called upon to provide at least $500 billion if not $750 billion.

Mr. Chairman, if there are no other questions, I would close on a somewhat lighter vein with this illustration. A husband was telling his wife that they could not get a new car because they were so heavily in debt. The wife's reply was, "Well, look at the Government; it is head over heels in debt and that does not stop them from spending."

My comment is that it should.

Mrs. GRIFFITHS. Mr. Chairman, I move to strike out the last word, and ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Michigan?

There was no objection.

Mrs. GRIFFITHS. Mr. Chairman, I rise in support of the committee bill. The only place that a meaningful cut can be made in the entire budget is in the area of defense. It would be made by reducing the items of defense, but I am sure that all of us prefer to leave that to the President and to the Chiefs of Staff. It could be made by cutting the duplication in defense, and while I would support such a cut I am not suggesting it.

However, I would like to say that I think it is essential that each of us face the fact that some items are bought after the need has gone. In the cases where the item is not essential in the judgment of the Defense Department but is purchased or where items are purchased that are not usable, I suggest that they be called by the name that fits them best. Such purchases are in reality a WPA project, and I think they should be called that. I might suggest that I consider the $125 million worth of planes that will not fly, the $100 million worth of tanks whose turrets will not turn, and $150 million worth of TACAN equipment, not one piece of which will work, a WPA project. If they were called by such a name it would give the people and the country an honest opportunity to determine whether they want these items or would rather have the money spent some other way. The place where I think the entire cut could be made is in the purchasing department of Defense, and I would like to address myself to that subject.

During World War II I was a negotiator of Government contracts for the Detroit Ordnance District. I spent 4 years of my life buying the armaments of war. The only previous trips I had ever made to Washington before I was sworn in as a Congresswoman were to explain to General Summerville's staff the contracts of the Detroit Ordnance District.

There is no question in my mind that the items purchased by the Defense Department are over-priced and carry excess profit.

The other day on the floor I was interested in listening to the fears of some that it was possible that there was bribery in the placement of contracts. My fear is that it is not bribery. Bribery is ascertainable, provable, and punishable under the criminal statutes of the country. It could be wiped out.

The real problem in defense purchasing is that the high prices are paid because of a mixture of about 50 percent "don't know" and 50 percent "don't care." There are neither battle stars nor wound stripes given in the battle with vice presidents over price. Although the new Air Force Academy does do so, neither West Point nor Annapolis offers courses in accounting nor in business administration, yet their officers are placed in complete charge of the largest purchasing procedure on earth, and I may say that at least when they start they know nothing about it. When they have completed their tour of duty and are about to learn they are moved on. I am sure that they are trying to remedy it, but it has not been remedied so far. There is no real guaranty on a competitive bid contract that the successful bidder is not selling an overpriced item. The Government is required to place the contract with the lowest qualified bidder, and "qualified" is within the determination of the contracting officer. On behalf of all bidders who have failed, I might say that the contracting officer sometimes has a whim of iron. There would be a better guaranty of a reasonably priced contract on a negotiated

contract, that is, a reasonable percentage of profit as related to reasonable costs and invested capital, if the contract negotiator were first trained to do his job and secondly, backed up by his superiors. Let me give you some examples. More than 150 years after Valley Forge, the Quartermaster Corps which buys clothing for the Armed Forces, and who by this time, should know so much about the making of clothing that they would make Schiaparelli look like an apprentice seamstress, is still placing contracts with people who do not even have a sewing machine when the contract is placed. There is no reason why a clothing purchaser for the Armed Forces should not be able to tell you by looking at the contract—by looking at the bid, whether or not the person is using union labor; whether they live in the North or the South; and exactly how competent the labor is. As a matter of fact, they do not even require a price breakdown of the bids.

One of the places where it is most obvious that the Government is not doing a proper purchasing job is in Air Force procurement. There are seven companies in the United States who supply only the Government. Now, they—the management and the employees and, to the extent they participate, the stockholders of these companies—are just as much Federal employees as you are or as I am. Every dime that they are paid comes from the taxpayers' money. It seems to me that a proper procurement should properly look into the salaries paid the management, the bonuses given them, the dividends paid, as well as concern themselves with every subcontracted item. It is only too apparent from reading the papers in the last few weeks that no matter whether they are attempting to do such things, and I really think the Air Force is making such an attempt, they are certainly not succeeding.

In Detroit recently, we read the shocking information that the Ford Motor Co. as a subcontractor of Boeing Aircraft offered to return $5 million of excess profits on their subcontract, and Boeing made no effort to take the money. Actually, no matter how much the renegotiator or the negotiator tries to perform otherwise, it is humanly impossible to keep from considering profit in relation to cost. The higher the costs of Boeing, therefore, the more their profit. Five airplane companies made an excess profit in 1953 of more than $1 billion plus. They are now engaged in a "hassle" with the renegotiation board over whether or not they are going to repay it. That money, in my judgment, properly belongs back in the pockets of the taxpayers. The Government should have a consultative power on the placement of subcontracts. This does not mean that the Government has to place the subcontracts or do the buying, but they should be notified of the price that the subcontractor charges and the price the prime contractor then charges the Government. And it could be quite simply done. It is proper that the President should defend his budget and that he should look to the defense of the Nation. But, it is deplorable that he has not pointed out that the Defense Department should become price conscious and that they must do everything within their power to reduce the prices paid for the defense items. By that I certainly do not mean that they should ever attempt to break a contractor. The purchasing power of the Department of Defense to a nation that has not been invaded within the memory of living men is a power in some of its aspects more beneficent than peace itself, and in others more destructive than war. It is the power to destroy an industry or to build an industry; to destroy or build a section of the country, and it should be used with wisdom.

The Government is offering its greatest competition to industry, not as a competitive producer, but as a competitive purchaser in the market place. It pushes the small producer away from the steel mill and compels him to buy through warehouses at a higher price. It pushes up the price of civilian planes. Every place its hand touches it actually raises civilian prices for its own taxpayers. The least the Defense Department can do is to see to it that it pays a fair profit on reasonable costs, and that it does not reach into the pockets of its own taxpayers to build up private fortunes; that it does not permit ever increasing dividends to the stockholders, but instead gives to its own taxpayers their money's worth for the items that they buy.

For this reason, and because I believe this cut is the least cut that could be made, I urge that the bill be accepted.

Mr. CUNNINGHAM of Nebraska. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. CUNNINGHAM of Nebraska. Mr. Chairman, I am not at all convinced that the Department of Defense is concerned about economy. I hesitate to make such a statement as I came to the Congress in January with an open mind. But after personal experience with the Department of the Army I have found they are wasteful and arrogant.

In my hometown of Omaha, there is located a very fine company. It is a small concern and manufactures a fine line of steel shelving. Their shelving is sold throughout the United States and is a high-quality product.

Recently the procurement officer at Fort Knox advertised for bids for steel shelving for use at Fort Knox. My constituent entered a bid and it was the low bid. My constituent has proven to me that his bid met the specifications within the tolerances allowed. However, he was informed by the officials at Fort Knox that he would not receive the contract but that it would be awarded to a higher bidder. They gave no satisfactory reason for this unusual practice.

Upon hearing of this decision, I entered a strong protest and demanded that the award go to the low bidder. Now, after about 2 months, my constituent and I have been given the run-around by the Army officials and they have not given this contract to the low bidder whose product meets the specifications. I wonder if they ever will as I have the feeling that their pride has been hurt and they are not willing to recognize the justice of our case.

As a result of this unfortunate experience and the refusal of the Army to save money as they would in this case, by awarding this contract to the low bidder, I am firmly convinced there is much waste in Army procurement and that this budget contains a good deal of "fat." Therefore I am willing to vote for reductions in their budget requests as it seems to me to be the only way to register my protest against such highhanded methods.

This is only a small item so far as dollars are concerned. The entire bid amounted to only $10,566.17. So it is not the money but the principle that is involved here. If the Army can waste money in this small instance, is it not only natural to conclude that they might waste millions when you consider the huge contracts they enter into for their other needs?

Until I receive a proper explanation of this wasteful practice I shall have little faith in the Department of the Army and its purchasing officers.

Mr. CANFIELD. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, this bill providing funds for the defense of our country has been properly described as the most important of the year.

Because I had doubts about the serious cuts imposed by the House Committee on Appropriations last week in reporting the bill to the floor, I insisted my vote be recorded against the measure.

I have the greatest respect for the very distinguished and very able gentleman from Texas, chairman of the subcommittee handling defense appropriations, and every member of this subcommittee. All are dedicated, patriotic, sincere and honest.

Why, then, my doubts?

The President and Commander in Chief, one of the greatest military leaders of all time, the Joint Chiefs of Staff, and the Secretary of Defense all insist the cuts present a risky gamble which they vigorously oppose.

In presenting the measure the gentleman from Texas [Mr. MAHON], states quite frankly the United States and the Soviets are in a nip-and-tuck race for military superiority and some members of his subcommittee now concede some cuts in the bill are too deep.

After the distinguished gentleman from California [Mr. SHEPPARD], in charge of the naval panel, and the distinguished gentleman from Florida [Mr. SYKES], in charge of the Army panel, had presented their cases, I was amazed when the distinguished chairman of the full committee, the gentleman from Missouri [Mr. CANNON] took the floor to riddle the requests of both services.

Speaking of the Navy, the gentleman from Missouri [Mr. CANNON] said:

If war should come, could the Navy protect us? Ridiculous. Enemy bombers would fly right over them. With the exception of

our submarines the Navy would cease to exist in a few hours.

And turning to the Army, he went on to say:

We ought to cut at least one Army division out of the bill—if not more. We have no use for them.

No longer can we sing, "The Army and the Navy forever."

I am also a strong protagonist of air power but I am not for abolishing the Army and the Navy and I like the statement made yesterday by my distinguished friend from South Carolina [Mr. RILEY] that we have to maintain all our fighting components as a working team.

Whenever I hear any one advocating cuts in our Armed Forces, especially Army, I think of that great soldier of World War II, Gen. Jonathan "Skinny" Wainright.

Remember the General, hero of Corregidor and Bataan, when he addressed the Congress on his return home from a Japanese prison camp. He stood before us, thin, weak, emaciated, tears streaming down his cheeks. And what was his plea? It was this:

Never, gentlemen of the Congress, never again, cut our defense forces. Never, never again, let America's defenses grow weak.

I feel certain that there are many others here today who have doubts as we approach votes on this bill. Let us resolve them in favor of strength. Let it not be said today, Memorial Day, or any other day, we did otherwise.

Mr. SCOTT of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. CANFIELD. I yield to my good friend from Pennsylvania, a veteran of two wars, with whom I worked as a seaman on a tanker in the North Atlantic run during the Congressional summer recess of 1944.

Mr. SCOTT of Pennsylvania. I think the gentleman will agree that any reference to the Army and the Navy as being of little use in future wars ignores, of course, the proven value of both services in the Korean war, and all the evidence bears out the view that a balanced defense on the part of all services is vital to our safety; and in view of the fact that our planning is for a modern and increasingly nuclear-powered armed service, will not the gentleman agree that much as we have relied upon the cannon in the past, perhaps now the cannon is in danger of being old fashioned, obsolete, and out of step with the concept of modern warfare?

Mr. CANFIELD. Perhaps the gentleman means to say that the cannon volleyed and thundered but did not get very far.

Mr. SCOTT of Pennsylvania. And did not hit the target.

Mr. JOHANSEN. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. Chairman, it is reassuring to those of us who are younger Members of the House, and perhaps a source of some consolation to find the acknowledgment from an older, more experienced, and wiser colleague that there is no absolute infallibility in the matter of appropriations for national defense. Thus, yesterday, the distinguished chairman of the Committee on the Armed Services, the gentleman from Georgia [Mr. VINSON] said:

No living person can state with certainty that this bill contains a sufficient amount of money to assure our national survival, nor can anyone state with certainty that it endangers our security.

This acknowledgment of our common fallibility from so eminent a source does not, of course, lessen the determination of any one of us to discover and to do the right thing so far as humanly possible. The basic problem before us, as I see it, is to weigh the national security necessities of adequate appropriations for military defense against the national security necessities of sound economy and fiscal stability, and thus endeavor to come up with an answer as accurate and as adequate as it is possible for fallible human beings to reach.

It seems to me the dilemma now facing us is even more acute and more specific. The issue is whether we are going to accept the figures recommended by the Appropriations Subcommittee after months of study, or make restoration of certain items as proposed or to be proposed in subsequent amendments.

I think that many of my colleagues may share some of the concern and misgivings that I feel, based on a lack of knowledge, a lack of information, and lack of certainty with respect to certain points. I certainly cannot help but feel that a 7-percent adequate cut in the overall appropriation for defense is not an unreasonable one. When you eliminate what the President himself has called simple bookkeeping changes that reduction is only 3 percent. On the other hand, some of us are deeply concerned whether in specific items there may not have too deep cuts recommended which ought to be repaired by restoration.

As the only possible way I can conceive to meet that dilemma, I intend to propose at the appropriate time amendments which would confirm the restorations which may be proposed in 3 or 4 instances, and then, at the same time, propose an amendment instructing the appropriate Secretary of the appropriate department that an equivalent amount be reduced from the aggregate appropriation for that particular department. In other words, we hear so much these days about using a meat ax. I am proposing that we use the scalpel instead of the meat ax, and I am suggesting that we place this scalpel in the hands of a competent surgeon, in the hands of the experts in the Defense Department, to the end that they will make the cuts where the impact on actual security will be the least. I must say to the House in all candor that if these amendments fail to prevail or if for technical reasons they are ruled out of order, I shall with the greatest reluctance vote against the restorations on the simple ground that we can lose the national security on either of two fronts. We can lose national security if we lose the battle of the budget by failing to face up to the problem of a sound responsible fiscal policy which will enable us to go home to our people, not so much with a tax cut but with the assurance that our fiscal and economic defenses are firm and sure. Both fronts in the area of defense, it seems to me, must be held firm and secure, if we are to have genuine national security.

Mr. MARTIN. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, no one appreciates any more than I do the many hours of study that the Committee on Appropriations and the subcommittees have given to this bill. I know the members are all honest, patriotic, and consecrated, and I know that they are striving for the same objective as we are—the security of America. But it is possible that they could be mistaken in some instances in a bill of this magnitude just as surely as the Chief of Staff and the men entrusted with the defense of this country, or the President, might be mistaken. It is just barely possible.

I, too, want to say that I share with every Member of this House the passion for economy because I know we must have a sound economy if this country is to continue to enjoy prosperity. But I think the poorest place in the world to begin that economy is risking our national security.

There have been statements here that the President of the United States has not carefully considered this legislation. That is not so.

My friends, what are the facts? I think—and you will pardon me if I say so—that the President of the United States should have as much knowledge about this legislation as any one of us. His whole life has been spent working in the national defense. He has studied every phase of our military life. He has had great armies and he was Chief of Staff. The people of this country elected him President by a tremendous majority because they had faith in him and they realized that in this tense period they wanted to have in charge of our country a man who knew the facts and was acquainted with realities of the tense world.

Let us not forget, when we talk about these economy cuts, that this budget started out with a request for $48 billion when it came in from the several departments. It was reduced by over $10 billion before the budget was sent up to the Congress. Since the present bill has been reported out a careful check has been made under the direction of the President as to the results of these reductions. I believe that every one of us should carefully consider what those reductions mean before we announce our position on this bill. As these facts are given to me I find:

First, contrary to public impression, the appropriation does cut our armed strength. It forces the Army to reduce by some 10,000 the number of its soldiers; the Navy by some 10,000 sailors; the Air Force by 9,500 airmen, and the Marine Corps by 3,000 Marines. Those are not estimates. They are figures that have been carefully and efficiently worked out.

You saw the distinguished statesman from Germany, Chancellor Adenauer,

here today when he told you how tense the situation was in Europe. He pleaded for liberty and freedom. I tell you, my friends, this is not the hour in which to reduce the military forces of this country unless we want to take a tragic risk, a risk that we may well regret. True, if war does not come, the gamble may well have been a good gamble, but if war comes, I do not want to have it on my soul that I was the one who invited this war because I reduced the military forces of this Nation. The people of America, too, love freedom and they prefer that to dollars, and they prefer to spend for armaments to maintain peace.

Second, contrary to public impression, the appropriation cut reduces the naval air power by some 100 aircraft. I would not be able to tell you where that reduction can be made. Probably it could be done, I do not know, but that is a fact. It further tightens already stringent limitations on training in the use of guided missiles. In the event of an atomic war, the safety of the country will depend upon how well we learn to use them. Certainly we do not want our boys to use these missiles without full training.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. ANDERSEN. Mr. Chairman, I ask unanimous consent that the gentleman from Massachusetts [Mr. MARTIN] may proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MARTIN. Third, contrary to public impression, the appropriation cut deprives our naval forces of two modern destroyers and a guided missile destroyer leader at a time when the number of our modern naval vessels is declining and Soviet naval power, particularly the submarine, is rapidly gaining. The Soviet has a tremendous submarine navy and those destroyers are highly desirable.

Fourth, that without changing Army missions in the least, the appropriation cut causes a sharp reduction in the civilian work, the forces essential to these missions, thereby requiring their replacement by soldiers. That is a course exactly opposite from what we have been following in the past.

Fifth. The appropriation cut worsens an already difficult fiscal situation in the Air Force that will require drastic readjustments of going Air Force programs even if every dollar requested in this budget be approved.

The cut will reduce Air Force procurement of aircraft and guided missiles.

Clearly, this is no time to do this. I am one of those who believes that the Communist forces are on the retreat and that today we stand in a position where they nor any other nation dares attack us because we are strong. The Soviet do not dare to atack as long as we keep up our armaments. But if our strength should dwindle and we get ourselves into a position where we may be attacked safely, then I know what the answer will be and I believe, Mr. Chairman, you know the answer. The Soviets create these tense situations in the world today and they will march if given the opportunity to march. Let us not risk the possibility of tempting them to do so.

That is the actual situation, and I am leaving it to you and your conscience to determine whether you will support the President, our general staff, and those who have studied this situation, or whether in a passion for economy you will cut wherever cuts have been recommended. The economy cut could well rebound and make us spend billions trying to catch up.

I have faith in this House. I believe that we will restore a number of these reductions by amendments which will be offered in due time, because they will make sure that the cuts that are made are not too destructive.

Mr. MAHON. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MAHON. Mr. Chairman, the battle lines are drawn and a frontal attack has been made upon the objective of the Congress and the people to get more economy and efficiency in Government. Here we stand on the crucial day to make that determination.

If there is any man in or out of Congress who could be labeled as a cautious man when it comes to matters of defense, I suspect that I would win that designation. Regardless of necessary costs involved, I favor a strong and adequate defense program and I feel that view is shared by all Members of the House. Often during the hearings my friends have stopped me in the corridors—and I say more of my friends on the left than on the right, and of high-ranking position—saying, "George, can't you cut the defense budget? Can't you cut out $2 billion; could you possibly go to $3 billion?" And I would say, "Gentlemen, you and I would not be willing to jeopardize the security of the country but we will do the best we can to make some reductions in this field."

On March 26 the Republican conference made this announcement:

Whereas the American people and the Congress are deeply concerned at the continued high rate of Federal spending which continues to deprive them of adequate and prompt relief from high taxation; and

Whereas it is the consensus of the Republican Members of the House of Representatives that a sharp reduction is essential in the high level of Federal Government spending; and

Whereas the Republican policy committee on March 5, 1957, adopted a resolution recommending to Congress that a substantial reduction be made in the 1958 fiscal budget as submitted: Therefore be it

Resolved, That the Republican conference, representing the entire membership of the Republican Party in the House of Representatives, requests a determined crusade of economy in all branches of the Federal Government; be it further

Resolved, That the Republican conference pledges its best efforts to the reduction of Federal expenditures, the balancing of the budget, a payment on the national debt, and the reduction of taxes as soon as practicable.

Mr. Chairman, we are confronted with pressure from the Pentagon, civilian and military—led by the civilians I must say—good men I assure you.

But today who will win, the elected representatives of the people, or will big Government win through the avenue of the Pentagon and defeat this effort to make a very small reduction in the defense budget, which has been quoted by one of the gentlemen from the Republican side as being only 3 percent.

Suppose one of our younger colleagues goes back to his district after this session is over and his father says, "Son, how much did you cut the defense budget?" The son would say, "Well, we gave them 97 percent of what they requested." The old gentleman would probably say, "Son, if through the years I had given you 97 percent of everything you had requested, you probably would not have developed enough initiative to go to Congress."

If he goes on down the street and meets some veteran of World War I or World War II or the Korean war and the veteran inquires, "How much did you cut the defense budget?" the Congressman would say, "Well, we cut it about 3 percent." The veteran would probably say, "In other words, you gave those people 97 percent of what they requested. Don't you know they always request far more than they need?" This veteran would say, "Listen, big Government has got control of Congress, and you people are being made the captives of big Government. If you do not extricate yourselves from this situation, nobody else can."

Big Government is a colossus. As I was driving to the office this morning I was thinking of those lines where Cassius was talking to Brutus, and he said:

Why, man, he—

Big Government—

doth bestride the narrow world
Like a colossus, and we petty men
Walk under his huge legs, and peep about
To find ourselves dishonourable graves.

That is the threat of big Government to the legislative branch of the Government.

Cassius, continuing, said:

The fault, dear Brutus, is not in our stars,
But in ourselves, that we are underlings.

I appeal to the Members of the Congress to do their own thinking and to temper slightly in the public interest the programs of the Pentagon—to let officials know that there is some determination for economy and better management in the Congress of the United States. Did you hear the gentlewoman from Michigan speak a little while ago? We just proposed a little economy. The line is drawn. If we are going to be pushed over and demolished—if we, the legislative representatives of the people today, are going to be overcome and overrun in the attempt to propose a little economy, it will be a sad day for this country—and you know it. No, we have

not taken any chances with the defense of our country. We have given officials practically everything they have asked for, and in many instances we have given them perhaps more than they required. On the first of July, they will have about $34 billion in all defense areas in unexpended funds without considering this appropriation, and with this appropriation, they will have in the neighborhood of $67 billion or $68 billion to spend.

It does not speak well for people in management that they cannot take a 3-percent cut. I am saying that, if people agree that they are going to fall flat on their faces and utterly fail, and let this country be open to exploitation by our enemies by reason of a 3 percent cut, there is something lacking in the Pentagon, something big and important lacking in management. Admiral Arthur Radford, Chairman of the Joint Chiefs of Staff, said to the committee several weeks ago, and he recently reaffirmed it:

> I feel that we have a Military Establishment today which is responsive to almost any situation that can be foreseen and within any reasonable period of time. We can take care of anything. And we are respected. Our power is respected.

All right, that is the way it was a couple of days ago—that is the way it is today. If we give defense officials, as we do in this bill, more than $34 billion in new money and, if we couple that with about $34 billion more, and these people in the Pentagon have all that money for next year—tell me, to what sad state have we fallen that we cannot have a reasonably adequate defense program based upon such tremendous and astronomical figures as that? Why we made a 1-percent cut in the pay of the Army, which includes subsistence and travel, among other items, and we are told that this may mean the loss of a division. That is putting your worse foot forward in order to intimidate the fearful. This is the test of men who stand firm when the going gets rough. This is the test of Congressional stability. This is the day when we will separate those who have the courage to evaluate this thing on the basis of merit rather than on some other basis. Those who would mislead, confuse, and intimidate say if you cut this budget, it could lead to disaster. We cut it 3 percent—could that lead us to disaster? How naive—how irresponsible can you be, if you think a cut of 3 percent could lead us to disaster.

If you go home and you meet Mrs. Joe Doakes and you say, "How are you, Mrs. Doakes, and how are the 7 children?" And she says, "Well, just fine, but we are having a pretty hard time with our personal budget. But let me ask you, Mr. Congressman, how much did you cut the defense budget? We believe in strong defense. We do not want to weaken ourselves. We also believe in some reductions and in better management, and we believe such a course is better for defense over the long pull."

As I was saying, if Mrs. Doakes asks you, "How much, Mr. Congressman, did you cut the defense budget?" And you say, "Oh, we gave them 97 percent of what they asked for." Mrs. Joe Doakes would say, "Well, I am afraid that if the breadwinner in our family gave us 97 percent of what we asked for, our family would go bankrupt and we would all have to go to the poorhouse."

This is just a homespun approach to the question that is confronting us. I will not sell my country short and admit that a 3-percent cut will cause us to lose the race with Soviet Russia. I say we will get stronger if we enforce better management and better operations which we are seeking to do by these small reductions in the defense budget.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SHEPPARD. Mr. Chairman, I ask unanimous consent that the gentleman from Texas may proceed for 2 additional minutes.

Mr. HOFFMAN. Mr. Chairman, reserving the right to object, and I shall not object, I wonder is somebody can assure me when we get along to about 5 o'clock that some of us who have not had an opportunity will be given an opportunity to talk.

Mr. SHEPPARD. Of course, the gentleman from Michigan fully realizes that I am not in that position of authority. But, so far as I am concerned, all I can say is that I have never objected to any unanimous consent request made by the gentleman.

Mr. HOFFMAN. I know the gentleman has not, but I wonder if whoever is in charge of the bill could assure us. This has happened heretofore. I do not care if the gentleman from Texas speaks for 10 minutes; that is all right with me.

Mr. MAHON. We are talking about $34 billion here and I do not think people ought to be denied a right to speak.

Mr. HOFFMAN. Oh, is that all, $34 billion?

Mr. MAHON. Some Members did not have a chance to discuss this during general debate. I think it would be better to be tolerant for a while. We can move faster later.

Mr. HOFFMAN. Will the gentleman be tolerant later on in the afternoon?

Mr. MAHON. I will always be tolerant, and that includes my attitude with the Department of Defense.

Mr. SHEPPARD. I have in my hand a quotation taken from the hearings, and I would like to ask the gentleman from Texas, during the length of time in which the policy representation of the Department of Defense appeared before the panels, if they were not asked this question: "If the chips were down tomorrow, what is the present military situation about winning or losing?" or words to that effect. And insistently, throughout the entire response, it was: "If we have to, we are prepared to do the job today."

Mr. MAHON. My friend is correct. They say that we are prepared, as I read in this report earlier. Officials say we could pulverize any potential enemy with what we have, and with 34 billion fresh dollars provided in this bill we ought to remain in fair shape for some time.

I look askance at those who would say to the wide world that if you cut the budget 3 percent we will probably lose the next war and invite disaster. How irresponsible can people be in order to take political advantage of a situation in which there should be no politics?

Mrs. ROGERS of Massachusetts. Mr. Chairman, I move to strike out the requisite number of words.

First, Mr. Chairman, I would like to thank the members of the subcommittee and the committee for what they have authorized in this bill. I know it has meant endless work and endless research, and I am deeply grateful for many things they have included in the bill. I am deeply grateful that they have the missile carrier, so very vital to our defense. I am deeply grateful that they have in the bill the hospitals for Arkansas and Waltham, so badly needed. I am deeply grateful that they have in the bill money for the airplanes and the submarines and all national defense. I am deeply grateful for additional help for the Army, the Navy, the Marine Corps and the Air Force.

I would say to the chairman of the committee and the other members of the committee that much as I appreciate what they have done, I am going along with the President's request for $1,250,000 more. No one in the world knows more the necessity for national defense or preparedness. I saw General Eisenhower's army in four countries abroad. I know what it means when he did not have the necessary equipment; when he did not have adequate arms and munitions; when faulty ammunition was sent, which was responsible for killing some of our own men. When at times he did not have many of the necessities to wage war. I would say to the gentleman from Texas [Mr. MAHON] that I, too, was at home recently. I saw Korean veterans; I saw veterans of every single war. There was not a veteran who asked to have this defense budget cut. I saw boys that had frozen feet and arms in Korea, and who lost those arms and legs as a result. They knew what the lack of equipment meant. I saw the boys overseas of World War I and World War II who had faulty equipment that we sent over to them, and there were poor and inadequate airplanes. Many of our soldiers had not been trained adequately to fight. I saw old men of the Spanish-American War and other soldiers. Not a man I saw last Sunday, Memorial Sunday, asked for a cut in this defense appropriation bill. These men know what it means not to be properly cared for. Those who escaped being killed at Pearl Harbor know what it means for the Navy to be not in proper operation.

I know what it would have meant had the draft not been continued—before Pearl Harbor—and that bill passed by only one vote. Then immediately came war. What would have happened if our soldiers had been dispersed.

The only thing these soldiers and veterans asked me when I went home was: "Do you think, Mrs. ROGERS, that we are going to be adequately prepared?" And I said: "Congress wants you to be prepared adequately, and I know the President does also." Their reply was: "I only hope so."

Have you ever been in a hospital where men were lying on the floor because they could not get beds? I have. Where they could not get even a drink of water because of shortage of personnel? You know, that might well happen in our civilian hospitals as well as our military hospitals at home and abroad if we have a bombing in this country.

Mr. Chairman, it is my intention to vote for H. R. 7665, the Defense Department Appropriation Bill for 1958. At President Eisenhower's request I shall vote to reinstate $1,250 million which he has stated is gravely necessary. Although I do not firmly hold to the view that there are not any items in this appropriation bill which cannot be reduced, I am confident in my decision that this appropriation for national defense in general should be approved in the full amount requested by the Congress. Broad reasons for my decision to vote for this bill are as follows:

First. It must be recognized that at this time there are no agreements between the Free World and the Communist world on which we can depend and which, if we could depend, would warrant reduction in our defense appropriation.

Second. The Communist ideology of government, under the authority of the Kremlin, is still expanding in various areas of the world and is becoming more and more a threat to freedom and the free nations.

Third. This point is very important—the free nations of the world look toward and depend upon the United States of America for their military protection and economic progress. In fact, they depend upon the military forces of the United States for survival. In the case of the Communist nations, however, it is to be realized most of them do not depend upon the military power of Russia for their survival. In other words, the military forces of the United States of America are not only geared to the requirements of defense for our country alone but they are geared, if need be, to defend the Free World. In this defense of the Free World, of course we are engaged in defending America as well.

Fourth. The general increase in production costs in all industries engaged in defense work of course results in an increase in the cost of our total national defense.

Fifth. Because of the tensions existing in various areas of the world, any slight weakening in the military forces of the United States could represent encouragement to any nation or group of nations hoping to achieve certain objectives by force.

Sixth. Upon the strength of the military forces of the United States, the Army, the Navy, the Air Force, and the Marine Corps, depends the peace of the world in this generation. If peace cannot be achieved by honorable, dependable agreements, then peace must be assured by the mighty destructive power of the mighty military forces of the United States of America. Minus any dependable agreements, the peace of the world is threatened and is no longer within our control just as soon as the Communist world, and Soviet Russia in particular, possesses stronger military forces than does our own United States.

Seventh. It is far cheaper to spend our dollars for a mighty defense to assure peace than would be the cost in dollars if we were forced to actually defend our country because of attack.

Eighth. Weakness invites attack and consequently the unlimited expenditure involved in striving for victory. Overwhelming strength prevents attack and saves the unlimited resources that would necessarily have to be expended if an attack were made. Strength means peace and weakness means war.

Ninth. Only within the concept of our Nation at peace and functioning in a peaceful economy lies any hope of a reduction in the costs of government in general for the American people.

Tenth. After all arguments are made, there is one forceful consideration that governs our action. We cannot risk the possibility of defeat if our country, or any country in the Free World, is attacked. In the words of General MacArthur, and I quote, "There is no substitute for victory."

Broadly speaking, these reasons I have briefly outlined represent the boundaries of my thinking concerning the necessity and the great importance the strength of our military forces represent in the world today. It is for these reasons it is difficult for me to comprehend how anyone could intentionally adopt any action that would cause a weakening of our military forces. It is for these reasons, broadly speaking, I believe this Defense Department appropriation bill for 1958 should be adopted without compromise and any serious reductions.

In this appropriation bill, there appears an item which I believe represents a landmark in our national defense and particularly in the development of our naval power. I refer to the appropriation for a nuclear-powered aircraft carrier. This is a great and important step in the United States Navy. This step is as significant and as important as it was when the Navy changed from sail to coal, and from coal to oil. In one word, it represents progress, and important and necessary progress. In the not too distant future, it is possible for all of us here to visualize the entire United States Navy operating under nuclear power.

This new carrier, when in operation, will be a great asset to the defenses of the United States of America and the Free World. This nuclear-powered carrier will not be dependent on refueling at sea and will add tremendous strength of both a strategical and tactical nature to our naval operations.

The great naval carrier, with its air striking force, is a unque asset in the military forces and the military power of the Nation. No possible enemy of the United States possesses such a valuable asset and such an enormous advantage that this asset provides and insures. Our giant carriers, representing as they do speedy and mobile airbases at sea, constitute the greatest deterrent to enemy attack and war in the history of the world. In other words, these carriers operate to insure the peace. Two occasions very clearly illustrate this fact. The first is when the carriers in the 7th Fleet of the United States Navy, under the command of Admiral Pride, drove into the waters surrounding Quemoy Island and prevented Communist China from attempting to invade the island and therefore prevented war. The second occasion occurred within the last few months. All of us remember so well when the great carriers in the 6th Fleet of the United States Navy, under the command of Admiral Brown, made way to the eastern Mediterranean and by their very presence prevented war in the Middle East.

On both of these occasions, if war had broken out it would have constituted the beginning of world war III. On these two occasions, the great carriers of the United States Navy have many, many times over justified their cost to the American people. It is well to remember in our thinking regarding our carrier fleet, that it represents mobile airbases over which our country always possesses sovereignty. It is not conceivable any of these carrier-mobile bases could ever captured and turned against us.

It is, therefore, of great satisfaction to me, and I know to many of the Congress, that this Defense Department appropriation bill for 1958 provides for the construction of this first nuclear-powered aircraft carrier.

The adoption of this Defense Department appropriation bill for 1958 without compromise or reductions, I maintain, is vitally necessary to the defense of our country and the welfare of the Free World. As a nation we now have certain grave responsibilities. We cannot lay these aside. We cannot shirk them. We cannot close our eyes to them. Although there is no question that certain reductions in this bill could be made at this time, the issue confronting each of us, however, is this: Dare we make these reductions? Dare we take this risk? Dare we to weaken our national defense? Dare we to risk taking any action here that might in the end encourage an attack and a resulting nuclear war? Do any of you want to assume such grave responsibility?

In this time of our thinking, I need only say that in the leadership of our military forces, as well as in the leadership of our President, our sincere, energetic, and devoted President Eisenhower, we are fortunate to possess the greatest military minds in the world. After careful appraisal of world conditions and relationships, and after careful appraisal of the military requirements to meet our responsibilities, and after careful appraisal of the military forces necessary to preserve the peace, the conclusion of these leaders is that the funds necessary to provide these needs are presented to the Congress in this Defense Department appropriation bill for 1958 for its approval. Is there anyone, I call out, is there any person, who is, regardless of profession or employment, who is, regardless of position, who believes himself qualified to substitute his knowledge and his judgment for the judgment of our military leadership and who is ready therefore, to reduce the military power

of the United States? Is there anyone willing to take the responsibility of advocating that regardless of the conclusions reached by our military leaders certain reductions in our military appropriations must be made? Is there anyone willing to assume that responsibility? Is there anyone willing to take that risk with the welfare of this Nation and the defense of the Free World?

Mr. Chairman, surely there is no alternative. Either we must appropriate the funds for powerful military forces, military forces equal to the demands and responsibilities of these times, or we must appropriate funds unlimited to finance a war for survival. In my mind, this choice is both obvious and clearly discerned. I urge all of you to approve the funds requested by President Eisenhower, our military leaders, and the officials of our Defense Department as requested in H. R. 7665, the Defense Department appropriation bill for 1958.

Mr. FLOOD. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I just want to make a few statements because we have heard these expressions of concern that we are not going to have any army, not going to have a navy, not going to have an air force, and that the folks back home wonder when we are going to have those three branches of the service.

Let me remind you that this committee has reported for the Army 7½ billion American dollars—$7½ billion for the Army.

For the Navy: $9½ billion—for the Navy 9½ billion American dollars.

For the Air Force: Nearly 16 billion American dollars; that much is in here for the Air Force.

Mr. MARTIN. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Of course I yield to the minority leader.

Mr. MARTIN. I want to assure the gentleman, if he is interpreting my remarks to mean that there was not going to be any Army, Navy, or Marine Corps, he is greatly mistaken.

I said that these cuts would force the reduction of those services by the number of men I announced; and that is a careful canvass. Those are the facts.

Mr. FLOOD. All right, let me say that that is what makes a horse race, a difference of opinion about what people think of the facts.

Let me say that this defense subcommittee under no circumstances—and the committee has made it very clear to the Department of Defense and to this House—we are opposed to cutting one single uniformed member of any of the armed services. Where the cut is made depends upon how the figures are applied. The Department of Defense would have you believe, Mr. Chairman, that we are going to cut the Army 15,000 men and that one division would be given to the Marines or the Air Force. We opposed cutting personnel.

May I say this, Mr. Chairman: This Army panel says to you now, Mr. Chairman, that on our figures there will not be—and we oppose—the cutting of one single uniformed body. It will not be cut.

Mr. MARTIN. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield, of course.

Mr. MARTIN. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I yield to the gentleman from Massachusetts.

Mr. MARTIN. I have given the gentleman figures to indicate what may happen. What is the gentleman going to do about paying these people he says must be continued in the service?

Mr. FLOOD. Talking about the infallibility of the Joint Chiefs of Staff, talking about the infallibility of our great President, a great Commander in Chief, talking about all of the civilian chiefs from Mr. Wilson down, at all levels, of all branches, and there is more than a corporal's guard down there, believe me, this is what they asked for last summer: $48½ billion was the first figure discussed by the uniformed Joint Chiefs of Staff. At the end of some discussion, and this is their language I quote, they wound up at the end of last summer, and I refer to the uniformed Joint Chiefs of Staff, a Secretary at the Secretary's level, they asked for $40 billion. That is the infallibility involved. They asked the Congress finally, after some more conversation, for $36,100,000,000.

Now, the Secretary of Defense came to us and he said: "You cannot cut this budget one dollar." Every member of the Joint Chiefs of Staff said: "You cannot cut this budget one dollar." For 5 months they said that. Then one day out of the clear blue sky the President sent this House a message in which he said: "Pardon me. You can cut it $500 million," and 1 week later when we made our report, the President, the Joint Chiefs of Staff and everybody in the Pentagon now say: "Well, $1,300 million is merely bookkeeping." So there is a cut of $1,800 million which the President and the Joint Chiefs of Staff say will not hurt the national defense at all.

I submit, Mr. Chairman, that is not evidence of infallibility in 30 days.

Mr. MARTIN. The gentleman will admit from his own statement that the President of the United States was trying to cut as deeply as possible and he did bring this down substantially from $48 billion which was the original request. Does the gentleman not think with all his vast knowledge of military affairs that the President squeezed all of the water that he could out of it?

Mr. FLOOD. I do not think so. That is the reason I have been talking for the last 4 minutes.

Mr. WHITTEN. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, I take time to explain the way these budgets are built up. The figures that appear in the budget resulted in this way: The military does not decide at the top level what it takes to run the Nation's defenses for the coming year. In the preparation of this budget a request goes out to every military activity throughout the country, throughout the world, as a matter of fact, and they are invited to send their estimates in as to what it will take to run the local operation. In other words, when they talk about this $48½ billion that was in the original estimate, that amount represents the sum total of the buildup of all the requests by all the folks at all the stations saying what they would like to have. So, when you ask everybody what he wants at Podunk, or some other place, and to send in his figures, having learned that it gets trimmed down as it goes along the line, quite naturally he takes that into account when he submits his estimate, so whatever happens as the request works up from the ground level to the top level, he will still be all right. Of course, through the years the top level pulls that sum total down. The top folks in the Pentagon are wise enough to know that in the process generally the figures that come down here, if the Congress wants to economize, will also likely be cut.

When the statement is made that the application of amount of cuts in this budget will do harm, let me point out the total cuts here could easily be absorbed if wasteful practices were cut out. In the Military Department, according to our own investigation on procurement policies and practices, we were able to show that they had launched an airfield in the worst possible place of four eligible. Their location would cost more to build, would have had fewer flying hours, the weather was worse, there was a radio tower which constituted a flying hazard—why was it selected—political pressure. As I told the House the other day, we had evidence where aircraft companies were kept operating putting out defective planes for various reasons other than defense. In this record you will see that when General LeMay becomes Chief of the Air Force, there will be 177 changes in command throughout the world at a cost of thousands and thousands of dollars. You will see in the record of last year in our procurement practices investigation where company after company had turned back profits that were so exorbitant that even they were embarrassed to keep them. You just heard the gentlewoman from Michigan, in a masterful way cite numerous instances.

I regret that time does not permit me to go into all the details, but if you want to know how much the military will ask, the military asked this committee and this Congress for $350,000 to build a home for the Chairman of the Joint Chiefs of Staff in this country where there is no home provided even for the Vice President of the United States.

That is typical of what they will ask for and the size of the request is typical of how much.

Now, when I tell you how these figures in the budget are built up, you may get an indication of how conservative the requests are by the size of this request for the Chief of Staff's residence.

Mr. SCRIVNER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Kansas.

Mr. SCRIVNER. There is no item in here for the Joint Chief of Staff house.

Mr. WHITTEN. The gentleman misunderstood me. I said that the military department requested of the committee and of the Congress $350,000, and I used that to illustrate how little conservatism there is in military requests. It is not in here, but it does illustrate how far these people are going in their requests.

Now, I am going into all the details of this investigation of procurement policies and practices, but I would point out that it offers evidence there where they are purchasing on one hand and were selling the same articles as obsolete on the other. You will find how bad it was when I insisted and got Mr. Secretary Wilson to read that report of our investigators last year. Listen to this. He said, Yes, Mr. Congressman, I read it over the weekend and it makes me "sad" and it makes me "mad" that my department has such a bad record as that with your committee. Now, that is the statement of the head of the Defense Department, and you will find it in the hearings. And, I say to you that the cuts in this bill could easily be absorbed in cutting out these wasteful practices that go on and on and on. And, if the military has told the minority leader that they are going to apply this cut to manpower, that is another illustration of how far this group will go to regain every dollar they have asked. They have no need to reduce military manpower. In fact, if these cuts are so applied it will be opposite to the intent of the committee. We need to apply a little checkrein and say to the military, "No, we are not going to dot every i and cross every t." We realize that these figures are built from the ground level up, and we recognize that they request more than they expect to get. I say that the military can easily absorb this cut in cutting out waste in the military department.

Let us see just how the Defense Department treats those with whom it contracts. Let us see how much money the Air Force, if they can find out themselves, I quote from my views in the committee report:

In the last 5 years the Defense Department has spent approximately $80 billions of dollars with 50 corporations. The stock of those corporations has increased from an average of approximately $57 per share to an average of about $149 in that 5-year period. The Federal Government provided most of the cost of the facilities for the major aircraft companies which are producing planes for the military establishment. Yet the total profits to these aircraft companies, with little investment and practically no risk, increased last year, though total sales were less than the preceding year. In addition, the Government gave the aircraft companies the opportunity to write off their investment in 5 years instead of the usual 20 years provided for most others.

OPERATION "SMOKEOUT—RECOUPMENT"

The majority report states the following: "The primary reason for large unobligated balances is the practice of full funding of programs."

It is almost unbelievable what such course has led to. As the testimony will show, the Air Force has had so much money appropriated for so many purposes in years past, that it has had to assign large numbers of people to "smokeout" funds in its own dormant accounts, the size and number of which had increased to huge proportions through the years. This operation has been very successful, as the Air Force has recovered from itself approximately one and a half billion dollars. This is referred to as "recoupment" by the Air Force. In case the public doesn't know, "recoupment" means that the Air Force has recovered from itself one and a half billion dollars which it didn't know about until it had the operation "smokeout."

I personally feel that the appropriations for the Military Establishment for fiscal year 1958 could and should have been reduced further, and spending should have been held to last year's level. I think this is essential. It is my judgment that we are getting only about 70 cents worth of defense for a dollar spent. We must cut out the spending which is nonessential and in the nature of pump priming. That is the main cause of our inflation, which in turn could threaten our economy. If we don't slow down on this matter of permitting domestic economy to become dependent upon military spending, we are likely to go the way of every other major country which ever got on this treadmill, which is to get in a war to keep the military plants in operation.

Mr. ARENDS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I came to Congress in 1935 with the gentleman from Texas [Mr. MAHON] who is in charge of the bill before us. I have great admiration and respect for him, as a man and as one of the ablest Members of the Congress. I am proud to call him my friend.

We have our honest differences of opinion. The gentleman from Texas [Mr. MAHON] has disagreed before just as we disagree today. Whatever our disagreements, although he sits on one side of the aisle and I on the other, we both honestly and sincerely desire to do that which we honestly and sincerely believe to be for the best interests of the country as a whole.

We cannot, and we must not, approach the questions relating to our national defense from a political basis. I am sure my friend from Texas [Mr. MAHON] agrees with that thesis. And, frankly, I was somewhat surprised that he saw fit to chide us Republicans about the resolution we adopted demanding economy in Government and we are here today seeking to restore part of the cuts his committee made in this defense appropriation bill.

Yes; we are for economy in Government, and the economy resolution that the gentleman from Texas [Mr. MAHON] quoted as Republican policy is as valid today as the day it was adopted. We are determined to save wherever we can make legitimate savings, but we are not willing to commit the sin of risking the safety of our country in the name of economy. That is what we will be doing if we accept the committee's recommendation.

The American people want us to economize, but they do not want us to deny our Military Establishment whatever money may be necessary for our national security and for the preservation of peace and freedom in the world.

President Eisenhower has given more personal attention to our military needs than any other part of our national budget. No one is more fully qualified by training and experience to pass judgment on our actual defense requirements. We should not, and we must not, arbitrarily substitute our judgment for his, simply in the name of economy. We must evaluate each phase and each item in the defense program, lest what we call economy may in the end prove to be costly, not only in dollars but in the peace and freedom we all cherish.

I have been a member of the Armed Services Committee for 22 years. I do not profess to be an expert in anything, but national defense is one thing about which I know the most. If nothing else, I hope I may impress you with the fact that there is no substitute for an adequate national defense, and particularly during these days of great international uncertainty with a foreign ideology seeking our destruction and constantly probing for weaknesses in our defense armor.

It takes time and many billions of dollars to build and to maintain a defense that our enemies, real and potential, will respect. Strength is a deterrent to war, and strength is the only thing the Communists respect. We must be strong.

I can well recall how desperately our Committee on Armed Services—then the Military Affairs Committee and the Naval Affairs Committee—struggled in the days before World War II to build up our defense establishment in view of the ominous gathering of war threats. When war broke out we were not prepared. We were too late with too little. Our enemies saw in us weakness of which they could take advantage. Our weakness encouraged them to take aggressive action.

It is my considered opinion that the $1.2 billion cut made by the Appropriations Committee goes dangerously into the very muscle of our defense arm. The gentleman from Texas [Mr. MAHON] has referred to the relatively small percentage the cut represents in relation to the total. That is no valid criteria. There are innumerable parts in an automible. The spark plugs are a very small percentage part, but if you remove the spark plugs the whole machine does not function. The question is what is vital, what do we absolutely have to have for a really effective defense machinery.

It is by no means an easy question to resolve. Last year this House agreed to a conference report on the defense appropriation bill that gave the Air Force $900 million more than they requested. Last year the gentleman from Texas [Mr. MAHON] was desirous of giving the Defense Department more than it wanted, but this year he seeks to prevent them from having what they want. It doesn't make sense, unless it should be that political considerations other than actual defense needs constitute the motivating force in the action taken.

Just as there is no valid reason why we should appropriate more money for the Armed Forces than they want, there is no valid reason why we should appropriate all that they want. It is not a question of want but of need. It is a matter of making certain that the actual needs, in the light of the existing international situation, are adequately met—no more and no less.

For the past several weeks our Committee on Armed Services has been meet-

ing day after day in a painstaking consideration of a bill to authorize a little over $1 billion 500 million for military public works. We are making a searching examination of each proposal, making certain that it is necessary. If it can be proven to be needed, our committee will seek to have it authorized.

When this bill is reported there will doubtless be those who will seek to eliminate, or add, this or that specific project. I just wonder what will be the attitude if it should be proposed to eliminate some particular project that would affect our individual district. That will be a test. We will then hear eloquent argument as to its need for national defense, and from the Member whose district is affected we will hear little about economy.

We cannot properly deal with defense matters by allowing ourselves to be influenced by how it affects our individual district or what may be the political consequences of the position we take, as an individual or as a party. Our sole consideration must be what is best for the country.

If there is one thing the American people demand, it is that we make certain we have the proper national defense. Anyone who votes against a national defense need is certain to have to make an accounting with the people he represents.

A number of years ago, prior to World War II, I voted against a bill to enlarge the harbor at Guam. It was represented as a bill to fortify Guam, although it was not in fact such a bill. But I experienced three hard campaigns on this issue. My opponents accused me of being against an adequate defense by virute of this vote, and it took an all-out effort on my part to clarify what was actually involved.

It was a lively issue. And why? Simply because the people wanted to be certain that I was, as their representative, for the kind of military defense this country needed—first, last and always. I say to you with all the emphasis I can command that nothing is more important to the American people than that we meet our defense needs that we may have security and preserve the peace.

Yes, we are for economy. We should be. It behooves us to save wherever possible. No one of us advocates that the cuts made by the committee should be fully restored. But the committee has gone much too far. If we err, let us err on the side of safety.

I question no one's patriotism, and no one's sincerity of purpose. But let us leave political considerations out of this and endeavor to resolve the issues on a strictly objective basis, all with a view to making absolutely certain that our defense needs are met and we do not risk the security of our country, the freedom of our people and the peace of the world.

Mr. HOFFMAN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, there are many statements of the President that we all can go along with very easily.

WE CAN ECONOMIZE

When the budget of $71 billion plus was sent to the Congress on January 16, there were available in holdover funds some $70 billion.

The deadline on income-tax payments being April 15, the people were tax conscious. Demands that the budget be cut came from the taxpayers, from the press, and suggestions that it could be cut, without harm, were advanced by members of the President's Cabinet—members of his official family.

In his state of the Union message given Congress on January 10, 1957, the President told the people that because of the danger of inflation, it would be necessary for both labor and management to avoid demands for wage increases or higher prices—at least, that is the way I interpreted his statement. It necessarily follows that the Government should avoid inflationary action; that is, wherever possible, ask, if not for less, at least no increases, in appropriations.

The House sent to the President a resolution asking that he tell us where and to what extent the budget should be safely cut.

The President replied that the responsibility for making cuts rested with it.

The House, through the Department of Defense Subcommittee of the House Appropriations Committee, after extensive hearings and intensive study, came up with a bill which was $1,192,000,000 less than the amount carried in the budget for the armed services.

The President, in substance, over television told the public that if substantial cuts were made in the money requests submitted by the armed services, if the cuts were not restored, the House was courting disaster for the Nation.

For more than 20 long years we have disregarded the suggestion of President Franklin D. Roosevelt that we had nothing to fear but fear itself. But fear has been guiding, at least influencing, our legislation. The fear of something; first one thing and then another. But let us assume that the President was right when in his state of the Union message he told us that unless we stopped inflation we would destroy this country just as surely as though Russia did it by war.

But members of the President's official family had stated publicly that the budget could be cut. The President advised us to use our judgment. We did. Then the President, over TV, took us to task.

It is just too bad, it would have saved us a lot of embarrassment if in the beginning the President had said that that was the budget, that that was it, and that if we wanted to make cuts we could assume the responsibility. But later when it was apparent that the House intended to act upon his suggestion that we exercise our judgment, good or bad, and make cuts, the President, resorting to the doctrine of fear, told the mothers of America, that their sons—not those words, but that was the implication—that if the funds sought in this bill were not given again, their sons might be sent to war.

That was not quite fair to us. Here we are now with the argument, "You can either appropriate these fund dollars for the Defense Department or your boys are going to war again." That is what it boils down to. Though the statement was that they might, not that they would, fear of another war was planted in the people's minds.

The bill was debated for a day, then on Monday, May 27, Republicans were told that the party's policy committee meeting that morning advised that $498 millions of the cut should be restored.

Neither the citizen nor Congressman knows, of his own knowledge, the exact amount which the Defense Department needs to protect us from foreign aggression.

Patrick Henry once said:

> I have but one lamp by which my feet are guided, and that is the lamp of experience. I know of no way of judging of the future but by the past.

History has demonstrated that nations can, and have, destroyed themselves by excessive spending.

Citizens and Members of Congress do know there is a limit to the amount which can safely be spent for defense, or for other purposes.

If we accept the President's statements, these seem to be facts:

If the people are to retain their liberty, if we are to continue as a Nation, there is a limit to the amount which the Congress can appropriate, the burden which can be placed upon the taxpayer.

Accepting the President's statement that a reduction of the sums carried in H. R. 7665 will endanger our national security, it follows that if we comply with his demand as to the total carried by this bill, we must cut other appropriations such as the appropriation for foreign aid; temporarily forget Federal aid to education; demands of Federal employees—including those of the postal workers—for increased compensation; the proposed civil rights legislation to establish a new agency, and any and all other legislation calling for additional appropriations.

If the Congress accepts the President's demand that we reject the Appropriations Committee report and the action of the House sitting in Committee, it follows that those voting to restore the cuts, impliedly, at least, agree to vote against further and additional expenditures by this Congress which would add to the overall appropriation.

For—let me repeat—the President warned us in his state of the Union message that the national danger arising from inflation was as great as that caused by war.

Why did not the President tell us, "Now, listen, Members of the House, we must have this money for national defense. Inflation is dangerous, almost as dangerous as a war, which we may lose. What bankrupt country ever won a war?" Why does not the President say: "So I will agree that if you will give the Defense Department the money carried in this bill for national defense, I will just forget a part of foreign aid, I will just forget Federal aid to education, I will just forget civil rights, which calls for a new agency and additional expenditures, I will just forget some other things that I want, if you will go along

on this one, and you can keep the total appropriations for this year down to a safe limit?"

Oh, no. The President is just like the rest of us. What he wants he wants. What he desires is, in his opinion, necessary. We are to appropriate every dollar he asks for national defense and then we are to go along with Federal aid to education and foreign aid and the appropriations of other billions of dollars, always adding to the danger of inflation and shove the total up where it may, according to the President's own statement, destroy us. Is it right? Is it fair?

Is the prophecy that if you elect an Army man President you will have a military Government coming true? Can we not if danger threatens forget our social programs until we are secure?

Mr. DIES. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I want to compliment the gentleman from Michigan on the best speech he has made on the floor of the House for a long time.

This is a very difficult subject to the average Member who has not had an opportunity to study the facts. I am sure that none of us wants to weaken the national defense. It is certainly true that Russia is as great a menace today as she was 10 years ago. But, Mr. Chairman, there is another menace to this country that is growing greater every day and every month, and that is the menace of inflation. For 14 months, there has been a steady rise in the price of living. Actually, there has been a depreciation of the purchasing power of the dollar. That is the thermometer which determines whether or not the economy of a country is healthy. There is something fundamentally wrong with our economy when our money constantly falls in purchasing power. The President called attention not long ago to the fact that the Soviet Union has repudiated $65 billion of honest obligations. But, what he did not say is that we, ourselves, have repudiated 50 percent of the purchasing power of the bonds which we sold to the American people. Literally thousands of patriotic Americans were induced to invest in this country beginning in 1935. Those people have found that their investment has been repudiated to the extent of 50 percent, our Government has also repudiated 50 percent of annuities, pensions, and other fixed income which can not be, or has not been, increased. It seems to me the people of this country are entirely right in demanding a reduction—a substantial reduction in the expenditures of the Government. It may well develop that the reduction in the defense budget is too drastic. If it does so develop, the committees can iron it out in conference; but at this time I believe, after giving the matter searching inquiry and thought, that we should support the committee. We should support the committee in order to restore the confidence of the American people in the honesty of this Government.

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. DIES. I yield.

Mr. MAHON. The gentleman has pointed out something so well, if we have made cuts that are unwise, there is an appeal to the other body. If the other body in conference together with this body agrees on cuts that are too low, we will meet again in January. Certainly, $67 billion or $68 billion will run them until January 1. Other requests can be made. These cuts are being made in order to bring about better management and more economy in Government.

Mr. DIES. I think the gentleman deserves a great deal of credit. The gentleman's committee deserves a great deal of credit, and this Congress deserves a great deal of credit because we are now shouldering our responsibility to the American people.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. DIES. I yield.

Mr. HALLECK. Apropos of the suggestion made by the gentleman from Texas and his colleague from Texas about action in the other body, I well realize that for years and years and years, practically all the time I have been here, if we cut an appropriation bill too drastically it has been increased in the other body. But, something has happened over there this year. I just want to say to the gentleman that if you cut this Defense Department appropriation bill too deeply, and I happen to think you have cut it too deeply, you are leaning on a weak reed when you argue now to let it go at this figure and then depend on the other body to raise it because I do not think they will raise it.

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. DIES. I yield.

Mr. MAHON. Probably, we have not cut the budget enough in certain respects. This was a compromise proposal that we have submitted. We do not rely on the other body or on anybody else, but we are trying to discharge our own responsibility.

Mr. HALLECK. Mr. Chairman, will the gentleman yield further?

Mr. DIES. I yield.

Mr. HALLECK. It just seems to me that both of the gentlemen from Texas, if they were not saying so directly, were certainly saying indirectly, "Well, if we cut this too deep, let us depend on the other body to increase the amount and then we will work it out in conference." Now, if I did not understand those words correctly, then I do not understand the English language.

Mr. DIES. Of course, all of us know the military is never modest in its requests. All of us are familiar with the tremendous waste that has attended military preparations and maintenance from the very beginning of this Republic. I can understand the attitude of a man who has lived from the public trough all his life, and who has never had to compete in the markets of the world and who has never had to practice law in a little, hot courtroom, and end up with a $100 fee, or who has not been compelled to operate a little mercantile store in a small town or meet a payroll. I can understand how a man who has lived from the public trough all his life can be in favor of such enormous expenditures.

I can understand how men who spend an entire lifetime supported by the Government, can fail to understand and appreciate fiscal responsibility. They simply think that money grows on trees. But there are literally thousands of people all over America who are seriously and deeply alarmed.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(By unanimous consent, Mr. DIES was granted 2 additional minutes.)

Mr. DIES. There are people all over the United States who are seriously and deeply alarmed by the irresponsibility of this Government; by the fact that they have already lost half of their savings. These people now demand a substantial reduction in Government expenditures. This is no superficial demand—it is a grassroots rebellion against extravagance and wastefulness in the Government. Every branch of the Government has been guilty of it. The legislative branch has not manifested sufficient regard for our responsibility, and neither has the President. I have become seriously disappointed in the President. He cannot be a candidate for reelection. If there ever was a time for him to demonstrate great statemanship and moral and political courage it is today. I want him to lead this country back to financial solvency, and to honesty in our fiscal policy. That I conceive to be of greater need today than anything else. We may have the threat of the Soviet Union with us for a hundred years. How does any man know when this threat will lessen? Does the gentleman believe that in 5 year or 10 years we have any certainty, by wasting the resources of this country, to purchase peace and security? We are faced with a situation which may continue for decades. Are we going to bankrupt our country and fulfill the prophecy of Lenin who, in 1921, stated in an interview which appeared in one of the New York City papers, that someday the Soviet Union will force the United States to spend itself into bankruptcy. What surer way is there for us to dig our grave, destroy our country than to continue to spend our grandchildren's money and to repudiate honest obligations?

I say, Mr. Chairman, this committee and the Democrats in this House deserve commendation because we are now facing up to our grave responsibilities.

The CHAIRMAN. The time of the gentleman has again expired.

The Clerk read as follows:

COURT OF MILITARY APPEALS

For salaries and expenses necessary for the Court of Military Appeals, $375,000.

Mr. ABBITT. Mr. Chairman, I move to strike out the last word, and I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. ABBITT. Mr. Chairman, we hear much from certain administrative leaders and spokesmen that the budget request for the armed services should not be reduced below that requested by the President. I for one believe in an adequate preparedness program. I realize it is necessary that we protect the security of this country. We cannot afford to allow ourselves to become weak

militarily. However, I do not believe that the amount of money requested by this administration is the lowest possible amount that will adequately provide the necessary protection for our country.

No one familiar with the Defense Establishment will question that its activities involve much waste and inefficiency in its procurement and supply functions and in the utilization of personnel. If these weaknesses were corrected, the appropriation for the Defense Department could be tremendously reduced. I have talked with and heard from a number of members of the armed services. They were unanimously of the opinion that the operation of the Armed Forces abounds with waste and inefficiency. They pointed out many instances of this to me. Obviously their names cannot be used for fear of retaliation by their superiors.

The Congress as well as the executive department has a responsibility for cutting this waste. One way of doing it is through the reduction of appropriations and demanding that the Defense Department eliminate waste and inefficiency as far as possible. I am convinced that so long as the Congress is willing to blindly follow the request for money by the Department just so long will the Department refuse to make a real effort to reduce its waste and inefficiency.

I am convinced that millions and millions of dollars have literally been wasted by the Defense Department over the past few years. There is no real desire by this Department from the Secretary on down to achieve any economy. They are so busy trying to build up their prestige and seniority that they have no thought for the woes of the American taxpayer.

The President requested in his budget the sum of $36,128,000,000. The committee has recommended that this sum be reduced to $33,541,225,000. This is a most modest reduction in such a huge appropriation. I do not believe for one moment that the cut will in anywise reduce the striking power of the Armed Forces if any real effort is made to absorb the cut.

This present administration talks economy but has made no sincere effort to achieve it. Only last week, the President in a telephone talk to a political rally said—and I quote—"if the item veto existed right now, I could easily do some serious expense cutting." He, of course, was referring to requested legislation whereby the Chief Executive would be permitted to cut out individual items in an appropriation bill. I do not at this time desire to question the advisability of giving the Chief Executive this authority. It has much to commend it. However, I would like to point out to the people that even if this authority were given the Chief Executive they could not expect too much reduction in governmental expenditures.

It so happens that every item in all 11 of the appropriation bills that have been passed by the House of Representatives were put there by the Chief Executive himself and upon his request. Out of all of these appropriations—11 bills—only 4 items have been increased over the request of the administration by the House. These increases amount to approximately $2 million. On the other hand, every bill that the House of Representatives has passed upon has been reduced in a substantial amount. In addition to this, the House of Representatives before acting upon the appropriation bills called upon the Chief Executive by a formal resolution to point out the items in his budget that could be reduced. In response to this, the Chief Executive did indicate certain items that could be reduced. These reductions have been made by the House. I merely say this to point out the inconsistency in this administration in saying in one breath that it will achieve efficiency and economy and turn around in the next breath and demand that Congress increase the appropriations.

I do not believe that there is a real desire on the part of this administration to reduce expenditures but I hope that the American people will continue to demand efficiency in Government and an economical operation thereof by both the executive and legislative branches of their Government.

This same administration which is requesting the authority of item veto so it can easily do some serious expense cutting is the same administration that has proposed in its budget request Federal aid to State and local governments totaling more than $5.5 billion for new programs.

Unless we guard against the dangers of extravagance, we may go down in history as the generation which, instead of passing on a better and richer country to the next generation—mortgaged the future of our children and grandchildren to assure our own ease and comfort.

The Clerk read as follows:

OPERATION AND MAINTENANCE

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, including administration; medical and dental care of personnel entitled thereto by law or regulation (including charges of private facilities for care of military personnel on duty or leave, except elective private treatment), and other measures necessary to protect the health of the Army; care of the dead; chaplains' activities; awards and medals; welfare and recreation; information and educational services for the Armed Forces; recruiting expenses; subsistence of prisoners at disciplinary barracks, and of civilian employees as authorized by law; expenses of apprehension and delivery of prisoners escaped from disciplinary barracks, including payment of rewards not exceeding $25 in any one case, and expenses of confinement of such prisoners in nonmilitary facilities; donations of not to exceed $25 to each prisoner upon each release from confinement in a disciplinary barracks; military courts, boards, and commissions; authorized issues of articles for use of applicants for enlistment and persons in military custody; civilian clothing, not to exceed $30 in cost, to be issued each person upon each release from confinement in an Army or contract prison and to each soldier discharged for unsuitability, inaptitude, or otherwise than honorably, or sentenced by a civil court to confinement in a civil prison, or interned or discharged as an alien enemy; transportation services; communications services, including construction of communication systems; maps and similar data for military purposes; military surveys and engineering planning; contracts for maintenance of reserve tools and facilities for 12 months beginning at any time during the current fiscal year; repair of facilities; utility services for buildings erected at private cost, as authorized by law (10 U. S. C. 4778), and buildings on military reservations authorized by Army regulations to be used for a similar purpose; purchase of ambulances; hire of passenger motor vehicles; tuition and fees incident to training of military personnel at civilian institutions; field exercises and maneuvers, including payments in advance for rentals or options to rent land; expenses for the Reserve Officers' Training Corps and other units at educational institutions, as authorized by law; exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law; expenses of inter-American cooperation, as authorized for the Navy by law (10 U. S. C. 7208) for Latin-American cooperation; not to exceed $5,371,000 for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certificate of necessity for confidential military purposes, and his determination shall be final and conclusive upon the accounting officers of the Government; $3,145,200,000: *Provided*, That during the fiscal year 1958 the maintenance, operation, and availability of the Army-Navy Hospital at Hot Springs National Park, Arkansas, and the Murphy General Hospital in Boston, Mass., to meet requirements of the military and naval forces shall be continued.

Mr. FORD. Mr. Chairman, I make a point of order against the language on page 8, beginning on line 2 and running through line 6.

The CHAIRMAN. Will the gentleman state his point of order?

Mr. FORD. The point of order, Mr. Chairman, is predicated on the fact that this is legislation on an appropriation bill and contrary to existing law. It is my understanding under the rules of the House that the inclusion of any language in an appropriation bill that imposes an additional burden or duty or authority on the executive branch of the Government, not required by law, makes such language subject to a point of order as legislation on an appropriation bill.

The CHAIRMAN. Does the gentleman from Texas desire to be heard on the point of order?

Mr. MAHON. If the Chair please, I would like for the Chair to hear the gentleman from Arkansas [Mr. NORRELL].

Mr. FORD. Mr. Chairman, if I might continue I would like to discuss the basis of my point of order.

The CHAIRMAN. The Chair had the understanding that the gentleman had completed.

The gentleman from Michigan reserves a point of order.

The gentleman from Arkansas [Mr. NORRELL] is recognized.

Mr. NORRELL. Mr. Chairman, I maintain that the Chairman should not sustain this point of order.

I like the gentleman from Michian; he is a fine man, but Army and Navy Hospital of Hot Springs, Ark., has been authorized for a long, long time. It was first authorized about 80 years ago. I hold in my hand—and I am not going to take much of your valuable time—United States Statutes at Large No. 22. On page 121 you will find this section:

The establishment of the Army and Navy Hospital at Hot Springs, Ark.—

And this is the establishment of the Army and Navy Hospital at Hot Springs. It is true it was in an appropriation bill, but it is law, and it has been on the statute books since 1882.

In addition to that, in 1929, United States Statutes at Large, No. 42, on page 53 you will find where the Army and Navy Hospital was enlarged.

On the basis of these citations I maintain that the point of order should be overruled.

The CHAIRMAN. Does any other gentleman desire to be heard on the point of order? If so, the Chair will be pleased to hear him.

Mr. FORD. Mr. Chairman, I think the crux of the matter is that without this language in the appropriation bill the executive branch of the Government, in this case the Department of the Army, would have full authority to close these installations. In my opinion, the inclusion of the language which is currently in the Defense Department appropriation bill for the fiscal year 1957, and the language to which I object is an extension of that language in the fiscal year 1958 Department of Defense appropriation bill. But let me just refer as a practical matter to the language in the current appropriation bill and I will carry on from there to show that if this language is included in the fiscal 1958 bill again, there is no question but what it imposes an addition burden, an additional obligation, on the Department of Defense. Let me read testimony from the Department of the Army, and this is Secretary Brucker testifying on page 479 of the Department of Defense hearings for the fiscal year 1958:

Secretary BRUCKER. Mr. Ford, the situation is precisely this: Twice we have recommended to the committees of Congress that both of those hospitals be abandoned and that no money be put in for them. The reason is because we do not have need for them, and while the hospitals, of course, have adequate personnel, both nurses and doctors, there is not sufficient patient load in the area for either one of those two hospitals—

Here is the important language, still quoting Secretary Brucker—

so twice we have recommended against inclusion of those two hospitals——

Mr. DONOHUE. Mr. Chairman, I make a point of order that the gentleman is not speaking on the point of order he has raised.

The CHAIRMAN. The gentleman from Michigan will proceed and direct his remarks to the point of order. The Chair does not intend to cut short the gentleman from Michigan, and is prepared to rule.

Mr. FORD. Mr. Chairman, may I finish one sentence, which I think goes to the crux of the matter—

so twice we have recommended against inclusion of those two hospitals, but twice they were placed back into the bill, and we were compelled to retain them.

There is language, Mr. Chairman, which indicates clearly that the Department of the Army by the inclusion of this language in fiscal 1957 and by the possibility of inclusion of the same language in fiscal 1958 is required to do something it does not want to do and it does not have to do unless this language is included.

Mr. DONOHUE. Mr. Chairman, speaking in opposition to the point of order, may I say that insofar as the Murphy General Hospital, in Waltham, Mass., is concerned, that was established by law and is authorized to be carried on by the Government; therefore, the point of order is not well taken.

The CHAIRMAN (Mr. KEOGH). The Chair is ready to rule.

The gentleman from Michigan makes a point of order directed to the language on page 8, lines 2 to 6, inclusive, on the ground that that language constitutes legislation on an appropriation bill.

The language of the proviso in effect imposes upon a department of Government an affirmative and mandatory requirement that the two named installations shall be continued. In the opinion of the Chair, the interposition of that affirmative requirement is legislation on an appropriation bill and the Chair, therefore, sustains the point of order.

Mr. FORD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FORD: On page 8, line 1, strike out "$3,145,200,000" and insert "$3,225,200,000."

Mr. FORD. Mr. Chairman, I rise in support of an amendment that seeks to restore $80 million in what we call the operation and maintenance account of the Department of the Army. This is the second largest item in the Department of the Army, but it is the account that pays for the day-to-day operations of all the posts, camps, and stations, not only in the United States but throughout the world.

The Department of the Army in the budget which was submitted in January was authorized to request $3,400,000,000 for this account. Let me give you some history as to how this figure was arrived at. Actually the staff of the Department of the Army felt that the amount should have been substantially higher. There is nothing unique about that, but I think in good faith I ought to tell you exactly what their figure was. Their figure was about $600 million more than appears in the budget. But, when the Department of the Army staff proposed this figure, it was reduced by $329 million, and then when the operations and maintenance account went to the Bureau of the Budget and the Department of Defense, it was cut another $278 million, so we ended up with a figure of $3.4 billion.

Our subcommittee reduced it by a total of $264 million, but you can forget about $104 million, because that involves what we call deutschemark support; in other words, instead of us putting up dollars, the West German Government of Chancellor Adenauer will pay us in deutschemarks for the support of our forces in Europe to the extent of $104 million. The committee did make a reduction of $150 million. In my opinion, that reduction is too severe. I might also say that this reduction of $150 million does not coincide with the proposals of what we call the Army panel. The gentleman from Florida [Mr. SIKES], the gentleman from South Carolina [Mr. RILEY], the gentleman from Pennsylvania [Mr. FLOOD], and our good friend, the gentleman from Maryland [Mr. MILLER], who currently is in the hospital, and who, incidentally, asked me to say here on the floor that this amendment coincided with his views, the five of us, after spending 4 months analyzing most carefully and scrutinizing every item, recommended that there should be only a $70 million cut in this particular account. But, the whole subcommittee, composed of those who analyzed the Air Force and analyzed the Navy, imposed on us, those who ought to know the most about the Army, a reduction in addition to the $70 million we recommended, a total of $150 million.

Now, let me just take another series of figures. It would appear on the surface that this budget request of $3.4 billion is some $260 million more than the Army has in this account in fiscal 1957. Superficially that is correct, but actually it is not so, because the Congress, primarily, the Department of Defense to some extent, and other factors beyond the Army's control, created obligations resulting in increases in this account alone to the extent of $315 million, so in reality the Department of the Army in this account in fiscal 1958, based on the budget submission, will have to live on less than what they are during the current fiscal year.

Let me itemize for your information some of the additional burdens that the Congress imposed on the Department of the Army in this instance. If you will turn to page 414 of the Department of the Army hearings for fiscal 1958, you will find this: $72 million in additional burdens was imposed on the Department of the Army in this account alone for the so-called civil-service retirement. We passed that law. They have to include that money in their budget. The net result is an increase in the apparent size of this account.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. FORD. Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. FORD. In addition, Mr. Chairman, this Congress in 1956 passed the so-called Dependent Medical Care Act. In this account the enactment of that legislation results in fiscal 1958 an additional cost over 1957 to the extent of $19 million. There have been MSTS rate increases to the extent of $6 million. Sixty-one million dollars in increases in this account alone are caused by the enactment of our Reserve Forces Act of 1955. In the maintenance and operations account the Army has to house, has to take care of, has to equip the 6-month trainees who are on active duty. In this account in the fiscal year 1958, because we enacted that legislation, there will be an additional burden of some $61 million.

Here is an item of increase. We did not cause it, the Department of Defense

did not cause it; but in December of 1956 there were freight rate increases for the eastern railroads, the western railroads, the interterritorial railroads, the southern railroads and as a result this account is going to have an additional burden of over $6 million.

Let us talk about another item. We have been axiously waiting for the procurement and the installation of our Nike weapon around our major metropolitan cities. The procurement of equipment is expensive. The building of the installations is expensive. The training of the people to operate these multimillion-dollar antiaircraft weapons is expensive. To maintain the weapons once they are on the site is expensive.

If you want them to launch them, if we ever have that attack, and we hope we do not, it does not do any good to have bought equipment, put it on the site, if we let it deteriorate to a point where it will not function properly. In this account alone for the Department of the Army there is an additional burden because of the Nike program of about $30 million.

When you look at the fact that the Army in this account on its own in the fiscal year 1958 was asking for less money; when you bear in mind the additional burdens that we placed upon the Army, then I think this amendment should be approved.

Mr. Chairman, I should like to say this. Our Army panel has done its best for the past several years to find ways and means to get a few extra dollars so that the Army plant—its facilities, its posts, camps, and stations—could be kept up, could be properly maintained. We have cut down what we call deferred maintenance from $110 million several years ago to, I believe it is now, $84 million. But now in this account as submitted by the President, not as cut by the subcommittee, there is not a dime for deferred maintenance. I think that is a serious situation. The $150 million committee cut aggravates this situation.

So when you come right down to it, Mr. Chairman, in my honest opinion—and it is the consensus of those who analyzed the Army budget day after day after day for 4 months, the reduction in this particular part of the bill should not be more than $70 million. I trust and hope that we will be able to restore the $80 million.

I have listened with great interest to my friend the gentleman from Texas [Mr. MAHON], for whom I have the highest personal regard. But at the same time I like to look at this kind of a problem this way. We have had military difficulties prior to World War I, and prior to Korea. Let us hope we do not have them again. It seems to me it is the better part of wisdom to provide a little more to preserve the peace than it to provide a lot more to win a war.

Mr. GAVIN. Mr. Chairman, I offer a substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. GAVIN as a substitute for the amendment offered by Mr. FORD: On page 8, line 1, after the semicolon strike out "$3,145,200,000" and insert "$3,295,200,000."

Mr. GAVIN. Mr. Chairman, this amendment would restore the full $150 million.

I might say to the Members that when there is no war and no American boys are fighting and dying, defense appropriations seemingly do not have the appeal they have when there is a war on. We should be thankful to Almighty God that no boys are going into Anzio or Normandy beachheads today risking their lives, that there are no boys up in the air today that are being blasted out of the skies, or trapped down under the seas in submarines.

Sometimes I am surprised how quickly we forget the practical, realistic, hardheaded lessons of war. Last year we put $960 million in the defense-appropriations bill for the Air Force budget that nobody seemingly wanted, but it was put in anyway. I listened with a great deal of interest several years ago just prior to Korea when we had a budget of $17 billion for defense. We cut that budget back from $17 billion to $13 billion. A great American, Jimmy Forrestal, retired as Secretary of Defense. The budget was cut back further. Then suddenly we were precipitated into Korea. We had practically skeletonized our Army, Navy, Air Force, and Marine Corps. We had a few bazookas, a few obsolete tanks in Japan. We were in a desperate position. We called the boys back who had battled in World War II. We pushed them into Korea to stem the tide. The situation was critical and the result was we were nearly pushed back into the sea at Pusan, the most humiliating incident that ever occurred in the history of this Nation. Certainly we cannot afford to be caught again unprepared.

With a nation that has a budget today of seventy-some-odd billion dollars these items pertaining to defense should be given every consideration. I want to say I am particularly concerned with the Army's position. The cutbacks in the Army's programs are going to make it most difficult to maintain the defense strength so necessary and essential at this time. We seem to lose sight of the fact that we are living in a critical and chaotic world today when anything may happen. As far as I am concerned, we should build the greatest Army, the greatest Navy, the greatest Air Force we have ever had to meet the needs and demands that may be made upon us at any time and place in the world. The world today looks to us for strength and leadership and we will have a stabilized world as long as we remain strong. Never again should we let down our guard and be caught unprepared.

As has been pointed out here, this $150-million cut is one that will make it necessary for the Department of the Army to curtail and cut back many of its activities. If any branch of the service needs that help, the Army needs it. Let us not be economy minded for the sake of being economy minded. There is a great deal at stake. Now I do not wish to be misunderstood; I have every confidence in the committee. I respect their great judgment, the long hours, days, and weeks they have held hearings and heard testimony before presenting this legislation, but I think the Army cut is too great. Also permit me to say I have respect for those men who are leading our Armed Forces. We never hear much about them in time of peace, but when war comes, we need them, and we need them badly, and they must be prepared with the manpower, weapons, and equipment to meet the demands. Maybe they do make mistakes. We all make mistakes. None of us are infallible. I hope the day never comes when we are caught unprepared. I never want to see our boys go into action again without the planes, tanks, guns, missiles, and equipment necessary.

On a recent television program I noted an evacuation of our forces in Korea, if I recall correctly, at the Chosin Reservoir. We had three helicopters to evacuate our wounded, we were short on everything. We had practically nothing to try to fight a communistic horde.

In the chaotic world in which we live anything may happen. I do not know and you do not know. But I think we should give the Defense Department every dollar they think is essential and necessary to continue to build and maintain a great strength to meet any emergency that may arise at any time. So it is entirely up to you. The Congress is the one to reach a decision. I am as economyminded as anyone in the House, however, let me say it is my opinion that we should not economize at the expense of our defense program. If we maintain our strength and the countries of the world know we are strong, I am certain there will not be any difficulties arising and eventually we may restore the world to peace. Unless this amendment is adopted it will have a most serious effect on the ability of the Army to perform its mission. Its essential equipment will become deteriorated because of lack of repair. Training exercises will have to be curtailed. Training of replacements for our Nike units will be seriously limited. The soldier's standard of living will have to be lowered and a release of a substantial numbre of civilian employees by the Department of the Army will be necessary. It must be obvious, gentlemen, that the recommended cut of $150 million in operation and maintenance for the Army will not only seriously impair the Army's day-to-day operations and will deteriorate the Army's physical plant but will decrease the combat efficiency and effectiveness of the entire Military Establishment. This cut should be restored.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MAHON. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment, and all amendments thereto, and the substitute amendment, close in 25 minutes with the last 5 minutes to be reserved to the committee.

Mr. HALLECK. Mr. Chairman, reserving the right to object. I have not taken any time in debate either in committee during the reading of the bill or in general debate, but I do have a few things I would like to say and I might say to the gentleman from Texas I think it would, perhaps, take me a little more

than 5 minutes. So at the moment I trust he will not press his request.

Mr. MAHON. Mr. Chairman, I withdraw the request.

Mr. HALLECK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, this is, indeed, serious business that we are about today. This appropriation bill will set the extent of the provision so far as the armed services are concerned on the domestic front for the defense of our country. I am quite sure there is no one of us who would not agree with me that the threat of the Communist conspiracy is yet a real threat. It is a threat that might explode at any time. It is a threat which, I am quite sure, is held back by the power and strength of our great land. I have heard our beloved Speaker, the gentleman from Texas [Mr. RAYBURN], speak many times on the floor of the House in connection with matters involving our national security. On those occasions, without exception, if I am correct, and I believe I am, he has said that if he has to err he wants to err on the side of providing too much and not providing too little. I think that is the important thing here today. Reference was made by the gentleman from Texas [Mr. DIES] about our great President. Let me just say for myself, as I have said before, that this great land of ours without regard to politics of any sort and without regard to party, is fortunate, indeed, to have as our leader a man with the experience and wisdom and genuine American concern that Dwight D. Eisenhower has. The gentleman from Texas, and I do not know what it had particularly to do with this part of the debate, referred to how we ought to again have the inspired leadership that would protect the value of the dollar through a balanced budget and so on. I would like to remind him for whatever it is worth in this debate that in my 22 or 23 years here in the Congress, there have been just 4 years when we had a balanced budget and three of them have been under the leadership of Dwight D. Eisenhower—and the people of the country know it. We started out with an alleged cut of $2.6 billion.

Part of that, everybody agrees, has to do with bookkeeping and one thing or another. And then we get down to one point—two or three billion dollars—that is a cut into the real defense of the country. It is that about which we are concerned. It is that part of the cut about which we are concerned. If you will look at it, those of us who are seeking to make these restorations have added up about three hundred and thirty or three hundred and forty million dollars. That is about 25 percent of the real cut that has been made by the committee. In my opinion, it gets right down to a bare minimum. Certainly the minimum restoration, as the gentleman from Michigan has pointed out, putting it back to the figure where the Army panel agreed, is the least we should do.

Speaking of this whole business of the budget and our responsibility, broadly speaking there are two kinds of appropriations that come before us. One has to do with strictly domestic affairs that involves providing service to the people. I am one of those who hold that the Congress has a complete right and responsibility to say, "This much service we will provide out of the moneys of the Federal Treasury and not more." Then it is up to the people downtown to cut the cloth to fit the pattern. But when you get into the realm of national defense and national security, programs vital to the very existence of our country, then I say it is high time for us to stop, look, and listen, and to take the advice of people in whom we have confidence, if there are such. Let me say at this point I have confidence in our President, and I have confidence in the people in the armed services who are there advising him, and in the civilian people he has brought into the Defense Department.

I would like to remind some of my friends on the right, if you vote against national defense, adequate national defense, and you do not get into trouble, that is a laudable vote. But I recall, like the gentleman from Illinois, that I voted against these little fortifications in Guam. The gentleman from Massachusetts, the great majority leader, has often reminded me that I voted against the extension of Selective Service just before Pearl Harbor. There was provision for some additional battleships before Pearl Harbor. Some of us voted against that. As I say, it turned out to be a matter of great concern to some of us, although I must say with respect to the situation at that time, of course, had I known of the imminence of war I would not have voted that way.

Actually, the best deterrent to war in this day and age, when you deal with Communists who only know force and strength, is to have the sort of national defense that they know they cannot lick.

The CHAIRMAN. The time of the gentleman from Indiana [Mr. HALLECK] has expired.

(By unanimous consent, at the request of Mr. WIGGLESWORTH, Mr. HALLECK was granted 5 additional minutes.)

Mr. HALLECK. I have always said that no dictator nation can lick us because the productivity of men enslaved to a state cannot equal the productivity of freemen. But when I say that I also recognize that until the ultimate struggle between slave and free is determined, we must see to it that we are not destroyed by force of arms. That is the really important issue before us today. When I talk about the defense of the country, we have to keep a balance in mind. We have to have a balance between the armed services themselves. It is a matter of common knowledge to all of us that while we in the 80th Congress merged the Naval Affairs and the Military Affairs Committee and sought unification, there has not been the unification that we sought. One day we hope to get that unification, but let me say to you that you cannot get it as of fiscal 1958. It just cannot be done.

When I spoke of the balance between the services, I meant this: Surely the Army thinks they should have enough money to defend this country without any of the other services. The Army feels that way and the Navy feels the same way and the Air Force feels the same way. So it is up to us to divide up the areas of responsibility and say, "This much we give to each of the services."

Then there is another balance we have to strike, and it is important in this consideration, as it will be later on in the consideration of the mutual-assistance program and its appropriation. We have to have a balance between what we do at home for our own defense on the home front, and what I choose to call our offshore defense. In these farflung strategic places around the world we in effect have ringed the Communist conspiracy with bands of steel. Now, I say we are making that balance.

What is the final balance we have got to achieve? And let me say here because I have heard the President speak of it so often, no one appreciates more than he the necessity of this balance. It is simply the balance between what we do in respect to what we plan with our reserves of manpower in our Armed Forces, having in mind the absolute necessity of maintaining a strong functioning economy here at home. That is the most important balance of all. In connection with that may I remind some of the older Members who are here, that once upon a time President Eisenhower, then General Eisenhower, came back from a survey in Europe and spoke to us over in the auditorium of the Library of Congress, I think it was. And, as though it were yesterday I can hear him saying:

> The Armed Forces of the United States are but the cutting edge of the great productive machine that is America.

So I say we have struck that balance in this budget. I realize there are some people who would disband all of the Armed Forces, because they think the Russan Communist threat is not real. There are others who would go to complete mobilization, which would mean the shutdown of every automobile factory and regimenting of the people everywhere for all-out defense, then no war comes and we would lose the freedoms we want to protect.

What has happened in this budget? We have struck that balance, in my judgment, as near as can be determined by the best and most responsible minds of this whole country of ours. Having struck that balance then I certainly insist that it is folly, it is dangerous, it is bad judgment or worse, now to go on with deeper cuts that can jeopardize our very national security.

I think, as I said before, these cuts have gone too deep. I trust we can put some of it back. I have heard these statements about some of the people in the armed services. I know a lot of them, and I suppose spending their lifetime in those responsible positions they lose sight of some other considerations, but if I carried the responsibility of answering to the American people in the event of attack I would be concerned too. I have talked to them and heard them urge the necessities of their service. I have also heard them say time and again that they recognize along with our great President that we have got to strike the balance, the proper balance, between the maintenance of our Armed Forces and our strong functioning economy at home.

Unfortunately there is no arithmetic by which you can absolutely prove that any given figure is the right one.

But in respect to this figure—that is, the one presently before us—we all know of the possibility of so-called limited wars, or brush fire wars that need to be stopped. We have to stop them before they start or they will grow into bigger wars and possibly extend into world conflict. The Army is conscious of that.

I sincerely hope that in your good conscience and good judgment you can see fit to support this pending amendment.

Mr. MAHON. Mr. Chairman, I rise for the purpose of undertaking to fix a limit on debate on this substitute and all amendments thereto.

Mr. Chairman, I ask unanimous consent that all debate on this substitute and amendments thereto close in 30 minutes.

Mr. RILEY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. RILEY. Does the gentleman's amendment preclude the offering of another amendment to this section for a different amount?

The CHAIRMAN. The gentleman's request applies only to the pending substitute and amendments thereto.

Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MAHON. Mr. Chairman, I ask unanimous consent that the last 5 minutes be reserved to the committee.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. HIESTAND].

Mr. HIESTAND. Mr. Chairman, I feel very humble in rising immediately after the distinguished gentleman from Indiana, for whom I do have not only a high esteem but a real affection. I respect his point of view and I hate to differ in any particular with him. May I suggest that in some parts at least we are in agreement, for instance that of a balanced economy here at home.

Mr. Chairman, I rise to stress that point. To me there is nothing personal about all of this. I respect the original recommendation, also the original amendment offered by the gentleman from Michigan. His pronouncement was very factual and is indisputable. However, to me this is entirely a matter of principle affecting our Nation and one which we should consider at this time.

A famous Senator recently said:

> Our free enterprise system is the greatest deterrent in the world today to Russian aggression. It is our first line of defense. [It] can only exist under solvent Government. [Thus] there is literally nothing on earth more important than the preservation of the fiscal integrity of the Federal Government.

And:

> The $275 billion Federal debt equals the full assessed value of all the land, all the buildings, all the mines, all the machinery, all the factories, all the livestock, everything of tangible value in the United States of America.
>
> All of the tangible assets of this country are now mortgaged to the hilt.

Mr. Chairman, if we continue this spending and do not try to cut it, but just hold it even, and remember, we are not cutting it back from last year's expenditures, we are trying to hold it even, we shall have accomplished nothing. If we continue to spend, we are going into an era of inflation that will surely make the hair on our heads curl. You all know the effects of inflation. The basic cause is increased Federal spending. The more money we spend that is not productive money and for goods that are not sold, the more dollars are dumped into circulation. Thus the more the supply of goods and services are bid up. Inflation is the most terrible taxation we can inflict on the people of this country, especially those least able to stand it.

Therefore, I take the position of opposing every effort to restore funds to this budget. The committee, I might suggest, has done a magnificent job in adjusting it this much. They have gone into every detail. I am not qualified to say that this cut or that cut is justified or not justified. But on a basic principle where we are discussing this matter, first of $80 million and subsequently $150 million, may I suggest this cutback is not going to hurt very much when we compare it with $3 billion for this item in a budget of $33 billion. This 80 or 150 is not going to hurt very much. But this is a matter of principle. I think we have to hold the line as nearly as we can, to the previous year. Of course, allowances have had to be made for necessary pensions and so forth.

I submit that we can hold this line, I am opposed to the pending amendment and I hope it will be defeated.

The CHAIRMAN. The Chair recognizes the gentleman from Wyoming [Mr. THOMSON].

Mr. THOMSON of Wyoming. Mr. Chairman, I rise in support of the amendment and in opposition to the substitute. In cutting expenditures I believe that we have a most solemn duty and responsibility, both to make cuts where we can and on the other hand to provide the necessary money where we should and must. Throughout our consideration of appropriation bills it has been my purpose to cut Government spending on a selective basis in such a way as not to interfere with the necessary and proper functions of Government. By doing this I am satisfied that we can provide for a tax cut, and at the same time demonstrate fiscal responsibility by making substantial payments on the national debt, both of which I am convinced must be done if this country is to remain strong. My record of voting for economy in this Congress will speak for itself. I am sure that the Committee will acknowledge the genuineness of my support for real economy as evidenced by even requesting reduction and deferment in expenditures that affect my own State; but, Mr. Chairman, in our zeal for economy we must not lose sight of our dual obligation to provide for the necessary and proper functions of Government.

Mr. Chairman, there is no more necessary or proper function of Government than the defense of this country. I do not intend to support reductions in the defense appropriations just to bring cuts up to a figure that someone has taken out of a hat or just to achieve a certain percentage cut in the budget requests for this purpose. In my short service in the Congress I have come to know and to respect the chairman of the subcommittee that considered this bill, the gentleman from Texas. I know that he did not intend to infer that we should be satisfied with appropriating 97 percent of the funds for the necessary defense of this country. Not one of us expects 97 percent effort on the part of a soldier. It takes 100 percent of the necessary effort to win battles. We have an obligation to provide 100 percent of the weapons, materiel, and training that our serviceman really needs in order to accomplish his mission with the greatest chance of survival. I cannot accept the argument in the field of national defense that we can justify cuts on the basis of percentages of requests. The cut of $70 million made by the Army panel has been justified but so far I have heard no real justification for the additional $80 million knocked out by the full committee over the protests of the Army panel, the men who actually heard the evidence.

Mr. Chairman, we are all, I am confident, for the defense and security of this country. I think it is fair to say that each Member has proven that on the battlefield or otherwise.

The only contention between the President, the Defense Department and the administration, and the majority of the committee pertains to $1,353,775,000 of the cuts. The remainder of the $2,586,775,000 cut from the budget request is either that suggested by the President or obtained by transfer and recovery, or by expected deutschemark support. With regard to this controversy, I think we as House Members have a reasonable solution available to us.

I respect the President's ability generally, and particularly in the military field. I particularly wish to support the President in his responsibility to defend this country as Commander in Chief of the Armed Forces. I know, though, that he cannot possibly know everything that is in this appropriation bill any more than he could possibly know what each one of the platoons in his Army was doing on the field of battle. Therefore, I believe that under our system of government we must base our decisions upon the record made before the committee to justify the expenditures.

I respect this committee. I know they are trying to do a sincere job. Yet, even in 4½ months of hearings they too cannot possibly hear or know all of the facts pertaining to the hundreds of thousands of items that go into the defense of this country. The responsibility is on the military to fully justify their appropriations. Where the Department has failed to do that, and the committee has made cuts I think they should be sustained, particularly in our consideration in the House. I was impressed by Mr. SCRIVNER'S statement explaining how this particular appropriation bill is handled. Without reviewing that in detail I

point out that the Senate committee does not hold full hearings. They only hold hearings on the cuts that have been imposed by the House giving the military an opportunity to justify on the record which we can all read and understand, a restoration of those funds. Therefore, as to the funds which the President or the Defense Department says should not have been cut but on which there was no detailed justification before the committee, I believe that we are fully justified in sustaining the cuts. If, before the committee of the other body, the military having a full opportunity to do so, justifies the restoration of those funds I will support that restoration in acting on the conference report. In that respect and on that basis, I intend to support certain committee cuts.

On the other hand, where cuts have been made without an explanation by the committee except in terms of a percentage reduction of the budget and contrary to the recommendation of the panel that heard the evidence, I believe that those cuts should be restored now. As I am informed, the full committee has in several cases made reductions not recommended by the panel that heard the testimony. In some of those cases the need for the funds cut out was, in my opinion, fully justified. The $80 million sought to be restored by the amendment of the gentleman from Michigan is, in my opinion, such an instance. The gentleman from Michigan is a member of the Army panel. He has told us that the panel cut $70 million from the appropriation, but that the committee added another $80 million cut to make it $150 million. He has detailed for us the basis for the reduction of $70 million, but there has been no justification, except general talk, for the further reduction of $80 million made by the committee which this amendment would restore. In turn the gentleman from Michigan has pointed out to us that unless the restoration is made we will be taking away, or at least setting back, the Nike defense of this country. I do not think that any of us are willing to take the responsibility for that. If not, we should support this amendment.

On the same basis I think there are several other amendments to be offered which we should support. I understand that in a similar fashion $8 million was taken from the research and development funds of the Army. I believe in a balanced military force. I cannot accept the statements that we can do away entirely with some branches of the service. If we had, we would have capitulated when "Axis Sally" talked about new and horrible weapons which the Germans had to destroy us. I point out that history shows that for every offensive weapon that has ever been developed, there has been ultimately developed a defense. The Army has shown great progress in the development of an antimissile missile. If this $8 million cut remains, the program for that development would be jeopardized. That I do not believe is in the best interests of the people of this country who we are here to represent. Likewise, I think that it is our obligation to support, on the same basis, restoration of certain funds for the Air Force when the amendments to do that are offered. Seventy-five million dollars has been cut from the missile program which should be, in my opinion, restored. Eighty-three million dollars has been cut from the funds for modification and modernization of aircraft. I do not think that any of us would want to take the responsibility for sending a man up in an airplane that is not modern. We paid too high a price for that in Korea. Similarly, certain funds for spare parts should be restored. I also want to particularly mention the necessity of restoring the $10 million for the Army Reserves. Otherwise, the 6-month training program for which so many of us worked so hard and which is just now beginning to really take hold will be destroyed. I intend to support restorations in these and some other instances now. All told they represent only about $313 million of the total cuts of over $2½ billion made from the budget requests. I intend to support for now the cuts in funds the necessity for which has not been so justified. In turn, if on the "complaint hearings" before the Senate committee, restoration for those funds is shown to be necessary, I will support their restoration by conference action.

If they are not so justified by the administration and the military, the cuts should remain as a genuine, selective, reduction of Government spending. In that way I believe that I am carrying out my obligation to provide for the adequate defense of this country. At the same time, I am carrying out my pledge to cut Government spending on a selective basis in such a way as not to interfere with the necessary and proper functions of government. In that we we can bring about a reduction in taxes, while at the same time showing fiscal responsibility by making substantial payments on the public debt, both of which I also believe to be necessary if this country is to remain strong.

I submit to you that a reasonable course of action is to support cuts based on facts and on reason, and to restore funds which the record shows to be necessary for the adequate defense of this country. Let the Defense Department prove the need for funds not restored by the House on the record before the Senate committee. To the extent that they do so restore them in conference. Where they do not do so, save the money. By following this suggested course of action we are not abrogating our responsibility to the other body. If the other body should fail to act in what we consider a reasonable manner to provide for the necessary defense we can still consider a supplemental request for funds.

I further believe that this is supporting the President in his responsibility as Commander in Chief to provide for the defense of this country and at the same time, exercising our constitutional responsibility with regard to appropriations. Applied to the problem before the House, and under these principles, I urge support of the amendment offered by the gentleman from Michigan [Mr. FORD], and that the substitute be rejected.

The CHAIRMAN. The Chair recognizes the gentleman from Mississippi [Mr. COLMER.]

Mr. COLMER. Mr. Chairman, what I have to say in a few minutes must of necessity be of a general and a brief nature. But as one who has been consistently interested in the matter of economizing, even looking forward some day to a little retrenchment, I cannot permit this opportunity to pass without raising my voice in an effort to uphold this committee in its considered judgment in making these reductions in this gargantuan budget for the armed services of our land.

I am sure that none of us want to risk the defense of this country. But on the other hand I am sure that some of us are concerned about the overall economy of this country and where this unbridled spending is leading. I recall that in 1945 when the now President of the United States was in charge of our armed services in Europe, it was my high privilege, as chairman of the Postwar Economic Policy Committee, to interview him. I recall that I asked him the question in Frankfurt, Germany, that I asked all of the other leaders of the various countries we visited, 13 in all.

General, what is the opportunity or the chance for Germany to go Communist?

His reply was a classic one. He said:

I think it is rather slight, but bear this in mind, that a hungry belly does not care much what type of government it lives under.

If we spend ourselves into bankruptcy are we not playing into the hands of the Kremlin?

I have great admiration for the President of the United States. I think he is a great American and if I thought that he had studied this budget, that he had prepared this budget—yes, if I thought that he knew as much about it—and certainly this is no reflection upon him—as does the gentleman from Texas [Mr. MAHON] who as chairman of this subcommittee has studied it for months, I would be inclined to go along with the amendment.

I have been around here for a long while, too, and I have never seen this question of the budget raised, particularly with our national defense or in our dealings with foreign countries in the Foreign Aid Program, but what the leadership came down into the well, from one side or the other, and pointed out the grave danger we faced, just as the gentleman from Indiana, my friend [Mr. HALLECK], pointed out today. We are always on the brink of tragedy.

I say to you in my humble judgment that the most important thing before this country is the economy of the country, the stability of the dollar. We cannot cut all of these small items in the domestic program and let this big bill go by without stalling or killing the economy drive. This bill can stand this cut without injury to the defense of the country. Personally, I repeat, I am more apprehensive of inflation than I fear the Kremlin.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. JOHANSEN].

Mr. JOHANSEN. Mr. Chairman, I invite the attention of the distinguished chairman of the subcommittee and also

of my good friend and colleague, Mr. FORD, to these questions, not in the spirit of debate or contention, but for the purpose of obtaining information. We have had repeated references in this debate to the fact that we have, I believe it is, $10 billion of unobligated funds. We have had a reference to some $33 billion or $34 billion of unexpended funds. What concerns me—and I direct my question to both these gentlemen—is this. Suppose this $80 million is not restored. Suppose subsequent developments indicate that it should have been restored. In terms of possible relief, what relevancy is there in this $10 billion of unobligated funds? What relief is there possibly in terms of transfer by administrative action?

What relief is there in terms of the possibility of a supplemental or a deficiency appropriation?

Mr. MAHON. The gentleman has asked a good question. The services can come before the Congress in January and say, "We need additional funds. We would like you to give us permission to transfer some of the unobligated funds to this purpose, or we would like a direct appropriation." If there is any serious difficulty, I am of the opinion that the Congress would do whatever was right if there was any merit to the request.

Mr. JOHANSEN. I thank the gentleman.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. JOHANSEN. I yield to the gentleman from Michigan.

Mr. FORD. It is true, however, that there cannot be a transfer to the operations and maintenance account from any other Army account such as military pay, reserves, or research and development without a specific authority in law, so that in order to make a transfer, to make up this $80 million in case they needed it out of any of the other unobligated balances, and in the Army there are relatively few unobligated balances, if any, something less than $300 million at a maximum, before they could get any transfers at all they would have to get an authorization in the law.

Mr. JOHANSEN. Does the gentleman from Michigan regard the statement he has just made as being in any way contrary to the statement of the subcommittee chairman?

Mr. FORD. No; the gentleman from Texas simply stated that they can come back in January if they do not have enough money and get a supplemental. I agree with that. But it does not provide good planning and good programing to tell them they cannot have it now and then come in in January and tell them they can have it for the last 6 months.

Mr. SIKES. Mr. Chairman, will the gentleman yield?

Mr. JOHANSEN. I yield to the gentleman from Florida.

Mr. SIKES. It is also true that if we limit the amount of money that is to be available for this purpose the Service would have a directive not to spend more than that. Therefore, it can hardly be considered that they will come back for a supplemental.

Mr. HIESTAND. Mr Chairman, will the gentleman yield?

Mr. JOHANSEN. I yield to the gentleman from California.

Mr. HIESTAND. May I ask the chairman of the subcommittee if it is not true that even though it cannot be transferred from a major head, it can be transferred from any other subhead within this $3,145,000,000 for operation and maintenance?

Mr. FORD. Of course, anything within that account may be used by the Army for the purposes set forth in the hearings before the subcommittee or the Army panel, but if you look at the detailed justifications, which are complete and factual, you will find that they not only have a need for this $80 million, according to the facts and figures I tried to explain, they do not have enough to begin with, so there is nothing from which they can transfer in this account to make up the $80 million which my amendment provides.

Mr. JOHANSEN. I thank the gentleman.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. SCOTT].

Mr. SCOTT of Pennsylvania. Mr. Chairman, the size of this defense budget is not dictated in this country at all, it is dictated from the Soviet centers of power, from those centers of power which sent Communist forces pouring into Korea, from those sources of power which overwhelmed more than a dozen nations in the world.

One of the gentlemen has referred to the fact that if we do not appropriate enough we can come back in January. I call your attention to the way in which we got into the Korean war.

On a day on which all of us woke up without any warning whatever that war was imminent and at a time when most of the Members of the House were off the floor having lunch, the announcement was casually made that during the preceding night we had entered into a war in Korea. There was no time to come back in January at all. There was no time to restore the cuts. There was no opportunity to be ready. I further call your attention to the fact that at that time the then President of the United States had rejected an action of the Congress in appropriating funds for a 70-group Air Force and had asserted that a 44-group Air Force was ample for our defense—very much as some of you gentlemen are arguing today that you know better than the soldier President of this country how much defense is needed for its protection. There was no time to build up the Air Force after we had entered into the war. I state this today as a warning that should we enter into a war with even less notice than occurred in the last one, the monkey will be on the back of you who for so long have professed your support of the President of the United States even asserting that your support has exceeded that of his own party—and it is true that frequently you did when it was a question of Federal aid to States, knowing that the governors of most of the States were members of your party and that patronage was involved. Very little patronage is involved in the defense appropriation bill. So you are willing to support the President when there are some cakes and ale involved in the fringe benefits, and in this kind of domestic program where there is some opportunity to gain, but you are not willing to support the President when the security of the United States is at stake. I will not set up my judgment against that of a President who has said that as to certain items here, the vital defense of the Nation is involved and the money is necessary. I, for one, am going to support the amendment and the amendment to the amendment.

Mr. SHEPPARD. Mr. Chairman, will the gentleman yield?

Mr. SCOTT of Pennsylvania. I yield.

Mr. SHEPPARD. I would like to ask the gentleman this, if I may. I have a high regard for the gentleman and his political acumen, but I have always understood that it was your desire in view of the position previously held by the gentleman to have Republican control of the House. So what are you worrying about us Democrats for? If we make a mistake and lose, you will benefit from it. So you ought to take your embalming fluid and keep it on that side of the aisle where it belongs.

Mr. SCOTT of Pennsylvania. I am not worrying about you gentlemen with regard to your partisan politics. I am sure you make every blunder in the game and then you will go out and assert that you are a united party and that you have saved the Union. But, I am telling the public, now in advance, and I am telling you gentlemen in advance that if you do not support this budget, and if you make crucial cuts in it and if you weaken the defense of this country, there are at least some of us who are going out to remind the people of what you did and that you were responsible for doing it, and that we refused to be a part of it.

The CHAIRMAN. The time of the gentleman has expired.

The Chair recognizes the gentleman from Texas [Mr. MAHON] to close debate on the pending amendment and the amendment thereto.

Mr. MAHON. Mr. Chairman, this is the critical first amendment to be offered to this bill. Let me point out that this is a program of operation and maintenance of the Army. It is not for new weapons or missiles. It is for operation and maintenance of the Army. If you will look at page 113, you will see the amount we have provided in the bill is $3 billion—$3,145,000,000 is in this bill already. That amount remains after our cut. I am not convinced that the Army cannot do a fair job of operation and maintenance for $3,145,000,000. That is $90 million more than they have for this year's operation. They absorbed this year about $89 million. So here is $3 billion. The extent of the amount we gave them is about 96 percent of the amount they requested.

These floor amendments are very bad, misleading, and confusing. The gentleman from Michigan [Mr. FORD] knocked out a proposal which he said will save a million dollars in operations and maintenance, and yet the gentleman

from Pennsylvania would spend the saving in this operation and maintenance area because he proposes to restore the full $150 million included in the budget. He is not willing to let my friends from Michigan save just one million.

Members here today in effect have said, "Yes, I am a rubber stamp. I want exactly this. You cannot cut this operation and maintenance a dime."

I have a telegram from a friend in one of the great armed centers of the Nation which says: "Hogwash." He is a very fine individual, and former officer, too. He says: "If the price of peace includes cost of 2 captains and 5 enlisted men to run the golf shop and save this country, you can just count me out."

This $3,145,000,000 includes how much personnel? It includes 457,984 civilian personnel, in this 1 program and the gentlemen are not willing to cut off 1 man. In heaven's name, how can our people expect responsibility in government if people get up and say, "I am not willing to cut 1 man out of a payroll of 457,984"? How lacking in understanding can we be when we have not spent months studying this budget? In the event of peace or war within the next few years I think the figure for maintenance and operations of the Army in the sum of $3,145,000,000 is reasonably safe and adequate.

President Eisenhower, on April 26, 1950, shortly before the Korean war broke out in June of that year, said "I think the military budget is about right, except for an additional billion and a half." He said "That addition will make it accord exactly with what I think we ought to do" or words to that effect. He was wrong, I was wrong, you were wrong. There is no infallibility to be found anywhere.

What I am pleading for is a military budget in the area of $35 billion. With a program of that proportion we can make a great contribution toward deterring war, and if war comes we can lick the living daylights out of any nation which attacks us. Of course, we could get much more for our money, much more effective defense, if we could eliminate waste and dangerous rivalry among the services. The President made reference to this important problem in his press conference about 10 days ago. Unless we can do something about unwholesome service rivalries, defense costs will skyrocket and our defense effort and the taxpayer will suffer.

There is money in this item for the maintenance of thousands of automobiles and the pay of hundreds of chauffeurs. Many of these costs are necessary, but we owe a duty to our people to get more efficiency and economy in the management of the Armed Forces.

It is a sad state of affairs when Members are willing to completely abdicate. I am not one who believes that when the vote is taken on this amendment we will abdicate.

The CHAIRMAN. The time of the gentleman from Texas [Mr. MAHON] has expired. All time on this amendment has expired.

The question is on the substitute offered by the gentleman from Pennsylvania [Mr. GAVIN] to the amendment offered by the gentleman from Michigan [Mr. FORD].

The question was taken; and on a division (demanded by Mr. GAVIN) there were—ayes 32, noes 151.

So the substitute amendment was rejected.

The CHAIRMAN. The question recurs on the amendment offered by the gentleman from Michigan [Mr. FORD].

The question was taken; and the Chair announced that the noes appeared to have it.

Mr. FORD. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. FORD and Mr. MAHON.

The Committee divided; and the tellers reported that there were—ayes 113, noes 145.

So the amendment was rejected.

Mr. ARENDS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have just observed something I believe merits public notice. Above all else, the people we represent should know what we really stand for. Let us not try to be all things to all men.

On page 7451 of the RECORD of May 22, the gentleman from New Jersey [Mr. THOMPSON] incorporated in the RECORD a copy of a telegram signed by 42 Members on the other side of the aisle. They sent it to the President of the United States, telling him that they supported him in his budget request in the full amount. But I did not observe any of the signers of this telegram voting that way on this last teller vote. If they have changed their position, let them publicly say so; but let us not say one thing and do another.

Mr. MAHON. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, my district went for President Eisenhower in 1952 and he only lost it by 10,000 votes in 1956. I regard President Eisenhower as my personal friend. He is a fine American and I have great admiration for him. I am sorry the President has not had an opportunity to assert himself more affirmatively in the defense program but the President's responsibilities are very heavy in a wide range of Government problems.

The House in the vote just taken is generally supporting the President's program. We are providing him with about 96 percent of the funds which he requested. This is an effort to support the defense program of the country. We are all in the same boat.

This reduction is no reflection on the President. The changes in the bill by the committee were modest, and I wish the bill could have gone through the House without so much controversy. Rash and reckless statements tend to confuse our own people and the people of the world.

Mr. MARTIN. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the distinguished minority leader.

Mr. MARTIN. The gentleman says he is sorry that the President did not assert his leadership. The President has asserted his leadership in this defense fight. Why did the gentleman not go along with him, if he wanted him to assert his leadership?

Mr. MAHON. Well, we could not give a rubberstamp endorsement.

Mr. MARTIN. I did not say anything about a rubberstamp endorsement. This is merely a preliminary amendment to restore 25 percent of the cuts. That is not extravagant. That is a precautionary measure against disaster.

Mr. MAHON. In operating the Army, with all of its civilian personnel, all of its fields of operation, there is something wrong with the Army and there is something wrong with the administration if a fairly good job cannot be done with the funds recommended for appropriation. I believe the Defense Department will do a good job with the funds provided.

Mr. MARTIN. There is always something wrong with the Army, the Navy, and the Air Force until trouble comes, and then you want them.

Mr. MAHON. We are providing defense funds of about $35 billion, the highest peacetime budget in the history of our country. We are working for a strong defense program and we are fighting to uphold the hands of the President. I think after the shouting has subsided and the clouds are cleared, the President will be inclined to say, "Thanks, gentlemen, for doing a pretty good job with the defense budget."

Mr. GARY. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Virginia.

Mr. GARY. Does the Congress not have a responsibility and a duty to perform as well as the President of the United States?

Mr. MAHON. Well, some even voted to restore funds for a hospital that had been stricken on a point of order. It makes one want to smile except for the seriousness of it.

Mr. MARTIN. The committee put the hospital in the bill.

Mr. MAHON. Yes, but I say that the hospital was stricken out, that is, the mandate to operate it, and yet numerous Members on the other side voted for the amendment of the gentleman from Pennsylvania which would restore the entire multi-billion-dollar budget estimate for maintenance and operations.

Mr. MARTIN. What has the hospital got to do with this point?

Mr. MAHON. Well, it is very definitely a $1 million consideration.

Mr. HOFFMAN. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. HOFFMAN moves that the Committee do now rise and report the bill to the House with the recommendation that the enacting clause be stricken out.

Mr. HOFFMAN. Mr. Chairman, as long as this discussion has developed into what might be called a political—well, what would you say—maneuver, I might just as well remind the Committee that I do not mind being kicked around either by the President or by my own party leadership, only I reserve the right to yelp whether I am hurt or not. Just to let you know I am not

dumb. While we are talking about loyalty to the party, may I recall and I do very, very distinctly an occasion when the majority leader went off the reservation on the Phillips amendment. To those on the Democratic side who cheer, may I say, "Oh, I have no love for you."

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN. The gentleman once said he had a minimum of admiration for me. He may keep it. I do not yield, Mr. Chairman.

I recall when one of the minority leaders, our distinguished friend from Indiana, went off the reservation and led 57 Republicans with him. Now who is going to call the turn? Who is to fix the standard of party loyalty—do the judging? That is something all would like to know.

My allegiance is to my country, to my people and to the principles of my party and then to the leadership, but not before. If the President of the United States wants to give an order, if he wants to crack a whip over me, all right; but I want him to crack it at the beginning of the battle—not give me one order one day and then another order another day. I cannot change that quickly, and that is all there is to that.

I am saying this for the benefit of my Republican friends; I will go along with the President on economy, but there is not an individual in this House, not one, who does not know that the President, as Commander in Chief of the Armed Forces, can squeeze out of this budget, out of appropriations for the Armed Forces, any cut that is made here, if he wants to take it out where there is waste and inefficiency. That is the situation. I will go along with the leadership of my party when they are right and stick to the principles of the party. But I will not kneel down, worship, and kiss the feet of any man. Nor will I throw overboard my convictions in favor of what appears just at the moment to be political expediency. The principles of the party are better and adherence to them more essential than is any one individual.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN. I yield.

Mr. FORD. I think the record should be straightened out. I am sure the gentleman from Texas [Mr. MAHON] did not mean to infer that anybody who voted for the restoration of the $80 million was in any way whatsoever seeking to restore any of the money which the committee directed the Department of the Army to spend uselessly, wastefully, inefficiently in the 2 hospitals, one in Massachusetts and one in Arkansas. I am sure the gentleman wants to straighten out that record.

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN. Mr. Chairman, I cannot yield further. I am not involved in any of this discussion between the gentlemen. The only point I am trying to make is, as was said in the beginning, kick me all you want, but do not expect me to remain silent while you do it even though no personal hurt is felt. Further, who other than my constituents put a judge over me—and just what are his qualifications?

Mr. HOLLAND. Mr. Chairman, I rise in opposition to the preferential motion.

Mr. Chairman, the gentleman from Illinois [Mr. ARENDS] stated that Congressman THOMPSON of New Jersey sent a telegram to the President signed by a number of Members, who signified that they would support the President's budget. He failed to read the telegram in full. The telegram read as follows:

> As Democratic Members of Congress, who have, in the national interest, resisted irresponsible budget cuts, we welcome your belated decision to go to the people in defense of your budget.
>
> Whereas your speech contained political overtones and implications which, in our opinion were irrelevant and unnecessary, it was on the whole a constructive defense of the Federal budget.
>
> We must observe your failure to note that much of your current difficulty over the budget comes from members of your own party, most, if not all, of whom you recommended for support by the electorate in the elections of last November.
>
> We are, nonetheless, willing to cooperate with you in your efforts to stem the reckless economy drive which constitutes a threat to our national defense and to the general welfare of the United States.
>
> We are for sound economies, and support many of the recommendations that have been made by the Appropriations Committees of the House and Senate.
>
> We urge further studies which, we believe, can bring about savings in the operation of the Defense Establishment, while at the same time increasing the efficiency of the armed services.

For the information of the gentleman from Illinois, I was one of the signers.

I did not sign the resolution to give the President a blank check.

There was no blind following of the President. I am very much surprised to hear the gentleman from Illinois trying to chastise the Democrats of the House for not following the President. I think it is about time the gentleman from Illinois started chastising the Republicans for not following the President. Most of the Republicans owe their election to his coattails.

Mr. ARENDS. Mr. Chairman, will the gentleman yield?

Mr. HOLLAND. I yield.

Mr. ARENDS. I have a copy of the telegram here which said that his presentation of the budget to the country on his television show was on the whole a constructive defense of the Federal budget.

Either the gentleman meant it or he did not mean it.

Mr. MAHON. Mr. Chairman, will the gentleman yield to me?

Mr. ARENDS. Mr. Chairman, I have no quarrel with the gentleman from Texas about this matter, because he was not involved in it.

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. HOLLAND. I yield to the gentleman from Texas.

Mr. MAHON. My name is on the bill we are considering. I heard the President speak in general defense of this budget and I thought he made a good presentation. I agree with much of what he said. The bill before us would indicate that I perhaps agree with 97 percent of what he said about the defense budget, and he did a good job from his point of view on his foreign aid speech. I think the defense budget is generally good. We made a few helpful changes. However, we have given the President more than 93 percent of what he requested.

Mr. HOLLAND. I think if the gentleman from Illinois will only take the time to absorb the contents of this telegram, he will find that it states:

> We are for sound economies and will support many of the recommendations that have been made by the Appropriations Committees of the House and Senate.

My vote today carries out the above promise.

I sympathize with the gentleman from Illinois, as I realize he must be a very confused Republican. I am not sure if he is a member of the "modern Republicans" because by his record I would say that he is not. It must be very hard to be a member of a party when the President's own Cabinet does not agree with him on his budget and suggests cuts.

Even the President himself seems to be uncertain if his budget is right. I would suggest that they have a get-together meeting and try to arrange for a meeting of the minds of the Eisenhower Cabinet.

The CHAIRMAN. The question is on the preferential motion offered by the gentleman from Michigan.

The motion was rejected.

The Clerk read as follows:

RESERVE PERSONNEL

For pay allowances, clothing, subsistence, transportation, travel and related expenses, as authorized by law, for personnel of the Army Reserve while on active duty under section 265 of title 10, United States Code, or undergoing Reserve training or while performing drills or equivalent duty, and for members of the Reserve Officer's Training Corps, subsistence for members of the Army Reserve for drills of 8 or more hours' duration in any one calendar day; $197 million.

Mr. SIKES. Mr. Chairman, I offer a committee amendment.

The Clerk read as follows:

Committee amendment offered by Mr. SIKES: On page 8, line 16, after $197,000,000" insert "*Provided*, That $10,000,000 of the unobligated balance of the appropriation 'reserve personnel, Army, 1957' shall remain available until June 30, 1958, and shall be merged with the appropriation 'reserve personnel, Army' made by this act."

Mr. SIKES. Mr. Chairman, the Congress has diligently sought to build a strong Reserve force. At no time have we failed to provide adequate funds for the Reserve programs which have been developed by the Department of Defense. There have been times when we have felt the Department has not given to the Reserves the same wholehearted backing which we in Congress have given. I want to be sure that we maintain that same record of enthusiastic support in the coming fiscal year.

The budget estimate for Reserve personnel in fiscal 1958 called for $207 million. The subcommittee looked at past records and felt the amount requested was greater than could be used. For several years we have found fund requests for the Reserves to be higher than the

actual requirements. Each year we have provided a smaller amount than the amount requested; yet each year the amount we gave was more than was used. In 1957, we allowed $215 million for this item, and the amount used is expected to be $197 million. Hence for 1958 we earmarked the same amount as that used last year, $197 million, which is $10 million less than the amount requested.

Very recently, however, we have received information that the entire amount of the budget request must be allowed if the 6 months' training program is to be carried on throughout fiscal 1958. The number of trainees enrolling in recent months shows the program has ballooned far above expectations. The large number of trainees now on hand will require such a large part of the fiscal 1958 money to be spent in the summer and fall that there will be no funds for an orderly 6 months' training program throughout the year. This would bring about a disrupted program not in the best interests of the service. Possibly the budget request for $207 million is now too small. However to provide additional money without a budget request would leave us with no assurance the extra money would be used. Therefore, we are recommending—and this is the committee action—that 10 additional millions be made available.

Please remember that is not a new appropriation of $10 million. This amendment does not add to the amount of the bill. It simply provides that $10 million of the amount of money heretofore provided for the reserves, which will not be spent by the Army during the fiscal year 1957, can be carried over—not revert to the Treasury—can be carried over and used during fiscal 1958. From the evidence given to me yesterday by Secretary Milton and others from the Department of the Army, it appears this amount will permit a training program for the 6 months' trainees to be carried on throughout fiscal 1958 although on a somewhat modified basis.

Mr. MAHON. Mr. Chairman, will the gentleman yield ?

Mr. SIKES. I yield.

Mr. MAHON. In previous years, as the gentleman has pointed out, there have been unused funds in the reserve program. Now it has appeared that the amount of the funds budgeted would be required and this is not increasing the overall figures in the bill, but takes care of the reserve program 100 percent according to the budget. I am strong for it and I understand all the members of the committee are for it.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield.

Mr. FORD. Is it not true that our Army panel, and I believe the subcommittee, took the initiative on this because we were informed by officials in the Department of the Army that this would impose certain restrictions, legitimate restrictions, on the number of those who would come into this 6 months' training program in the age group of 18½ to 26.

Mr. SIKES. Actually we have been concerned that the Army has overemphasized the six months' training program at the expense of the regular service and the detriment of the recruiting program for enlistments. In its zeal to make the six months' training program a successful one, the Army may have contributed to the drop in enlistments for the regular service. In any event we on the subcommittee feel there is question in the Army's wisdom in recruiting young men 18½ to 26 for the six months' training program, and we question their wisdom in shortening the reserve obligations. These actions have helped to bring about the current backlog of trainees which has disrupted the planned training program.

We feel that the group the program was primarily intended to reach was really the 17- to 18½-year-olds, that the emphasis should be continued on that group rather than the older group, and that reserve obligations should be lengthened.

Mr. BROOKS of Louisiana. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield.

Mr. BROOKS of Louisiana. Mr. Chairman, I think this amendment is a highly important amendment. I am going to ask for a little bit of time myself to talk on the amendment, but I want to commend the gentleman for offering the amendment at this time.

Mr. SIKES. I am grateful to my distinguished friend for his interest. I feel that the amendment is necessary and I trust it will be adopted.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MAHON. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment, and all amendments thereto, close in 5 minutes.

Mr. BROOKS of Louisiana. Mr. Chairman, how much time does the committee want? I would like to have 3 minutes—or 4 minutes rather—to speak on the amendment.

Mr. MAHON. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto close in 6 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana [Mr. BROOKS] for 1½ minutes.

Mr. BROOKS of Louisiana. Mr. Chairman, I understood that I would have 4 minutes.

The CHAIRMAN. Without objection, the gentleman from Louisiana will be recognized for 4 minutes.

There was no objection.

Mr. BROOKS of Louisiana. Mr. Chairman, I rise to explain the situation with reference to this amendment which has been offered. After the hearings were held by the panel in the Committee on Appropriations, the Armed Services Subcommittee No. 1, held additional hearings on this particular matter. At these additional hearings, we were privileged to have at least one member of the panel of the Committee on Appropriations sit in with us and listen to the testimony presented to Subcommittee No. 1 of the Committee on Armed Services with regard to the development of the program. To be very frank about the matter, the last 3 months has shown a tremendous development in the Reserve program. The development has been in the 6 months' training program. At the present time, there is a backlog of almost 32,000 people awaiting the 6 months' training program. The USAR, that is the United States Army Reserve, today is a reserve of 281,692 persons driving toward a total of 300,000 in the Army Reserve.

At the time the hearings were held before the Subcommittee on Appropriations, the Army Reserve had a total of something like 244,000 individuals. The Army Guard now has a total of 437,166 persons. In fact, the Reserve program in the last 3 months has grown so fast that the Army Reserve program is completely out of funds at the present time for the 6-month trainees. No 6-month trainees are being taken into the program for 6 months' training at the present time, and cannot be, because of lack of money until July 1.

What we want is an opportunity to train these 6-month trainees following the end of the fiscal year, July 1. The Committee on Armed Services has been working for many years to build up the Army Reserve program. It is a program that we have had trouble with all through the years. Now for the first time we have the material to train, we have the manpower to train, but we are out of money to train those people in the 6 months' training program.

Mr. DEVEREUX. Mr. Chairman, will the gentleman yield?

Mr. BROOKS of Louisiana. I yield.

Mr. DEVEREUX. I would like to compliment the gentleman from Louisiana for his statement. This money must be provided if we are to go ahead with our Reserve training program, with which we hope to save money eventually.

Mr. BROOKS of Louisiana. If we do not have the money, the 6 months' training for the Army collapses.

The CHAIRMAN. The time of the gentleman from Louisiana [Mr. BROOKS] has expired.

The CHAIRMAN. The Chair recognizes the gentleman from Montana [Mr. ANDERSON].

Mr. ANDERSON of Montana. Mr. Chairman, I have listened with a great deal of interest to the splendid discussions we have had during the past 2 legislative days on the appropriations bill for national defense.

There has been some disagreement, but we are all agreed, first, that we want to provide an adequate defense, and, second, that we want maximum results from every dollar we spend.

There are few who will disagree with the next statement I am going to make: "The dollars that buy the most defense are those we invest in our civilian components—in the National Guard and in the Reserves of the Army, Air Force, Navy, and Marines."

Not only do we get the most for our money, but we do it without draining our Nation's manpower resources. Those in our civilian components carry their full civilian occupation load, contributing their full share to the civilian economy and, at the same time, work to develop

and maintain those military skills which will be required if mobilization should come.

In view of the great competence displayed by those who have spoken on the bill, perhaps I should, as the lawyers say, qualify myself to testify on this subject. In the first place, I am deeply interested in the military and particularly in the civilian components. I have 32 years of service, enlisted and commissioned, in the National Guard and the Army Reserve. I was in the Reserve before World War II, when units were only on paper and the Reserve was chiefly a pool of officers. After World War II, I became commander of 1 of the 25 Reserve divisions in the United States. I am still commanding general of the 96th Infantry Division Reserve, whose units cover Montana, Utah, Arizona, and Idaho, and I have to live with this bill.

I have fought the fight to make the civilian components into units, ready to mobilize beside their Regular Army partners in a minimum of time.

That requires trained men and trained units, and no one knows better than I the long way we have come along that road. The longest step we ever took toward ready civilian components was, when the Congress passed Reserve Forces Act, 1955, so that we could replace inexperienced recruits with trained men.

Under the 6-month training program the Reserve and the National Guard can enlist young men for military service and after 6 months' training he will come back with an individual military skill to be welded into the unit framework.

The 6-month program caught on—and in short order we enlisted as many young men as could be trained with the funds in view. For some time now there has been no 6-month training enlistment program in the Army Reserve, and unless we pass this amendment there will be none in the year ahead. That has been a hard blow to reservists who were just making real headway toward the goal of units filled with trained men.

Week before last I met with the Senior Reserve Commanders Association which consists of some over a hundred general officers and their chiefs of staff. Seventy of the members of the Association, top Reserve commanders from all over the United States, were present and were greatly concerned at the halt in recruiting under Reserve Forces Act, 1955. I have with me a resolution adopted at that meeting which urges that the program be continued without interruption. I ask that that resolution be included in the RECORD.

There will be no such program the remainder of this fiscal year, and moreover, Mr. Chairman, there will be no recruiting program in fiscal 1958 unless we now restore this $10 million cut.

I want to make it clear that even passage of this amendment will permit only a limited number of enlistments which will have to be controlled by severe quotas. Such curtailed enlistments mean that we will meet our strength goals only if the 2-year men who start coming back in August are integrated into our ranks. If they are not brought in we are going to require a greatly expanded 6-month program if we are to accomplish our mission.

That matter can be considered in January—but if we are to avoid a drastic setback to our efforts to attain a really ready Reserve then we must restore this cut in Army Reserve funds now.

RESOLUTION ADOPTED BY THE SENIOR RESERVE COMMANDERS ASSOCIATION, MAY 14, 1957, CONCERNING CONTINUING THE RECRUITMENT AND TRAINING OF 6-MONTH ENLISTEES

The Senior Reserve Commanders Association representing all of the 25 Reserve divisions and certain other major Reserve commands in meeting assembled at Fort Leavenworth, Kans., May 14, 1957, calls the following facts to the attention of the chairman, Senate Armed Services Committee; the chairman, Senate Appropriations Committee; the chairman, Senate Defense Subcommittee on Appropriations; the chairman, House Armed Services Committee; the chairman, House Appropriations Committee; the chairman, House Defense Subcommittee on Appropriations; the Secretary of Defense; the Secretary of the Army; the Chief of Staff, United States Army:

(a) The Chief of Staff on February 6, 1957, in testimony before the Department of Defense Subcommittee of the House Appropriations Committee stated, "We have deliberately designed this program * * * so that the ceiling can go up as the demand goes up * * *. We will take whatever the load requires."

(b) Testimony of Secretary of the Army Brucker at the same hearing emphasized the determination of the Army to do "Whatever is necessary to meet our commitments under this program."

(c) The General Staff Committee on National Guard and Army Reserve Policy on May 3, 1957, adopted resolutions addressed to the Secretary of the Army urging him to take such action as may be required to insure adequate and full support of the well-publicized and well-received program to provide a minimum paid strength of 303,000 enlisted men and 78,000 officers for the Army Reserve.

Whereas public acceptance of the outlined program, brought about by the untiring efforts of the Army Reserve components reflects the nationwide endorsement of that program, it is the considered opinion of the Senior Reserve Commanders Association that in curtailing or stopping the training of the 6-month enlistees the Department of Defense and the Department of the Army are breaking faith and will do irreparable damage to the Reserve program and their own prestige: Therefore be it

Resolved, That the Department of the Army and the Department of Defense immediately ask sufficient funds from the Congress to insure that there be no interruption in the overall recruiting and training program as originally planned by the Department of the Army and the Department of Defense. This program continues to receive the fullest endorsement of the Senior Reserve Commanders Association whose members are convinced that any such curtailing or stopping is contrary to the demonstrated public opinion and will defeat the very purpose of the Department of the Army and the Department of Defense, namely, a strong, well-trained Ready Reserve.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. FORD].

Mr. FORD. Mr. Chairman, I feel it my duty to point out two things. This amendment, although it will not seemingly increase the budget, does contemplate the same expenditure in fiscal 1958 that the President submitted at the time his budget was sent to Congress.

Second. I must reemphasize one important reason why I, and I believe the gentleman from Florida [Mr. SIKES], and others went along with this, we have been assured that the Department of the Army will write certain restrictive regulations which will cut back the number in the age group 18½ to 26 who will participate in this program. On that assurance, and we accept their word in good faith, we have gone along with the increase of $10 million over what our panel originally proposed. I can assure the proper officials in the Department of the Army that our Army panel next year in the hearings will look with considerable interest at the number in the age group 18½ to 26 who will be taken into this training. We hope that they will live up to the agreement which they have made with our panel.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida [Mr. SIKES].

The amendment was agreed to.

Mr. HOFFMAN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, with apologies: A few moments ago when in the well I forgot to make a point which to me seemed important. It was that, inasmuch as this has developed into something of a political discussion, one of the very, very important things is that the position of the individual membership be accurately given to the public.

One of the current greatest sources of misinformation as to the votes of Members of Congress is the Congressional Quarterly. In other days we had the New Republic—sometimes then described as the "uptown edition of the Daily Worker."

The issue of free speech or free press is not involved. The issue is one of using a fraudulent title or label.

The Congressional Quarterly is just a successor to the New Republic, which you will remember was a political publication which for a few years made a business of misrepresenting the political position of individual Members of Congress and the way they voted.

The Congressional Quarterly is just as inaccurate, as biased, as misleading, as vicious—just as intent on getting a dollar. In addition, it sails under a false flag and charges a higher price for its deceptive output.

For some years Congressional Quarterly, a weekly publication which calls itself the "authoritative reference on Congress," has masqueraded as a nonpartisan, objective source of information about the United States Congress and its Members while spewing forth its prospending left wing propaganda. People are deceived when they see this publication quoted and requoted, evidently on the theory that it is an official Government publication, as the basis of who in Congress supported or did not support President Eisenhower's programs, or some other program.

Congressional Quarterly's so-called news accounts are biased, unreliable. Their statistics are inaccurate. Their interpretation of events are slanted. Their repeatedly crediting Democrats with having "saved" or "rescued" one of

the President's programs or provided the "winning margin" of votes he needed is untrue. Since there are more Democrats than Republicans in Congress, there would be few measures passed if some Democrats did not cross party lines to support them. It is interesting to note, Mr. Chairman, that the words "saved" and "rescued" and "winning margin" came into Congressional Quarterly's vocabulary in 1953 when Democrats first voted for one of the President's programs.

I take issue also, Mr. Chairman, with the partisan and misleading manner in which Congressional Quarterly compiles its vote statistics to indicate Democrat support for the President. In the first place, it supposedly gives equal statistical weight to all votes used in its survey without listing the votes so that the reader can judge for himself whether the President had clearly stated his position on the subject. It also lists an absence, such as for illness or for official business, as a vote against the President's program. Why not credit a Congressman with a plus rather than with a minus mark when he does not vote at all? It is a silly as well as a fraudulent method of computation. And, perhaps even more misleading, it frequently includes in its tabulations all votes on a particular measure, such as floor amendments to an appropriation bill, on which the President obviously could not have expressed himself.

Since Congressional Quarterly has a virtual monopoly in its field, its publishers have a very substantial obligation to avoid editorial slanting. For one thing, the very name of the publication leads people to believe it is an official organ of the United States Congress; and second, it represents itself to be completely objective. It is neither. If it was a food otherwise than for thought, the Food and Drug agency would be after it for false labeling and poisonous content.

Congressional Quarterly's publishers have not only failed to take their obligation seriously, but apparently have deliberately distorted the contents of their publication to favor one individual and political party over another. For this reason, today two bills are introduced which would:

First. Amend chapter 83 of title 18 of the United States Code to bar from the mails certain publications having titles which convey the false impression that they are official publications of the United States Congress.

Second. Amend chapter 33 of title 18 of the United States Code to prohibit the use of the words "Congress" or "Congressional" as part of the title of any publication where the use of such word can reasonably convey the false impression that such publication is an official publication of the United States Congress.

In the past, when a business or other profit-making venture used such words as "United States," "Federal," or "Red Cross" in its title to falsely imply that it was connected with some Federal agency, Congress has not failed to act quickly to prohibit such flagrant commercial exploitation. I hope Congress will be equally vigilant in this case, where its own integrity is involved.

In the CONGRESSIONAL RECORD, pages 7599–7600, you will find an accurate statement of the gentleman from Missouri [Mr. CURTIS] which gives you a picture of the kind of a publication Congressional Quarterly is. There is also a reference to some of the comments made in the other body on the same subject at pages 7577–7578 on the same day.

The bills read:

A bill to amend chapter 83 of title 18 of the United States Code to bar from the mails certain publications having titles which convey the false impression that they are official publications of the United States Congress

Be it enacted, etc., That (a) chapter 83 of title 18 of the United States Code is amended by adding at the end thereof the following:

"§ 1733. Certain publications as nonmailable.

"Every publication issued periodically (other than annually) having the word 'Congress' or 'Congressional' as a part of its name where the use of such word alone or with other words is reasonably calculated to convey the false impression that such publication has some connection with, or authorization from, the Congress of the United States, which does not in fact exist, is nonmailable, and shall not be conveyed in the mails or delivered from any post office or by any letter carrier.

"Whoever uses or attempts to use the mails or Postal Service of the United States for the transmission of any matter declared by this section to be nonmailable, shall be fined not more than $1,000 or imprisoned not more than 1 year, or both."

(b) The analysis of such chapter 83 is amended by adding at the end thereof the following:

"SEC. 1733. Certain publications as nonmailable."

A bill to amend chapter 33 of title 18 of the United States Code to prohibit the use of the word "Congress" or "Congressional" as part of the title of any publication where the use of such word can reasonably convey the false impression that such publication is an official publication of the United States Congress

Be it enacted, etc., That (a) chapter 33 of title 18 of the United States Code is amended by adding at the end thereof the following new section:

"§ 712. False advertising or misuse of name to indicate connection with Congress

"It shall be unlawful to use the word 'Congress' or 'Congressional' as a part of the name of any publication issued periodically (other than annually) where the use of such word alone or with other words is reasonably calculated to convey the false impression that such publication has some connection with, or authorization from, the Congress of the United States, where such connection or authorization does not in fact exist.

"Whoever violates this section shall be fined not more than $1,000 or imprisoned not more than one year, or both."

(b) The analysis of such chapter 33 is amended by adding at the end thereof the following:

"SEC. 712. False advertising or misuse of name to indicate connection with Congress."

Mr. MAHON. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose, and the Speaker having resumed the chair, Mr. KEOGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H. R. 7665) making appropriations for the Department of Defense for the fiscal year ending June 30, 1958, and for other purposes, had come to no resolution thereon.

GENERAL LEAVE TO EXTEND

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members speaking on this Defense Department appropriation bill today may revise and extend their remarks and insert pertinent related matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PUTTING TREASURY LOANS TO REA ON A SOUND BASIS

Mr. BECKER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BECKER. Mr. Speaker, on May 15 I offered an amendment, on the floor, to the farm bill to eliminate the $239 million to be loaned to the Rural Electrification Administration—REA—for the reason that this money was being loaned at 2 percent while the Treasury Department is paying 3¼ percent and, further, that the REA cooperatives have accumulated vast surpluses that they are not only loaning out at a higher interest rate but are buying the very Government bonds of the Treasury Department. This amendment was defeated.

At the time I introduced the above amendment and after it was defeated, one of my colleagues on the Democrat side of the House was very proud to put in the RECORD that not one Democrat voted for this amendment. This is another instance where the Democrats talk of economy but when they have a real opportunity such as I offered where a great saving could have been made, the Democrat votes were just not there.

I have, therefore, today introduced a bill amending subsection (a) of section 3 of the Rural Electrification Act of 1936, as amended (7 U. S. C., sec. 903 (a)), whereby all future loans to the REA be made at the going rate of interest payable by the United States on its obligations, and, second, I have amended section 5 of this same act to provide the payment of an additional one-half of 1 percent per annum to cover the reasonable cost of administration and handling of these loans.

It is a well known fact that the outstanding loans of the Treasury Department to the REA in the sum of $2½ billion is costing the taxpayers of this country over $25 million a year just for the additional interest paid by the Treasury Department on borrowed money.

I want to make it clear that this bill is not intended to eliminate the advantage rural electric cooperatives have in being able to borrow money from the Federal Government, but simply to bring the cooperatives' interest rates up to a point where the Treasury will not have to shoulder losses. It does not seem reasonable to me that taxpayers who now find the Federal tax burden so hard to bear should be asked to help contribute still more for the electric bills of rural electric users. The fact is, rural electric cooperatives are very prosperous, and their members do not stand in need of the special help of credit that stands the Treasury a loss.

I want to point out that by paying interest rates that square with what money costs the Treasury, rural electric cooperatives would be in a better position to meet criticisms that they are reloaning 2 percent Federal money at higher rates rather than repaying it to the Treasury, and that the cooperatives, in many cases, are passing along the benefits of 2-percent money to members who purchase washing machines and other electrical appliances.

I might add that President Eisenhower called attention, at a recent press conference, to the need for revision of some of these borrowing privileges that are forcing substantial increases in budgetary requirements. To take this action that I propose is in line with his recommendations, as well as with the great popular support for all reasonable economies in Government.

I also wish to call attention to the fact that if at some future time interest rates that must be paid by the Treasury decline, the interest rate charged rural electric cooperatives would automatically go down. I point this out because I want to make it clear that enactment of this bill would impose no heavier handicap on rural electric cooperatives than the rest of us have to bear.

When the Rural Electrification Act was passed in 1936 to electrify farms situated so far apart and with so few customers to the mile, private funds immensely short in the depression simply were not available. This, of course, was a fine and necessary program at the time and, therefore, there is no intention to condemn the intent of the law and the Rural Electrification Administration as such. However, today it is an established fact that the farms of this country are 96 percent electrified and, therefore, it is only consistent that from here on the borrowers of money from the Government for this, or any other purpose, should pay the going rate of interest on all Treasury Department loans. I believe the introduction of this legislation to be eminently fair and in the best interest of sound government. I would feel certain to say that the recipients of power through the REA and its cooperatives, if they knew the facts, would be desirous of paying their proper share. I sincerely hope this legislation will receive prompt consideration.

TRIBUTE TO AMVETS FOR THEIR AMERICANISM CAMPAIGN

Mr. HARVEY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HARVEY. Mr. Speaker, on the eve of Memorial Day, I believe it appropriate to call attention to an excellent program now being sponsored by the American Veterans of World War II and Korea. This organization, designated as the AMVETS, was chartered by act of Congress on July 23, 1947. As this organization looks forward to its 10th anniversary, it becomes increasingly clear that the 80th Congress served a good purpose in granting it a Federal charter, for this veterans' group has taken seriously its desire to serve the Nation before it serves itself.

At their national convention in 1954, AMVETS concluded that too much emphasis was being placed on what's wrong with America, and too little was being said or taught of what is good about our country. They felt there was an unfortunate tendency in some quarters to appropriate the word "Americanism" to narrow ends—and that there was a real danger of these same groups setting up their own standards of measurement as to who is and who is not a good American.

I am proud to state that in their quest for a new approach to the nurturing of sound Americanism, AMVETS found their program in the patriotic inspiration of a constituent of Indiana's 10th Congressional District. My friend, Martin D. Schwartz, of Muncie, conceived a program that has since prospered under his guidance as chairman of the national AMVETS Americanism division.

AMVETS, with an absolutely free hand in the investing of funds given by the Fund for the Republic, has successfully launched a program which rejects name calling and witchhunting. AMVETS prefers to emphasize the positive aspects of Americanism rather than the negative, to show clearly what is right about the United States and to restore the people's faith in the foundation upon which the Nation has been built.

AMVETS neither offers nor asks a pat definition of "Americanism." Instead, the organization holds that "Americanism" can no more be defined or explained than can love or religion; that it must be felt in the heart and lived each day. And that it is an appreciation of a way of life which has no superior in all the world, a deep and lasting faith in our Republic.

Let it be understood, however, that the members of AMVETS do not for a moment advocate discontinuance of the watchfulness with which we must guard against subversion in all its insidious forms. These veterans endorse and support the proper agencies of government that are charged with protecting our country from destructive influences, both internal and external. They feel that just as we must watch our skies day and night for possible attack, so must we be constantly vigilant against any lapses which undermine the strength of the Nation and the moral fiber of the people.

We enjoy a prosperity and national well-being unequaled in history. But in the midst of wealth and abundance, I must agree with AMVETS that we sometimes forget the basic heritage from which our moral and philosophical strength has always been drawn. If this be true, then in spite of our fine Armed Forces and modern weapons, we may someday find that, not unlike the shorn Samson, our national power has ebbed away and the moral will to defend the greatest Nation on earth has disappeared. Once we lose touch with the past, the historic past, if you will—once we forsake the teachings and the wisdom of those who brought into being our Constitution and Bill of Rights; once we abandon the guidance of men like Washington, Marshall, Jefferson, and Franklin—or even of Lincoln and Clay, Wilson and Hoover—we shall in truth have thrown overboard our compass in the midst of stormy seas.

As citizens, there is a pressing need to renew our knowledge and understanding of this great country in positive terms, to learn where we are in this world of conflicting ideologies, and to keep bright the only lights by which we can steer a safe course. There is little likelihood that we will ever dissipate our precious legacy if we fully grasp its value and live each day by its memorable precepts. There is a very grave danger that we shall lose our freedoms if we are so foolish as to forget how we came by them and why they are worth keeping inviolate.

AMVETS, let it be noted, is seeking to renew faith in America in a practical manner. Mr. Schwartz and the expanding group of leaders he heads, have launched a program based, first, on the study of the lives and aspirations of great Americans, and second, a program which prompts citizens to examine their country and recognize the many things about it which are good and noble. These blessings and attainments include our form of government as contrasted to others; the guaranties of liberty, justice, and equality embodied in our basic documents; the examples of courage, free enterprise, and straight thinking which have molded our national character.

In taking great Americans as the starting point for its Americanism program, AMVETS has put into practice the advice of Pericles, who in reminding the Athenians that there was virtue in following the precepts of those who built the glory of ancient Greece, said:

> Take these men for your example. Like them, remember that prosperity can only be for the free, that freedom is the sure possession of those alone who have the courage to defend it.

The pattern of this unique Americanism program is simple, but deserving of recognition and commendation. AMVETS have trained more than a hundred of their members in the art of organizing and leading group discussions. Throughout the country these members, without fanfare or self-aggrandizement, are quietly but effectively meeting with small groups of citizens from all walks of life, and these

groups are studying and talking about positive Americanism.

These are not social or political scientists so gathered, nor are they high-flown intellectuals—they are everyday lawyers, mechanics, salesmen, laborers, executives, high school students, white-collar workers and housewives. They are, if you please, the true grassroots of the country. If any American citizen can be called ordinary, they are ordinary citizens who have become fascinated by the interesting and revealing paths down which free discussion of so vital a subject as Americanism take them. Under able guidance they are learning not only from each other by sharing viewpoints and attitudes, but also from the Founding Fathers whose viewpoints serve to sharpen and clarify their own.

In Americanism discussion groups, these people are making history live—for the task of history is to relate the past to the present. They are intelligent people seeking knowledge of their citizenship and their country in order to build at least within their own minds a bulwark against the dry rot which can erode the soul of this Nation should it ever ignore its heritage of freedom and right. And these ordinary Americans are finding it thoroughly enjoyable to reemphasize heritage and tradition in their daily lives and their community living.

I am personally familiar with the splendid AMVETS post at Muncie, Ind. I have been proud to claim for my State and district one of the finest units of this outstanding organization of young veterans. But whenever I have listened to the post's excellent band, the famous Muncie Highlanders, and whenever I learn of these musicians having again won high honors, I am reminded that all of AMVETS is not pomp and ceremony, that they play stirring martial tunes in full pride of the background against which they have become known—that behind the marchers and the flags there exists the sincerest convictions of true Americanism.

Sir Walter Scott penned the words, "Breathes there a man with soul so dead, who never to himself hath said, this is my own, my native land!" It seems to me that in AMVETS we have a considerable number of Americans who not only take pride in their own, their native land, but who are undertaking in a most admirable way to see that it remains what it was meant to be—the land of the free and the home of the brave. Surely they deserve all the assistance and support the American people can give, for it is in their interest that they toil.

HOUR OF MEETING TOMORROW

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 10 o'clock tomorrow morning.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE DEFENSE BUDGET

Mr. SCOTT of Pennsylvania. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. SCOTT of Pennsylvania. Mr. Speaker, much has been said here about the budget under discussion. We have suggested revision, we have nibbled at it, and, in general terms, we have treated it as any other item of legislation which is expressed in words that lie well on paper. I am not so sure, gentlemen, that many of us fully appreciate what goes into the making of the Defense budget. Budgeting has become an integral function of command at all echelons of the services. The various regulations published in the Army, Navy, and Air Force state that each commander is provided with resources necessary to perform his assigned function or mission, and that he will be held strictly in account for the use of these resources.

Budget estimates in the three services from the lowest echelon on up are the expression of an agency program in financial terms. They are expressions of the minimum funds necessary to accomplish approved missions and functions. For 18 months prior to coming to us for the appropriation legislation we are now considering, the Army staff, for example, has reviewed estimates from the lower echelons in the field. An overseas commander prepares a budget summary based on Department of the Army primary programs, his current year budget, and his current reports. The Army staff reviews his estimates based on program guides, current year budget execution, current operation, financial reports, and the commander's budget summary. There is a Budget Advisory Committee responsible to the Chief of Staff which works in conjunction with a Program Advisory Committee and a Planning Advisory Committee. When finally presented to the Secretary of the Army and approved by him, the Army budget represents a structure which has been stripped to its essentials.

That, of course, does not mark the end of the budget of one of the services, since the Secretary of Defense has an assistant, the Comptroller, who reviews, correlates, examines, and where necessary, pares the budget of the three services.

The overall effect of the steps I have enumerated, is that the budget we are considering is like a house of cards carefully constructed. We cannot at random pull out a card here and there without expecting the structure to tumble. It is easy for us to recommend changes and reductions because truly we are not aware of the consequences involved. If the subcommittee headed by the gentleman from Florida feels that the $150 million reduction in maintenance and operation funds, for example, is a serious error, I feel there is no group better qualified in this Congress to advise us of our error than this subcommittee which has studied the Army budget as all of us should have, had we the time or opportunity to do so. I say to you therefore, gentlemen, that wherever the members of the subcommittees of our Appropriations Committee recommend amendments to the bill before us, our support should be given.

OUTLINE OF ARMY PROGRAMS IN FISCAL YEAR 1958 BUDGET ESTIMATES

In broad outline, the Army budget estimates for fiscal year 1958 provide for:

First. Troops.

(a) General: In fiscal year 1958 the Army will introduce new organizational concepts and modern methods of combat support into its force structure, designed to enhance combat readiness. This will be accomplished by reorganizing the divisions, increasing the number of atomic support commands and improving the readiness of the Army Strategic Reserve. Reorganization of the divisions into the new-style "Pentomic" units geared for atomic warfare will be completed by end of fiscal year 1958.

(b) Units: In fiscal year 1958, the number of divisions in the Army will be reduced to 17, the number of regiments and regimental combat teams will remain at 9, additional Atomic Support Commands will be activated; and anti-aircraft battalions will increase to 126.

Second. Manpower.

(a) Military: The Army will begin and end fiscal year 1958 with 1 million active-duty personnel with an average strength of 997,000. This is 2,800 man-years under the present fiscal year 1957 program of 999,800 man-years.

(b) Civilian: The Army will begin and end fiscal year 1958 with 405,000 civilian employees on military functions as compared with actual fiscal year 1957 beginning strength of 406,611.

Third. Materiel.

(a) Aircraft: The inventory of active aircraft will increase from 3,573 at beginning fiscal year 1957 to 5,301 by the end of fiscal year 1958. The procurement program for fiscal year 1958, cumulative with prior year programs, will give the Army about 80 percent of its light aircraft and 50 percent of its medium helicopter peacetime requirements. The Army is providing for the minimum training requirements for reserve component units. It is not programing procurement of aircraft for mobilization reserve stocks.

(b) Guided missiles: The fiscal year 1958 procurement program will continue to place emphasis on guided missiles and related equipment. Of the $1.39 billion fiscal year 1958 obligation program for procurement and production, approximately one-half will be for guided missiles. Even though this represents almost $700 million in fiscal year 1958, it is far short of program requirements, and represents a compromise between maximum desirable missile production and impact upon the national economy.

(c) Other procurement: In keeping with the emphasis on guided missiles, the procurement of conventional equipment, weapons, ammunition will be reduced in fiscal year 1958. It will be limited to the procurement of small quantities of new items for introduction into the supply system and minimum quantities of

standard items which will be required to meet shortages in the peacetime Army.

Fourth. Reserve components.

The number of Army reservists and National Guard men in drill pay status will increase from 655,900 at end fiscal year 1957 to 697,000 at end fiscal year 1958. This will be composed of 400,000 National Guard men and 297,000 Army reservists. The most significant aspect of the Reserve components program for fiscal year 1958 is that emphasis will be placed on quality of the individual reservist and guardsman. This will be accomplished by requiring those nonprior service personnel enlisting in the National Guard to take either 11 weeks or 6 months active duty for training and those enlisting in the Army Reserve to enter on 6 months' active duty for training.

Fifth. Research and development.

The fiscal year 1958 research and development program is slightly lower than in fiscal year 1957 but will continue to have as its primary objective, the maintenance of technological progress and the development, for the Army, of the best weapons and materiel that can be produced. In fiscal year 1958 the effort will be directed aggressively toward providing the implements of increased mobility and firepower, better communications, and improved logistic systems.

The funds requested by the Army to carry out the fiscal year 1958 programs which I have summarized are:

The Army budget, estimate, fiscal year 1958

DIRECT OBLIGATIONS

[Millions of dollars]

[Estimate, fiscal year 1958]

Military personnel, Army	3,549
Operation and maintenance, Army	3,400
Procurement and production, Army	1,394
Research and development, Army	400
Army National Guard	320
Reserve personnel, Army	207
Military construction, Army Reserve Forces	[1] 55
Military construction, Army	[1] 390
Other appropriations	6
Summary	9,721

MILITARY STRENGTH

[In thousands]

[Estimate, fiscal year 1958]

Beginning	1,000
Ending	1,000
Man-year	997

[1] Action on this appropriation is not included in current House bill.

THE GREAT CONTRIBUTION OF THE OIL INDUSTRY TO THE NATIONAL ECONOMY DURING THE RECENT SUEZ CRISIS

Mr. REES of Kansas. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. REES of Kansas. Mr. Speaker, during the last 6 months one vital segment of our national economy has been denounced for voluntarily accomplishing a program which the Federal Government admitted it could not so efficiently accomplish.

This industry, which has often taken the brunt of attack from those who are uninformed as to the very nature of the industry they are attacking, supplies approximately 70 percent of our Nation's energy. I am, of course, speaking of the oil industry.

This industry was prematurely slandered and vilified for doing a job successfully that it was called upon to do, that of supplying Western Europe with oil at a time when that area's source of supply of this essential fuel was cut off.

The oil industry didn't ask to do the job. It didn't bargain for concessions in the European market as recompense.

It did, however, attack the problem with the same vigor it has applied to the search for and development of oil supplies for the needs of our Nation.

As a result of this, the American oil industry shipped from 500,000 to 600,000 barrels of oil and products a day overseas to keep the factories of our allies turning out materials so necessary to their economies. These shipments were substantially in excess of the most optimistic goal set in the early days of the oil lift. This goal, of 500,000 barrels a day was, even by administration admission, more of a hoped-for target rather than something that was plausible.

The industry increased its production 834,000 barrels daily, from 6,966,000 barrels daily in October 1956 to 7,800,000 barrels daily in March of this year.

To do this took the combined effort not only of every oilman in the country, but also the cooperation of the State regulatory bodies.

In my own State of Kansas the Kansas Corporation Commission raised the allowable during those 5 months 20,000 barrels daily. But this was only a small drop in a very large bucket compared to the increases of other Southwestern States. Texas increased its allowable by 453,000 barrels daily, Oklahoma by 80,000 barrels daily, Louisiana by 255,000 barrels daily, and New Mexico by 51,000 barrels daily.

These are the tangible benefits of the mechanics of the operation known as the oil lift.

The oil industry's contributions to this project far transcend the fuel supplied the Western European nations, however.

Because there was a strong, healthy domestic oil industry in the United States capable of producing in excess of 2 million barrels of petroleum a day above the daily requirements of our own expanding economy, this country was able to tell our allies there was no need to fight a full-scale war over the Suez Canal.

This excess producing capacity enabled the United States to use its influence with our allies to halt a "little war" that could have sparked World War III with only a little encouragement.

When Secretary of State Dulles went to London shortly after England, France, and Israel invaded Egypt, he took with him these production figures. Thus he had the facts with which to convince our allies there was no need to take that "calculated risk" of embroiling the entire world in an atomic holocaust.

By the very fact of its existence, however, this domestic oil industry provided our Government with an opportunity to use statesmanship instead of battleships to bring about a resolving of differences.

Had this domestic industry not existed, or had it been subservient to Middle East oil as was England and France, then America would have had no other course but to join our allies in the invasion. Had this happened, there is no doubt in my mind but what the Soviet Union would have joined the issue on the side of Egypt.

Thus the contributions of the domestic segment of this industry alone go far beyond the immediate relief of fuel-short nations. They even transcend the national security of America when they can provide this country with authority to say to would-be aggressors "this far and no more."

When all the shouting and accusations of the earlier charges have died down this dynamic and aggressive industry stands exonerated before these very Halls of Congress.

One of the committees which thoroughly investigated all the charges made against the oil industry, the House Interstate and Foreign Commerce Committee, reported, after all the evidence was in that the oil lift "cannot but be hailed as a stupendous achievement on the part of the oil industry."

The only tragedy of the report, however, was that it was needed at all.

PARLIAMENTARY INQUIRY

Mrs. ROGERS of Massachusetts. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentlewoman will state it.

Mrs. ROGERS of Massachusetts. Mr. Speaker, may I ask the Speaker or the floor leader if it is the intention of the House to finish consideration of the pending bill on Thursday or Friday if it is not finished tomorrow?

The SPEAKER. We intend to finish the bill tomorrow.

SHORTAGE OF GOVERNMENT SCIENTISTS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes, to revise and extend my remarks, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, for several years I have been disturbed by the constantly growing loss of scientists and technicians working in Government laboratories and particularly the laboratories of the military departments.

The causes for this alarming loss are plain and simple. They are attracted away from Government service by being offered higher salaries, more congenial working conditions, greater freedom and more authority and the temptations offered and the persuasiveness of industries and private laboratories become in too many cases irresistible.

We are spending billions of dollars in military research to maintain our scientific leadership and to make sure

that we have the best weapons, devices and equipment for our Armed Forces, but up to now, we as a Government have shown little concern while the skilled men to whom we entrust the spending of this money are being drained away. As a result the quality of our military production, based on the discoveries and improvements that must come from research, suffers directly from the loss of these capable men and our inability to replace them.

It seems as if the moment that a scientist or technician achieves a good reputation working for the Government, he is pressured from all sides to leave his position, in many cases by private concerns holding military research contracts in the field in which he is an expert.

May I point out that military research scientists are vital to the success of our defense program. It is almost impossible to replace them, because they have to be specially trained in their military work and this takes years. When they leave their positions in Government, all of their military knowledge and experience walks out with them.

We must keep these keymen. One of the most important reasons is because they have the responsibility of supervising the work of private companies holding military research contracts, the selection of qualified companies and to make sure that these companies properly perform their work.

The principal loss is in administrators, chief project engineers, and scientists engaged in specific projects, in basic, applied or development research, the most valuable men we have. It is chiefly from them or through their efforts that new discoveries and the practical application must come.

The burdens that these Government scientists carry is not an easy one, beset as they are by Government regulations established to run a battleship, an army or an air force. Great credit should be given to the scientists and technicians who stick to their important posts, in spite of all difficulties and inducements to lure them away, imbued as most of them are by a very high degree of patriotism, and enthusiasm for their work.

The most important step that should be taken at this time, to stop or reduce this great loss of intellect, knowledge, and skill, is to establish supergrade positions under civil service by setting up separate scientific and professional civil service classifications, so that these superior men may obtain salaries commensurate with their abilities and responsibilities. It is the only way whereby the military laboratories can fill the many key positions now vacant.

There are many vacancies in military laboratories, and it is very difficult to fill them. I have just received a letter written by a director of one of our most important military laboratories, which reads as follows:

I can attest the seriousness of the situation in that during the past year we have been vainly attempting to fill several Grade 15 positions and 1 Grade 16 position with at present no success in being able to find people sufficiently trained to trust with the responsibilities, in spite of extensive recruiting efforts.

I have also a copy of a letter written by the president of a prominent industrial research company, who has been attempting to help the Quartermaster Department obtain qualified men. The letter makes this comment:

The amount of money involved in the purchase of materials by the Quartermaster—one of the largest purchasers of industrial materials in the world—is so great, that it is absurd economy for the Government to restrict the salaries of the keymen determining the basis on which these purchases are to be made.

An excellent study of the problem is reported in an article entitled "Manpower Crisis in Federal Labs," which appeared in the April 1 issue of the Chemical and Engineering News, the national voice of the American Chemical Society, which I would like to call to the attention of the Congress and the executive department.

I hope that this year the Congress will take specific and corrective action based on the recommendations made by many prominent citizens, leading scientific and engineering associations, and other advisers on military research who are familiar with the alarming situation.

MANPOWER CRISIS IN FEDERAL LABS—LOW GOVERNMENT SALARIES TEMPT SCIENTISTS TO TAKE INDUSTRIAL JOBS, DISCOURAGE NEW SCIENCE GRADUATES FROM ENTERING FEDERAL SERVICE

(By Joseph A. Grand, chairman, professional relations and status committee, Washington section of the American Chemical Society)

Government laboratories are losing out in the keen competition for scarce scientific manpower. The critical situation now facing Government labs results from two things:

The Federal service is not obtaining its fair share of new science graduates.

It is unable to retain a considerable portion of its better scientific personnel.

How serious is the problem? As one official of a prominent Government laboratory put it: "We are withering on the vine, and if we don't get help soon, we will be dead." This is an extreme view, and the seriousness of the situation varies with the character of the employment. Defense Department laboratories, employing a higher percentage of physical scientists and engineers, undoubtedly feel the pinch more severely than other departmental laboratories.

Compared with industry figures, the hiring and separations statistics for Federal scientists do not indicate an alarming turnover rate. However, considerations of quality and source of employees tell a different story. Influx of new graduates into Government service, vital new blood in the lifeline of a laboratory, is a mere trickle. One recent survey shows that 75 percent of the industrial firms surveyed reported 25 percent acceptance of employment offers to scientific personnel. Another survey shows that 27 percent of the firms reported 50 percent acceptance. The Federal Government acceptance rate is only about 10 percent.

MORALE PROBLEMS

The prestige of many Government laboratories is built around a hard core of senior scientists hired on a highly selective basis in less inflationary years. In general, these men are devoted to their work, and salary has not been the predominant consideration. But, in recent years, with rapid inflation, their relative economic position has become painfully clear to them. Today, approximately one-third of the total separations of scientific employees from the Government are senior-grade personnel.

The combination of high-quality employees leaving and lack of young graduates generates a lower morale and lower productivity. The prestige and sense of dedication of the Federal scientist that held him to his job possibly more than anything else can be sensibly dulled. The obvious end point of this reaction is the loss of scientific leadership and prestige of the Government laboratory and its ultimate demoralization.

What has caused this aggravated condition? Fundamentally, the scientific manpower shortage is to blame. The immediate cause is the disparity of pay scales for professional employees in the Federal Government and in industry.

A recent Government study compares salaries for professional employees in industry with the corresponding civil-service grade designations. (See table.)

The grade classification GS–5 corresponds to a junior chemist or chemical engineer, or other scientific designation (a bachelor of science degree and no professional experience); GS–7 corresponds to assistant chemist (master of science degree or equivalent in experience); GS–11 corresponds to chemist (doctor of philosophy degree or equivalent in experience).

The discrepancy in salaries between industry and Government is obvious on comparing the industry average with the Government maximum. Disregarding fringe benefits, Government salaries are approximately $700 to $3,000 per year lower.

These data very closely parallel those reported by the special survey committee of the Engineers Joint Council. This report, Professional Income of Engineers, 1956, issued in January 1957, shows salaries of engineers by year of entry into the profession. In this study, comparison of median pay of engineers engaged in research and development with median pay of engineers in the Federal Government shows that the Government engineer makes $575 to $3,350 less per year.

FRINGE BENEFITS

Some contend that the fringe benefits of Federal service—retirement, insurance, liberal vacation, and sick leave—tend to lessen this differential in pay. In addition, the prestige of Federal service, stability of employment, association with senior scientists, excellence of equipment, and nature of work may be presented as "fringe-fringe" benefits tending to lower the differential.

To both the young graduate and the professional pondering separation from Government service, these benefits are not too difficult to evaluate. Many of today's industrial giants have fringe benefits similar to the Federal Government plus such extras as medical and health insurance and profit-sharing or stock-purchase plans. News of private industry's modern laboratories and equipment punctuates nearly every issue of C&EN. The ability of industrial scientists is well attested by their publications in scientific journals.

CIVIL SERVICE VIEWS

Philip Young, retiring chairman of the Civil Service Commission, recognized Government's present lethargy with respect to fringe benefits when he said before the engineers joint council, "Whereas the Government was once considered a leader in this field, private industry has been moving ahead in recent years faster than we have."

In the concluding paragraph of his speech on January 17, Young said, "Now I agree heartily with the executive officer of the National Institutes of Health who recently said, 'I do not believe poverty is any more a necessary condition of dedication to science than it is of dedication to the sale of life insur-

ance.' But the sense of dedication is a necessary condition to a fully satisfying career in the Federal service—and I know that is very widely felt. There is a special appeal in the nature and importance of the pressing scientific and technical problems before the Government, and in the contributions of Federal engineers and scientists to the Nation's welfare and security that is its own reward. And this has never been as true as it is today, in this age of unprecedented scientific and technological progress."

Industry pays scientists higher salaries than Government for comparable work

Government grade classification	Average salary in industry	Government salary	
		Minimum	Maximum
GS-5	$5,200	$3,670	$4,480
GS-7	6,000	4,525	5,335
GS-9	6,750	5,440	6,250
GS-11	8,400	6,390	7,465
GS-12	9,500	7,570	8,645
GS-13	11,200	8,990	10,065
GS-14	13,300	10,320	11,395
GS-15	15,500	11,610	12,690

These remarks are only too true. The difficulty is that the Government does not exercise a monopoly on this sense of dedication.

For the past 3 years, the Defense Department alone has passed out over $1.5 billion of research money annually to private companies. Many professional employees have left the Federal service for industrial employment in a similar capacity but with increased pay on projects financed with those funds. The growth of industrial laboratories, aided by Federal funds, and the attrition of Government laboratories is an important recruiting factor.

It should seem conclusive at this point that if Government laboratories are to compete with industry in recruitment and retention of professional personnel, they must compete with comparable pay.

WHAT'S BEING DONE

A problem with such an obvious solution would be expected to draw considerable attention and action. Action means legislation enacted by Congress and concurred in by the administration. The problem has drawn attention but no such action.

As a result of House Post Office and Civil Service Committee hearings in the past Congress on supergrade positions, Representative CHARLES S. GUBSER, Republican, of California, and Representative JOHN E. MOSS, Democrat, of California, saw the need for legislation. Bills introduced by these gentlemen in the 84th Congress (H. R. 12054 and H. R. 12055) died without hearings.

In the new Congress, Representatives GUBSER and Moss introduced improved versions of their previous bills. These bills (H. R. 2803 and H. R. 2804) call for increased pay, and, in addition, would set up a separate scientific and professional civil-service classification. In the Senate, Senator OLIN D. JOHNSTON, Democrat, of South Carolina, has introduced a similar bill, S. 1326. All these bills have been referred to the respective Post Office and Civil Service Committees.

The executive branch of the Government has also initiated action. Last year President Eisenhower appointed the White House Committee on Engineers and Scientists for Federal Government Programs to study the recruitment, retention, and use of scientists and engineers in the Government. Committee studies were to be pointed toward immediate executive and legislative action by Congress. So far, no public announcement of findings has been made.

The Defense Advisory Committee on Professional and Technical Compensation (the so-called Cordiner Committee), headed by Ralph J. Cordiner, president of the General Electric, was appointed by Secretary Charles E. Wilson to study military and civilian pay problems in the Defense Department. The Washington press reports that the Cordiner Committee has recommended pay raises from $500 to $3,000 a year for all employees (not professionals alone) in civil-service grades GS-7 and up. These newspaper accounts report that the administration is cool to the proposals and variously say that Secretary Wilson will order the report shelved or will refer the Cordiner suggestions to the Cabinet and to the President.

The Civil Service Commission opposes a separate scientific and professional classification act and also opposes a general pay raise. The Civil Service Commission desires further study of Federal pay policy that might result in a flexible wage system that could meet rapidly changing conditions in manpower shortage fields. This view was indicated by Commissioner Young in his speech before the Engineers Joint Council.

LEGISLATIVE OUTLOOK

The outlook for passage of legislation is bleak at the moment but could be changed to a rosier hue. In its efforts to fight inflation the administration has generally opposed pay raises. Faced by a lack of administration support or strong urgings from their voting constituents, Congress appears somewhat apathetic toward the bills already introduced. Representative TOM MURRAY, Democrat, of Tennessee, chairman of the House Post Office and Civil Service Committee, has said that the appointment of two new Civil Service Commissioners will delay hearings by his group for several months.

Two slight rays of hope:

Senator JOHNSTON'S announcement that his committee will hold hearings in the next 4 months.

President Eisenhower's statement in his budget message to Congress that pay legislation for scientific employees should await completion of the Cordiner study.

WHAT SHOULD BE DONE

Immediate interim legislation is needed to remove the present pay inequities. This would call for hearings in Congress now. For long range, permanent legislation a study group or subcommittee should be set up.

This problem of the growing discrepancy between Government salaries for scientists and those paid by private industry must be solved either by the Federal administration or Congress or both. Unless members of Congress and top administration officials are made aware of the facts and the need to correct a situation leading to deterioration in the quality of research in Government agencies, nothing will be done. It is becoming evident that unless this situation is corrected, the welfare of our nation can be jeopardized.

Information on the problem has been made readily available from time to time by the various scientific societies, including the American Chemical Society. Not only is it a privilege, but it is a duty of citizens to advise their representatives regarding their views, supported by as much factual evidence as possible. One of the marks of the professional man is a serious concern with such civic responsibilities.

The plight of Government scientists presents a compelling opportunity for members of the scientific professions to demonstrate their concern with professional responsibilities and the status of their professions. Rather than complain about the lack of status, each should now take some action to prove his sincerity.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. MCGREGOR, for Wednesday and Thursday, on account of illness in immediate family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mrs. ROGERS of Massachusetts, for 5 minutes, on tomorrow.

Mr. BAILEY, for 45 minutes, on Monday next.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. ANDERSON of Montana to revise and extend the remarks he made in the Committee of the Whole today and include related matter.

Mr. PRICE and to include related matter.

Mr. ENGLE in two instances, in each to include related matter.

Mr. PORTER and to include related matter.

Mr. PHILBIN and to include extraneous matter.

Mr. BURDICK and to include extraneous matter.

Mr. JONES of Missouri and to include an analysis of a bill which he has today introduced.

Mr. BOLAND (at the request of Mr. MCCORMACK) and to include extraneous matter.

Mr. ABBITT (at the request of Mr. MCCORMACK) and to include extraneous matter.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 5788. An act making appropriations for the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 93. An act for the relief of Dominic Steinhauser (Hiroshi Tsuruda);

S. 687. An act for the relief of Stylianos Lecomples;

S. 696. An act for the relief of Alecos Markos Karavasilis and his wife, Steliani Karavasilis; and

S. 797. An act for the relief of John Leary.

ADJOURNMENT

Mr. MCCORMACK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 21 minutes p. m.), under its previous order, the House adjourned until tomorrow, Wednesday, May 29, 1957, at 10 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from

the Speaker's table and referred as follows:

899. A letter from the Comptroller General of the United States, transmitting a report on the audit of Farm Credit Administration for the fiscal year ended June 30, 1956, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), the Accounting and Auditing Act of 1950 (31 U. S. C. 67), the Government Corporation Control Act (31 U. S. C. 841), and the Agricultural Marketing Act (12 U. S. C. 1141i) (H. Doc. No. 188); to the Committee on Government Operations, and ordered to be printed.

900. A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to amend the act of May 4, 1956 (70 Stat. 130), relating to the establishment of public recreational facilities in Alaska"; to the Committee on Interior and Insular Affairs.

901. A letter from the Secretary of State, transmitting a draft of proposed legislation entitled "A bill to provide for the appointment of representatives of the United States in the organs of the International Atomic Energy Agency, and to make other provisions with respect to the participation of the United States in that Agency, and for other purposes"; to the Joint Committee on Atomic Energy.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. RODINO: Committee on the Judiciary. H. R. 7698. A bill to amend the Clayton Act, as amended, by requiring prior notification of corporate mergers and acquisitions, and for other purposes; without amendment (Rept. No. 486). Referred to the Committee of the Whole House on the State of the Union.

Mr. BARDEN: Committee on Education and Labor. H. R. 1. A bill to authorize Federal assistance to the States and local communities in financing an expanded program of school construction so as to eliminate the national shortage of classrooms; with amendment (Rept. No. 489). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H. R. 7259. A bill relating to marketing quotas and price supports for fire-cured, dark air-cured, and Virginia sun-cured tobacco; without amendment (Rept. No. 490). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H. R. 632. A bill to amend the Federal Crop Insurance Act, as amended; without amendment (Rept. No. 491). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROONEY: Committee of conference. H. R. 6871. A bill making appropriations for the Departments of State and Justice, the Judiciary, and related agencies for the fiscal year ending June 30, 1958, and for other purposes (Rept. No. 492). Ordered to be printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LANE: Committee on the Judiciary. H. R. 5719. A bill for the relief of Clara M. Briggs; without amendment (Rept. No. 485). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 895. An act for the relief of Josefa Kusiak; without amendment (Rept. No. 487). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. S. 1203. An act for the relief of Lydia Anne Foote; without amendment (Rept. No. 488). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. JOHNSON:

H. R. 7794. A bill to protect the public health and promote the public interest and to establish standards of identity, sanitation standards, and sanitation practices for the production, processing, transportation, sale, and offering for sale of fluid milk and milk products shipped in interstate commerce or which affects interstate commerce for consumption as fluid milk and fluid-milk products in any State, county, or municipality of the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. BECKER:

H. R. 7795. A bill to amend the Rural Electrification Act of 1936 with respect to the rate of interest payable on loans made by the Secretary of the Treasury to the Administrator of the Rural Electrification Administration and on loans made by the Administrator of the Rural Electrification Administration; to the Committee on Agriculture.

By Mr. BENTLEY:

H. R. 7796. A bill to amend the antitrust laws by vesting in the Federal Trade Commission jurisdiction to prevent monopolistic acts or practices and other unlawful restraints in commerce by certain persons engaged in commerce in meat and meat products, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BROYHILL:

H. R. 7797. A bill to authorize and direct the Administrator of Civil Aeronautics to investigate and evaluate the use of all-wind unidirectional airport runways, from standpoint of solving problems related to the establishment and maintenance of adequate airports to serve large population centers; to the Committee on Interstate and Foreign Commerce.

By Mr. DELANEY:

H. R. 7798. A bill to protect the public health by amending the Federal Food, Drug, and Cosmetic Act so as to provide for the safety of chemical additives in food; to the Committee on Interstate and Foreign Commerce.

By Mr. DIGGS (by request):

H. R. 7799. A bill to establish the Federal Agency for Handicapped, to define its duties, and for other purposes; to the Committee on Education and Labor.

By Mr. DIGGS:

H. R. 7800. A bill to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically depressed areas; to the Committee on Banking and Currency.

By Mr. DORN of New York:

H. R. 7801. A bill to reduce individual income taxes by 7 percent, and to increase from $600 to $750 the personal income-tax exemptions of a taxpayer (including the exemption for a spouse, the exemption for a dependent, and the additional exemptions for old age and blindness); to the Committee on Ways and Means.

By Mr. FRELINGHUYSEN:

H. R. 7802. A bill to provide for the registration and reporting of employee welfare and pension benefit plans, and for other purposes; to the Committee on Education and Labor.

By Mr. HOFFMAN:

H. R. 7803. A bill to amend chapter 33 of title 18 of the United States Code to prohibit the use of the word "Congress" or "Congressional" as part of the title of any publication where the use of such word can reasonably convey the false impression that such publication is an official publication of the United States Congress; to the Committee on the Judiciary.

H. R. 7804. A bill to amend chapter 83 of title 18 of the United States Code to bar from the mails certain publications having titles which convey the false impression that they are official publications of the United States Congress; to the Committee on Post Office and Civil Service.

By Mr. O'BRIEN of New York:

H. R. 7805. A bill to authorize the Governors of Guam, the Virgin Islands, and American Samoa to nominate cadets for appointment to the United States Military Academy, the United States Naval Academy, and the United States Air Force Academy; to the Committee on Armed Services.

By Mr. SIMPSON of Pennsylvania:

H. R. 7806. A bill relating to estate tax on reciprocal transfers in trust; to the Committee on Ways and Means.

By Mr. BENTLEY:

H. R. 7807. A bill to authorize cooperative associations of producers to bargain with purchasers singly or in groups and for other purposes; to the Committee on the Judiciary.

By Mr. BONNER:

H. R. 7808. A bill to amend title 14, United States Code, entitled "Coast Guard," by providing for the designation of one chief aviation officer; to the Committee on Merchant Marine and Fisheries.

By Mr. BURDICK:

H. R. 7809. A bill to prohibit the denial of a deduction as a business expense for compensation paid to a dependent of the taxpayer for personal services actually rendered in the taxpayer's trade or business; to the Committee on Ways and Means.

By Mr. COAD:

H. R. 7810. A bill to prohibit the advertisement in the District of Columbia of the retail sales price of certain products used for ophthalmic purposes; to the Committee on the District of Columbia.

By Mr. BECKWORTH:

H. R. 7811. A bill to provide for Federal assistance, on a dollar-matching basis, to State and local governments and agencies thereof for planning, constructing, operating, and maintaining water-conservation and water-storage projects; to the Committee on Interior and Insular Affairs.

H. R. 7812. A bill to provide that when a family's home is being acquired by the United States, in determining the price to be paid for such home the agency acquiring such home may take into account the same considerations as would be taken into account by such family in determining whether or not to sell their home voluntarily; to the Committee on the Judiciary.

By Mr. McCORMACK:

H. R. 7813. A bill to organize and microfilm the papers of Presidents of the United States in the collections of the Library of Congress; to the Committee on House Administration.

By Mr. ULLMAN:

H. R. 7814. A bill to provide benefits for members of reserve components of the Armed Forces disabled from disease incurred or aggravated while on active duty for training after October 1, 1949; to the Committee on Armed Services.

H. R. 7815. A bill to provide an improved farm program; to the Committee on Agriculture.

By Mr. JONES of Missouri:

H. R. 7816. A bill to increase farm income and to expand markets for cotton by enabling cotton to be sold competitively in domestic and foreign markets; to the Committee on Agriculture.

By Mr. ABERNETHY:

H. R. 7817. A bill to increase farm income and to expand markets for cotton by enabling cotton to be sold competitively in domestic and foreign markets; to the Committee on Agriculture.

By Mr. MARTIN:

H. J. Res. 346. Joint resolution designating the second Sunday in August of each year as National Children's Day; to the Committee on the Judiciary.

By Mr. LANE:

H. Res. 269. Resolution to authorize the Committee on Interstate and Foreign Commerce to investigate and study safety of design of motor vehicles used in interstate commerce; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOYKIN:

H. R. 7818. A bill for the relief of William S. Sherrill; to the Committee on Armed Services.

By Mr. CELLER:

H. R. 7819. A bill to authorize Hon. VICTOR L. ANFUSO, Member of Congress, to accept and wear the awards of Commander of the Order of Merit of the Italian Republic, and Commander of the National Order of Merit "Carlos Manuel de Cespedes," Cuba; to the Committee on Foreign Affairs.

By Mr. HAGEN:

H. R. 7820. A bill for the relief of Babette Elisabeth Lippold and her minor children; to the Committee on the Judiciary.

By Mr. HEALEY:

H. R. 7821. A bill for the relief of Luigi Lavadera Lubrano; to the Committee on the Judiciary.

By Mr. HOFFMAN:

H. R. 7822. A bill for the relief of Maria Ferraiuolo Perrino; to the Committee on the Judiciary.

By Mr. JOHANSEN:

H. R. 7823. A bill for the relief of Stefanie Szerdahelyi; to the Committee on the Judiciary.

By Mr. MAY:

H. R. 7824. A bill for the relief of Elena Bratianu; to the Committee on the Judiciary.

By Mr. MULTER:

H. R. 7825. A bill to exempt from taxation certain property of the B'nai B'rith Henry Monsky Foundation, in the District of Columbia; to the Committee on the District of Columbia.

By Mr. O'BRIEN of New York:

H. R. 7826. A bill for the relief of Israel Baird Poskanzer; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

260. By Mr. CANFIELD: Resolution by New Jersey Society of Certified Public Accountants adopted at their annual meeting on May 11, 1957, endorsing the Jenkins-Keogh bills, H. R. 9 and 10; to the Committee on Ways and Means.

261. By Mr. NIMTZ: Petition of Robert T. Grubb, chairman of the "Our Stake in Better Government" Committee of the Elkhart Junior Chamber of Commerce, Elkhart, Ind., and 140 other Indiana citizens, urging greater efficiency and economy in Federal Government operation through Congressional support of the Hoover report recommendations; to the Committee on Government Operations.

262. By the SPEAKER: Petition of city clerk, Tucson, Ariz., petitioning consideration of their resolution relative to continuing operation of the air primary training station at Marana Airbase as the Federal economy shall permit; and declaring an emergency; to the Committee on Armed Services.

EXTENSIONS OF REMARKS

Results of Questionnaire Mailed to Second Congressional District of California

EXTENSION OF REMARKS

OF

HON. CLAIR ENGLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 28, 1957

Mr. ENGLE. Mr. Speaker, I recently mailed approximately 78,000 questionnaires to residents of the Second Congressional District. As in the past, the percentage of returns has been excellent. It is gratifying to know of the interest of my constituents in national and international affairs. Almost 50 percent of those answering added additional comments on the various questions. Their responses are certainly appreciated and will be of interest to my colleagues:

1. Please check 6 of the following 12 issues you think most important today: (a) Government spending, 70 percent; (b) balancing the budget, 45 percent; (c) reduction of debt of Federal Government, 48 percent; (d) taxation, 62 percent; (e) farm prices and policies, 42 percent; (f) United States foreign trade polices, 39 percent; (g) control of communism in America, 55 percent; (h) labor policies, 45 percent; (i) defense and war preparedness, 50 percent; (j) maintaining peace, 43 percent; (k) American foreign policy, 46 percent; (l) civil rights, 36 percent.

2. Please check 3 of the following 6 items you think should be cut in Federal spending: (1) Number of Federal employees, 75 percent; (2) construction of Federal public works (dams, airports, buildings, interstate roads, etc.), 25 percent; (3) Federal aid to States, municipalities, school districts, and local public agencies, 50 percent; (4) foreign aid, 76 percent; (5) national defense, 19 percent; (6) Federal aid to agriculture and small business, 27 percent.

3. Do you favor Federal aid to education, specifically for school construction to meet class-room shortages? Yes, 62 percent; no, 33 percent; no opinion, 5 percent.

4. Would you vote to increase first-class postal rates (on 3-cent letters), even though that class of mail is earning its own way, in order to meet the deficit caused by second-, third-, and fourth-class mail? Yes, 16 percent; no, 82 percent; no opinion, 2 percent.

5. Do you approve the President's handling of the Middle East crisis? Yes, 49 percent; no, 38 percent; no opinion, 13 percent.

6. Would you favor special tax relief for small business? Yes, 62 percent; no, 28 percent; no opinion, 10 percent.

7. Would you support the President's request for more authority to admit refugees from Communist countries? Yes, 20 percent; no, 70 percent; no opinion, 10 percent.

8. Do you think Congress should take further action to safeguard the civil rights of Negroes and other minority groups? Yes, 55 percent; no, 35 percent; no opinion, 10 percent.

9. Do you believe the P. G. & E. Co. should be permitted to take over the power development on the Trinity River project, now under construction by the Federal Government as part of the Central Valley project? Yes, 34.6 percent; no, 58.9 percent; no opinion, 6.5 percent.

10. Do you favor the tight-money policy of this administration? Yes, 43 percent; no, 44 percent; no opinion, 13 percent.

11. Do you approve the present farm program? Yes, 25 percent; no, 57 percent; no opinion, 18 percent.

12. Would you favor limiting debate in the United States Senate? Yes, 60 percent; no, 26 percent; no opinion, 14 percent.

13. Would you vote to continue domestic mining of strategic and critical minerals and metals if a Federal subsidy is necessary to do so? Yes, 56 percent; no, 31 percent; no opinion, 13 percent.

14. Do you believe that the price of gold should be raised? Yes, 59 percent; no, 26 percent; no opinion, 15 percent.

15. If Congress cuts the budget by two or four billion dollars would you reduce taxes (42 percent, yes) in that amount or apply that money on the national debt (57 percent, yes)? No opinion, 1 percent.

16. Do you believe the Forest Service does a good job of forest management? Yes, 53 percent; no, 34 percent; no opinion, 13 percent.

17. Do you favor the so-called right to work legislation? Yes, 67 percent; no, 21 percent; no opinion, 12 percent.

If your answer is "yes," has your opinion been affected by the recent hearings involving the teamsters? Yes, 23 percent; no, 49 percent.

Armenian Independence Day

EXTENSION OF REMARKS

OF

HON. EDWARD P. BOLAND

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 28, 1957

Mr. BOLAND. Mr. Speaker, Armenians are one of the oldest people in known history. They can trace their national origin to some 3,000 years. In their ancient mountainland, the traditional Garden of Eden nestled under the towering Mount Ararat, they maintained their independence for centuries before the discovery of America. And when Asiatic invaders put an end to their national independence, they managed to maintain their communal and spiritual independence wherever they happened to be.

Armenia was ravaged and ruined and divided among its conquerors, and during all that time Armenians lived with the hope of regaining their ancient homeland. In the course of centuries they endured all kinds of hardships and suffered much. Early in World War I wholesale massacres carried out by the Turks came perilously close to exterminating them. At the end of that war, however, the surviving Armenians proclaimed their national independence.

This was on May 28, 1918. It signified the rebirth of a nation which had lost its national independence more than 500 years before. The event was welcomed by freedom-loving people everywhere, and the President of the United States, Woodrow Wilson, undertook to draw the boundaries of the new Republic. But neither his official acts nor all the good wishes of the world could save the new state from its enemies. Late in 1920 it was attacked by Turkish nationalists and Russian Communists, and its fate was sealed early in December of that year.

Since then Armenia has become part of the Soviet Union, and the Armenians there have been lost in that prison of nationalities. Today in celebrating the 39th anniversary of the Armenian independence, we all hope that Armenians will regain their independence once more and celebrate it freely in their ancient homeland.

The Red River Canal

EXTENSION OF REMARKS

OF

HON. RUSSELL B. LONG

OF LOUISIANA

IN THE SENATE OF THE UNITED STATES

Tuesday, May 28, 1957

Mr. LONG. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an address delivered by me concerning the need for a canal to connect Shreveport, La., and, subsequently, Denison, Tex., and Jefferson, Tex., with the Mississippi River. This address was made before the Red River Valley Association Convention, in Shreveport, La., on April 23, 1957. The growth of the areas in the State of Louisiana now served by waterways has been so phenomenal that it is my feeling that the tabulations contained in this address will be of general interest, since they demonstrate a definite trend in the industrial development of our Nation.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS OF HON. RUSSELL B. LONG, OF LOUISIANA, BEFORE THE RED RIVER VALLEY ASSOCIATION CONVENTION, SHREVEPORT, LA., APRIL 23, 1957

It is certainly a pleasure to have the opportunity to talk to you immediately after hearing the Chief of Engineers tell you that, after a thorough recheck, he finds that the Red River lateral canal has a favorable economic ratio and he is ready to start to work on your project.

You have come a long way in a little over a year with this project, and I think the report you have just heard is a great tribute to your association—to Roy Matthias, to Clif Fairbanks, and to his beloved predecessor, our good friend Fred Webb. They worked hard to bring this project back and certainly deserve a big hand for having done so.

Two years ago Roy Matthias came to me in Washington and said he wanted my help in getting construction started on the Overton Red River Canal. I told him that I would be happy to do all I could, but that I needed help from the people from northwest Louisiana in the way of an expression that they wanted and needed this waterway.

Roy certainly brought that message back to you, because on several occasions I have had that expression—particularly when more than 175 of you came to Washington for the express purpose of urging the construction of a waterway to connect Shreveport with the Mississippi River. Your efforts have not been wasted.

NEED BETTER RATES

Last year, when I spoke before this meeting, I told you that it was my feeling that this section of Louisiana needed a waterway if it hoped to keep pace with the progress of the rest of the State.

I told you that Shreveport was a captive port and, because of this, those who wished to trade with it were forced to pay a premium freight rate because it did not have a waterway. I cited you some examples and I pointed to the other great cities of Louisiana and said that they were getting the lion's share of industry's new money—because they had a waterway.

During the past year, the trend I called attention to then has become even more noticeable. Let's look at the figures that have just been released by the Department of Commerce and Industry of the State of Louisiana:

During 1956, a total of $563 million was invested in the State by new industry. The breakdown indicating the parishes that received the major portion of this investment looks like this:

Calcasieu	$109,000,000
East Baton Rouge	84,000,000
Ascension	80,000,000
Jefferson	49,000,000
Ouachita	65,000,000
Total	387,000,000

On the other hand, let us compare the figures for new industrial development in the seven parishes of the Red River Valley:

Caddo	$4,000,000
Avoyelles	20,000
Bossier	74,000
Rapides	161,000
Natchitoches	----------
Grant	----------
Red River	----------
Total	4,255,000

It is particularly interesting to note that Ouachita received a big share of this investment with $65 million dollars. Just a little over 2 years ago, an official of the largest industry that was using the 6½-foot channel of the Ouachita River came to me with the fear that the Corps of Engineers might be forced to abandon maintenance of this project because of the amount of traffic that was using the waterway. Just as they have done in the case of your waterway, the engineers made a recheck and discovered that industry wanted to use it, but they wanted a 9-foot channel. Based on these findings, we were successful in securing planning money for the already authorized 9-foot channel, and it appears that this was all that was necessary to cause new industry to rush to the banks of this waterway-to-be.

NEW MONEY AND JOBS

The half billion dollars of new money that industry invested in Louisiana during 1953 represents nearly 12,000 new jobs at wages far beyond the average for Louisiana. It does not stop there. So far, during 1956, industry has continued to invest more than $1 million a day and some 2,000 new jobs have opened up in the State this year as a result of an additional investment in excess of $107 million.

The investment that industry has made in Louisiana during the past 15 months indicates that it is anxious to locate in the State, first of all because an unlimited supply of industrial water can be found there, and, secondly, the flood-protection program has advanced to the stage where the people and the factories behind the levees have reasonable assurance that they will not be flooded out every spring. As evidence that industry is attracted by the waterways, the investment figures for the two principal areas of the State served by waterways—the New Orleans-Baton Rouge area and the Lake Charles area—show the following story:

Investments by industry

[In millions]

Parish	1956	1957 January to March
East Baton Rouge	$84.4	$12.5
West Baton Rouge	----------	----------
Iberville	11.0	43.5
Ascension	80.8	----------
St. John the Baptist	----------	----------
St. James	66.5	----------
St. Charles	18.9	----------
Jefferson	48.9	1.4
Plaquemines	2.4	1.7
St. Bernard	26.3	.1
Orleans	6.1	2.6
Calcasieu	109.4	35.9
Total for 12 parishes	454.7	97.7
Total State investment	563.3	107.1
Percent of total State investment in 11-parish Baton Rouge-New Orleans area and Lake Charles area	80	81

The Lake Charles-Calcasieu area is continuing to grow by leaps and bounds. The people of that area are clamoring for a wider and deeper channel to the sea and a wider and deeper Intracoastal Waterway to the east and west.

THE GOLDEN HORN

The Baton Rouge-New Orleans story is truly a revelation. So astounding is the growth in this area that it has been called the fastest growing area in America.

Industrialists who come to Louisiana see in a hurry what is happening. As Gov. Averell Harriman of New York, pointed out to New Orleans businessmen a short time ago—"the rate at which industries are growing along the Mississippi River between Baton Rouge and New Orleans will cause those two major cities to expand until they practically meet."

As indicated by the figures above, during 1956 and the early part of 1957, better than 60 percent of new industry located in the area along the Mississippi River, commencing a few miles south of New Orleans and extending upstream a few miles north of Baton Rouge.

The magazine Business Week makes a significant point with respect to the location of industries. It points out that many industries prefer to locate on the east bank of the Mississippi River because it throws them into the southern freight-rate zone rather than to locate on the western bank which has somewhat higher freight rates. Nevertheless, those large industries which move their products primarily by water and pipelines can locate on either bank without penalty. The point to keep in mind is that, when a large corporation prefers the east

bank of the Mississippi River to the west bank because freight rates are somewhat more favorable on the east bank, one can begin to understand what a tremendous disadvantage is suffered by an area which lacks the competition of water transportation.

In our lifetime, we have seen the population of East Baton Rouge Parish increase from 30,000 to nearly 200,000. Industry began to flock to the banks of the Mississippi River in the area that provided deepwater navigation just as soon as the flood-control program was well underway. Since 1950, outlays and commitments by industry on the 130-mile stretch of river from Baton Rouge to New Orleans total more than $1 billion. There is no indication that this movement is even approaching a point of diminishing returns. This is the picture as it exists today:

Starting about 30 miles above Baton Rouge, at St. Francisville, a new paper mill is under construction. It will cost about $35 million.

In the Baton Rouge area, W. R. Grace & Co. is building an $18 million polyethylene plant and United States Rubber Co. is constructing a $5 million resin plant. Esso Standard Oil Co., which claims its Baton Rouge oil refinery is the Nation's largest, the Ethyl Corp., General Chemical and Solvay Process divisions of Allied Chemical & Dye Corp., Lion Oil Co., Copolymer Rubber & Chemical Corp., Shell Oil Co., America Cyanamid, Consolidated Chemicals, Foster Grant, and Nyotex Chemicals have all made plans to boost their present capacities.

Moving southward, in Iberville Parish, the Dow Chemical Corp. is building a $50 million installation that is to begin producing chlorine, caustic soda, and a number of organic chemicals next year. I have been told that the investments this corporation will make in that section will ultimately run to more than $300 million.

A few miles farther down, at Geismar, Wyandotte Chemicals Corp. is constructing a $28 million chlorine and caustic soda-making installation. That represents its first major venture away from its Michigan home plant.

Still a few miles further south, at Burnside, the Olin-Revere Metals Corp. is building a $51 million alumina plant. It is expected that this plant will, in a brief space of time, aggregate an $80 million investment and that this investment will be developed in the very near future.

At Gramercy, just a few miles further south, the Kaiser Aluminum & Chemical Corp. is putting up a $70 million alumina and chemicals plant—its third facility in the Louisiana area. It has been estimated that this plant will eventually represent a $200 million investment.

Ten miles below that point, at Reserve, Webb & Knapp, Inc., has begun the first phase of work on what it eventually intends to be a large industrial community.

Jefferson and Orleans Parishes are running out of industrial locations along the Mississippi River. Because there was little place where industry could locate in Orleans Parish, Jefferson has exceeded Orleans during recent years in acquiring major industrial expansion.

The same is true on the east bank in St. Barnard Parish, to a lesser extent, but Freeport Sulphur Co. has announced its intention to locate a $100 million nickel and cobalt plant at Braithwaite in Plaquemines Parish a bit further below New Orleans.

NEW ORLEANS CLAMORING

Areas that already have the advantages of water transportation understand the problems involved and are constantly behind their delegation pressing for improvements of their transportation facilities. Along the Mississippi River we have one of the best navigation highways in the world. It amounts to an inland harbor almost 200 miles long from Baton Rouge to the end of the industrial area below New Orleans.

As I have pointed out, that area has some of the best transportation facilities on earth, yet New Orleans is pressing for an additional outlet to the sea. Not only has that channel been authorized, but this year I predict that construction money will be made available to commence building this $100 million tidewater channel from the Industrial Canal at New Orleans to the Gulf of Mexico that will create 80,000 acres of new industrial sites to permit this tremendous development to continue.

This great area along the Mississippi River has an unlimited supply of fresh water, good railroad connections, and magnificent water transportation facilities, attracting the largest of American corporate investments, the area is growing so rapidly that construction men estimate that the area will be short more than 20,000 construction workers merely to construct the new industries already projected.

POPULATION TREND

Now let's check and see where our population is increasing as a result of this activity:

Here is a comparison of the population trend in the areas that have water transportation as compared with the Red River Valley which does not have it:

Population trend 1940–56

AREAS WITH WATER TRANSPORTATION

Parish	1940	1950	1956 (estimate)	Percent gain (+) or loss (−) 1940–56
	Thousands	*Thousands*	*Thousands*	
Calcasieu	56.5	89.6	119.2	+111
East Baton Rouge	88.4	158.2	212.5	+140
Jefferson	50.4	103.9	152.2	+200
St. Bernard	7.3	11.1	14.7	+100
Orleans	494.5	570.4	630.2	+27
Total	697.1	----------	1,128.8	[1] +62

[1] Average.

RED RIVER VALLEY

Parish	1940	1950	1956 (estimate)	Percent gain (+) or loss (−) 1940–56
	Thousands	*Thousands*	*Thousands*	
Caddo	150.2	176.5	205.9	+37
De Soto	31.8	24.4	22.9	−3
Red River	15.9	12.1	10.8	−3
Natchitoches	41.0	38.1	37.6	−1
Rapides	73.4	90.6	106.0	+44
Avoyelles	39.3	38.0	38.7	−1
Grant	15.9	14.3	13.8	−1
Total	366.2	----------	436.1	+19

When you note that New Orleans increased by only 27 percent during this period, it is important to keep in mind that New Orleans is limited for expansion and, during the last 16 years, has been spreading over into Jefferson, St. Bernard and Plaquemines Parishes, which accounts for the increase of more than 200 percent in Jefferson Parish during the same period. The overall average increase for the area of the three Parishes of Orleans, Jefferson, and St. Bernard is 60 percent.

Much of the population increase of Shreveport and Alexandria is due to the activities of the Air Force and the Army. It would be well to keep in mind that a major cutback in defense expenditures could have a very depressing effect upon these areas, particularly if we do not call upon industrial expansion to take up the slack.

A good example of the industrial problem can be demonstrated by the situation which exists at our shell loading plant a few miles from Minden, La. We are trying to keep that plant operating in competition with similar plants across the country. Nevertheless, we know that certain of the shell loading plants in America are going to be closed within a year. It is entirely possible that a difference of 10 cents or 15 cents per shell loaded may be the difference between staying in production or closing down.

Now let us look for just one moment at the freight rate situation at the Louisiana ordnance plant between Shreveport and Minden plant: Rail freight to the Shreveport area is $4 a ton more than rail freight to New Orleans, accounted for by the fact that the rail rates to New Orleans must compete with water transportation. This means that the material to produce a 50-pound shell will cost 10 cents more to be delivered by rail than it would cost to deliver the same thing by rail to New Orleans. If the same material is to be moved across the country to an ammunition depot, it would cost an additional 10 cents extra in order to bring the shell to its destination. This additional 20 cents in cost may very well prove to be the difference between operating that plant and closing it down.

Any major industrialist who is considering placing a plant in the Shreveport area or the Alexandria area would have to keep those factors in mind. He certainly would not want to choose a location where unfavorable rates would mean the difference between staying in business or going out of it.

So it becomes important for Shreveport, Alexandria, and the other cities on the Red River to have a waterway and to have one now. And it becomes important for Jefferson, Tex., to have a waterway and the sooner we can get this part of it started the sooner we can help my good friend, Congressman WRIGHT PATMAN, to extend it to serve the steel mill and other industries in his area.

LOCAL COOPERATION

I realize that we failed at ratify a constitutional amendment that would have set up the means of local cooperation for this project, but I feel that can be surmounted and I intend to go with your able representatives to testify before the Appropriations Committee to see if we can't get you some preconstruction planning money that will actually get this project underway. We cannot afford to lose any more time.

FLOOD-CONTROL FACTORS

There is one more factor to be considered. It is important to consider the drainage benefits that would result from a lateral canal from Shreveport to the Mississippi River. When we have high water on the Red River the water backs up into the low areas. The area around Powhatan in Natchitoches Parish is a good example. High water on the Red River submerges an area approximately 10 miles wide and 25 miles long in that vicinity. Here we have wonderful soil; rich, flat alluvial land—from which periodically the people farming it must evacuate; they must lose their crops, and sell their livestock at a sacrifice.

At the present time Bayou Pierre must be used to drain that area, discharging its water into the Red River north of Natchitoches. When the Red River Canal is constructed, we can then close off Bayou Pierre and drain the rainwater that falls on the south side of the Red River down the canal, emptying it into Red River north of Boyce.

When you recall the terrible flooding and backwater conditions along the Cane River prior to the construction of the Cane River closure, you will, of course, realize what great advantages can result in using this water to our advantage rather than to our harm. Furthermore, with the construction of the additional upstream reservoirs we will have a more dependable water supply along Red River. It will be possible for farmers to

pump water from the canal for irrigation purposes during the dry periods. Crops that would be destroyed by drought during the dry months can thus be saved and the land can be made to produce at a maximum. It will not be necessary to lift the water over the levees in order to get to it nor will we have to contend with the constant problem of the channel changing its course as is the case in the Red River.

We are doing a lot of talking about economy and cutting the budget these days. I am heartily in favor of cutting out a lot of wasteful spending in our foreign aid program—but I am not in favor of cutting out our needed and desirable public works. I consider the Red River Canal a necessary public work, and if it is humanly possible, I would like to see some money made available to General Itschner for the next fiscal year. I don't know whether or not it will be possible to do any "adding" this year, but I will certainly testify in that direction and reiterate to the committee what I have said here—we need this waterway and should start work on it now if this section of our State is to retain its rightful place in the development of our country.

BANK STABILIZATION

And now, I want to talk a little bit about another subject that is very close to your hearts—bank stabilization.

As we reviewed the figures that represent the investments industry is making today in those sections of the country which afford the unrestricted use of a waterway, we come to the realization that our land today is becoming more and more valuable.

The first step in making those waterways available to industry on an unrestricted basis was flood proofing. It cost well over a billion dollars to perform that mission on the lower Mississippi Valley and took a great deal of courage and foresight on the part of the legislators who could see in the years to come the 6 to 1 return on their investment which can be demonstrated today.

The job of flood proofing is essentially complete. A lot remains to be done in the way of raising levees, improving conditions, relieving many areas which it was first thought would have to be forever considered as backwater areas, and do other things to maintain the progress which has been made. The time will never come when the job of maintenance can cease. But we have arrived at the time when we can start feeling the real benefits that this protective system affords.

One of the by-products of the picture of progress is the enhanced value of our land. It has become so valuable in fact that we can no longer afford to give it to the river without a struggle.

In our early days of flood control we let the river take the lead and when it encroached too closely to our lines of defense, we retreated—retreated by means of a setback levee. The figures we have just reviewed bring us to the realization that the land we give to the river forever is possibly the most valuable asset we have in America today, and we can no longer afford to be so wasteful.

Today we have reached another great era in the development of our waterways. We have reached the end of the setback era—we must have the foresight to realize that the time has come to enter the period of complete river stabilization.

America is still a young nation. To match our less than 200 years of experience, some nations of the world have been stabilizing their rivers for hundreds of years before we started. Nevertheless, in our few brief innings we have learned a great deal which others have copied. We have learned enough to embark on a full-scale program of bank stabilization, and we have the end products in sight that will more than amply justify even the million dollar a mile revetment on the Mississippi River.

Many years ago we realized that the Red River was very difficult to tame. We know that from its source near Canyon, Tex., it has a fall of 465 feet. We know it has a bed of sand and that its banks are notoriously unstable. In an effort to tame this fractious river we embarked more than 10 years ago on a comprehensive plan for flood control, and, as one of its adjuncts, the Corps of Engineers has undertaken a complete study of the bank stabilization problem.

I feel certain that the recent rise we have had will provide the engineers the material they need to complete this important study. Perhaps that is the bright ray of sunshine that comes from behind recent rain clouds. Perhaps this recent rise will be not just one more high water but one that will help to point the way to a program that will make it possible for your banks to resist the periodic ravages of your unpredictable river.

It will not be an easy job to sell a complete program of bank stabilization to the Congress. The main reason it will be difficult is because it will be necessarily expensive. However, as the value of our land increases to those who run our Nation's industry, it should become less and less difficult to balance the cost of these works in the scale that we must use as a criterion before we can spend appropriated funds.

I am glad General Itschner is here, because I want to assure him that when his report is ready, on Red River and on the Mississippi, I am ready to launch a full-scale campaign to bring this Nation out of the setback era and into the final phase of flood control—the age of stability. I know the corps is doing its usual outstanding job of achieving completeness of those reports in the least possible time. When the Red River report is complete, I assure him and you that I will do everything in my power to see to it that its findings are put to good use in the shortest possible time.

Public Health Endangered by Harmful Food Additives

EXTENSION OF REMARKS
OF
HON. USHER L. BURDICK
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 28, 1957

Mr. BURDICK. Mr. Speaker, the pure-food law is in serious need of amendment, but it seems impossible to get Congress to do anything. The Delaney commitee investigated poisoned food for several years and made some ominous findings; and that there are poisons used in foods there is no room for doubt, but the theory of the law is that those who use additives and other poisonous substances in food can go right ahead dispensing their products and the burden of proof is on the users of this food to show that the substances are deleterious.

This situation should be reversed, and those who use additives in food should by scientific investigation, prove to the Public Health Department that none of the ingredients used in the preparation of food are dangerous, deleterious, or poisonous. When the Public Health Department has this proof before the products can be sold, it will clear up this situation. To leave the law as it now is will leave the public completely unprotected. It has been proved here in the investigations carried on by the Delaney committee that certain pills injected into a slit in the necks of chickens have the effect of producing cancer in those who eat chicken thus treated.

Should not the law demand that the effects of this pill be proved harmless before it is used and the contaminated food resulting therefrom is offered to the public? There are literally hundreds of additives and concoctions used in foods today that have not been analyzed at all, and these foods are going out to the consumers, most of whom think they are protected by the Public Health Department, while the same Public Health Department does not know the nature of the additives used, nor their effect upon the health of the people who eat them.

If these additives can be used lawfully, before they are analyzed and the public fed upon food containing them without the Public Health Department knowing anything about their poisonous and disease-producing effect on human life, then I say the present public health laws do not, as a matter of fact, enable the Department to stop the use of these additives until after the foods have been eaten. The examination should be made before the foods are used—not afterwards.

I do not know what forces are at work to prevent the passage of these needed amendments, but whatever it is, it is a strong force of which many Congressmen are afraid. I am sure the average Congressman wants to protect the public health, but too many either do not believe that there are poisonous additives used in foods, or the influence of the manufacturers of food in which they are used are too strong politically, and Members shy away from raising any protest that might stop the sale of this kind of food.

So far as I am concerned, and as far as I can go, the public is going to find out what they are daily eating if it breaks every food processor in the United States. If these manufacturers and producers were required to submit for scientific investigation any proposed additive before it found its way into food, many illnesses would be averted, many lives saved, and the turmoil about poisoned foods would end. Why do the manufacturers, processors, and producers fight against an investigation? Your guess is as good as mine.

A Cotton Program To Expand Markets Through Competitive Pricing

EXTENSION OF REMARKS
OF
HON. PAUL C. JONES
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 28, 1957

Mr. JONES of Missouri. Mr. Speaker, I have today introduced a bill which has for its purpose to increase farm income and to expand markets for cotton by

enabling cotton to be sold competitively in domestic and foreign markets.

This is not my bill, Mr. Speaker, and I am claiming no pride of authorship, although I have had the privilege of working with a large group of men, each expert in his own field, who represent most of the segments in the cotton industry, and I believe the bill which has resulted from numerous conferences and is the product of many compromises, warrants the studious consideration of all Members of this House.

Farmers and particularly cotton producers are not the only persons who will benefit from the provisions of this bill, when and if it becomes law. Actually, I know of no group which will not benefit, including the consumers of cotton and other textiles.

Primarily, this bill, if enacted into law, would insure the continuation and expansion of our export program on a worldwide competitive basis, without the necessity of subsidy payments, or losses which have been necessary in moving the huge surpluses of cotton which were built up over a long period of years through a combination of circumstances which I shall not take time to discuss here.

With a minimum of Government support, it would enable cotton to compete successfully with synthetics and other substitutes in the domestic market, giving the consumer the advantages which accrue from the preferential use of cotton and cotton products and at the same time assuring an adequate supply of cotton at reasonable price levels.

Yes; it would at the same time protect the farmer's income, and permit him to slightly increase his production of cotton to a more realistic basis, and to afford the family size farm an opportunity to enjoy more economic stability.

The introduction of this bill comes at a time, Mr. Speaker, when my section of Missouri, which incidentally produces more than 99 percent of all the cotton grown in Missouri, is faced with the greatest disaster which we have experienced in the past generation. Due to unprecedented floods, which have virtually destroyed one-third to one-half of the cotton crop which has been planted, southeast Missouri is now faced with a condition which in all probability will result in the nearest thing to a crop failure which our area of the State has ever experienced.

I know of nothing which at this time could give our people greater hope and more encouragement than for Congress to give conscientious and sympathetic consideration to this type of legislation, which would not only be beneficial to that section, but to every other section of the country in which cotton can be produced.

As stated earlier Mr. Speaker, all segments of the cotton industry, after several industrywide conferences and meetings, have agreed on the principles involved in this bill. I mean the producer, the cotton ginner, the warehouseman, the buyers, the shippers, the cotton merchant, representatives of our large cotton exchanges, the cottonseed processors, and yes, even the spinners and textile mills, have agreed that something needs to be done, and to be done this year.

The bill which I have introduced, and which other Members of Congress, both in this House and in the other body, will I am sure support, is the result of the general agreement which has been reached. We are hoping, Mr. Speaker, to have the opportunity at an early date, of hearing testimony on this bill, and I am sure I am speaking for all of the sponsors of this legislation when I say that we will welcome the opportunity of explaining the details of its operation. Yes, Mr. Speaker, we not only welcome the opportunity to explain what we believe to be the merits of this legislation, but we will also welcome any questions which anyone may have. Likewise, we will welcome suggestions for improvement if you feel that the legislation can be improved.

I am including herewith a brief analysis of what we the sponsors of this legislation believe it will do. We urge you to read it, and to let us have your comments:

DUAL ALLOTMENT PROGRAM FOR COTTON: DOMESTIC ALLOTMENT—EXPORT ALLOTMENT

The dual allotment program would—

A. Protect the farmer's income and permit him to use his land and equipment more efficiently.

B. Provide full price competition both at home and abroad.

C. Eliminate the need for a special export sales program.

D. Increase consumption and prevent accumulation of surpluses.

E. Return cotton handling and marketing to normal channels of trade.

F. Eliminate present conditions which create unfair competition for American cotton mills.

G. Benefit consumers through lower retail prices, and wider choice of fabrics.

H. Would reduce cost to Government.

I. Counteract inflationary trend in textile markets.

The stated objectives would be accomplished as follows:

First. The loan program would be continued, but the loan level woudl be slightly—probably 5 percent—under the world price for cotton as determined by the Secretary of Agriculture as of June 1 of the calendar year in which the cotton is produced.

Second. The national marketing quota would be estimated domestic consumption plus exports. Under this method the minimum national marketing quota for 1958 would be 14 million bales which woud provide a national acreage allotment of 20½ million acres, or an increase of 17 percent over 1957. This method would insure continuation of acreage allotments and marketing quotas and provide protection against unregulated production.

Third. Producers taking advantage of increased cotton allotments would be excluded from the cotton acreage reserve provisions of the Soil Bank. State, county, and farm history would be preserved under this provision.

Fourth. Domestic allotment: Marketing equalization payments would be made to the producer through the cotton merchant to represent the difference between the average spot market price or loan price, whichever is higher, and a stated percentage—probably 90 percent—of parity.

Fifth. Export allotment: There would be no marketing equalization payments. The program would be financed with unused funds available for cotton payments under the Soil Bank Act; and, insofar as such funds are insufficient, the Secretary of Agriculture would be authorized to use funds of the Commodity Credit Corporation.

Atomic Energy Commission Press Release Tends To Give False Sense of Security From Civil Defense Standpoint

EXTENSION OF REMARKS
OF
HON. MELVIN PRICE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 28, 1957

Mr. PRICE. Mr. Speaker, under leave to extend my remarks, I include herewith a statement made by the Honorable CHET HOLIFIELD, chairman of a special subcommittee of the Joint Committee on Atomic Energy to study radiation problems:

MR. HOLIFIELD'S STATEMENT

"I have just read the press release issued by the Atomic Energy Commission for before noon release Wednesday, May 29, 1957, announcing progress in their so-called clean weapon program," it was stated today by Representative CHET HOLIFIELD, Democrat, of California, chairman of the Subcommittee on Radiation of the Joint Committee on Atomic Energy. Mr. HOLIFIELD says:

"In view of the fact that this press release has been made in the midst of our hearings which have been trying in an objective way to find something out about the nature of radioactive fallout from nuclear explosions, I have the following comments to make:

"1. The AEC's issuance of this release violated their own rules of informing the joint committee at least 24 hours in advance of a press release. It was received at the joint committee's office at 5:59 p. m. last evening, May 28, under circumstances which would make it difficult for the committee members to be informed or to prepare comment. The release bears a curious parallel to the original 'clean bomb' press release last July 19 (1956), in which the committee was given even less notice of the AEC statement.

"2. Testimony before the joint committee during the current fallout hearings and in prior executive sessions has indicated that the AEC statement that 'the success thus far achieved (in developing cleaner weapons) has convinced us that widespread hazard from fallout is not a necessary complement to the employment of large nuclear weapons' is misleading for the following reasons:

"(a) It tends to give a false sense of security from a civil-defense standpoint. We can be certain that the Soviet Communists will use the dirtiest bombs which they can devise when and if they make the mistake of attacking this country or any other country.

"(b) It may give the wrong impression to our friends and allies that the use of large-scale megaton bombs under the cleanliness program will not entail widespread radioactive fallout. It is true that fallout is being reduced. But there is and at present cannot

be such a thing as an absolutely clean bomb, i. e., no fallout. Moreover, in any large-scale war, it would seem inevitable that weapons of varying degrees of cleanliness will be used, and the inevitable result will be large-scale fallout.

"(c) It tends to give the impression that weapons tests from so-called clean bombs have little fallout. This is a subject which these hearings will explore further. So far we have been provided with no evidence to prove the Commission's assertion. We have no assurance that Russian or British tests are or will be free of substantial radioactive fallout.

"3. This statement ignores the alternative suggestion of Commissioner Thomes E. Murray that rather than rely solely on large-scale thermonuclear bombs we develop and produce numbers of small-yield nuclear weapons which can be widely dispersed and used on a selective and limited basis in brush fire wars.

"Senator ANDERSON has asked me to add that he fully endorses this statement."

P. G. & E. Co. Wants To Monopolize Power Market

EXTENSION OF REMARKS

OF

HON. CLAIR ENGLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 28, 1957

Mr. ENGLE. Mr. Speaker, as I have previously stated several times to my colleagues, the existence of Federal power in an area has the effect of holding down power and energy rates of the private utilities in that area. To see this, one only needs to compare prevailing power rates in the Pacific Northwest and other areas where Federal power is available with areas such as the Northeast where there is no Federal power. This explains the real purpose of the Pacific Gas & Electric Co.'s proposal to construct the Trinity project power facilities, which is to stop, at least for a period of 50 years, any further expansion of Federal power in California in order that it may monopolize the power market in that area. Then there would be no competition to force it to hold down its power rates nor a yardstick with which its rates could be compared.

It is interesting to examine the history of the P. G. & E. resale rates—that is, rates to municipalities and others for power to be resold—in the Central Valley project area and the effect the existence of CVP power has had on such rates. Prior to the time power was marketed from the Central Valley project, the Pacific Gas & Electric Co. had no competition in northern California and its resale schedule was such as to discourage municipalities from operating their power distribution systems. In 1945 the competitive effect of the Central Valley project led the company to adopt a resale schedule considerably lower than the one previously existing. This came at a time when the general trend in power rates was up instead of down and it was made clear at the Public Utility Commission hearing on the matter that the threat of competition had led the company to propose this new lower rate. As a result of this new resale schedule one municipality alone saved over $6 million in a 7-year period. All municipalities purchasing energy from the company profited by this rate decrease which was due largely to the existence of Central Valley project power. Irrigation districts in San Joaquin Valley had somewhat the same experience. In 1951, doubtless due to competition from CVP, the company lowered rates for irrigation districts in the San Joaquin Valley by approximately 20 percent. Again these reductions came at a time when the trend was in the opposite direction.

The point I am making is that if the P. G. & E. Co. is successful in cutting off expansion of Federal power in northern California it will have the area all to itself and if this happens it will be to the detriment of every user of electricity in the area. Existence of Federal power in an area does not just benefit those who actually buy it but it benefits all users of electricity because it is a deterrent to excessive power rates.

The Gerry Murphy Case: Certain Corrections

EXTENSION OF REMARKS

OF

HON. CHARLES O. PORTER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 28, 1957

Mr. PORTER. Mr. Speaker, my distinguished colleague from Louisiana [Mr. LONG], in the Appendix of the RECORD May 27, beginning at page A4065, states that he is indeed sorry that I see fit "to continue this unfriendly controversy with regard to one of the foremost neighboring republics to the south and one of our stanchest friends in the free world, the Dominican Republic, and its President Trujillo."

I point out that Mr. LONG, not I, began this exchange. And I cannot allow the gentleman's gargantuan and fantastic inaccuracies to go unchallenged. In the interest of brevity, let me deal tersely with the main errors in his latest remarks.

First. The gentleman believes the Dominican Republic to be "democratic and progressive" and, in another place, "great and democratic," "one of our stanchest friends in the free world." The fact is that it is terror-ridden dictatorship. Our State Department will so testify. Every authority says the same thing.

Second. The gentleman accuses me of attempting to convict the Dominican leaders for Gerry Murphy's disappearance on hearsay evidence. I am a lawyer. My distinguished friend from Louisiana is a dentist. I say that the evidence against Dictator Trujillo, both real and circumstantial, is sufficient to convict him in any American court and would not be subject to being stricken as inadmissible hearsay.

Perhaps my friend from Louisiana made his statement before he had an opportunity to hear the CBS Edward Murrow broadcast, The Galindez-Murphy Case: A Chronicle of Terror. I say again, as I have said off the floor of the House, that the Dominican Government, which means Rafael Trujillo, is guilty of Gerry Murphy's kidnapping and probable murder.

My colleague has never deigned to discuss the evidence, just to characterize it. I refer him to my speech in the House on February 28 where the evidence is discussed. I also remind Mr. LONG that the Dominican Government's explanation of Murphy's death was sternly rejected by our State Department and that the House Foreign Affairs Committee has decided to consider the Murphy-Galindez matter in executive session June 4.

Moreover, in its latest note to the dominican Republic, our Government cited the investigation into Murphy's activities and stated that "sufficient evidence has now been uncovered to indicate that Mr. Murphy may have been connected with the disappearance of Dr. Jesus de Galindez in New York on or about March 12, 1956, acting on behalf or in association with certain Dominican and American nationals."

Our Government has asked that the former Dominican consul general, Arturo Espaillat, return here without diplomatic immunity "in order that he should be amenable to the usual and lawful procedures in matters of investigation and trial."

This request was made on May 2. As of May 29, no reply had been received from the Dominican Government which had previously made repeated official declarations of willingness to cooperate in this investigation.

Third. The gentleman from Louisiana states that the Murphy case is one of the "shapes and forms" of the Communist effort "to overthrow the present great and democratic Government of the Dominican Republic." He gives no evidence for this allegation, which implicates me, the State Department, and many others. He says my article in the June Coronet magazine, The Butcher of the Caribbean, is "a lurid rehash which reeks with its communistic origin." Again, no evidence. Again, no discussion of the facts. The reaction to my article from those who know Trujillo has been entirely enthusiastic, as has the reaction from those who previously did not know about this tyrant. It may be a "lurid rehash" to my colleague but to date I have found no such reaction elsewhere.

Fourth. The gentleman from Louisiana states that I impugned, "if only by implication," the character of Majority Leader JOHN MCCORMACK by using his name in my Coronet article. I did nothing of the sort. I indicated a disagreement but I specifically wrote:

> My respect and admiration for Mr. MCCORMACK was—and is—immense.

No other colleague, including the distinguished and beloved majority leader

himself, has indicated to me, directly or indirectly, that my mention of Mr. McCORMACK was in any way discourteous. The disagreement between my colleague from Louisiana and myself centers about entirely different matters, namely, the nature of the Dominican Government, its responsibility for the disappearance of my constituent, and the motivations for my pressing for a change in our Government's policy toward such tyrants. I am aware of no such disagreements with my good friend and mentor, the kindly and truly liberal JOHN MCCORMACK, of Massachusetts.

Fifth. The gentleman from Louisiana states that my saying I must carry a gun impugns the honor of every Member of the House. No other Member has even hinted that he held a similar view. I carry a gun, on occasion, for self-protection because I have been so advised by the police, because I have received many such recommendations from responsible persons who know Trujillo and his gang, and because my own conclusion on all the facts is that a weapon might come in handy. My colleague asks me if I carry the gun on the floor of the Congress. The answer, of course, is that I do not.

I shall continue to fight, as best I can, tyranny of every kind, whether Communist or otherwise. My constituents in Oregon, along with other American citizens, proud of their heritage as free people, rightfully expect this of the Representatives they send to Congress.

Are We Wasting Natural Resources?

EXTENSION OF REMARKS

OF

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 28, 1957

Mr. PHILBIN. Mr. Speaker, the rate at which we are utilizing and, in many instances, wasting our natural resources is giving our scientists and sociologists special concern these days. Every American should be concerned.

Some of these experts are of the opinion that we are rapidly becoming a have-not nation in many respects. At the turn of the century we were assured by some of our great steel corporations that we had an inexhaustible supply of iron ore in the Mesabi Range of Minnesota. Notwithstanding these assurances of strongly expressed, cocksure confidence, I am informed that we are now down to mining taconite which is a low-grade 30-percent ore and that we are importing iron ore.

Relatively the same situation obtains in the oil industry. In 1930 when the east Texas field was discovered, it was assumed that we had an indefinite supply of oil. But that has not proved to be the case and we are now in the role of an oil importer.

Is there a national attitude of unconcern for the future? Are we tending to minimize or overlook completely the serious problems of supply of natural resources that we are bound to have to face in years ahead? Have our methods been wasteful and improvident in utilizing these natural resources? Are we doing enough research to replace them when the day comes that they are exhausted? Are we spreading ourselves too thin by exporting large quantities of valuable resources to other parts of the world? What situation will confront us when our resources are relatively exhausted and the comparatively unexploited resources of the Communist world are fully developed?

I pose these questions because I believe they are worthy of careful intensive study and that we are indulging in an unwise luxury when we are deferring our search for appropriate answers. There are many agencies I know that are charged with some degree of responsibility for conserving and keeping inventory of natural resources and how to develop them. But it seems to me that there should be an integrated study inaugurated by appropriate committees of the Congress on a very broad scale designed to collect the facts relating to the present status of our natural resources supply and make recommendation for their more prudent utilization as well as provide some rational plan for developing satisfactory substitutes for these steadily depleting resources.

I think that the Congress should fully assume its responsibility in this all-vital and all-important field of conservation because at the rate we are going it is certain that the most serious problems lie ahead of us, and we must move to try to cope with them in order to protect the paramount interest of the American Nation and its people.

The Red River Canal

EXTENSION OF REMARKS

OF

HON. RUSSELL B. LONG

OF LOUISIANA

IN THE SENATE OF THE UNITED STATES

Tuesday, May 28, 1957

Mr. LONG. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD the address delivered by Representative OVERTON BROOKS, of Louisiana, before the Red River Valley Association Convention, in Shreveport, La., on April 23, 1957. In my opinion, this address does a creditable job of explaining the reasons why navigation is necessary between Shreveport, La., and the Mississippi River, and why it cannot be achieved except through the medium of a lateral canal, making use of the existing waterways paralleling the Red River.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY CONGRESSMAN OVERTON BROOKS BEFORE THE RED RIVER VALLEY ASSOCIATION, APRIL 21, 22, 23, 1957, SHREVEPORT, LA.

In the year 1899 the last boat steaming up the Red River arrived at Shreveport and after leaving its cargo retraced its course back to the Mississippi. Since this date no river boats have arrived at Shreveport, and the Red River has not been used for navigation. The question naturally arises, "Why has this stream not been used for waterborne commerce in more than 50 years?"

The answer is that the Red River over the years became unsuited for navigation. It has developed like many other streams in this nation which have changed due to the stripping of the hillsides of timber and to the cultivation of the lands by draining them and making possible the quick removal of water from the land. The little streams throughout our countryside have often dried up and have even disappeared in many instances in the course of the development of our Nation.

Red River has suffered this fate. The banks are soft and crumble and melt away under the terrific impact of high water rushing downstream to the sea. Channels have changed in the course of time to such an extent that boundaries have disappeared and old lines have been marked out. Parts of Bossier Parish, for instance, now find themselves on the Caddo side of the River. In at least one instance we have built a great bridge over the Red River and this was in Avoyelles Parish—only to find later that the river actually bypassed the bridge and left the structure high and dry, making a several million dollar structure, in the course of a very short time, worthless and unusable. In another instance, in northern Bossier, within the last few years, the State was compelled to spend tens of thousands of dollars to stop the ever-moving process of a Red River-changing channel in order to save another bridge in the course of construction in the Plain Dealing area and prevent it from being bypassed.

From the time the last river boat came to Shreveport, our people began to yearn for and to hope for the day when navigation would be restored to the river. They have seen other river ports in Louisiana and elsewhere thrive and grow and expand while our own valley—as fertile as the Garden of Eden—does not keep pace with this growth of these other areas. We have the people, the climate, the natural advantages of other localities; but we fail to provide the water transportation and water rates which they enjoy. This is the real difference between the Red River Valley cities and towns and other places.

In the years prior to 1946, we who were interested in the further development of our valley had been at work trying to restore navigation. At first we asked for navigation on the Red River itself as the answer to our traffic problems. We know that every large community must of necessity have every form of transportation—road, rail, air, pipelines, and water—and that the community that fails in any one respect does not contribute fully to its own development competitively with other more fortunate communities. After working on this matter for years, our plans were submitted to the Board of Rivers and Harbors of the Army Engineers in Washington—a board composed of the best hydraulic engineers in America.

I was present when this hearing occurred in Washington in 1946. I can look back over the years and realize how important this hearing was to our people here. Claudius Dickson of Shreveport was president of the Red River Valley Association and headed the delegation going to Washington. John Ewing of the Shreveport Times, a director of the Kansas City Southern Railway, came up especially and made a splendid presentation. Senator John H. Overton, my uncle, organized the meeting and presented the witnesses. Other distinguished citizens, many now gone to their rewards, made appearances on behalf of water transportation

along the Red River. We all asked for navigation on the river itself.

After months of study and deliberation, the Board of Rivers and Harbors on April 19, 1946, in effect turned down our request for navigation on the Red River, but approved a plan for a waterway to be built on the south side of the river in the alluvial valley as a canal. There can be no question but that the approval of the Overton Waterway was a rejection of the use of the channel of Red River for navigation purposes. Since this decision was rendered, year by year, we have asked the Congress for money for the purpose of planning, blueprinting, and for engineering work for the lateral canal, and the Congress has granted this request; and has provided in all $515,000 for this purpose.

Why did the Board of Rivers and Harbors turn down the use of the channel of the Red River for navigation purposes but, at the same time, approved the construction of a canal along the south side of the river from Shreveport to the Atchafalaya? There were a number of reasons for this decision.

The first reason was that which I have already discussed; namely, the shifting of the channel, the caving and disintegration of the banks of the stream, the lack of availability of an adequate supply of water in the Red; and the greater cost of providing for navigation along the channel of Red River and the greater length of the channel of the river for transportation, for such purposes over that of the canal.

I think it is obvious that navigation on the Red River would require more water than navigation on the Overton Waterway. This is, of course, because the Red River is a flowing stream and the canal will be a slack-water course. It will require much more water to maintain a channel of a specified depth on the flowing stream than on a slack-water canal. How much more will be required depends upon the rate of the flow of the river and this will depend upon the number of obstacles placed in the path of the current.

The third reason that the use of the Red River channel for navigation purposes was discarded is that such a route must be much longer than the canal type of waterway. The Overton Waterway, as designed, is 205 miles long. On the other hand, the Red River channel is 280 miles long—75 miles longer than the proposed Overton Waterway. The Red River channel, of course, is longer because it is filled with curves, and bends. Then, too, its current will provide a serious obstacle to upstream navigation. The lack of current on the Overton Waterway, as designed, makes for much less bank wash and erosion; and provides for a greater stabilization of bank and channel.

The use of the Red River channel, if this were feasible, would require 12 locks and dams. The dams on the river, of necessity would be much larger and longer than those on the canal, for from bank to bank the river is much wider and, of course, would cost much more money to construct. It is obvious also that banks above and below the locks and the dams would have to be completely stabilized for some distance to prevent what occurred in Avoyelles Parish when the Red River cut a pathway around one of the bridges which had been constructed and thereby rendered the bridge useless. This would require much money. The project to stabilize the banks of the Red 3 miles above and 3 miles below Shreveport has already cost the Government over $10 million. This will give you some idea of the cost of stabilizing the river for a distance of 280 miles.

The original estimate of the cost of the Overton Waterway was $42 million. Since this estimate was made in 1946, of course, prices have gone up considerably. The engineers will give you a further cost estimate; but I would guess that it would certainly run under $100 million. On the other hand, the cost of building the Red River route, using the river channel for navigation, will run $300 million or better—2 or 3 times that of the cost of the waterway.

Besides this, the engineers say that it is not feasible to build the waterway on the Red River. Constant shifting of channels, crumbling of banks, and varying elevations of water make real problems; and these, in turn, make the river itself unsuited and unusable for navigation purposes.

You may say, "Well, Congressman, who says that the river is unsuitable for navigation besides yourself?". I answer, "The United States Corps of Army Engineers."

When we are sick, we go to a doctor; when we have toothache, we visit a dentist; and when we need to build a great canal for navigation, we look to our engineers. They have not let us down in any emergency.

This is the group of engineers which has built the program of flood control and navigation for our Nation since its inception. It is the group which was founded by the Father of Our Country, George Washington, when he was President of the United States. He sent to Europe to obtain three of the very best engineers from the armies of Napoleon, and they formed what is now our Army engineers. Since that time our Corps of Engineers has rated tops in conduct, ability, and efficiency.

The Army engineers is the same organization which landed its men on the shores of Normandy in France in World War II, even before the combat troops landed; and they cut the barbed wire and removed the obstacles, preparing the way for the landing of the infantry and the artillery, the tanks and the jeeps. They won an immortal place in the hearts and minds of our people; and neither time nor distance will efface the valor of their efforts nor the impact of their achievements in the development of America. I think we can safely depend upon them in the building of the Overton waterway.

The canal when built will begin at the confluence of the Old and Mississippi Rivers, and will continue on up to Shreveport, 206 miles to the northwest. The first 7 miles is through Old River, and the next 24 miles through Red River, at which point it follows Coulee des Grues, Choctaw Bayou, and Chatlain Lake Canal to Alexandria. It then proceeds through land cuts to Cane River through Natchitoches, and then on to Bayou Pierre and to Shreveport. It will use 120 miles of existing waterway as compared to 86 miles of land cuts. At Shreveport a turnaround basin will be built and a basin for loading and unloading will be built at all of the large stopping points.

It is fair to say that most of the land utilized will be far removed from urban centers and will be low or swampy land not normally used for cultivation. By the same token, the number of roads to be rerouted will be reduced to a minimum.

I have heard it said that such a canal will split the countryside wide open; and that a barrier greater than anything we have experienced will be erected to prevent the free passage to and fro across the waterway. This, of course, is not true. The waterway, of course, will be no greater a barrier than is Bayou Pierre and Cane River at the present time. At this time, these streams and others like them must be bridged if we are to cross them. The same will apply to the canal.

On the other hand, the canal will pass through rather low places in the countryside; and this waterway will provide means of draining these sections of central and northwest Louisiana, which they do not now have. It is estimated that flood control and drainage benefits for the area will exceed $1 million per year. Flood control is an item for which we will spend millions of dollars even though we do not build the canal. If built, the canal will help take care of this expense and no other development presently contemplated will provide flood control and drainage benefits as indicated by the building of the canal.

Of course, this canal will cost lots of money. Any worthwhile project will cost money; and the question is, whether or not it is justified. The Army Engineers will settle this question, and I submit that they are better to dispose of this question accurately than any other group of people.

The actual or total benefits from the construction of this project will be inestimable. A million and a half people have settled in this portion of the Red River Valley and they are all affected by freight rates. Every rate increase of the railroad companies and the truck carriers, and the buses, adds to the cost of living of our people. Those living in the areas of Louisiana where navigation is available, know the difference in the costs. A rate increase is often the difference between success and failure of business.

Throughout the length and breadth of this country, we see the great cities and towns grow up along the rivers and the harbors. Navigation has attracted the people and businesses to these spots. Cost of living is lower and business prospers in such locations. And we see the great highways terminating at the sea and at the inland ports; and even the railroads, feeling the quickening impulse of lower rates, lay double tracks, add to their equipment and personnel and begin to boom in the stimulus of the increased transportation attendant with the port and with navigation. It is largely in places where there is navigation that the communities grow and prosper. New Orleans, the Crescent City; St. Louis, the hub of America; Chicago, the windy city; Pittsburgh and its golden triangle—all of these great cities are built on waterways and the backbone of their prosperity and growth lies in the development which lower freight rates and navigation have given to the community.

The Overton Waterway will open up to us, for waterborne commerce, the great ports along the Mississippi, such as Baton Rouge, New Orleans, Memphis, and St. Louis; the ports along the Atchafalaya and along the Intercoastal Canal, such as Lake Charles, Houston, and Beaumont. It will connect our communities directly with navigation all along the inland waterways of America—with Pittsburgh, Chicago, Minneapolis, and Sioux City. It will develop in our midst a new type of industry and bring fresh opportunity and new accomplishment to our people.

If we are going to have navigation for the Red River Valley below Shreveport, it is going to be by way of the Overton Waterway. Congress will never appropriate funds for the construction of a great project such as this if it is not approved by the Corps of Engineers. Nor will the people who must support the project by local cooperation approve it in the absence of the recommendations of the Army engineers. We can use all of the persuasion possible and apply political pressure, but I can tell you this—the Army engineers will not yield to the point of recommending a project which they feel is not worthy of the approval.

If, therefore, we reject the canal proposal, make no mistake, navigation in the Red River Valley is dead. We have no alternative. If we accept the proposal, we move forward. The way is not smooth. It is rough; filled with opposition and difficulties;

but at the end of the rainbow, it offers the fulfillment of a dream of 55 years—navigation in the Red River Valley. We moved forward—at times, it is true, slowly—but always forward, and ultimately over the years we leave to our children the priceless heritage of having developed our God-given resources to the best of our ability. We leave to them the basis for competitive commerce in our valley, for further development greater than otherwise would have been possible; for prosperity and for happiness.

Address of Hon. William M. Tuck, of Virginia, Before the Jefferson-Jackson Day Dinner of the Eighth Congressional District in Charlottesville, Va., May 25, 1957

EXTENSION OF REMARKS

OF

HON. WATKINS M. ABBITT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 28, 1957

Mr. ABBITT. Mr. Speaker, on Saturday night, May 25, 1957, the Honorable WILLIAM M. TUCK, Representative from the Fifth Congressional District of Virginia, delivered a most important speech before the Jefferson-Jackson Day Dinner of the Eighth Congressional District of Virginia at Charlottesville, Va.

Congressman TUCK is one of the outstanding Members of Congress who is rendering faithful and loyal service not only to the people of the Fifth Congressional District but to the Commonwealth of Virginia as well as the entire Nation.

I join with Congressman TUCK in his commendation of the Honorable HOWARD W. SMITH, Representative of the Eighth Congressional District of Virginia. Judge SMITH, as he is affectionately called, is one of the great Americans of today. I commend his people upon having such an outstanding Representative to look after their interests in the Halls of the Congress.

Congressman TUCK's speech is as follows:

ADDRESS OF REPRESENTATIVE WILLIAM M. TUCK BEFORE THE JEFFERSON-JACKSON DAY DINNER OF THE EIGHTH CONGRESSIONAL DISTRICT IN CHARLOTTESVILLE, VA., MAY 25, 1957

I am happy to be here this evening as the guest of the Democrats of the Eighth Congressional District, and I was highly flattered and honored when Judge SMITH and Calvin Haley invited me to come and enjoy this fine fellowship.

Your district is rich in history and resources, and occupies a prominent place in the life and welfare of this Commonwealth. You have able representation in the general assembly; your officials who hold positions of leadership in the State government are of the highest caliber; your membership on the Democratic executive and State central committees is made up of men and women who are thoroughly devoted to the public welfare; and your county and city officials throughout the district are citizens of high character and purpose who apply themselves diligently to the faithful discharge of their duties. From Albemarle to Northumberland; from Loudoun to Goochland; and from King William to Culpeper, I salute the Democrats of this great district and express my admiration and esteem for all of you.

The Democrats of the Eighth Congressional District in general, and those who live in Charlottesville and Albemarle County in particular, are most fortunate in having as residents of your community the Honorable Colgate W. Darden, Jr., and the Honorable John Stewart Battle. These two illustrious statesmen are devoted public servants and stalwart Democrats. Their administrations as chief executives of this State were in the finest traditions of the Commonwealth, and their contributions to the cause of good government are shining examples of what the Democratic Party in Virginia stands for. I know you will join with me in extending hearty greetings and best wishes to Colgate Darden and John Battle.

I am aware of the high esteem and warm affection you have for your beloved Congressman, Hon. HOWARD W. SMITH, but sometimes I wonder if the people of this Congressional district—and for that matter the Commonwealth of Virginia, and the Nation—fully realize and appreciate the sterling qualities of leadership and ability of this outstanding public servant and statesman. I have admired him throughout his public career, but since I became a Member of the Congress it has been my pleasure and privilege to know him intimately, follow his leadership, and marvel at his eminent qualifications. Although not a seeker of publicity and modest and unpretentious to a marked degree, Judge SMITH is always on the front line in the battle for sound legislative measures and in support of fundamental doctrines and principles which he believes in so firmly. In his capacity as chairman of the all-important and powerful Committee on Rules in the House of Representatives, he has performed valiant service in the interest of sound government and in the defense of States' rights.

It was highly gratifying when on February 22, 1955, the American Good Government Society, in a resolution of tribute and honor to HOWARD WORTH SMITH, described him in appropriate language as a statesman, lawyer, farmer, and banker who has served the public weal in an illustrious manner, and it was pointed out that among his notable achievements is the Smith Act of 1940, which has resulted in the conviction of Communist leaders and aliens whose purpose was the overthrow of our cherished form of government. Judge SMITH has also made notable contributions in the legislative field concerning amendments to the National Labor Relations Act which formed the necessary groundwork for the Taft-Hartley Law. The list of his worthy achievements is lengthy. He is a tower of strength in the Congress and considered by many as its most outstanding member.

I know many of you are familiar with the notable address Judge SMITH delivered at the New York Herald Tribune Forum on October 24, 1950, entitled "The Kind of American I Am." It was inserted in the CONGRESSIONAL RECORD immediately following its delivery, and again last year by a colleague who deemed it appropriate to commend it again to the membership of the Congress for its outline of sound doctrines and Democratic principles.

In that address, Judge SMITH said he is proud to be known as a conservative Democrat and one who adheres unswervingly to the fundamental principles of government embedded in the Bill of Rights. He is a worthy Representative of the Congressional district of this great Commonwealth that was the home of George Washington, who conceived the idea of a Constitution; of George Mason, the great exponent of democratic government who wrote the Bill of Rights; Thomas Jefferson, who wrote the Declaration of Independence and founded the Democratic Party; James Madison, the father of the Constitution; James Monroe, author of the Monroe Doctrine, and John Marshall, Chief Justice of the Supreme Court, who, by his decisions, breathed life and vitality into the Constitution.

I cannot find words adequate to pay proper and appropriate tribute to your beloved Congressman. His devotion to duty; outstanding capabilities; wise leadership and calm and courageous conduct are a source of inspiration to me.

It is always appropriate and fitting at all Democratic gatherings to pay respect to the memory of Thomas Jefferson, the founder of the Democratic Party. As every Virginian knows, he was its first champion and the most brilliant, farsighted, and bold philosopher the Republic has ever known. He envisioned the Democratic Party as the party of the people and declared that governments are not the masters but the servants of the people.

Jefferson stood for the legitimate rights of the States and in the most positive terms advocated the greatest degree of local government. He denounced the idea of government catering to groups seeking special privileges, and it was his belief that the greatest danger the young Republic would ever have to face from within was the threat of centralization of authority and its inevitable abuses of individual liberties. Although we have been saddened and perturbed to witness flagrant abuse of Jeffersonian principles in national administrations, claiming to be his adherents, it behooves us as Virginia Democrats to insist upon steadfast adherence to the principles and philosophies espoused by the sage of Monticello.

With masterful emphasis, Mr. Jefferson wrote: "I do verily believe that, if the principle were to prevail of a common law being in force in the United States in which the General (Federal) Government at once possesses all the powers of the State governments and reduces us to a single consolidated government, it would become the most corrupt government on earth." Let us exert our every effort to maintain State autonomy and protect the traditional American form of local self-government operating in the communities and the counties and the States.

Although he was born to wealth and position, Jefferson believed that tyranny could best be thwarted by letting the power reside in the people. He was opposed to tyranny in any form, and one of his most immortal utterances was, "I have sworn upon the altar of God eternal hostility against every form of tyranny over the mind of man."

Jefferson's personal platform at the time he was elected President was as follows:

I do with sincere zeal wish an inviolable preservation of our Federal Constitution according to the true sense in which it was adopted by the States.

I am for preserving to the States powers not yielded by them to the Union.

I am opposed to transferring all the powers of the States to the General Government, and of that Government to the executive branch.

I am for a government rigorously frugal and simple, applying all the savings of public revenue to the public debt.

I am opposed to increasing the public debt on the principle that it is a public blessing.

I am for freedom of religion and freedom of the press, and against all violations of the Constitution.

We should likewise pay tribute here to the hallowed memory of that other great patron saint of the Democratic Party, the immortal Andrew Jackson. Although born in such obscurity that two States have claimed his birthplace, he rose to fame as a legislator, jurist, soldier, statesman, and President, and he espoused and upheld with vigor and determination the sound doctrines and high principles upon which the Democratic Party was founded. A recent visit to Jackson's beautiful country home, the Hermitage near Nashville, Tenn., was indeed an inspiring experience.

Senator BYRD, in addressing the Kiwanis Club in Richmond on April 3, pointed out that Andrew Jackson was the only President of the United States to pay off the Federal debt in toto. Although the debt was not large, he paid it off and boasted about it, and Senator BYRD said that when he is asked what kind of a Democrat he is, he is proud to reply, "I am an Andrew Jackson Democrat."

I am reluctant to disturb the sociality and conviviality of this occasion, and yet there are dangers confronting us so vital to the interest and welfare of our country I would not be doing my duty as a citizen of the Commonwealth were I to fail to point them out.

The most alarming is the pattern now employed by the Supreme Court of the United States in decision after decision which reveals a studied campaign to obliterate the rights of the sovereign States. Some of the recent decisions of this court break down our Constitution and shatter our Bill of Rights which was penned on the soil of this Commonwealth and which has found its way into the Constitution not only of the United States, but of every State in the American Union.

Prior to 1896 there was practically no public school system in any of the States, including Virginia. In that year the Supreme Court of the United States handed down a decision in the case of *Plessy* v. *Ferguson*, pronouncing what is known as the "separate but equal doctrine"; that is, that the States could provide separate schools for the races provided the schools were substantially equal.

The validity and soundness of this decision was upheld many times by the Supreme Court of the United States and by other courts. Even as late as 1927 the Supreme Court, speaking through Chief Justice Taft, a former President, enunciated this same sound doctrine. Relying upon these decisions, the States have spent millions of dollars constructing school systems for the training and education of our children.

On May 17, 1954, the Supreme Court overruled this and many other decisions of the court, striking down at the same time the Constitutions of at least 17 States, holding that if we operate public schools they must be integrated. No legal authority was cited in support of this infamous opinion which undertakes to substitute a government of men for a government of laws, and the only authority was psychology and sociology of a doubtful variety, referring to such men as E. Franklin Frazier, a Negro, who wrote a book entitled, "The Negro in the United States," and who extolled the characteristics of such Communists as Paul Robeson, and who signed a statement condemning any punitive measures directed against the Communist Party in the United States.

The Supreme Court in its opinion further referred to another authority, a man by the name of Gunnar Myrdal, who is a notorious Swedish Socialist, imported to the United States in 1937 by the Carnegie Foundation of Alger Hiss fame. Myrdal has an utter contempt for the principles upon which the United States was founded and the political system to which our people adhere. The very book to which the Chief Justice in his opinion referred, by this Socialist Myrdal, stated that the Constitution of the United States was "impractical and unsuited to modern conditions, and its adoption was merely a plot against the common people." This is plain unvarnished communism and is the authority cited by the Supreme Court of the United States for this improvident, unwise and, I believe, unpatriotic decision.

This loved prophet of the Supreme Court, Myrdal, has written another book entitled "An International Economy," in which he argues against the awkward fact of the United States bigness and urges equalization and integration of all peoples through redistribution of natural and commercial wealth. Apparently he doesn't approve of the size of the United States any more than he does the United States Constitution. So respectful of its prophet is our High Court (or was on May 17, 1954) that it might entertain an antitrust suit against the United States of America as a monopoly in restraint of trade. Also, of course, in restraint of Russia.

It is said that members of the bar are now forced in self-defense to study the works of Gunnar Myrdal and acquaint themselves with his philosophy in order to prepare for cases when there is a possibility of Supreme Court consideration.

It would seem that the school decision of 1954 would have done enough violence to our Constitution for at least one generation, but the Supreme Court thinks otherwise and continues to render these decisions which are disturbing to all thoughtful and patriotic Americans. The unbridled attempts of the Supreme Court to usurp the powers of Congress and to amend the Constitution of the United States by judicial decree may succeed in awakening and arousing the people, not only in the South but in all parts of the country, to the dangers which confront us, and to the fact that our Constitution is being jettisoned by the very branch of the Government designed to preserve and protect it.

Despite the fact that the wise legislation sponsored by Judge SMITH contains a provision distinctly preserving the rights and powers of States to pass antisedition and anti-Communist laws, the Supreme Court, in the case of the *Commonwealth of Pennsylvania* v. *Nelson*, handed down a decision reversing the conviction of a Communist by the name of Nelson in the State courts of Pennsylvania. The Court declared that the Congress in passing the Smith Act, despite this provision to the contrary, had preempted the field and the States were without power to deal with Communists and subversives and others who would overthrow the State and Federal governments. The Supreme Court has struck down the powers of the States to convict Communists and other leftwing elements who wish to destroy our Constitution and to reduce each State as well as the Government of the United States to a shambles.

The people of Pennsylvania, and others who know of this decision, are incensed over the matter and are beginning to understand and appreciate the force and efficacy of the arguments which we have recently made in the South in respect to the school decision case. They now seem to realize what the members of the General Assembly of Virginia and other southern States meant when they passed almost unanimously the "Resolutions of Interposition" protesting the unauthorized and unprecedented acts of the Supreme Court of the United States. Citizens of other States are likewise beginning to understand the meaning of the language employed and the constitutional principles declared in that historic document known as the "Southern Manifesto," signed by more than 100 members of the Congress.

The great State of New York has likewise come under the hammer of the Supreme Court of the United States in a case involving the principle. In that State, a school teacher who had refused to testify before one of the Congressional committees, seeking cloak and shelter under the beneficence and protective wings of the fifth amendment to the Constitution of the United States, because of lost confidence in her loyalty, was discharged. The Supreme Court handed down a decision denying to the sovereign State of New York the right to fire the school teacher, whose compensation was entirely from State funds.

Among the most recent decisions of the Supreme Court was the one handed down in the Girard College case, where the late Stephen Girard of Philadelphia by his last will and testament created a trust fund for the erection, maintenance, and operation of a college for as many poor white male orphans as the income from the fund shall be adequate to maintain. The Supreme Court held that the operation of Girard College, pursuant to the provisions of the last will and testament of the individual who created the fund to finance its operation, was null and void because the student body is made up of white boys. In total disregard of the sanctity of the will of Stephen Girard, Negro politicians have now prevailed in their contention that he had no right to make a will which provided for the education of white boys alone and that the college must now be compelled to admit Negroes. As you know, the Supreme Court decreed that Stephen Girard's stipulation of white orphan boys must be disregarded for the extraordinary reason that the "board which operated the Girard College is an agency of the State of Pennsylvania" and that "the board's refusal to admit Negroes constituted discrimination by the State of Pennsylvania." A decision of this nature takes us far down the road to tyranny and presents a frightening situation showing a rapid approach to a centralized Federal tyranny.

As recently as Monday, May 6, 1957, we became aware of decisions of the Supreme Court of the United States which constitute flagrant substitution of the High Court's judgment for the judgment of the States. In the New Mexico and California cases where, after patient and careful consideration, the State authorities had denied two former Communists admission to the respective bars of New Mexico and California on the ground that their long and open activities as Communist Party members prove their moral unfitness to become members of the bars, the United States Supreme Court made it its business to trample underfoot the decisions of both State courts by holding that the due process clauses of the 14th amendment had been violated and the State court decisions were, therefore, unconstitutional. In a recent editorial on this subject, the able editor of the Richmond News Leader asked the following pertinent questions: "If a State no longer can fix standards of propriety and fitness for its teachers; if a State no longer can operate its public schools so as to avoid domestic strife; if a State no longer can establish its own rules for appellate proceedings; if a State no longer can pass upon the fitness of prospective lawyers who would become officers of State courts—what, then, is left to the States?"

Another iniquitous onslaught against the States rights is inherent in the so-called civil rights proposal now pending in the Congress. As Senator HARRY F. BYRD has so forcefully stated, this legislation is punitive in nature and clearly designed to pun-

ish the South for its refusal to submit to the Supreme Court's decision in the school case which is in complete violation of our constitutional rights. But these unwarranted and ill-advised so-called civil rights proposals are fraught with extreme danger not only to the South, but to every State in the Union. They constitute a grave threat to the sovereignty and to the future existence of our States on an autonomous basis.

I joined with seven of my colleagues on the Judiciary Committee of the House of Representatives in presenting the minority views on the bill H. R. 6127 in an earnest effort to outline in detail the unsoundness of these proposals and the shocking manner in which they would usurp the rights of the States. Our own able attorney general, Hon. J. Lindsay Almond, Jr., appeared before the Judiciary Committee and presented a masterful argument in opposition to the bill, as did many other outstanding lawyers.

Real craftsmanship was employed by the skillful and dexterous political professional who drafted the proposed legislation, and although his approach is a surreptitious one the flagrant violation of our fundamental rights is quite plain.

We are confronted with a proposal by the Attorney General of the United States to violate the sacred precincts of the constitutionally embedded system of trial by jury. He does this by the simple proposal of permitting the United States to become a party to what appears to be a civil suit, but before the suit is consummated it develops into a criminal procedure and he succeeds in abolishing, if this proposal is enacted, the time-honored safeguard and means of applying the sanctions of a penal statute. He proposes to lodge and substitute for these safeguards the contempt powers of the Federal Judiciary, some of whom rule with a ruthless and tyrannical hand. He would set at naught and banish from the American scene the right of an accused person to demand the nature and cause of his accusation, to be confronted by his accusers, to demand proof, to place himself in a position to plead former jeopardy, to cross-examine those hostile to his rights, to call for witnesses in his behalf, and to demand a fair, speedy, and impartial trial before a jury of his peers, without whose unanimous consent he cannot be found guilty. In order to accomplish his purpose to amend the criminal conspiracy statute (which in effect these proposals do) he would sacrifice all of these constitutional principles.

One of the features of the bill provides for the establishment of a Commission on Civil Rights. On its face this appears harmless except as a foolish expenditure of public funds in a country where we are already overloaded with debt, but the serious objection is not the establishment of another costly and foolish bureau, but the establishment of one with sweeping powers so unlimited as to constitute a board of inquisition and ex parte condemnation. Such a Commission will serve no good purpose and will provide a source of harassment to the several States which it will seek to victimize in derogation of their rights under the Constitution to administer their own internal governmental affairs. The duties of the Commission, as outlined in the bill, are fantastic and the powers proposed to be invested in the Commission would be another abrogation of State sovereignty and in careless disregard of the rights of individual citizens of the various States.

One of the oldest and most thoroughly established and salutary rules in American jurisprudence is the requirement for the exhaustion of State administrative remedies before resort to a Federal court. The pending proposals provide for the abolishment of this principle in the amendment to the so-called civil rights statutes and the amendment relating to the right to vote. Every thoughtful person must agree that wherever parties may have their rights adjudicated at the State and local level, Federal courts should not interfere, and indeed they have no right to do so. The only conclusion to be reached is that the attempt to enact these so-called civil rights proposals into law constitutes a deliberate, open, and blatant expression of total lack of faith and confidence in the virtue and the integrity of our respective State governments in general and our State judicial systems in particular, and constitute an insult of the ugliest sort.

The proponents of this legislation completely overlook and refuse to recognize that there are no Federal elections. There is no Federal election machinery and no provision in the Constitution of the United States which authorizes it. No constitutional authority is conferred upon the Federal Government to conduct, regulate, and administer any election. On the other hand the Constitution expressly negates any concept of such authority in the Federal Government, and it is made abundantly clear that such authority resides only with the States. The States have clear constitutional rights to regulate and administer their own electoral processes. We should never agree to permit the Attorney General of the United States to meddle with State elections and brush aside State law, remedy, procedure, States' rights, jurisdiction, and authority in matters pertaining to elections.

One of the most frightening phases of this whole situation is the apparent complete lack of knowledge on the part of the President of the United States of what is going on. President Eisenhower admitted at a recent press conference that he has not even read the so-called civil-rights bill. He is quoted by the press as having made the following amazing statement, "The civil-rights bill is a very moderate thing, done in all decency and in a simple attempt to study the matter, see where the Federal responsibilities lie, and to move in strict accordance with the Supreme Court's decision, and no faster and no further."

My friend, Jack Kilpatrick, the able editor of the Richmond News Leader, recently in an editorial described the President's apparent ignorance of the gravest issue of State and Federal relations now before the Congress, as a gross neglect of duties, and he very aptly suggested that the President "tuck a copy of the bill in his golf bag and read it while riding in his electric cart from tee to tee at Burning Tree."

Our mutual friend and your district chairman, Ben Garrett, kindly sent me one of the King William County medals cast as a part of King William's observance of the Jamestown Festival. It is a most attractive bronze medal with the seal of the circuit court of King William County on one side, and a picture of the old courthouse on the other, and with one of the most timely and appropriate inscriptions imaginable. The inscription reads, "The Constitution or the Supreme Court—Liberty or Tyranny." I shall fight with all the power at my command in support of the Constitution and liberty, and I appeal to every lover of liberty in this Nation to awaken to the dangers confronting us and recall the warning of the Founding Fathers and the makers of the Constitution, that an uncontrolled Supreme Court makes despotism—yea, tyranny.

The people are rightly concerned about high taxes and the current Federal budget which is the largest in peacetime history. I will not impose upon your good nature by dwelling upon this unpleasant subject unduly. I do want to say, however, that it is highly gratifying to observe that the American public is demanding a reduction in unnecessary Federal expenditures and I fervently hope that there will be such a compelling force of public opinion as to guarantee a large measure of return to fiscal sanity and solvency. The current budget can be reduced by six or seven billion dollars with no danger to our national defense or serious impairment of normal and essential functions of Government.

We in Virginia are blessed with good government. Our government is interested in the well-being and happiness of all for whom government was established. We still believe in the fundamental principle that all authority resides in the people, and that the government is the servant of the people and not their master.

Because of our steadfast and firm determination to adhere to the fundamental principles of government established on the soil of Virginia, and which has made our Commonwealth and our country great, and which we cherish, many of those who would change everything, even our form of government derisively refer to us as old fashioned. So much so that be believe with Jefferson, who asserted "that government is best which governs least," and with Cleveland, who believed "that it was the duty of the people to support the Government instead of the Government supporting the people." Indeed we are so old fashioned that we believe in economy and honesty in Government. So old fashioned that we believe in paying our debts. We have resisted socialism and its Russian counterpart, communism, and irrespective of what may happen elsewhere I firmly believe that Virginians will continue to resist these trends.

We believe that the faithful and impartial enforcement of law is paramount and we recognize that as the first and foremost function of Government. In short, we believe in those Jeffersonian principles upon which the Nation was founded and has grown to maturity as a leader among the free peoples of the world. We jealously guard our rights as individuals and as citizens under a free government, and we seek through our public services to strengthen and preserve those rights, rather than to weaken and destroy them.

We cherish this great heritage, unequaled elsewhere on earth. We recognize that these great blessings are accompanied by grave responsibilities, foremost of which is the obligation of so exercising our liberties that succeeding generations may enjoy the same rights and privileges, with neither fear nor restraint. With the benefit of the experience of those who have preceded us, we should be able to strengthen and revitalize the democratic institutions which are the very sinews of our American way of life.

At Williamsburg, we have the Nation's foremost example of the restoration of the physical reminders of our early heritage. We should also include a restoration of ideas, and Virginians should lead the way in restoring the sound ideas of government bequeathed to us by Jefferson and the early founders of the Democratic Party, and when we invoke their names and honor their memories we should also be mindful of and never depart from the fundamental principles they so courageously enunciated.

As one who has been actively identified with the affairs of the Democratic Party in the State of Virginia for many years, I am indeed hopeful that you will exert in your respective localities a steadfast and unflagging effort to advance the cause of the Democratic Party of the State of Virginia to the end that we may have a continuation of the fine type of government with which Virginia has been blessed and to which our people are entitled.

SENATE

WEDNESDAY, MAY 29, 1957

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

God of all hope, as again on the morrow comes the Nation's day of remembrance, we bless Thee for the cleansing ministry of memory and for the rich heritage of noble deeds. In Maytime's lovely garden we thank Thee for the hallowed thoughts which make tender our hearts as we decorate the grassy mounds and the white stones where sleep in quiet cities of the dead those whose lives were offered as freedom's shield.

Inspired and challenged by the sacrifice of remembered yesterdays, may we dedicate afresh all that we have and are to the deathless cause for which they gave the last full measure of devotion. Make us worthy of those whose graves are garnished on the Republic's sacramental day of remembrance. We ask it in the name of the Redeemer whose death meant life for all mankind. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Journal of the proceedings of Tuesday, May 28, 1957, was approved, and its reading was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on May 23, 1957, the President had approved and signed the act (S. 1442) to facilitate the regulation, control, and eradication of plant pests.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6871) making appropriations for the Departments of State and Justice, the judiciary, and related agencies, for the fiscal year ending June 30, 1958, and for other purposes, and that the House receded from its disagreement to the amendments of the Senate numbered 27 and 30, to the bill, and concurred therein.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the following subcommittees were authorized to meet during the session of the Senate today:

The Subcommittee on Public Health, Education, Welfare, and Safety, of the Committee on the District of Columbia.

The Judiciary Subcommittee of the Committee on the District of Columbia.

The Indian Affairs Subcommittee of the Committee on Interior and Insular Affairs.

The Subcommittee on Welfare and Pension Plans Legislation of the Committee on Labor and Public Welfare.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule there will be the usual morning hour. I ask unanimous consent that statements made in connection with the business of the morning hour be limited to 2 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT ON PRICE TRENDS AND RALTIONSHIPS FOR FOREST PRODUCTS

A letter from the Assistant Secretary of Agriculture, transmitting, pursuant to law, a report on price trends and relationships for forest products, dated May 15, 1957 (with an accompanying report); to the Committee on Agriculture and Forestry.

AUTHORIZATION FOR CERTAIN TRANSPORTATION EXPENSES OF DEPENDENTS

A letter from the Secretary of the Air Force, transmitting a draft of proposed legislation to authorize, in case of the death of a member of the uniformed services, certain transportation expenses for his dependents (with an accompanying paper); to the Committee on Armed Services.

PROPOSED TRAVEL AND TRANSPORTATION ALLOWANCES FOR CERTAIN MEMBERS OF UNIFORMED SERVICES

A letter from the Secretary of the Air Force, transmitting a draft of proposed legislation to authorize travel and transportation allowances in the case of certain members of the uniformed services (with an accompanying paper); to the Committee on Armed Services.

AMENDMENT OF TITLE 10, UNITED STATES CODE, RELATING TO SETTLEMENT OF CERTAIN CLAIMS

A letter from the Secretary of the Air Force, transmitting a draft of proposed legislation to amend title 10, United States Code, to authorize the Secretaries of the military departments to settle certain claims in the amount of $5,000, or less, and to partially pay certain claims which are certified to Congress (with an accompanying paper); to the Committee on Armed Services.

PROPOSED AMENDMENT OF CAREER COMPENSATION ACT OF 1949, RELATING TO INCENTIVE PAY FOR HUMAN TEST SUBJECTS

A letter from the Secretary of the Air Force, transmitting a draft of proposed legislation to amend the Career Compensation Act of 1949 to provide incentive pay for human test subjects (with an accompanying paper); to the Committee on Armed Services.

REPORT OF NAVY CLUB OF THE UNITED STATES

A letter from the Secretary to National Shipswriter, Navy Club of the United States of America, Rockford, Ill., transmitting, pursuant to law, a report of that club, dated April 30, 1957 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

A letter from the Secretary, Department of Health, Education, and Welfare, transmitting, pursuant to law, a report of that Department, for the fiscal year 1956 (with an accompanying report); to the Committee on Labor and Public Welfare.

PROPOSED PARTICIPATION OF THE UNITED STATES IN INTERNATIONAL ATOMIC ENERGY AGENCY

A letter from the Secretary of State, transmitting a draft of proposed legislation to provide for the appointment of representatives of the United States in the organs of the International Atomic Energy Agency, and to make other provisions with respect to the participation of the United States in that Agency, and for other purposes (with an accompanying paper); to the Joint Committee on Atomic Energy.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A resolution of the Legislature of the State of Nebraska; to the Committee on Labor and Public Welfare:

"Legislative Resolution 31

"Whereas in recent years, through the efforts of certain national groups, there has developed a strong movement to have the Federal Government step into or invade the education field, particularly in the area of school construction, on the pretext that the State and local authorities are unable to cope with the school problem, whereas the real reason therefore is to force more money for school construction by communities which do not feel the need for such construction; and

"Whereas any such movement is objectionable upon several grounds among which are:

"(a) Federal financing eventually means Federal control and supervision;

"(b) No State has demonstrated or claimed its inability to meet its school building responsibility;

"(c) Federal aid does not lessen the cost of construction but adds a further cost of administration to the school construction program;

"Whereas the Education Committee of the Commission on Intergovernmental Relations has said:

"1. The American people have built up, over the last century and a half, the greatest school system in the world under State and local responsibility.

"2. Federal aid is not necessary either for current operating expenses for public schools or for capital expenditures for school facilities (buildings and classrooms): Now, therefore, be it

"*Resolved by the members of the Nebraska Legislature in 68th session assembled*, 1. That the Congress of the United States be, and it is hereby memorialized to reject any and all efforts to obtain passage of any additional legislation by the terms of which money would be appropriated and made available to the States through grants-in-aid or otherwise for construction of schools and that the matter of school construction continue to be a responsibility of the several States and individual school districts thereof.

"2. That a copy of this resolution be sent to the President of the Senate and the Speaker of the House of Representatives of the United States, and to each of the United States Senators and Representatives from Nebraska.

"DWIGHT W. BURNEY,
"*President of the Legislature.*

"I, Hugo F. Srb, hereby certify that the above is a true and correct copy of Legislative Resolution 31, which was passed by the

Legislature of Nebraska in 68th regular session on the 24th day of May 1957.

"HUGO F. SRB,
"Clerk of the Legislature."

By Mr. CURTIS:

A resolution of the Legislature of the State of Nebraska; to the Committee on Labor and Public Welfare:

"Legislative Resolution 27

"Whereas secondary boycotts are used by the officials of labor unions to bring economic pressure upon neutral employers or employees to compel workmen to join labor organizations, to force union members to switch their union affiliation, and to win collective bargaining contract demands; and

"Whereas organizational or 'racket picketing' is a technique used by some labor union officials to bring economic pressure upon an employer to make him force union membership on his employees; and

"Whereas secondary boycotts and racket picketing interfere with and disrupt the right of free collective bargaining and voluntary union membership guaranteed in section 7 of the Labor-Management Relations Act; and

"Whereas the 'hot cargo' clause in contracts of unionized carriers avoids the responsibility of these carriers in rendering adequate service to the general public; and

"Whereas the use of the secondary boycott by the teamsters union gravely affects the welfare of numerous Nebraska communities; and

"Whereas there is now pending in the Senate of the United States, S. 76, introduced by CARL T. CURTIS, of Nebraska, a bill to make illegal all forms of the secondary boycott and to outlaw racket picketing: Now, therefore, be it

"Resolved by the members of the Nebraska Legislature in 68th session assembled, 1. That the legislature respectfully memorializes the Congress of the United States to amend the Labor-Management Relations Act to end completely these types of unfair labor practices.

"2. That authenticated copies of this memorial be transmitted to the President of the Senate and the Speaker of the House of Representatives of the United States, to each of the United States Senators and Representatives from Nebraska, and to the Secretary of Labor of the United States in Washington, D. C.

"DWIGHT W. BURNEY,
"President of the Legislature.

"I, Hugo F. Srb, hereby certify that the above is a true and correct copy of Legislative Resolution 27, which was passed by the Legislature of Nebraska in 68th regular session on the 22d day of May 1957.

"HUGO F. SRB,
"Clerk of the Legislature."

LETTER FROM WISCONSIN FEDERATION OF BUSINESS AND PROFESSIONAL WOMEN'S CLUBS

Mr. WILEY. Mr. President, I was pleased to receive this morning a letter from the State legislative chairman of the Wisconsin Federation of Business and Professional Women's Clubs, Mrs. Erna Romanik, of Milwaukee, expressing the deep conviction of that fine organization on behalf of the continuation of the Nation's program of mutual security and of economic and technical assistance by ourselves and through the United Nations.

I commend the letter to the attention of my colleagues. I ask unanimous consent that the letter be printed in the RECORD, to be preceded by a list of the able officers of the federation.

There being no objection, the letter, together with the list of officers, was ordered to be printed in the RECORD, as follows:

THE WISCONSIN FEDERATION OF
BUSINESS AND PROFESSIONAL
WOMEN'S CLUBS, INC.,
Milwaukee, Wis., May 25, 1957.

The Honorable ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: Our Wisconsin Federation of Business and Professional Women's Clubs, Inc., has, as part of its legislative platform, support of legislation within the framework of the United States Constitution to implement a foreign policy which promotes peace and national security.

Our platform promises to advance international economic development through technical assistance. As our Member in Congress and as a member of the Senate Foreign Relations Committee we are asking you to support the mutual security program. We also urge that the arbitrary ceiling of 33.3 percent on United States contributions to the United Nations technical assistance program be lifted.

Along with our National Federation, and other groups, which have surveyed the problem of foreign-aid assistance, we suggest that:

1. Programs should be based on an understanding of the problems of other peoples, and a continuing concern for their economic development.

2. Programs of technical and economic aid should be planned and administered according to the economic and social needs and opportunities. A long-term basis is needed in financing, programing, and administering aid programs.

3. A greater emphasis should be placed on the use of international agencies, such as regional organizations and the United Nations.

We urge your serious consideration and support of the Mutual Security Program as requested by President Eisenhower.

Sincerely,

MRS. ERMA ROMANIK,
State Legislation Chairman.

RESOLUTION OF HARTFORD, WIS., AMERICAN LEGION POST

Mr. WILEY. Mr. President, tomorrow will be Memorial Day. Tomorrow especially, therefore, is an appropriate occasion on which to remember those who have saved this Nation on the field of battle, although they should be remembered every day.

Unfortunately, all too often this country has tended to forget the price which America has paid for victory. It is a price reflected in the rows upon rows of white crosses in our military cemeteries. It is a price reflected in the wards of our veterans' hospitals, filled with the combat wounded of America's conflicts.

Regrettably, it is not very long after the guns have ceased firing that the images of sacrifices, the memories of mutilated bodies and minds, have tended to disappear.

We may see signs about us, the canes of the crippled, the crutches, the wheelchairs, the seeing-eye dogs of the blind, and other symbols of the tragedy of war, but too often too many Americans fail to realize that this is only a part of the price of victory.

Naturally, the organizations of America's ex-servicemen are deeply interested in making sure that this country does not forget—that on Memorial Day and on other days we remember.

I present a resolution which I have received from the John E. Courtney Post, No. 19, of the American Legion of Hartford, Wis., as conveyed by George A. Kolb. The resolution addresses itself to the problems posed by the Commission which had been headed by Gen. Omar Bradley, and which had been intended to make a study of America's program for its veterans.

I believe the resolution of this Legion post deserves the most serious consideration, as do similar expressions which I have heretofore submitted, and which I shall continue to bring to the attention of my colleagues.

America wants sound and efficient veterans' programs. It does not, however, want to be remiss in its obligations to those without whom the Stars and Stripes would not be flying tomorrow or any other day of the year above this fair land.

I ask unanimous consent that the resolution be printed in the RECORD, and thereafter appropriately referred.

There being no objection, the resolution was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Whereas there is presently before Congress the consideration of the Bradley Commission report; and

Whereas it has been the consistent policy of the people of the United States and its Representatives in Congress to adequately care for the veterans of the wars in which the United States has engaged, and the Bradley Commission in its report has recommended economy actions against the veterans of the United States and more directly against those who have suffered a wartime injury or disease incurred in line of duty; the more drastic provisions in this report being as follows:

1. Revise the VA's disability rating schedule with loss of earning power as the primary factor in determining the rating of disabled veterans. (In other words, if you have a steady job, no disability payments.)

2. Eliminate statutory awards to blind, limbless veterans and those with tuberculosis. (Special awards for loss of limb, eye, would be eliminated.)

3. Eliminate the presumptive service connections for certain diseases that appear after military service. (This means service connection will not be granted for conditions showing up within 1 year after service, such as heart disease, arthritis, etc.)

4. Grant non-service-connected pension only when aged or needy veterans do not qualify under social-security programs.

5. Limit non-service-connected pensions to widows who have children or who cannot themselves work; and

Whereas there has never been a policy established in the history of the United States for tax economy to be practiced against the veterans who earned a compensation while fighting in defense of his country: Now, therefore, be it

Resolved, That we, the members of the John E. Courtney Post No. 19 of the city of Hartford, Washington County, State of Wisconsin, are in complete opposition to the Bradley report and everything therein contained regarding the reduction or elimination of any veterans' benefits now in effect.

Jack Wirth, Lovell J. Martin, Blake F. Abbott, James J. Kolb, Norbert Schillinger, George A. Kolb, Fred Hesprech, H. O. Johnson, C. E. Nodolf, Walter Parent, Floyd Hughes, Norbert Breitkrentz, Harley J. Lichtenwalmer, William H. Uebele, Harry U. Onuden.

PANAMA CANAL: AN ENGINEER'S ANALYSIS OF THE SEA-LEVEL PROJECT

Mr. MARTIN of Iowa. Mr. President, in a statement to the Senate in the RECORD of April 16, 1957, I included letters from a number of experienced engineers and others associated in the construction of the Panama Canal. One of these was from George M. Wells, a distinguished graduate of the construction era, who, after leaving canal service in 1916, rose to high position in the engineering, construction, and industrial fields of the Nation.

Mr. Wells' canal career started in 1904. Thus, he observed the project throughout its entire planning and construction stages and helped to launch it into the era of permanent operation. Possessing a remarkably keen mind and habit of thorough investigation, he obtained an extensive knowledge of basic engineering-geological problems of the Panama Canal. Subsequently he followed closely important post-construction-era developments affecting the canal and thus kept his knowledge up to date.

During the past decade I often consulted with Mr. Wells concerning canal questions and gained a high respect for his ability, knowledge, and vision, especially as concerned the problem of modernizing the Panama Canal. It is with deep regret that I learned of his sudden death on May 3, 1957.

Fortunately, the essential points of his views on canal matters have been incorporated in various statements by me to both the House and Senate and in correspondence.

Through the courtesy of William R. McCann, of Hopewell, Va., a lifelong friend of Mr. Wells, I have just received a copy of one of his most illuminating letters of March 12, 1948, forwarded by him to Mr. McCann on February 18, 1957. As described by Mr. Wells, it is a "semi-engineering analysis" of the sea-level project and bears directly on section A of the letter of Gen. W. H. Rose, published in my statement to the Senate on April 16, 1957, page 5735 of the RECORD, which, together with Mr. Wells' letter, merits careful study.

Because of the extremely useful information that it contains relative to current canal discussions, I present for appropriate reference and ask unanimous consent to have printed at this point in the RECORD pertinent excerpts of the indicated 1948 letter of Mr. Wells.

There being no objection, the indicated excerpts of Mr. Wells' letter of 1948 were referred to the Committee on Interstate and Foreign Commerce and ordered to be printed in the RECORD, as follows:

MARCH 12, 1948.

I have given some thought to your suggestion or request that I might write at this time * * * an analysis or criticism of the proposed sea level project from the engineering standpoint.

Again, I have read carefully the official digest of Governor Mehaffey's report. There is little more, if any, of engineering disclosure than has appeared in the press. No basic or essential engineering data is given. The plates or the outlines of the proposed structures are limited to one dimension. If any project ever involved four dimensional problems, length, breadth, thickness, and time (sequence) in its engineering phases, this sea level dream does. To attempt to discuss such problems without the data, at least the more important data, available would be to write in most general terms and on many assumptions, that might not be involved in the recommended project.

I do find, however, for the first time that the report definitely proposes conversion to sea level from the existing Gatun Lake level and not by successive stages of lower levels, as the excavation progresses. This means subaqueous excavation to depths of over 150 feet. It means great earth work and rock flood controlling structures to be built in depths of water around 75 to 80 feet subsequently to be unwatered on the canal side. The plan as shown on plate 11 of the digest is so general and sketchy in form that I have difficulty in recognizing locations. This, notwithstanding, I personally directed in the field most all the detailed surveys of the territory involved lying north, east, and west of Gamboa, with the exception of the Caño and Frijoles Basins.

I also note on page 9 of the digest, last paragraph, the formal statement to the effect that the science of soil engineering has progressed so greatly in the years since we built the present canal that now the authorities on the canal can compute and establish the angles of permanently stable slopes in advance and thereby eliminate the slide specter, that otherwise would be unavoidable in the sea level project. This statement is startling in that, first, it gives a measure of the kind of thinking that to a great extent must be behind the engineering designs involved, and second, it seems to me deliberately intended to try to answer in advance the anticipated criticisms of the sea level project by those who are most competent to do so as a result of their years of experience on the original canal construction. Also the report infers or actually states that soil engineering as now understood would have saved millions of yards of unnecessary excavation in the period 1906–16.

As I was involved in many problems of so-called soil engineering not only on the canal and subsequently in the United States in many important engineering structures, I would like to discuss this phase of the digest.

The question here is one of soil mechanics. This divides into theoretical and applied soil mechanics and I believe it can be shown that all or practically all the basic principles or ideas in this field have been known and practiced by the profession for more than three-quarters of a century. During the past 25 years there has been a compilation of known data and theoretical analysis of the behavior of soils under different conditions of loading and stress, brought together in many leading works of recognized professors specializing in this field. Among such writers may be listed Terzaghi, Westergaard, Krynine, Casagrande, and many others.

The mechanics of soils as theoretically presented by such writers is a beautiful example of mathematical analyses, based on known principles, supplemented by extensive laboratory tests and research. These men and others have carried further afield into the realm of mathematics the basic theoretical principles first annunciated by the Frenchman Coulomb in the latter part of the 18th century and later by Rankine in 1856. These principles were in 1904–16, as they are today, the basis from which engineers work in dealing with the active and passive pressures of soils. In the application to a structural design they are empirical. In practice, stresses in earth masses are estimated based on experience. They are not computed through mathematical analyses of theoretical soil mechanics, which assume either (a) elastic isotropic and homogeneous soil, or (b) a homogeneous fragmented soil. In other words, to apply these equations of determination to Culebra formations, if you will, you must assume (as in (a) above) the soil structure to have the same physical properties in all directions at all times, and must have the same composition of particles throughout, or you must have (as in (b) above) a fragmented or granular mass having cohesion in its particles of uniform magnitude throughout.

Aside from all consideration of the above, we are primarily concerned at Panama with disturbing the present stable equilibrium of deep, geological strata, extending from Gatun to Miraflores, varying constantly in its geological and intimate soil characteristics, and in horizons of strata having primary and secondary faults and marked folding. To imagine the application of theoretical mathematical exercises to predict the angles of slopes of repose, at varying depths of such strata as cut away first and then drained from +87 feet mean sea level to zero is not even academic; it is absurd.

As we lately have often heard said, "Let's look at the record." If theoretical soil mechanics, or the late development of soil engineering has an ideal field for application, it lies in the determination of slopes and the controls of soil classifications in building great earth dams in the dry, or with dry and hydraulically classified materials. Yet what happened during the construction of the Fort Peck Dam on the Missouri River? What about San Gabriel Dam No. 2? What about the failure of Belle Fourche Dam in South Dakota? Also the Alexander Dam failure in the Hawaiian Islands?

All these dams, except the Belle Fourche Dam failed by sliding during construction. In the case of the great Fort Peck Dam, over 5 million cubic yards moved suddenly toward the reservoir and at such a rapid rate that lives were lost and the whole movement was over in 10 minutes. What happened? The shale and bentonite foundation sheared. Here we had as nearly homogeneous material to deal with as would normally be found; we had all the best engineering brains brought to bear on the design and yet the dam slopes slid out. We had rotation, in other words, and then horizontal movement. Yet this was in 1938, 32 to 22 years after our work at Panama was completed and after the development of the advances in soil mechanics referred to in the digest on the sea-level project.

And now the Belle Fourche failure. This was a case of a rapid drawdown of the water level during an extreme dry season. About 600 feet of the upstream slope, slumped and slid into the reservoir.

Such examples of the relatively present period where soil mechanics or engineering progress in the so-called new art or science did not prevent grave failures, should be sufficient answer to the claims on page 9 of the digest. It is not hard to understand why engineers of experience with canal conditions are aghast at the academic or seemingly impractical proposals recommended in the sea-level project. If failures of almost ideal structures are not uncommon, as exampled above, what may we expect in the unpredictable and unprecedented conditions at Panama. If failure occurs in the main slopes between Gamboa and Paraiso, as they most surely will, even during construction, we must proceed as in the first canal days; that is, keep on digging until stability at +87 feet of water level is reached. But when unwatering from +87 feet to sea level begins, it is, in my opinion, beyond all doubt that great movements of strata will take place. In addition to these hazards we will have the condition of the Belle Fourche Dam failure, but multiplied many times in the great flood-control embankments. The certainty that great areas of the slopes next to the canal may move down with the lowering of the lake level, is hardly debatable.

This will be further induced by the unbalancing of the floor of the valley between the canal and embankments, due to taking the load of 87-foot depth of water off the floor of the lake.

In closing, I must repeat I still cannot believe that any committee of the Congress, if properly advised, can be induced to recommend a sea-level canal at Panama. The unnecessary waste of unknown billions of moneys, the certainty of temporarily losing the existing passageway between the oceans with prolonged interruption to commerce, and, finally, the futility of it all if ever completed, in comparison with the existing canal, just does not make sense, in my opinion.

Yours cordially,

GEO. M. WELLS,
Consulting Engineer, Formerly With Isthmian Canal Commission.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCLELLAN, from the Committee on Government Operations, without amendment:

S. 1791. A bill to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1959 (Rept. No. 386).

By Mr. McCLELLAN, from the Committee on Government Operations, with amendments:

S. 1941. A bill to authorize the payment by the Bureau of Public Roads of transportation and subsistence costs to temporary employees on direct Federal highway projects (Rept. No. 387).

By Mr. HUMPHREY, from the Committee on Government Operations, without amendment:

S. 1536. A bill to amend subsection 507 (a) of the Federal Property and Administrative Services Act of 1949, as amended (Rept. No. 388).

By Mr. HUMPHREY, from the Committee on Government Operations, with an amendment:

S. 434. A bill to provide for improved methods of stating budget estimates and estimates for deficiency and supplemental appropriations (Rept. No. 394).

(See the remarks of Mr. HUMPHREY when he reported the above bill, which appear under a separate heading.)

By Mr. CAPEHART, from the Committee on Government Operations, with amendments:

S. 806. A bill to authorize the Administrator of General Services to quitclaim all interest of the United States in and to certain lands located in Indiana to the State of Indiana and to the board of trustees for the Vincennes University, Vincennes, Ind. (Rept. No. 389).

By Mr. TALMADGE, from the Committee on Rules and Administration, without amendment:

H. R. 790. An act to amend the Legislative Appropriation Act, 1955, with reference to official office expenses of Members of Congress (Rept. No. 392);

H. R. 7234. An act to fix the responsibilities of certifying officers and disbursing officer of the Library of Congress (Rept. No. 393);

S. Con. Res. 30. Concurrent resolution to print a compilation of studies and reports on the foreign-aid program (Rept. No. 390);

S. Res. 139. Resolution to print additional hearings on S. 963, control of advertising on interstate highways; and

S. Res. 140. Resolution authorizing the printing of additional copies of Senate Report No. 130, 85th Congress, 1st session, entitled "Juvenile Delinquency" (Rept. No. 391).

REPORTS ON DISPOSITION OF EXECUTIVE PAPERS

Mr. JOHNSTON of South Carolina, from the Joint Select Committee on the Disposition of Executive Papers, to which were referred for examination and recommendation two lists of records transmitted to the Senate by the Archivist of the United States that appeared to have no permanent value or historical interest, submitted reports thereon, pursuant to law.

IMPROVED METHODS OF STATING APPROPRIATION ESTIMATES—REPORT OF A COMMITTEE

Mr. HUMPHREY. Mr. President, from the Committee on Government Operations, I report favorably, with an amendment, the bill (S. 434) to provide for improved methods of stating budget estimates and estimates for deficiency and supplemental appropriations, and I submit a report (No. 394) thereon. The bill was introduced by the Senator from Massachusetts [Mr. KENNEDY] (for himself, Mr. PAYNE, Mr. BYRD, Mr. BRIDGES, Mr. McCLELLAN, Mr. JACKSON, Mr. SYMINGTON, Mr. HUMPHREY, Mr. THURMOND, Mr. McCARTHY, Mr. MUNDT, Mrs. SMITH of Maine, Mr. COTTON, Mr. MARTIN of Iowa, Mr. ALLOTT, Mr. ANDERSON, Mr. BARRETT, Mr. BEALL, Mr. BENNETT, Mr. BIBLE, Mr. BUSH, Mr. BUTLER, Mr. CAPEHART, Mr. CARLSON, Mr. CASE of New Jersey, Mr. CASE of South Dakota, Mr. CHAVEZ, Mr. CURTIS, Mr. DIRKSEN, Mr. FLANDERS, Mr. GREEN, Mr. HOLLAND, Mr. HRUSKA, Mr. IVES, Mr. LAUSCHE, Mr. MAGNUSON, Mr. MARTIN of Pennsylvania, Mr. MONRONEY, Mr. MORTON, Mr. POTTER, Mr. PURTELL, Mr. ROBERTSON, Mr. SALTONSTALL, Mr. SMITH of New Jersey, Mr. SPARKMAN, Mr. TALMADGE, Mr. THYE, Mr. WATKINS, Mr. WILLIAMS, and Mr. CARROLL).

This bill authorizes the President to convert the appropriation estimates of the executive agencies of the Government to an annual accrued expenditure basis wherever such a transformation in the budgetary process is conducive to better fiscal control, improved financial management and economy in Government operations.

I invite the Senate's attention to the fact that the President on four separate occasions has requested this authority. In his last statement, a letter to the Speaker of the House of Representatives, April 18, 1957, on holding Federal expenditures to a minimum, he specifically urged the Congress to "enact bills approved by the administration to implement Hoover Commission recommendations, such as the authorization of appropriations on the basis of annual accrued expenditures."

In addition, at hearings held by the Subcommittee on Reorganization of the Committee on Government Operations, the Secretary of the Treasury, the Director of the Bureau of the Budget, and the Comptroller General of the United States strongly recommended the enactment of this legislation as a means of, first, improving financial management within the executive branch; and second, strengthening the Congress' control over expenditures by the executive agencies.

As noted, the bill directly implements the Hoover Commission's recommendations for improved fiscal control.

In stating budget estimates on an annual accrued expenditure basis, the executive agencies would present their estimates for the fiscal year on the basis of expenditures actually to be made or to be accrued that fiscal year only—and not for expenditures to be made in subsequent fiscal years, as frequently occurs under the present appropriations system.

It is fully recognized by the committee that if appropriations for long lead-time programs, such as the building of an aircraft carrier, are converted to the annual accrued expenditure basis, authority must be provided in the dollar amount required for forwarding contracting beyond the current budget year in which the program is started. The committee amendment, therefore, authorizes the Appropriations Committees to grant contract authority to the executive agencies where necessary for the forward planning of long lead-time programs.

It is also recognized that a change of this magnitude in appropriations procedures should not be approached on a governmentwide basis, but on the basis of individual appropriations where such a transformation is warranted by the budgetary situation in each Federal agency. The President, therefore, is given the broadest discretion as to implementation of the authority granted by this bill.

The Senate endorsed this proposal last year when, on June 20, 1956, it unanimously approved S. 3897, which contained the identical objectives of the present bill, S. 434, together with other improvements in the Government's financial operations. However, the section relating to budget estimates was stricken by the House of Representatives when it acted on S. 3897.

In conclusion, I should like to emphasize that this bill not only has the endorsement of the highest financial officers of the Government, but also that of the foremost economists of the Nation who recommend its enactment into law. I urge its early consideration by the Senate.

This is a bill which is introduced by our illustrious and esteemed colleague, the Senator from Massachusetts [Mr. KENNEDY]. It is a bill which is an administration proposal, and a bill which is supported by the junior Senator from Minnesota, all the members of his subcommittee, and of the full committee. I ask that the bill be printed and that the report be printed, and that the bill be placed on the calendar.

The VICE PRESIDENT. The report will be received, and the bill will be placed on the calendar.

PRINTING OF ADDITIONAL COPIES OF "REPORT ON THE DEVELOPMENT OF SCIENTIFIC, ENGINEERING, AND OTHER PROFESSIONAL MANPOWER"—REPORT OF A COMMITTEE

Mr. HUMPHREY. Mr. President, from the Committee on Government

Operations I report an original resolution and ask for its immediate consideration.

This resolution would authorize the printing of 7,000 additional copies of a report entitled "Report on the Development of Scientific, Engineering, and Other Professional Manpower." The report was prepared by the Legislative Reference Service of the Library of Congress, under the direction of Dr. Charles A. Quattlebaum, specialist in education, at the request of three subcommittees of the Senate and the House and other Members of Congress.

The adoption of the resolution is necessary because the Joint Committee on Atomic Energy and the House Committee on Education and Labor have already utilized most of the funds available to the Joint Committee on Printing for the printing of copies required for the use of those committees. My own interest in this problem is one of long standing. From my own background work on the subject, I know the report will elicit a large nationwide demand. As chairman of the Subcommittee on Reorganization, I therefore requested the chairman of the Committee on Government Operations to submit the subject resolution to the members of the committee for their approval. Upon the poll of the committee, at the direction of the chairman, there has been unanimous approval of the resolution.

The urgency in requesting immediate consideration is due to the fact that the printing of the report, which is now in page form, has been held up in order that the 7,000 additional copies authorized by the resolution might be printed simultaneously with the other copies to be furnished to the other participating committees.

The cost of the additional copies authorized by the resolution is within the $1,200 limitation required under the Senate rules, and it will not therefore be necessary to have the concurrence of the House of Representatives.

Mr. President, the resolution is self-explanatory. As I indicated earlier, the resolution has been cleared with the Committee on Rules and Administration, with the majority leader, and the minority leader, and with both Republican and Democratic ranking members of the committee. It has the unanimous approval of the committee.

The VICE PRESIDENT. The resolution will be read for the information of the Senate.

The resolution (S. Res. 142) was read, as follows:

Resolved, That there be printed 7,000 additional copies of the report entitled "Report on the Development of Scientific, Engineering, and Other Professional Manpower," prepared by the Legislative Reference Service of the Library of Congress. Such additional copies shall be for the use of the Senate Committee on Government Operations.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered, and agreed to.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HILL:

S. 2173. A bill to promote safety in transportation by motor vehicle in interstate commerce by assisting the States to establish programs for driver education; to the Committee on Labor and Public Welfare.

By Mr. SMITH of New Jersey:

S. 2174. A bill for the relief of Miklos Gervay; to the Committee on the Judiciary.

By Mr. IVES:

S. 2175. A bill to provide for the registration and reporting of employee welfare and pension benefit plans, and for other purposes; to the Committee on Labor and Public Welfare.

By Mr. RUSSELL:

S. 2176. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a certificate and domestic parity plan for upland cotton, to enable the American cotton farmers to farm and secure a fair return from the users of their products for their labor and investment, to preserve the historical relationship of cotton and competing fibers in domestic markets in the interest of the general welfare, and for other purposes; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. RUSSELL when he introduced the above bill, which appear under a separate heading.)

By Mr. McCLELLAN (by request):

S. 2177. A bill to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes; to the Committee on Government Operations.

(See the remarks of Mr. McCLELLAN when he introduced the above bill, which appear under a separate heading.)

By Mr. BEALL:

S. 2178. A bill for the relief of Mihail Zanakis; to the Committee on the Judiciary.

By Mr. YOUNG:

S. 2179. A bill to amend the Soil Bank Act so as to authorize the maintenance of wetlands in the conservation reserve program; to the Committee on Agriculture and Forestry.

By Mr. WATKINS:

S. 2180. A bill for the relief of Jean Joseph Cypers; to the Committee on the Judiciary.

By Mr. GOLDWATER:

S. 2181. A bill for the relief of Theodore Tanaka Smith; to the Committee on the Judiciary.

By Mr. DIRKSEN:

S. 2182. A bill for the relief of George E. Kitriniari and Demetroula E. Kitriniari; to the Committee on the Judiciary.

By Mr. MURRAY:

S. 2183. A bill to amend the act of August 2, 1956 (70 Stat. 940), providing for the establishment of the Virgin Islands National Park, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HUMPHREY:

S. 2184. A bill to amend the Small Business Act of 1953 to direct the Small Business Administration to make extensive, comprehensive, and continuing studies of certain problems of small business and to file semiannual reports on the results of such studies; and

S. 2185. A bill to amend the Small Business Act of 1953 to authorize the Small Business Administration to make loans to local private nonprofit organizations formed to assist, develop, and expand the economy of the area; to the Committee on Banking and Currency.

(See the remarks of Mr. HUMPHREY when he introduced the above bills, which appear under a separate heading.)

By Mr. DOUGLAS:

S. 2186. A bill for the relief of Martin Albert; and

S. 2187. A bill for the relief of Josef Winter; to the Committee on the Judiciary.

By Mr. IVES:

S. 2188. A bill for the relief of George Pierre Saviolidis, Ethel Saviolidis, his wife; and William Saviolidis, his son; to the Committee on the Judiciary.

RESOLUTION—PRINTING OF ADDITIONAL COPIES OF REPORT ON THE DEVELOPMENT OF SCIENTIFIC, ENGINEERING, AND OTHER PROFESSIONAL MANPOWER

Mr. HUMPHREY, from the Committee on Government Operations, reported an original resolution (S. Res. 142) to print additional copies of the "Report on the Development of Scientific, Engineering, and other Professional Manpower," which was considered and agreed to.

(See resolution printed in full where it appears under the heading "Reports of Committees.")

A NEW FARM PROGRAM FOR COTTON

Mr. RUSSELL. Mr. President, I introduce a bill for appropriate reference.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2176) to amend the Agricultural Adjustment Act of 1938, as amended, to establish a certificate and domestic parity plan for upland cotton, to enable the American cotton farmers to farm and secure a fair return from the users of their products for their labor and investment, to preserve the historical relationship of cotton and competing fibers in domestic markets in the interest of the general welfare, and for other purposes, introduced by Mr. RUSSELL, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. RUSSELL. Mr. President, this bill undertakes to establish a new farm program for cotton. I shall not at this time go into a detailed discussion of the provisions of the bill. A similar bill will be introduced in the other body today by Representative WHITTEN, of Mississippi.

I should like to make one brief observation. We have tried plan after plan to deal with the most acute situation which affects any segment of American life, namely, the situation affecting the farming interests of this Nation.

The farmer is still in a very unenviable position when compared with other segments of American life, which enjoy great benefits and a high standard of living.

I have watched farm programs come and go. We have tried plan after plan for dealing with this problem. I am convinced that we shall never be able satisfactorily to solve the farm problem merely by means of payments from the Treasury of the United States, or by adopting programs which lead to large disbursements from the Treasury because of losses which are incurred in their operation.

We have already experienced a revulsion of opposition to such large expendi-

tures from the Treasury. It was reflected in the vote taken in the other body within recent weeks, dealing with the soil bank program, which was our most recent effort. Any program which depends upon large payments from the Treasury will encounter opposition in varying degree from year to year, and cannot be considered a stable program.

The bill which I am introducing is somewhat similar to one which I urged upon the Senate when we last considered a general agricultural bill. It would adopt a two-price system of certification, which would assure the farmer full parity of income on the cotton which is used domestically within the United States.

It would do away with all acreage allotments and all payments from the National Treasury, and would adopt a program which would allow the farmer to exist without being compelled to come to the United States Treasury every year like a mendicant, with his cup in his hand, to secure large appropriations.

I am certain that a similar program could be applied to our other great export commodity, wheat. I do not undertake to deal with it in this bill, deferring to the initiative of Senators representing the great wheat growing States. They proposed and procured adoption in the Senate of a similar program with respect to wheat when the general agricultural bill was pending last year.

I ask unanimous consent that there be printed in the RECORD at this point as a part of my remarks a statement relating to the bill and a brief outline of its general provisions.

There being no objection, the statement and outline were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR RICHARD B. RUSSELL, OF GEORGIA, AND CONGRESSMAN JAMIE L. WHITTEN, OF MISSISSIPPI, CHAIRMEN, RESPECTIVELY, OF AGRICULTURAL APPROPRIATIONS SUBCOMMITTEES OF THE SENATE AND HOUSE

We are introducing the attached bill, which would establish a new farm program for cotton. We have attempted to recognize and meet on a fair basis existing problems of the cotton farmer, though of course there is no perfect answer to the farm problem. In preparing this measure, we have had the full cooperation of the Office of the General Counsel of the Department of Agriculture.

To determine the relative merits of this measure, which would require no financing from the Treasury, it should be compared with:

Existing law, with its acreage controls—which have proven self-defeating—with the production of basic commodities flowing into and out of the Commodity Credit Corporation, the Government paying the difference between the domestic support price and that at which such commodities are sold in world trade; and

The Brannon-Benson plan for compensatory payments where the difference between farm income and a fair income would be paid direct from the Federal Treasury.

We would point out that this Brannan-Benson approach has one significant defect. It would make the farmer dependent for part of his cost and all his profit on annual direct appropriations of the Congress. The level of the farmer's income would then be subject to the strong economic and political pressures which develop from year to year. For the farmer to rely upon any such program would be exceedingly risky, since 87 percent of the American people, whom the Congress represents, are nonfarmers.

The principle of protecting a farm program, deemed essential to the general welfare, from being destroyed by competition which might take advantage of the farm law itself, as provided in this bill, is the same as that which supports section 22 of the Agricultural Adjustment Act, which authorizes the President to prevent the destruction of farm programs by foreign competition by imposing a tariff or even an embargo.

To meet the problem of preventing advantage to either cotton or synthetics, the greater part of which are made from farm products, from the operations of such law, the Secretary should exercise discretion similar to that he exercised in past years in providing price-support levels for soybeans and cottonseed.

One major improvement contained in this bill is that the price would be the world price, and the support price provided in this bill would be the world price plus that added to offset American costs. This would leave no basis at all for complaints at United States production moving in world trade competitively.

This measure is being offered as a possible solution, so that it may have the consideration of the Congress and interested farmers and farm groups. We had hoped to prepare bills providing the same approach for other commodities; but time has not permitted us to do that. However, such approach could be expanded to include other commodities.

GENERAL PROVISIONS OF BILL ON COTTON, INTRODUCED BY SENATOR RUSSELL, OF GEORGIA, AND CONGRESSMAN WHITTEN, OF MISSISSIPPI

1. Acreage allotments would be eliminated and no restrictions would be placed on the number of acres which could be planted.

2. Cotton would move from the farm through the channels of the trade in this country at world prices. By means of a certificate system, farmers would receive an additional amount on their share of the domestic consumption to offset the high cost of producing American cotton.

3. The domestic quota would be established and distributed to States, counties, and farms, based on the 5-year average production, 1952–57. Adjustments are provided for abnormal weather conditions and for minimum farm quotas for farms having 4 acres or less.

4. Certificates representing each farm's share of the domestic quota would be issued to the persons sharing in the cotton produced on each farm. Manufacturers of synthetics similar to cotton would purchase certificates from CCC.

5. The certificates would be used to identify cotton coming within the domestic quota, as well as synthetic materials similar to cotton.

6. Domestic processors or manufacturers would be required to purchase certificates for all cottons and synthetics similar to cotton equal to the quantity of the raw cotton or synthetic used. A system of rebates for textile exports is provided for.

7. Imported textiles would have to be covered by certificates in the amount of raw cotton or synthetic equivalent in those products.

8. The value of the certificates would be equal to the difference between the world price and an amount to be determined by the Secretary of Agriculture, which would offset the higher cost of American production of cotton resulting from other laws, contracts, or regulations.

9. Price support on the domestic quota would be available through loans. The loan level would be the world price as determined by the Secretary of Agriculture, plus the amount added for the higher cost for American production.

10. Cotton acquired by CCC in price support operations would be offered for export sale at competitive world prices.

AMENDMENT OF FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949

Mr. McCLELLAN. Mr. President, I introduce, for appropriate reference, a bill to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes. This bill is introduced at the request of the Administrator of General Services as a part of the GSA's legislative program for 1957.

I ask unanimous consent to have printed in the RECORD at this point a copy of a letter addressed to the President of the Senate by the Administrator of General Services, together with a sectional analysis of the proposed legislation, which were referred to the Committee on Government Operations.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the letter and sectional analysis will be printed in the RECORD.

The bill (S. 2177) to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes, introduced by Mr. McCLELLAN (by request), was received, read twice by its title, and referred to the Committee on Government Operations.

The letter and sectional analysis are as follows:

GENERAL SERVICES ADMINISTRATION,
Washington, D. C., May 17, 1957.

Hon. RICHARD M. NIXON,
President of the Senate,
Washington, D. C.

MY DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation, "To amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes," together with a sectional analysis thereof.

This proposal is part of GSA's legislative program for 1957, and it is recommended that it be enacted by the Senate. It would amend the Federal Property and Administrative Services Act of 1949, as amended, by: (1) Authorizing any Federal agency head to permit the destruction of any records under his control beyond the continental limits of the United States, when it appeared that the retention of such records would imperil the security or be prejudicial to the interests of the United States, under specified conditions; (2) authorizing any Federal agency head to permit the destruction of records under his control within the continental limits of the United States, when it appeared that their retention would imperil the security of the country because of the imminence of hostile action at the place where the records are located; and (3) requiring the submission of a written report to GSA of a summary of the records so destroyed.

This proposal would also amend the Contract Settlement Act of 1944, as amended, to permit the destruction of records of war contractors under present statutory provisions notwithstanding retention provisions contained in the individual contracts.

The enactment of this proposal would not involve the expenditure of Federal funds.

The Bureau of the Budget has advised that there is no objection to the submission of this proposed legislation to the Senate.

Sincerely yours,

FRANKLIN G. FLOETE,
Administrator.

SECTIONAL ANALYSIS

Subsection (a): Emergency destruction of records and reports thereof.

Subsection (a) of the draft bill would amend section 506 of the Federal Property and Administrative Services Act of 1949, as amended, by designating subsection (g) as subsection (h) and by adding a new subsection (g) as set forth in subsection (a) of this proposed legislation. Subsection (a) of this proposed bill is divided into three paragraphs. The first two set up in standards under which records may be destroyed (1) beyond, and (2) within, the continental limits of the United States. Paragraph (3) provides for making reports of such destruction.

Paragraph (g) (1) of this bill would authorize the head of any Federal agency to delegate authority to proper officials for the purpose of carrying out the functions set out in this proposed bill. Thus, the head of any agency could issue instructions to the senior official in charge of any Government activity beyond the continental limits of the United States to destroy any or all Government records under his control when it became necessary.

Such destruction could only take place because of the existence of a state of war or the imminence of hostile action at the place where the records are located. It is intended that hostile action connote not only action of an enemy or showing the disposition of an enemy, but also action manifesting ill will, unfriendliness, malevolence, or an antagonistic desire to injure.

It is believed that the language of this bill is adequate to permit the destruction of records in case of rebellion, an armed insurrection, a civil war, riots, or any other commotion which might threaten the security, safety, capture, or compromise of the records of the United States.

It will be observed that the right to destroy is not limited to classified records but includes any records which broadens the scope of the act and would permit the official in charge of such records the use of discretion in determining which records should be preserved or destroyed.

Paragraph (g) (2) of this proposed legislation would authorize the head of any Federal agency to delegate authority to the senior official in charge of records, located at any point within the continental limits of the United States, to destroy such records under conditions where it appeared that the retention of such records might imperil the security of the United States.

Your attention is invited to the fact that the imminence of hostile action must occur at the place where the records are located prior to such destruction. The word "hostile" is used in the same broad sense as described above.

Paragraph (g) (3) provides, that subsequent to the destruction of such records that a report will be made to the Administrator of General Services.

After considerable discussion of this point with various Government agencies, which would be affected by this legislation, it was determined that in the event of war the requirement for the submission of this report within 1 year might work a hardship on the reporting agency. Therefore, the time within which such report should be made was left open.

It is believed that these reports should not only be made to the head of the affected Federal agency but that there should be a central depository for such reports within the Government. Under the terms of the Federal Property and Administrative Services Act of 1949, as amended, it clearly appears that the Administrator of General Services is the proper person who should assume the responsibility of correlating such reports. It is not contemplated that these reports should be in minute detail as it is recognized that the reports would be made a considerable time after the destruction and that such destruction would occur under emergency conditions.

The Administrator of General Services would not be concerned or interested in the details of classified material from other agencies but would merely wish to preserve a record of the broad outlines of what was destroyed on a given date.

Provision is made in this subsection for the Administrator of General Services to issue regulations covering such reports. These regulations would be issued after consultation with affected agencies and with due regard to the program activities of the agencies concerned. It is believed that the issuance of broad overall regulations of GSA, which would permit the head of each Federal agency to issue specific regulations to their officials, would result in a more uniform documentation of the records which would be destroyed under the provisions of this amendment.

Subsection (b): Repeal of section 11 of an act entitled "An act to provide for the disposal of certain records of the United States Government," approved July 7, 1943 (57 Stat. 382, as amended, 44 U. S. C. 376).

Subsection (c): An amendment of the Contract Settlement Act of 1944, as amended.

Subsection (c) of the bill would amend section 19 (a) of the Contract Settlement Act of 1944, as amended, by authorizing the destruction of records of war contractors "notwithstanding any provisions included in the individual contracts or subcontracts regarding periods of retention of records." This amendment seeks to aid many war contractors who find themselves saddled with a tremendous number of war contracts which could be disposed of under existing law if it were not for the fact that such individual contracts contain provisions prohibiting their disposition for a certain number of years. It appears that these war contractors should be granted relief from this situation and permitted to dispose of these records under existing law.

An example of the hardship on war contractors may be illustrated by pointing out that one war contractor is now compelled to devote 78,000 cubic feet of space for the storage of war contracts which might be disposed of under existing law but which must be retained due to the fact that the contracts themselves include a provision requiring that the contracts be retained for a number of years in excess of the time required by existing laws.

AMENDMENT OF SMALL BUSINESS ACT OF 1953, AS AMENDED

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference, two bills to amend the Small Business Act of 1953, as amended. I wish to explain these proposals and my reasons for introducing them.

The first measure would direct the Small Business Administration to make studies on the broad and basic problems of small business, to issue detailed reports to the Congress twice a year as to the studies it has undertaken, and also to make comments and recommendations which it may deem appropriate.

There is nothing in the present act which forbids the SBA from making such studies, but the record clearly indicates that the Small Business Administration has not made significant strides in studying the basic problems of small business. The semiannual SBA reports and the various publications it has put out, while excellent so far as they go, do not get down to the basic issues and problems involved. This is perhaps understandable in view of the relatively short time that the CBA has been in existence. It has had to devote its major efforts to getting the more immediate and pressing operations under way. But I think that the time has come for the Small Business Administration to expand its program, to consider and study the long-range problems faced by small business, and to report to the Congress as to its findings, conclusions, and recommendations. If small business is to remain vigorous and healthy, specific thought and attention must be given to the problems it faces and solutions must be sought.

The second measure I am introducing today would authorize the SBA to make loans to private and nonprofit development groups which have been established in various parts of the country. Local industrial foundations and municipal and State development credit corporations are serving an excellent purpose in promoting business development and in particular assisting many small-business firms in their growth. The record of such development corporations to date attests to the fine job they are doing, even though such work has been rather limited in scope due to lack of funds.

It is my understanding that the Small Business Administration has, in a handful of cases, made loans to development corporations, but only when a specific small-business firm was to be the recipient of the funds lent by SBA to such development group. SBA has been necessarily limited in making these loans due to the language of the present Small Business Act.

I am in full accord with SBA's desire to assist these development groups. My bill would spell out in precise language the authority of the SBA to make loans to development corporations and thereby remove the roadblock which SBA faces in its present efforts to be of assistance in this important field.

Mr. President, I am happy to join with Representative FRANK COFFIN in introducing this legislation. His companion bills in the House of Representatives are H. R. 5651 and H. R. 5693.

Mr. President, I ask unanimous consent that the bills may be printed in the RECORD.

The VICE PRESIDENT. The bills will be received and appropriately referred; and, without objection, the bills will be printed in the RECORD.

The bills, introduced by Mr. HUMPHREY, were received, read twice by their titles, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

S. 2184. A bill to amend the Small Business Act of 1953 to direct the Small Business Administration to make extensive, comprehensive, and continuing studies of certain problems of small business and to file semiannual reports on the results of such studies; and

S. 2185. A bill to amend the Small Business Act of 1953 to authorize the Small Business Administration to make loans to local private nonprofit organizations formed to assist, develop, and expand the economy of the area.

The bills referred to are as follows:

S. 2184

A bill to amend the Small Business Act of 1953 to direct the Small Business Administration to make extensive, comprehensive, and continuing studies of certain problems of small business and to file semiannual reports on the results of such studies

Be it enacted, etc., That the Small Business Act of 1953, as amended, is hereby amended by adding the following new section:

"226. (a) The Administration is directed to make extensive, comprehensive, and continuing studies to accomplish the following aims: (1) To identify and define the principal problems which affect or may affect the growth, stability, and competitive strength of the small-business segment of the economy, (2) to identify both the strengths and weaknesses inherent in small-business concerns, (3) to identify the fields of endeavor in which small business is best equipped to compete and prosper, (4) to gather information which can be used by small business to improve its competitive strength and to expand its contribution to the national economy, and (5) such other objects as the Administrator may deem desirable in the interests of small business. In making such studies the Administration shall distinguish and give separate consideration to the problems of small-business concerns engaged in the manufacturing or distributive or service trades. The Administration also shall give consideration to, among others, the effect on such small-business concerns of inflation and deflation, availability of credit, availability of materials and supplies, cost factors, labor problems, management and personnel problems, the development of new manufacturing techniques and equipment, the development of new merchandising methods, research and development problems, automation, nationwide distribution, advertising, atomic development, foreign competition, Government regulation including the activities of regulatory agencies, taxes, and any other factors which may affect the competitive strength and growth of small business.

"(b) In making such studies the Administration is authorized and directed: (1) to utilize on a reimbursable basis the information, services, and facilities of any Government agency, and (2) to employ by contract private persons and organizations to conduct appropriate studies, perform research or direct programs determined by the Administration to be necessary and appropriate under subsection (a) of this section.

"(c) The Administration shall make a report on December 31 and June 30 of each year to the President, the President of the Senate, and the Speaker of the House of Representatives on the activities conducted by the Administration under this section. Such report shall include a description of studies undertaken by the Administration pursuant to this section, a detailed description of the results of such studies as they are available, a statement of future programs and studies planned by the Administration and such other information, comments, and recommendations as the Administrator may deem appropriate."

S. 2185

A bill to amend the Small Business Act of 1953 to authorize the Small Business Administration to make loans to local private nonprofit organizations formed to assist, develop, and expand the economy of the area

Be it enacted, etc., That section 207 of the Small Business Act of 1953, as amended, is hereby amended by adding the following new subsection:

"(c) The Administration is empowered to make loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis) to local private nonprofit organizations (including industrial foundations, development credit corporations, or similar groups) formed to assist, develop, and expand the economy of the area: *Provided, however,* That all such loans shall be of such sound value or so secured as reasonably to assure repayment: *And provided further,* That no such loans including renewals and extensions thereof may be made for a period or periods exceeding 20 years."

AMENDMENT OF MUTUAL SECURITY ACT OF 1954—AMENDMENT

Mr. SMATHERS submitted an amendment, intended to be proposed by him, to the bill (S. 2130) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, which was referred to the Committee on Foreign Relations, and ordered to be printed.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. MURRAY:

Correspondence with the Department of the Interior regarding the development of Indian resources.

NOTICE OF CONSIDERATION OF NOMINATION OF LOFTUS E. BECKER TO BE LEGAL ADVISER OF THE DEPARTMENT OF STATE

Mr. GREEN. Mr. President, as chairman of the Committee on Foreign Relations, I desire to announce that the Senate received today the nomination of Loftus E. Becker, of New York, to be legal adviser of the Department of State, vice Herman Phleger, resigned.

Notice is given that the nomination will be eligible for consideration by the Committee on Foreign Relations at the expiration of 6 days, in accordance with the committee rule.

NOTICE CONCERNING CERTAIN NOMINATIONS BEFORE COMMITTEE ON THE JUDICIARY

Mr. McCLELLAN. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

John F. Barr, of West Virginia, to be United States marshal for the northern district of West Virginia, for a term of 4 years, vice Irl E. Thomas, deceased.

Hartwell Davis, of Alabama, to be United States attorney for the middle district of Alabama, for a term of 4 years. Reappointment.

Wendell A. Miles, of Michigan, to be United States attorney for the western district of Michigan, for a term of 4 years. Reappointment.

Clinton G. Richards, of South Dakota, to be United States attorney for the district of South Dakota, for a term of 4 years. Reappointment.

James L. May, of Alabama, to be United States marshal for the southern district of Alabama, for a term of 4 years. Reappointment.

William W. Kipp, Sr., of Illinois, to be United States marshal for the northern district of Illinois, for a term of 4 years. Reappointment.

On behalf of the Committee on the Judiciary notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Wednesday, June 5, 1957, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearings which may be scheduled.

NOTICE OF HEARING ON NOMINATION OF ROBERT VAN PELT TO BE UNITED STATES DISTRICT JUDGE FOR THE DISTRICT OF NEBRASKA

Mr. HRUSKA. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Thursday, June 6, 1957, at 10 a. m., in room 424, Senate Office Building, upon the nomination of Robert Van Pelt, of Nebraska, to be United States district judge for the district of Nebraska, vice John W. Delehant, retired.

At the indicated time and place all persons interested in the above nomination may make such representations as may be pertinent. The subcommittee consists of the Senator from North Carolina [Mr. ERVIN], the Senator from Arkansas [Mr. McCLELLAN], and myself, as chairman.

SUPPORTERS OF HELLS CANYON PROJECT

Mr. GOLDWATER. Mr. President, during recent weeks we have heard a great deal about the large number of people in the Pacific Northwest who are supposed to be supporting the high dam project in Hells Canyon. It has been claimed by some that its supporters number as many as two and a half million.

It is interesting to note that at a recent meeting of the Hells Canyon Association fewer than 30 people attended. I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks an article on this subject from the Spokesman-Review, of Spokane, Wash.; also an article from the Washington Voter, of Spokane, Wash., giving a list of contributors to the National Hells Canyon Association.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Spokane (Wash.) Spokesman-Review of May 4, 1957]

A FEW HELLS CANYONERS PRESSURE THE SENATE

Leaders of the Hells Canyon Association are now conducting a letterwriting campaign, with the faint hope that Congress will authorize this year a high Federal Hells Canyon Dam.

Congress has refused that authorization, time and again both directly and indirectly.

Last year the bill was defeated in the Senate by a vote of 41 to 51.

Since then the United States Supreme Court has upheld the Federal Power Commission license for private construction of three power dams in that part of the Snake River. The Hells Canyoners are still trying to block that development, now under way, by an act of Congress that in no way assures the Northwest of any Federal construction or any more power in the immediate future.

Yet among the specious arguments now being advanced by the promoters of the oft-rejected, oft-proposed Federal high dam is this one by the president of the National Hells Canyon Association. He wrote in an open letter last month: "It must be made clear to Congressmen from other parts of the United States that our whole region has issued a mandate for the construction of Hells Canyon Dam."

The enthusiasm of members of this association, which has claimed a backing of more than 2,500,000 people in the Pacific Northwest, was well illustrated just the other day.

At Lewiston, the Idaho-Washington-Oregon tri-State division of the National Hells Canyon Association held its annual meeting. The leaders issued glowing statements with their old familiar catch phrases.

Less than 30 persons attended this annual session. They are still hoping that distant Senators and Congressmen will believe them when they say that "our whole region has issued a mandate for the construction of Hells Canyon Dam."

[From the Spokane (Wash.) Voter of December 1956]

DUBINSKY, TVA, CO-OPS, AID PUBLIC POWER SLUSH FUND

It is a matter of record that Dubinsky's Ladies' Garment Workers' Union of America, Walter Reuther's Auto Workers, the Amalgamated Clothing Workers Union, the National CIO and AFL, and David McDonald's Steel Workers gave a total of $15,200 toward the financing of the Hells Canyon Dam Association.

This public-power group, everlastingly shouting against any private-power hydroelectric endeavor in the Pacific Northwest, use, as part of their untrue, tiresome tirade, the old motheaten bromide that they speak for the grassroots opinion in this region.

No matter how thin this claim is sliced, it is still baloney when one considers that 5 large international unions gave over 4 times as much money in support of the queer ideologies of the Hells Canyon group as did the individual contributors to the association.

The record shows that out of a total of $111,196.71 collected by the association, in a 2-year period, only $3,784.68 was contributed by individuals.

In the final analysis, individuals are considered the real source of grassroots opinion, not organized-labor groups, Government corporations, such as TVA, or hot fuses like the National Rural Electric Cooperative Association (not to be confused with REA), the American Public Power Association, and the National Farmers' Union.

Following is a complete list of donors to the Hells Canyon Dam Association covering the period noted. This list was issued over the signature of Mr. J. T. Marr, executive secretary of the Oregon State Federation of Labor, and president of the National Hells Canyon Dam Association.

Contributions to the National Hells Canyon Association

[From June 1953, through Aug. 12, 1955]

Labor:	
Oregon State Federation of Labor	$3,747.50
Washington State Federation of Labor	2,400.00
Idaho State Federation of Labor	700.00
Oregon State CIO	1,000.00

Contributions to the National Hells Canyon Association—Continued

Labor—Continued	
Brotherhood of Railway Carmen	$115.00
UAW-CIO	4,000.00
Washington State CIO	25.00
Mine, Mill and Smelter Workers	200.00
Montana State Federation of Labor	500.00
International Association of Bridge, Structural and Ornamental Iron Workers	2,000.00
CIO	5,000.00
International Brotherhood of Boilermakers	1,500.00
International Brotherhood of Pulp, Sulphite and Paper Mill Workers	1,200.00
International Association of Machinists	4,500.00
Sheet Metal Workers International Association	250.00
International Union of Operating Engineers	5,000.00
The Order of Railroad Telegraphers	500.00
International Brotherhood of Paper Makers	950.00
Lodge No. 1374, I. A. of M	400.00
United Packinghouse Workers of America, CIO	100.00
Brotherhood of Railway and Steamship Clerks	500.00
Wood, Wire and Metal Lathers International Union	100.00
International Ladies' Garment Workers' Union	2,000.00
Amalgamated Clothing Workers	700.00
United Steelworkers	2,500.00
International Hod Carriers and Common Laborers	1,000.00
Rocky Mountain District Council of Carpenters	220.00
United Association of Plumbers	500.00
Operative Plasterers' and Cement Masons' International Association	250.00
United Brotherhood of Carpenters	3,500.00
Brotherhood of Painters	500.00
Hoisting and Portable Engineers, Local 701	500.00
Western Conference of Operating Engineers	1,000.00
United Steelworkers of America, CIO	4,000.00
American Federation of Labor	1,000.00
CIO councils	385.00
Central labor councils	307.00
Other labor unions	5,403.80
Total	57,053.30
Farm:	
Oregon State Grange	2,000.00
Oregon Farmers Union	989.44
Washington State Grange	2,000.00
Missouri Farmers Association	1,000.00
National Farmers Union	1,000.00
Farmers Union Central Exchange	2,000.00
Pacific Supply Cooperative	600.00
Consumers Cooperation Association	450.00
Midland Cooperatives	200.00
Pierce County Farmers Ed. and Co-op Union	15.00
Gervais Farmers Union	30.00
